### THE MAILS, &c.

The next inward China mail is that with Shanghai dates to Nov. 26 and Hong Kong Dec. 2. It left Alexandria on the 2nd, and will therefore be delivered on its due date (Monday next). Telegrams in advance of the succeeding mail (Hong Kong, Dec. 15) were received in London on the 1st inst., having been forwarded with unusual rapidity. They advise that the Mikado's power has been completely established in Japan, and mention the loss of H.M.'s gunboat *Gnat*. With this number of the *Telegraph* we give a complete guide to the movements of the China mails for 1869, being a combined Time-table for both services, which we trust will be found useful by subscribers.

## List of Passengers.

### PASSENGERS INWARD.

Per Messageries Imperiales steamer *Peluse*, arrived at Marseilles Jan. 1.—From Yokohama: Messrs. Cazet, Nicolas, Valmale, Dontrancesco. From Shanghai: Messrs. Checa, Lemaire, Fubin, Mactrieb, M. le Comte le Lallemand. From Hong Kong: Messrs. Rarel, Maron. Howell, Milton, Sanchez, Arenas, Cores, Freyra, Caldiera, Antoine, Madame La Mouton and two children, four Spanish officers. From Saigon: Messrs. Girandon, Mosselman, Van Oyl. From Batavia: Messrs. Styman, Brogaardt, De Mumrich, Veening, Mr. and Mrs. Burger, Mr. and Mrs. Von Etty and child. From Singapore: Messrs. Beurel, Rabelsato, Descharmes, Youeses. From Galle: Messrs. Thenac, Mortimer, Hayley.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Syria*, from Southampton, Dec. 26.—To Hong Kong: Mr. H. Clerk, R.N., Miss Leavesley, Mr. Valentine Duke, and 2 second-class passengers To Ceylon: Mr. Boyd. To Calcutta: Mr. G. E. Money, Mr. and Mrs. W. J. Money and servant, Mr. and Mrs. Blackburn and child, Messrs. W. F. Smith, A. A. Green, F. G. Maclean, E. C. Bird, J. G. Pope. W. Ayrton, B. Blood, G. Hare, C. T. Smyth A. Agabeg, Mrs. Birch and child, Mr. Sheffield, Mr. Driver, Mrs. Ogg and child, Miss Grigg, Miss Roberts, Mr. T. D. Miller and 15 second-class passengers. To Madras: Mrs. Stace, Miss Gib, Mr. H. Maskell and one second-class passenger. To Bombay: Mrs. Kellie and child, Miss Bedford, Mrs. Best's child and servant, and six second-class passengers.

Per P. and O. steamer *Massilia*, from Marseilles, Jan. 3.—To Hong Kong: Ensign Clabburn, Mr. F. Ruthman, Mr. F. Leyburn, Commander F. C. Robinson. To Singapore: Mr. C. H. Watkins, Mr. A. Jacob. To Ceylon: Mrs. B. E. Pinco. To Calcutta: Mr. and Mrs. W. T. Burners, Mr. and Mrs. J. Henderso , Colonel and Mrs. Burne, Surgeon-Major Cannon, Major Bacon, Mr. A. H. Eckford, Mr. and Mrs. H. Cowell, Mr. and Mrs. Krujer, Mr. Foster Cunliffe, Rev. C Grant, Mrs. Joy, Mr. A. Y. Watt, Mr. A. P. Beaufort, Mr. and Mrs. Lingham and child, Mr. W. Tayler. To Madras: Colonel F. C. Barber, Lieut.-Col. Prichard, Rev. R. Harvey, Captain G. Tyndall. To Bombay: Mr. and Mrs. Sherer, Miss Watson, Mrs E. Keene and servant, Mr. C. S. Carlisle, Mr. S. Carlisle, Mr. and Mrs. C. E. Bernard, Miss Bernard, Mr. and Mrs. M. Rayne, Mr. and Mrs. King, child, and servant, Mr. A. Peile, Mr. and Mrs. J. P. Green. Mr. G. Boughey, Lady Morgan, two children and two servants, Mr. and Mrs. H. B. Simpson, Mr. W. Hay, Captain and Mrs. Bolton, Mr. Lee Smith, Mrs Martin, Mr. C. Griffith, Mr. D. Watson, Mr. H. Newton, Mr. T. N. Cargill and six second-class passengers.

Per P. and O. steamer from Suez, Jan. 10.—To Singapore: Mons. Jean de Xanthus.

Per P. and O. steamer *Poonah*, from Southampton, Jan. 9.—To Ceylon: Mr. and Mrs. J. Kydd and child, Mrs. Duncan, Miss Allen.

Per P. and O. steamer *Ripon*, from Marseilles, Jan. 17.—To Shanghai: Mr. Dawbarn. To Singapore: Mr. J. Steel, Mr. A. M. Skinner.. To Ceylon: Miss Black.

Per P. and O. steamer from Suez, Jan. 24.—To Singapore, *via* Bombay: Dr. Carl Ritter Von Scherzer.

Per P. and O. steamer *Tanjore*, from Marseilles, Jan. 24.—To Hong Kong, *via* Bombay: Mr. W. Pomeroy, jun.

Per P. and O. steamer *Ceylon*, from Southampton, Jan. 23.—To Hong Kong: Miss Gazalet, Mr. R. Pottinger, R.N., Mr. and Mrs. C. Browne and child, Mr. A. F. Angus. To Singapore: Mrs. Burn and child, Miss Stevens, Miss Maxwell.

Per P. and O. steamer *Syria*, from Marseilles, Jan. 31.—To Batavia: Mr. Doornik, Mrs. Van Delden and daughter, Mr. G. Van Delden, Mr. M. Van Delden.

Per P. and O. steamer from Suez, Feb. 7.—To Singapore: Mr. and Mrs. Stahlknecht.

## Summary of News from the Far East.

### JAPAN.

The *Hiogo and Osaka Herald* hears it rumoured that the Japanese Government has entered into a contract with a firm in Yokohama for the laying down of a railroad between Kobe and Osaka. When will the Chinese show a similar gleam of intelligence? The same paper says:—The British steamer *Filipino* was sold a day or two ago. by Messrs. Glover and Co., Osaka, to Prince Awa, for the sum of 98,600 rios. This vessel is the sixty-third that has been sold to the Japanese by Messrs. Glover and Co.

The *Japan Gazette* hears rumours of trouble at the Loo-choo Islands, caused by the Northerners, but cannot yet learn their origin, or further particulars. It is by no means improbable, as they belong to Prince Satsuma, and it would be easy to make a diversion in that direction. Complaints are made by merchants of obstruction to trade offered by the Osaka Customs authorities. They say:—"The Osaka authorities have placed obstacles in th way of the transit of produce, and this is admitted, we understand by the officials at Kobe, who explain it as an attempt of the Custom-house at the former place to secure for that establishment transit dues in addition to those hitherto paid in Kobe by the Japanese upon all goods sold to foreigners at the latter port. The result is that as the native dealers are unwilling to pay the double tax their produce is detained at Osaka."

The accusation is, however, repelled by the Commissioner of Trade, who says:—"There is no advantage to be gained by obstructing one class of merchants and favouring the other, whose interests are identical. This place has not long been open, and the people do not yet know its trading capacities, and therefore it is that only a small quantity of produce is as yet sent to Kobe.' When it becomes better known as a trading mart he predicts, vastly increasing business.

The Portuguese Consul has been to Hakodadi to examine into the case of the coolie ship which lately drifted to that port, and has gathered further particulars which tend to confirm belief that she is the *Cayalti*, from Pacasmayo to Callao, which never arrived at her destination.

On the 12th November a treaty between Spain and Japan was signed by H.E. Senor de Quevedo, Spanish Plenipotentiary, and the Japanese authorities. Senor Otin, Secretary of Legation, proceeds by this mail to Spain in charge of the copy for ratification.

From Nagasaki intelligence has reached us of a severe storm

Digitized by Google

having passed over the north-west coast of Japan, causing the loss of no less than eight steam vessels, chiefly, if not entirely, native-owned. We have not learned particulars of this disaster, which will probably be on the whole good news to those who have steamers to sell. There is never a wind that does not blow good to somebody. The *Ne-e-gata* is said to be amongst the lost vessels.

LATER ADVICES VIA SAN FRANCISCO.

The steamer *Great Republic* arrived at San Francisco on the 22nd Dec., with advices from Yokohama to the 28th Nov. She brings 320 passengers, 1,217 tons of freight, 1,545 packages of silk, and 500 packages of tea for New York. She brings the following news:—

"The rebels are still fighting, but their chief town is said to have been taken by the Imperialists.

"The Tokugawa clan, the supporters of the Shiogoon, have settled down at Burunga, and turned their attention to commerce. They desire to open their port to foreign trade, thus dividing the commerce of the west coast with Nagata.

"It is reported that seven war ships appeared in the Inland Sea and made a descent on the provinces. They burned many castles and some towns. The squadron will probably visit all the daimios who abandoned the Shiogoon through fear.

"Prince Satsuma's visit to the Mikado at Yedo was postponed on account of the discovery of a plot to capture him. Preparations are again being made for his visit, this time by land.

"The crowning of the Mikado at Kioto was observed as a gala day. The foreign representatives hoisted their national flags. The English war ship *Cormorant* fired a royal salute."

## CHINA.

—o—

TIENTSIN.

A correspondent writes:—"Li-hung-chang, lately Commander-in-Chief over the Imperial armies in the North of China, being no longer required in this region, owing to the rebellion having been put down and the country restored to tranquillity, repaired lately to Peking to have an audience of the Emperor; and two days back passed through Tientsin on his way to his post at Woo-chang-foo as Governor General of Hoo-kwang. He travels hence overland to some port on the Yangtze. He paid a visit to Chunghow, and dined with him. I have already informed you that Tso-tsung-tang had an audience of the Emperor, and had later proceeded to his post, at Sigan-foo, as Governor General of the provinces of Shense and Kansuh. About two weeks back Chung-how returned from an inspection of the districts lately occupied by the rebels. He reinstated the different officers in their posts and arranged disputed matters regarding the possession of certain properties, restoring everywhere the imperial authority, and releasing the owners of the land from paying taxes. The rebellion being put down we now-a-days hear nothing of rebels; and judging from the general appearance of things, I do not imagine we shall again be troubled with them in this and Shantung provinces."

SHANGHAI.

Dates from this port are to the 21st November; on the 12th the English mail of Sept. 25 was received, with London telegrams to Oct. 16. By the Kiachta line, however, messages to the 27th Oct. had been received. The following items of miscellaneous news are from the *North China Herald;* our own correspondent devotes his present letter to an exhaustive account of the circumstances connected with the Yangchow affair, in which some new features of interest will be found.

News has been received from Mr. T. T. Cooper, who has been again defeated in his attempt to cross the Western frontier of China, and is obliged to return to Shanghai. He has now tried four roads, and been foiled at each; first by way of Likya to Sudya, next from Bathang to Sudya, next from Bathang through Thibet to Nepaul, and lastly through Yunen by the old Bhamo route.

The new cemetery was dedicated on Thursday by the Bishop of Victoria, assisted by several clergymen. The extremely small attendance on the occasion has been much remarked on; but it seems likely that this may be chiefly attributable to the absence of any proper steps on the part of whoever regulated the proceedings. The printed programme announced that the "Consular body," among others, were to meet the Bishop at the porch, and beg him to dedicate the ground. But not a single member of the Consular body, so far as we can learn, received even an invitation to be present.

We hear that a Chinese missionary teacher was driven out, a few nights ago, from his house at Ka-hing, and that his landlord has since been persecuted. Evidently Mr. Medhurst will have to insist on severe punishment of the Yangchow rioters, or rather of those who instigated them, in order to bring officials to their senses.

Mr. Medhurst, having obtained Tseng-kwo-fan's adhesion to all his demands, is now going to Yangchow, with a strong escort, to see them carried out. The Chinese have it, among other rumours, that one of the objects of Mr. Medhurst's visit was to insist on the construction of a railway between Soochow and Shanghai.

The *Recorder* gives the following particulars regarding the expedition at present engaged in surveying the Yellow River:—"News has been received from Mr. Ney Elias, under date of 27th October. He was then at the mouth of the river, to which place he and his party had arrived in safety. He had left his boat with Mr. Hollingworth in it, at Tech-mun-quan, and had gone down to the mouth in an open boat. He sent his letter on by a junk bound to Chefoo. It appeared that the bar was a stopper to all navigation, even for Shanghai and Ningpo junks, which have to anchor outside. Mr. Elias, up to the time of writing, could only find six feet of water over what appeared to be the main channel over the bar. From that point to the Grand Canal, a distance of about 220 miles from the sea, there is plenty of water for flat-bottomed vessels. Mr. Elias purposed starting on the 28th, back up the river into Honan. He expected to find the stream impracticable beyond the Grand Canal. He describes the country at the mouth of the Yellow River as a complete 'wash;' so much so that, by digging two feet, you come upon salt water twenty miles or more from the coast. He will probably return to Shanghai *via* Chinkiang, not by Cheefoo, as he previously anticipated."

We are glad to hear that the subject of a road from the Chaitang coal mines to Tientsin is not allowed to drop. One of the foreign diplomatists had a conversation with Wensiang on the subject, a few days ago, and impressed upon him the advantage it would be to the people of the district. Apparently, this view of the case seemed to strike his Excellency favourably; but it will probably need several years' incubation before any action results, unless the matter is vigorously pushed.

We hear that Dr. Macartney has succeeded in turning out a torpedo from the arsenal at Nanking, and that an experiment was made with it on a junk, which was blown up two hundred feet high, and at a distance of two miles. The Chinese were in ecstacies on witnessing the feat. Some of these days we shall find one of our gunboats blown up, and shall probably have to thank Dr. Macartney and those of his genus for serious troubles in these parts.

The *Supreme Court Gazette* gives the following:—

The annual meeting of the Shanghai Chamber of Commerce took place on the 18th Nov., when the report was submitted and passed without alteration. The chief subject of discussion was the question whether the measurement of teas should take place here or in London, the facts upon which the Committee of the Chamber had previously come to a conclusion being called in question. It appears there is some doubt as to whether the difference in the measurement of teas at the port of shipment and that of discharge which was believed to exist is really a fact; and, after a lengthened discussion, it was decided to leave the matter in the hands of the committee for the purpose of collecting further information with regard to it.

The French policeman who, as mentioned in our last, was brought before his Consul on the charge of having caused the death of a Chinaman in the country by the discharge of a gun, has been committed to take his trial upon a charge of manslaughter.

The steamer *Tahwah* has been lost in a somewhat original manner. She was hauling into her usual moorings near Dent's Wharf, when, by a miscalculation, her stern caught on the edge of the bank, there very steep, and she hung, with the rest of her afloat. The *Hangchow* came to pull her off, but in trying to do so started her stern post, opened the wood ends, and she filled and sank. She now lies canted over on the bank, her hurricane deck forward being awash at high water. The loss to the company is stated to be nominal, as the directors were considering whether she should not be laid up altogether; for being a weak vessel from the first, she was becoming unsafe to run even occasionally with such heavy cargoes as are carried on the river.

By H.I.M. gunboat *L'Aspic* we note the arrival of H.E. Count Lallemand, H.I.M. Minister Plenipotentiary at Peking, who is *en route* for Europe.

On the 14th November a public meeting was held in the Masonic Hall, at which an Auxiliary to the British and Foreign Bible Society was organised, the Bishop of Victoria taking the chair. The officers chosen were W. H. Medhurst, Esq., H.B.M. Consul, president; the Lord Bishop of Victoria and F. B. Johnson, Esq., vice-presidents; E. Iveson, Esq., treasurer; Rev. E. W. Syle, secretary; and a committee was chosen, consisting of the above officers, together with Messrs. Krauss, Mackrill Smith and D. Reid. It was resolved that chaplains at the various ports in China should be requested to preach sermons in aid of the society.

The Municipal Council held their monthly meeting on the 11th. Nov. The report of the Watch Committee, which was presented, was not of any great interest. It referred principally to the measures taken in reference to the recent cattle plague, It is noticed that the collection of the taxes shows a likelihood of an excess over the estimates of 6,000 taels for the year. The council have issued a notice prohibiting coolie cries and the squeaking of wheelbarrows in the Settlement.

We regret to state that the barque *Annetta* was totally wrecked off Breaker Poiat on the night of the 7th of November.

A Chefoo correspondent writes:—H.B.M.'s Minister could have done nothing better to get up the name of the gold mines than to issue a notification secluding them. When it is known in Australia that the diggings are protected by soldiers, and are under the special shadow of the Powers, nothing on earth will remove the idea that they are of fabulous richness. This is but the legitimate conclusion of such jealousy in their regard.

Digitized by Google

Frosts have commenced at Newchwang, and vessels are loading as quickly as possible from fear of ice, but a correspondent (writing on the 9th Nov.) says, "There is really no danger unless the frost continues, which is not likely. At any rate, vessels can always get out until the ice becomes thick, as a north wind is a fair wind." Contradictory accounts reach us as to the success of the beancake machinery.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, November 21, 1868.

Just before the last English mail closed two reports were circulated in the Settlement, one that the Chinese authorities had definitely refused to accede to Mr. Medhurst's demands in the Yangchow affair, the other that everything had terminated satisfactorily. The latter, although somewhat anticipating matters, proved to be in the main correct. It was not, however, until some days had elapsed that full particulars arrived. On the evening of the 8th November the squadron, consisting of the *Rodney, Rinaldo, Icarus, Dove*, and *Slaney*, anchored before Nanking, and on the following morning Mr. Medhurst and a guard of sixty marines were conveyed by the *Slaney*, the steam launch of the *Rodney*, and a small steamer to the Han-si-mun, a west water gate. The party comprised also Captain Heneage, R.N., Major Crossman, R.E., Dr. Fegan, R.N., Captain Hale, R.M., Mr. Mowat, of the Supreme Court, and two Consular assistants. Arrived at the gate, chairs were found in waiting to carry the officials to the Yamen, which was reached by noon. Mr. Medhurst was received by the Viceroy, supported by Ting, Futai of Keangsoo, Ying, Taotai of Shanghai, and Tsai, Taotai of Chinkiang. The questions at issue came on immediately for discussion, and after a warm debate everything was assented to, and full reparation for the Yangchow and Hwai-quan outrages promised. Of course the fulfilment of these promises would require time, and many points of detail demanded settlement at Yangchow itself. It would seem that Mr. Medhurst suspected from the prompt settlement of the dispute that the ordinary principles of Chinese diplomacy were being followed, and that the concessions then so readily made would be found eventually to mean nothing. However this may have been, he took the bull by the horns, and demanded security. "Security," said Tseng-kwo-fan, "why, of course, here it is—my word strengthened by my bond, duly sealed with my official stamp." Mr. Medhurst, with all due politeness, begged to inform him, however, that these were not sufficient, and that a steamer—the *Tung Chi*, which had recently been launched at Shanghai for the Viceroy—should be handed over as a material pledge. I should mention that the first official act of the captain of the *Rodney* when he anchored had been to send on board this steamer, and inform the master that he was on no account to move from the position he then occupied, on pain of being immediately sunk. Now the *Tung-chi* is a beautiful little vessel, the mandarins are justly proud of her, and she was designed to carry Tseng-quo-fan in his projected triumphal procession from Nanking to Yangchow on his way to Peking after he should have resigned the seals of office to his successor. The blow was therefore a terrible one. An eye-witness describes the effect on the officials as being like that of an electric shock. The Viceroy changed colour, and Ting and Tsai, startled out of all their starched propriety, became furious, and raved with passion. But Mr. Medhurst remained impassive, and merely added to his previous remark that if she were not delivered up before sunset she would be seized. Orders were immediately sent to the anchorage, and the *Tung-chi* was surrendered before 5 P.M. Immediately after this stormy interview Mr. Medhurst visited the new Viceroy, Ma, and was very graciously received. Indeed, it is most fortunate that this event occurred at the moment when a new Governor-General is assuming the seals. He has been taught a terrific lesson in the person of another, and no doubt he has registered a vow to avoid giving offence to foreigners during his incumbency of office. This vow he may keep without compromising his dignity, for his policy is all before him to shape as he likes. On the following day (10th November) Tseng handed over the official seats to Ma. The two then addressed a joint despatch to Mr. Medhurst, informing him that the Hoppo at the Hwai-quan barrier was not under the Nanking jurisdiction, but received his appointment direct from the throne, and begging that no attempt should be made to ascend the Grand Canal to the barrier. At the interview Mr. Medhurst had stated that if the Governor-General could not exact compensation from the Hoppo, he would do it in person, and hence the joint letter. I have not heard what Mr Medhurst's line of conduct will be in this matter; but it is sincerely to be hoped that he will fulfil his threat. On the 12th Ma visited Mr. Medhurst on board the *Rodney*. He was conducted over the ship and shown every attention. Chinaman-like, of course he expressed himself greatly pleased with everything he saw, and was surprised to learn (what naturally he did not believe) that she is one of the least serviceable of the English fleet. He was landed by the *Rodney's* steam launch, a salute of nineteen guns being fired as he left the ship. On reaching the shore he sent a handsome present of money to the crew of the launch, which was, however, returned with many compliments. Mr. Medhurst cannot be charged with high-handed or oppressive proceedings. As soon as the squadron arrived, and before any hostile steps were taken, a minute examination was made by the surgeon of the *Rodney* into the personal injuries which Mr. Taylor and his party asserted they had received, and it was rendered only too clear that the sufferings of the luckless missionaries were in no degree exaggerated. So much for the grounds of his action. As for the action itself, he had been deceived before when relying on the Viceroy's promise and seal, and he saw clearly that the only way to secure his Government from being again fettered with war was to demand and obtain a material guarantee. The English Government have, in view of this last signal service, no longer any excuse for withholding from him the rank of C.B., which was justly his due many years ago, both on account of his actual length of service and for the skill and energy he displayed here during the trying time of the rebel occupation of this province. The squadron left Nanking on the 14th, having the *Tung Chi* in company. On the 15th Mr. Medhurst reached Yangchow, where he was met by the Taotai of Shanghai and the Salt Commissioner of Yangchow. The *Slaney* and *Dove* were moored off the principal gate of the City, and 600 blue jackets and marines were stationed in the "Temple of the Ten Thousand Genii." The reception accorded to Mr. Medhurst was quite satisfactory, but it is said that the local authorities conducted the troops to the Temple by all the back streets and alleys, so as to render their arrival as secret as possible. This was submitted to, but it was purposed to march the men through the whole city on the next day "for exercise." It was also intended to post a consular notification on the gate detailing all the circumstances. The *Zebra*, which joined the squadron off the Grand Canal, was sent back to Shanghai, and arrived yesterday. She brings the latest news received which is in all respects gratifying. Some of the ringleaders in the attack on Mr. Taylor's party have been arrested, and one of the Literati concerned is in custody. But the mainspring of the whole—a retired Governor-General, named Yen—whom, by the way, it would have been almost impossible to touch, has taken the precaution of withdrawing into private life. I am told that the Chinese commissioners do their best to throw difficulties in Mr. Medhurst's way, and it is believed that but for the guarantee held the matter could not be settled without the use of force. Before I close the subject I will give you an anecdote highly illustrative of Chinese character, and which recalls the days of our early intercourse with this extraordinary people. The Taotais of Shanghai and Chinkiang called on Mr. Medhurst at the British Consulate at Chinkiang, when the fleet was on its way up, and proposed that he shoul leave the ships where they were then anchored, and pro ceed with them in a Chinese gunboat. We can imagine th state of terror in which they were when he peremptorily refused, yet with inimitable stolidity, and all the time looking at the masts of the *Rodney, Rinaldo, Icarus, Slaney*, and *Dove*, the Taotai of Chinkiang turned to the Consul and said, "When are your ships coming up?"

The English mail of the 25th September, with telegrams t 17th October, arrived in Shanghai on the 13th of November. Since then we received (on the 17th inst.) telegrams from London, via Tientsin, to the 27th ult.

On the 17th the Shanghai General Chamber of Commerce hel its annual meeting. The matters for discussion were first, th measurement of teas; secondly, the charges to be allowed for managing the business of vessels in distress; and, thirdly, Sir Rutherford Alcock's recent sumptuary regulation forbidding English subjects of Chinese parentage to wear native dress in China. With regard to the first, it was stated that in 1866 and 1867 th Chamber had issued circular notices to the merchants recommending the adoption of the custom of measuring teas on shipment, and paying freight on the China measurement instead of on that of the port of discharge. This recommendation was in most case verbally assented to, but no practical result had exhibited itself. The question, then, was, whether it would not be advisable for the Chamber to relinquish the attempt to introduce the change. Various opinions were expressed, but it was generally allowed that the Chamber had not based its former action on any knowledge of facts. It was accordingly proposed and carried that time should be granted to allow the committee appointed to collect information on the subject. As to vessels in distress it was thought that the Chamber might exert a wholesome influence in discountenancing extortion; and as to Sir Rutherford Alcock's proclamation, it was decided that the Chamber had nothing to do with it. The proceedings may therefore be summed up in the one word—Nothing. This is justly a matter for surprise, especially as the all-important questions of bonded warehouses and Customs' guarantees are now before the mercantile community. I have already given you the correspondence which took place between Mr. Hart and the Chamber on the question of guarantees. It was thought the other day that the matter would be brought to an issue, for the P. and O. steamer *Formosa*, under despatch for Yokohama, was detained, as was asserted in the *North China Daily News*, in consequence of "the Custom-house refusing to accept the Peninsular and Oriental guarantee for payment of duty on her cargo" Next day, however, the affair was cleared up by a statement evidently emanating from official quarters. It appeared that the Peninsular and Oriental clerk applied for a clearance at 10.45 A.M. on the day previous to the steamer's announced departure. The chief Custom clerk said that he thought it would be better to have the duties paid, especially as the amount happened to be small, and that at any rate a clearance was not required until four P.M., when the office would close. The P. and O. clerk misunderstood this to be a refusal to accept a guarantee, and, accordingly, without any reference to the commissioner, the

having passed over the north-west coast of Japan, causing the loss of no less than eight steam vessels, chiefly, if not entirely, native-owned. We have not learned particulars of this disaster, which will probably be on the whole good news to those who have steamers to sell. There is never a wind that does not blow good to somebody. The *Ne-e-gata* is said to be amongst the lost vessels.

LATER ADVICES VIA SAN FRANCISCO.

The steamer *Great Republic* arrived at San Francisco on the 22nd Dec., with advices from Yokohama to the 28th Nov. She brings 320 passengers, 1,217 tons of freight, 1,545 packages of silk, and 500 packages of tea for New York. She brings the following news:—

"The rebels are still fighting, but their chief town is said to have been taken by the Imperialists.

"The Tokugawa clan, the supporters of the Shiogoon, have settled down at Burunga, and turned their attention to commerce. They desire to open their port to foreign trade, thus dividing the commerce of the west coast with Nagata.

"It is reported that seven war ships appeared in the Inland Sea and made a descent on the provinces. They burned many castles and some towns. The squadron will probably visit all the daimios who abandoned the Shiogoon through fear.

"Prince Satsuma's visit to the Mikado at Yedo was postponed on account of the discovery of a plot to capture him. Preparations are again being made for his visit, this time by land.

"The crowning of the Mikado at Kioto was observed as a gala day. The foreign representatives hoisted their national flags. The English war ship *Cormorant* fired a royal salute."

## CHINA.

—o—

TIENTSIN.

A correspondent writes:—"Li-hung-chang, lately Commander-in-Chief over the Imperial armies in the North of China, being no longer required in this region, owing to the rebellion having been put down and the country restored to tranquillity, repaired lately to Peking to have an audience of the Emperor; and two days back passed through Tientsin on his way to his post at Woo-chang-foo as Governor General of Hoo-kwang. He travels hence overland to some port on the Yangtze. He paid a visit to Chunghow, and dined with him. I have already informed you that Tso-tsung-tang had an audience of the Emperor, and had later proceeded to his post, at Sigan-foo, as Governor General of the provinces of Shense and Kansuh. About two weeks back Chung-how returned from an inspection of the districts lately occupied by the rebels. He reinstated the different officers in their posts and arranged disputed matters regarding the possession of certain properties, restoring everywhere the imperial authority, and releasing the owners of the land from paying taxes. The rebellion being put down we now-a-days hear nothing of rebels; and judging from the general appearance of things, I do not imagine we shall again be troubled with them in this and Shantung provinces."

SHANGHAI.

Dates from this port are to the 21st November; on the 12th the English mail of Sept. 25 was received, with London telegrams to Oct. 16. By the Kiachta line, however, messages to the 27th Oct. had been received. The following items of miscellaneous news are from the *North China Herald;* our own correspondent devotes his present letter to an exhaustive account of the circumstances connected with the Yangchow affair, in which some new features of interest will be found.

News has been received from Mr. T. T. Cooper, who has been again defeated in his attempt to cross the Western frontier of China, and is obliged to return to Shanghai. He has now tried four roads, and been foiled at each; first by way of Likya to Sudya, next from Bathang to Sudya, next from Bathang through Thibet to Nepaul, and lastly through Yunen by the old Bhamo route.

The new cemetery was dedicated on Thursday by the Bishop of Victoria, assisted by several clergymen. The extremely small attendance on the occasion has been much remarked on; but it seems likely that this may be chiefly attributable to the absence of any proper steps on the part of whoever regulated the proceedings. The printed programme announced that the "Consular body," among others, were to meet the Bishop at the porch, and beg him to dedicate the ground. But not a single member of the Consular body, so far as we can learn, received even an invitation to be present.

We hear that a Chinese missionary teacher was driven out, a few nights ago, from his house at Ka-hing, and that his landlord has since been persecuted. Evidently Mr. Medhurst will have to insist on severe punishment of the Yangchow rioters, or rather of those who instigated them, in order to bring officials to their senses.

Mr. Medhurst, having obtained Tseng-kwo-fan's adhesion to all his demands, is now going to Yangchow, with a strong escort, to see them carried out. The Chinese have it, among other rumours, that one of the objects of Mr. Medhurst's visit was to insist on the construction of a railway between Soochow and Shanghai.

The *Recorder* gives the following particulars regarding the expedition at present engaged in surveying the Yellow River:—"News has been received from Mr. Ney Elias, under date of 27th October. He was then at the mouth of the river, to which place he and his party had arrived in safety. He had left his boat with Mr. Hollingworth in it, at Tech-mun-quan, and had gone down to the mouth in an open boat. He sent his letter on by a junk bound to Chefoo. It appeared that the bar was a stopper to all navigation, even for Shanghai and Ningpo junks, which have to anchor outside. Mr. Elias, up to the time of writing, could only find six feet of water over what appeared to be the main channel over the bar. From that point to the Grand Canal, a distance of about 220 miles from the sea, there is plenty of water for flat-bottomed vessels. Mr. Elias purposed starting on the 28th, back up the river into Honan. He expected to find the stream impracticable beyond the Grand Canal. He describes the country at the mouth of the Yellow River as a complete 'wash;' so much so that, by digging two feet, you come upon salt water twenty miles or more from the coast. He will probably return to Shanghai *via* Chinkiang, not by Cheefoo, as he previously anticipated."

We are glad to hear that the subject of a road from the Chaitang coal mines to Tientsin is not allowed to drop. One of the foreign diplomatists had a conversation with Wensiang on the subject, a few days ago, and impressed upon him the advantage it would be to the people of the district. Apparently, this view of the case seemed to strike his Excellency favourably; but it will probably need several years' incubation before any action results, unless the matter is vigorously pushed.

We hear that Dr. Macartney has succeeded in turning out a torpedo from the arsenal at Nanking, and that an experiment was made with it on a junk, which was blown up two hundred feet high, and at a distance of two miles. The Chinese were in ecstacies on witnessing the feat. Some of these days we shall find one of our gunboats blown up, and shall probably have to thank Dr. Macartney and those of his genus for serious troubles in these parts.

The *Supreme Court Gazette* gives the following:—

The annual meeting of the Shanghai Chamber of Commerce took place on the 18th Nov., when the report was submitted and passed without alteration. The chief subject of discussion was the question whether the measurement of teas should take place here or in London, the facts upon which the Committee of the Chamber had previously come to a conclusion being called in question. It appears there is some doubt as to whether the difference in the measurement of teas at the port of shipment and that of discharge which was believed to exist is really a fact; and, after a lengthened discussion, it was decided to leave the matter in the hands of the committee for the purpose of collecting further information with regard to it.

The French policeman who, as mentioned in our last, was brought before his Consul on the charge of having caused the death of a Chinaman in the country by the discharge of a gun, has been committed to take his trial upon a charge of manslaughter.

The steamer *Tahwah* has been lost in a somewhat original manner. She was hauling into her usual moorings near Dent's Wharf, when, by a miscalculation, her stern caught on the edge of the bank, there very steep, and she hung, with the rest of her afloat. The *Hangchow* came to pull her off, but in trying to do so started her stern post, opened the wood ends, and she filled and sank. She now lies canted over on the bank, her hurricane deck forward being awash at high water. The loss to the company is stated to be nominal, as the directors were considering whether she should not be laid up altogether; for being a weak vessel from the first, she was becoming unsafe to run even occasionally with such heavy cargoes as are carried on the river.

By H.I.M. gunboat *L'Aspic* we note the arrival of H.E. Count Lallemand, H.I.M. Minister Plenipotentiary at Peking, who is *en route* for Europe.

On the 14th November a public meeting was held in the Masonic Hall, at which an Auxiliary to the British and Foreign Bible Society was organised, the Bishop of Victoria taking the chair. The officers chosen were W. H. Medhurst, Esq., H.B.M. Consul, president; the Lord Bishop of Victoria and F. B. Johnson, Esq., vice-presidents; E. Iveson, Esq., treasurer; Rev. E. W. Syle, secretary; and a committee was chosen, consisting of the above officers, together with Messrs. Krauss, Mackrill Smith and D. Reid. It was resolved that chaplains at the various ports in China should be requested to preach sermons in aid of the society.

The Municipal Council held their monthly meeting on the 11th. Nov. The report of the Watch Committee, which was presented, was not of any great interest. It referred principally to the measures taken in reference to the recent cattle plague, It is noticed that the collection of the taxes shows a likelihood of an excess over the estimates of 6,000 taels for the year. The council have issued a notice prohibiting coolie cries and the squeaking of wheelbarrows in the Settlement.

We regret to state that the barque *Annetta* was totally wrecked off Breaker Point on the night of the 7th of November.

A Chefoo correspondent writes:—H.B.M.'s Minister could have done nothing better to get up the name of the gold mines than to issue a notification secluding them. When it is known in Australia that the diggings are protected by soldiers, and are under the special shadow of the Powers, nothing on earth will remove the idea that they are of fabulous richness. This is but the legitimate conclusion of such jealousy in their regard.

Digitized by Google

Frosts have commenced at Newchwang, and vessels are loading as quickly as possible from fear of ice, but a correspondent (writing on the 9th Nov.) says, "There is really no danger unless the frost continues, which is not likely. At any rate, vessels can always get out until the ice becomes thick, as a north wind is a fair wind." Contradictory accounts reach us as to the success of the beancake machinery.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, November 21, 1868.

Just before the last English mail closed two reports were circulated in the Settlement, one that the Chinese authorities had definitely refused to accede to Mr. Medhurst's demands in the Yangchow affair, the other that everything had terminated satisfactorily. The latter, although somewhat anticipating matters, proved to be in the main correct. It was not, however, until some days had elapsed that full particulars arrived. On the evening of the 8th November the squadron, consisting of the *Rodney, Rinaldo, Icarus, Dove*, and *Slaney*, anchored before Nanking, and on the following morning Mr. Medhurst and a guard of sixty marines were conveyed by the *Slaney*, the steam launch of the *Rodney*, and a small steamer to the Han-si-mun, a west water gate. The party comprised also Captain Heneage, R.N., Major Crossman, R.E., Dr. Fegan, R.N., Captain Hale, R.M., Mr. Mowat, of the Supreme Court, and two Consular assistants. Arrived at the gate, chairs were found in waiting to carry the officials to the Yamen, which was reached by noon. Mr. Medhurst was received by the Viceroy, supported by Ting, Futai of Keangsoo, Ying, Taotai of Shanghai, and Tsai, Taotai of Chinkiang. The questions at issue came on immediately for discussion, and after a warm debate everything was assented to, and full reparation for the Yangchow and Hwai-quan outrages promised. Of course the fulfilment of these promises would require time, and many points of detail demanded settlement at Yangchow itself. It would seem that Mr. Medhurst suspected from the prompt settlement of the dispute that the ordinary principles of Chinese diplomacy were being followed, and that the concessions then so readily made would be found eventually to mean nothing. However this may have been, he took the bull by the horns, and demanded security. "Security," said Tseng-kwo-fan, "why, of course, here it is—my word strengthened by my bond, duly sealed with my official stamp." Mr. Medhurst, with all due politeness, begged to inform him, however, that these were not sufficient, and that a steamer—the *Tung Chi*, which had recently been launched at Shanghai for the Viceroy—should be handed over as a material pledge. I should mention that the first official act of the captain of the *Rodney* when he anchored had been to send on board this steamer, and inform the master that he was on no account to move from the position he then occupied, on pain of being immediately sunk. Now the *Tung-chi* is a beautiful little vessel, the mandarins are justly proud of her, and she was designed to carry Tseng-quo-fan in his projected triumphal procession from Nanking to Yangchow on his way to Peking after he should have resigned the seals of office to his successor. The blow was therefore a terrible one. An eye-witness describes the effect on the officials as being like that of an electric shock. The Viceroy changed colour, and Ting and Tsai, startled out of all their starched propriety, became furious, and raved with passion. But Mr. Medhurst remained impassive, and merely added to his previous remark that if she were not delivered up before sunset she would be seized. Orders were immediately sent to the anchorage, and the *Tung-chi* was surrendered before 5 P.M. Immediately after this stormy interview Mr. Medhurst visited the new Viceroy, Ma, and was very graciously received. Indeed, it is most fortunate that this event occurred at the moment when a new Governor-General is assuming the seals. He has been taught a terrific lesson in the person of another, and no doubt he has registered a vow to avoid giving offence to foreigners during his incumbency of office. This vow he may keep without compromising his dignity, for his policy is all before him to shape as he likes. On the following day (10th November) Tseng handed over the official seats to Ma. The two then addressed a joint despatch to Mr. Medhurst, informing him that the Hoppo at the Hwai-quan barrier was not under the Nanking jurisdiction, but received his appointment direct from the throne, and begging that no attempt should be made to ascend the Grand Canal to the barrier. At the interview Mr. Medhurst had stated that if the Governor-General could not exact compensation from the Hoppo, he would do it in person, and hence the joint letter. I have not heard what Mr Medhurst's line of conduct will be in this matter; but it is sincerely to be hoped that he will fulfil his threat. On the 12th Ma visited Mr. Medhurst on board the *Rodney*. He was conducted over the ship and shown every attention. Chinaman-like, of course he expressed himself greatly pleased with everything he saw, and was surprised to learn (what naturally he did not believe) that she is one of the least serviceable of the English fleet. He was landed by the *Rodney's* steam launch, a salute of nineteen guns being fired as he left the ship. On reaching the shore he sent a handsome present of money to the crew of the launch, which was, however, returned with many compliments. Mr. Medhurst cannot be charged with high-handed or oppressive proceedings. As soon as the squadron arrived, and before any hostile steps were taken, a minute examination was made by the surgeon of the *Rodney* into the personal injuries which Mr. Taylor and his party asserted they had received, and it was rendered only too clear that the sufferings of the luckless missionaries were in no degree exaggerated. So much for the grounds of his action. As for the action itself, he had been deceived before when relying on the Viceroy's promise and seal, and he saw clearly that the only way to secure his Government from being again fettered with war was to demand and obtain a material guarantee. The English Government have, in view of this last signal service, no longer any excuse for withholding from him the rank of C.B., which was justly his due many years ago, both on account of his actual length of service and for the skill and energy he displayed here during the trying time of the rebel occupation of this province. The squadron left Nanking on the 14th, having the *Tung Chi* in company. On the 15th Mr. Medhurst reached Yangchow, where he was met by the Taotai of Shanghai and the Salt Commissioner of Yangchow. The *Slaney* and *Dove* were moored off the principal gate of the City, and 600 blue jackets and marines were stationed in the "Temple of the Ten Thousand Genii." The reception accorded to Mr. Medhurst was quite satisfactory, but it is said that the local authorities conducted the troops to the Temple by all the back streets and alleys, so as to render their arrival as secret as possible. This was submitted to, but it was purposed to march the men through the whole city on the next day "for exercise." It was also intended to post a consular notification on the gate detailing all the circumstances. The *Zebra*, which joined the squadron off the Grand Canal, was sent back to Shanghai, and arrived yesterday. She brings the latest news received which is in all respects gratifying. Some of the ringleaders in the attack on Mr. Taylor's party have been arrested, and one of the Literati concerned is in custody. But the mainspring of the whole—a retired Governor-General, named Yen—whom, by the way, it would have been almost impossible to touch, has taken the precaution of withdrawing into private life. I am told that the Chinese commissioners do their best to throw difficulties in Mr. Medhurst's way, and it is believed that but for the guarantee held the matter could not be settled without the use of force. Before I close the subject I will give you an anecdote highly illustrative of Chinese character, and which recalls the days of our early intercourse with this extraordinary people. The Taotais of Shanghai and Chinkiang called on Mr. Medhurst at the British Consulate at Chinkiang, when the fleet was on its way up, and proposed that he shoul leave the ships where they were then anchored, and pro ceed with them in a Chinese gunboat. We can imagine th state of terror in which they were when he peremptorily refused, yet with inimitable stolidity, and all the time looking at the masts of the *Rodney, Rinaldo, Icarus, Slaney*, and *Dove*, the Taotai of Chinkiang turned to the Consul and said, "When are your ships coming up?"

The English mail of the 25th September, with telegrams t 17th October, arrived in Shanghai on the 13th of November. Since then we received (on the 17th inst.) telegrams from London, via Tientsin, to the 27th ult.

On the 17th the Shanghai General Chamber of Commerce hel its annual meeting. The matters for discussion were first, th measurement of teas; secondly, the charges to be allowed for managing the business of vessels in distress; and, thirdly, Sir Rutherford Alcock's recent sumptuary regulation forbidding English subjects of Chinese parentage to wear native dress in China. With regard to the first, it was stated that in 1866 and 1867 th Chamber had issued circular notices to the merchants recommending the adoption of the custom of measuring teas on shipment, and paying freight on the China measurement instead of on that of the port of discharge. This recommendation was in most case verbally assented to, but no practical result had exhibited itself. The question, then, was, whether it would not be advisable for the Chamber to relinquish the attempt to introduce the change. Various opinions were expressed, but it was generally allowed that the Chamber had not based its former action on any knowledge of facts. It was accordingly proposed and carried that time should be granted to allow the committee appointed to collect information on the subject. As to vessels in distress it was thought that the Chamber might exert a wholesome influence in discountenancing extortion; and as to Sir Rutherford Alcock's proclamation, it was decided that the Chamber had nothing to do with it. The proceedings may therefore be summed up in the one word—Nothing. This is justly a matter for surprise, especially as the all-important questions of bonded warehouses and Customs' guarantees are now before the mercantile community. I have already given you the correspondence which took place between Mr. Hart and the Chamber on the question of guarantees. It was thought the other day that the matter would be brought to an issue, for the P. and O. steamer *Formosa*, under despatch for Yokohama, was detained, as was asserted in the *North China Daily News*, in consequence of "the Custom-house refusing to accept the Peninsular and Oriental guarantee for payment of duty on her cargo" Next day, however, the affair was cleared up by a statement evidently emanating from official quarters. It appeared that the Peninsular and Oriental clerk applied for a clearance at 10.45 A.M. on the day previous to the steamer's announced departure. The chief Custom clerk said that he thought it would be better to have the duties paid, especially as the amount happened to be small, and that at any rate a clearance was not required until four P.M., when the office would close. The P. and O. clerk misunderstood this to be a refusal to accept a guarantee, and, accordingly, without any reference to the commissioner, the

Digitized by Google

agent postponed the steamer's departure. Meanwhile the following letter, received yesterday by the Chairman of the Chamber of Commerce, was on its way from the Inspector-general:—

Inspectorate-General of Customs, Peking, November 2, 1868.

Sir,—1. I have to thank you for your reply, under date October 7, to my communication concerning guarantees for duties remaining unpaid on clearance.

2. The question of a bonded warehouse system will, it is supposed, be definitely settled next spring; and, when visiting Shanghai for that among other purposes, I shall be glad to be favoured with the matured views of the Chamber. The intentions of the Chinese Government, as far as I am acquainted with them, though admitting of an alternative settlement, are yet of a kind that may fail to make bonded warehouses acceptable at your port.

3. As regards guarantees, while regretting that the reply under acknowledgment has not done much towards the solution of the difficulty, I beg you will assure the Chamber that the Customs authorities will endeavour to accommodate the action to be taken to the circumstances and requirements of the ports in the manner that shall cause the least amount of embarrassment generally.—I am, &c., ROBERT HART, [L.S.]

Inspector-General of I.M. Customs.

To the Chairman of the Shanghai General Chamber of Commerce.

The Mortuary Chapel and new Cemetery were consecrated on the 13th inst. by the Lord Bishop of Victoria, but the ceremony excited little interest, not more than half-a-dozen persons, not actually taking part in the proceedings, being present. The old parishioners of our worthy Consular Chaplain, the Rev. C. H. Butcher, M.A., who was formerly curate of St. Clement Danes, will be glad to hear that he has been appointed to a canonry in St. John's Cathedral, Hong Kong.

## YANGCHOW.

The *North China Daily News* says:—Mr. Medhurst's reception at Yangchow, we believe, was all that could be desired; but it is amusing to learn that the local authorities conducted the troops to the temple where they are quartered by all the back streets, in order to hide them as much as possible from view. This was submitted to, as they were merely being guided to their destination at the time; but an intention was expressed to march the men throughout the whole city next day. To provide against any misunderstanding as to recent proceedings, and as to the nature of the visit, it is further intended, we believe, to post a Consular notification at the gates, recounting the circumstances.

Negotiations about the riot are dragging along. Two individuals who were concerned in it have been caught—one, the man who took Mrs. Taylor's rings from off her fingers, the other a literary graduate, who was a prominent leader of the mob. It is hoped to detect many others yet. The officials object to the wording of the tablet which we want erected; but Mr. Medhurst insists. Compensation in the Hwei-quan barrier case has been arranged, and was to be paid on the 18th. English sentries are placed at the gate opposite which the gunboats are anchored, and officers and troops seem well pleased with their quarters. The five to six hundred marines and blue-jackets were quartered inside the city at the Temple of the "Ten Thousand Genii;" the *Slaney* and *Dove* were at anchor off the east gate of the city, and there was to be a High Court held, Mr. Medhurst, the Salt Commissioner and Taoutai of Shanghai acting jointly, to look into the demand made for the punishment of the Literati.

While these proceedings have been occurring at Nanking, Lieut. Commander Dunlop, of H.M.'s *Dove*, has been making a survey of the Grand Canal. He has been so active in this matter that, between Sunday morning and Tuesday evening, he had examined over sixty miles of the canal northward from the Yangtsze, and ascertained the possibility of getting his gunboat up as far as Kao-Yow. The survey had to be made in Chinese boats, as it was not considered safe to take the *Dove* into the canal before its depth and width were accurately known.

## HONG KONG.

Hong Kong advices by the present mail reach to Nov. 25. The home mail of Oct. 9 arrived out on the 18th Nov., with London telegrams to Oct. 30. The colony appears to remain in the same stagnant condition, and there is no local news of interest.

The *China Mail* says:—"A rifle match has been arranged to take place between the rival associations of Hong Kong, Shanghai, and Yokohama, the shooting here to come off on Tuesday, the 1st December. The following is a list of the Hong Kong team:—Messrs. J. T. Turner (73rd), J. Gibson (73rd), A. Lind, A. Glennie, H. J. Holmes, A. C. Sim, C. Wagner, and E. L. Woodin."

### THE COOLIE TRADE.

It is with most unfeigned pleasure, says the *China Mail*, that we give publicity to the following notification issued by his Excellency the Governor of Macao. We translate from the *Boletim* of the 23rd, which gives some other documents on the same subject, that shall appear to-morrow. It was never our belief that Portuguese gentlemen, desirous to maintain the honour of their country's flag, would knowingly embark in a traffic so dishonouring to their nationality, and Sergio de Souza, chief of the Portuguese gentlemen in this part of the world, is apparently anxious to prevent the possibility of a suspicion of that sort being entertained. The reputation of the Portuguese name seems safer in his hands than in those of the Acting Attorney-General of Hong Kong, though the latter is much better informed as to the brutalities of the trade upon which Macao has hitherto flourished. The following is the notification:—

The Governor of the province of Macao and Timor determines as follows:—

The Portuguese Consul in Callao, the port of Lima, having communicated to this Government by a despatch, dated the 2nd of August last, the horrible act committed by a farmer in the suburbs of that city upon forty-eight Chinese emigrants, who had been transported to that country as labourers, by marking them with a red hot iron, as was formerly the practice with African slaves; and that furthermore many labourers or Chinese colonists were wandering about the streets of that city soliciting the charity of the public, having been abandoned by their masters when, being mutilated, they were judged useless to perform the services for which they had contracted; it is therefore determined with the advice of the Council, that, failing the receipt of official information that energetic measures had been taken to prohibit atrocities of such a nature, so barbarous and so contrary to the civilisation of the age, his Majesty not determining to the contrary, the following regulations shall be observed:—

1. Until further notice the licences conceded by this Government to open emigration houses for Callao, the port of Lima, shall be suspended.

2. Furthermore, there shall not be admitted for examination by the superintendent of emigration, and then shall not be registered at the office of the procurator of Chinese affairs, contracts for any Chinese emigrants or colonists destined as above mentioned.

The officers on whom it devolves to take notice of and act upon this notification will do so accordingly.

ANTONIO SERGIO DE SOUZA,
Governor of Macao and Timor.

## COCHIN CHINA.

### SAIGON.

From the *Saigon Advertiser* of the 7th November we learn that a Chamber of Commerce and an Exchange have been established in Saigon, with the permission and approval of the Government. The Chamber of Commerce, so far as we can make out, consists of five Government officials and nine merchants, elected by vote of the mercantile community, but whose nomination must be confirmed and approved by the Governor. The gentlemen elected were Messrs. Marx, Denis, Daler, Lafon, Grandhomme, Parker, Dierx, and a native Annamese. A Government notification indicates the Wangtai Hotel, on the Quai Napoleon, as the place where the Chamber and Exchange-rooms are to be. The Chamber held its first meeting on the 3rd November, under the Presidency of M. le Directeur de l'Interieur. M. Daler was elected vice-president, and M. Dierx as honorary secretary, and amongst other business transacted, it was resolved that a price current should be issued under the authority of the Chamber. The Director of the Interior, in opening the proceedings, delivered the following speech, which we translate for the benefit of our Chamber here. It will be seen that the director, although dealing a good deal in vague generalities which may mean anything or nothing, is strongly in favour of free trade and against all duties and other obstacles to business. But with the love of order and precision, characteristic of a French official, he dwells strongly on correct returns being made of imports and exports.

The Director spoke as follows:—"Gentlemen, in opening the first meeting of the Saigon Chamber of Commerce, I experience a profound satisfaction; for I have still before my eyes the spectacle, so recent, of this country unknown to Europeans—of these vast and fertile plains without outlets for their produce—of this inexperienced people, who fled before the approach of the French—of the cares, anxieties, and hesitations which we endured together in the first days of the conquest.

"Since then, however, the chosen spirits charged with carrying out the elevated views of the French Government have announced a magnificent future in store for Cochin China.

"In rendering an homage of gratitude and respect to those worthy representatives of our illustrious Sovereign who have laboured without ceasing for the success of one of the grandest and most beneficial undertakings of our epoch, I am proud to state that they have been actively seconded by the spirit of order and moderation, by the wisdom and experience of which the mercantile community of Saigon have given so many proofs since the opening of the port.

"Yes, gentlemen, it will be a title of honour for the houses which you have founded, to have assisted in the creation so rapidly of a settlement destined to place in communication with the civilised world the whole of this vast peninsula and its numerous inhabitants.

"That the colony may at the same time prosper, Gentlemen, continue by your example and counsels to establish among the merchants whom you represent in this Chamber the traditions of order, industry, and energetic foresight which you have known how to make prevail here in such a short time, and make known to foreign commerce the security and the numerous resources which it can now meet with in trading with our port.

"Your time is precious, but a few hours given every month to public concerns and inquiries, of which I need not point out the utility, would be of invaluable service to the entire community, who would cherish your name among them as public benefactors.

Digitized by Google

"An Annamite has been invited to take his seat among you; his presence is a new proof of the liberal spirit which animates our institutions, and which wishes to associate all the inhabitants in the same labours and in the same rewards. He will represent the numerous and interesting class, who work directly the soil—a class whose interest it is to come more and more into contact with the mercantile class.

"If we have not beside us representatives of the other divers races who dwell in this city, their good relations with the Europeans should convince them that the interests of all merchants, whatever their nationality, have an equal share in our sympathies and solicitude.

"In expressing on this point sentiments which are also yours, I am persuaded I can assure all the residents of Cochin-China that you are strictly in accord with the Government to invite them to persevere in their efforts and to have confidence in the future.

"Permit me, before proceeding to the special work of the meeting, to glance at the important duties which will be entailed upon us in regard to the principal questions which will come under our consideration.

"Saigon is now a town of considerable trade. We declare an annual business of over 70,000,000f., but, thank Heaven, we have no customs' duties. If, however, our trade escapes free of taxation and burdensome restrictions, the simple declarations which we receive constitute very incomplete commercial returns. Now, it is the interest of all, and an unquestionable advantage, to know with the greatest exactness the amounts and values of our imports and exports, with full particulars; the Chamber, enlightened by your knowledge, and enjoying the confidence of private firms, will be able to obtain and publish all the documents which merchants, without compromising the secrets of their business, will consent to communicate.

"The movements in our market depend upon the fluctuations of prices in the neighbouring markets, and also, although to a less degree, upon the variations of the markets in the interior; on the other, the means of publicity at the disposal of commerce are still limited. It would be of great benefit to know every day, then to combine all the indications which result together from the conventions that have been executed, so as to be able to determine exactly what have been the imports and exports of the country in a certain defined period.

"The need of this is felt by Government as much as by commerce,—it will conduce to the creation of an Exchange.

"It is to you, Gentlemen, to whom it will appertain, to prepare the regulations of this establishment, which is so desirable, accommodating them to our exceptional position, and then to see them carried out when they shall have received the approval of our worthy Governor, whose benevolent support has been entirely acquired for the work which you are undertaking,

"Then, as soon as you remedied the defects of our actual commercial legislation, new services will be demanded of you; the correspondence of the Chamber will be extended across the ocean to our native land, which will have reason to be proud of our success; your zeal and devotion will have conferred numerous obligations; later on—very soon, without doubt—you will find, I hope, the sweetest reward of your labour in a new extension of the trade of our colony, in the bosom of which you will have powerfully contributed to spread ease and prosperity."

# Commercial Report.

—o—

The following market information is derived from Messrs. Olyphant and Co.'s Circular, dated Hong Kong, Nov. 25th.

## IMPORTS.

SHANGHAI.—No marked changes have occurred, and transactions in nearly every article under this heading have been very limited. Grey Shirtings are in small demand and lower; we quote 6⅞ catties weight at Tls. 2.16 to 2.18 per piece. White Shirtings and T-Cloths were nominally unaltered until within the past day or two, when a slight decline can be quoted. Most descriptions of Woollen Goods are quiet and without quotable change, but Black Camlets have been in good demand at full rates for Japan, and the stock is now quite exhausted. American Drills have fallen in price somewhat, but no business has taken place; we quote: Drills, Tls. 4.40 to 4.55; Jeans (30 yards) Tls. 3.60 to 3.70, and Sheetings, Tls. 4.20 per piece, all nominal. Lead has further improved in value and the better brands may now be quoted Tls. 5.75 to 5.80 per picul; other metals remain as last advised. Coals are in very heavy stock and difficult to move; Anthracite is nominally offered at Tls. 12.50 to 12.75 per ton, but no demand exists.

HONG KONG.—Our import market is very dull, and business continues of a very unsatisfactory nature. Raw Cotton has been sparingly taken, dealers being fairly supplied, and disinclined to increase their stock. Importers are willing sellers, and a decline of 50 cents has been established. In Yarn sales have been confined to about 80 bales Bombay and Singapore kinds, Nos. 16 to 24 taken at $100 to $106. Quotations for English manufacture are unchanged. Stocks of Piece Goods have been considerably increased, three vessels having arrived with part cargoes, and the offers now made for staples are extremely low and generally refused. A sale of 30-yard American Jeans has been made at $4.50 per piece, and the only parcel of American cottons now on offer is about 50 bales Drills, the balance of last receipts having been sent North. Woollens are quiet, but generally firmly held, though dealers have reduced their offers. In Metals nothing worthy of note has been reported. Coals are dull of sale at last quotations.

## EXPORTS.

SHANGHAI.—Green Teas: The demand has continued steady, and about 29,000 half-chests have been settled at prices showing little general change, but holders of fine teas have been very firm in their demands. The stock has been maintained at about the figures last advised, and is estimated at 74,000 half-chests of all descriptions. Black Teas: A moderate business has been transacted at some recovery in the prices of common descriptions, and settlements during the interval have been 9,600 chests, leaving a stock of about 18,300 chests. Raw Silk: Transactions in this staple have also been on a moderate scale, total purchases being estimated at 1,200 to 1,500 bales. Tsatlees have occupied the most attention, and recent settlements show an advance of Tls. 10 to 15 per picul; a second rate chop third Tsatlee is reported as having been sold at Tls. 585. Prices in the country are said to be higher than those on this market, and silkmen are consequently very firm, and a further advance is looked for. Stock about 3,000 bales.

FOOCHOW.—Tea: Settlements of tea since the despatch of last mail amount to 719 chests Congou, at Tls. 10.8 to 17.8 o.b.; 100 do. Souchong at Tls. 17.8 o.b.; and 357 do. Flowery Pekoe, at Tls. 25.8 to 30.8 o.b. Buyers of Congou for England are still holding off for a decline in prices, which holders are unwilling to submit to. Supplies are coming forward very slowly. In Oolongs no transactions have transpired, but there has been some inquiry on the part of American buyers, and at the last moment teamen report the settlement of about 7,000 half-chests good cargo grades at Tls. 20 short, but the report lacks confirmation, and may be entirely owing to the increasing anxiety of holders to induce buyers to enter the market, leading them to report to one house settlements by another in hopes of eliciting offers. The only departure has been the San Francisco for Melbourne with 221,000 lbs. tea.

AMOY TEA—The Congou season is closed, the small stock on offer when the last mail left having been settled at $12 to 18½ per picul, short. About 600 half-chests fair cargo Oolongs have been purchased from a Teaman, who is about leaving the port, at $20 to 23 per picul, which shews a drop of about $4, but holders generally are unwilling to accept similar terms. The stock amounts to about 109,000 half-chests. The usual reports of settlements are current, but are not generally credited; one, however, is circumstantial in naming the quantity settled, and the prices, say 14 chops, at $18 to 38.

CANTON.—Tea: There has been little demand for teas of any description, and the settlements of 8,000 boxes Scented kinds, and 1,500 boxes Gunpowder, at former quotations, have all been made by one house. At the moment there is nothing doing. In Congous there is no change to note. Raw Silk is in fair demand at slightly reduced values, but holders are very firm, more especially for fine silk, which is now becoming quite scarce. Re-reeled sorts are inquired for at a decline of about $10, which the dealers refuse to accept. 100 to 150 boxes have been taken at $550 for good silk. Buyers generally are holding off for lower rates.

## EXCHANGE.

SHANGHAI—The sterling rate has declined to 5s. 10d., and closes at this for the mail, for first class six months' sight private paper. On Hong Kong, Bank Bills, on demand, we quote at 24½ per cent. discount; private, fifteen days' sight, 25 to 25¼ per cent. discount.

HONG KONG.—Exchange on London declined shortly after despatch of last mail to 4s. 4¾d. for Bank, and 4s. 5d. for first class private paper, and little disposition to sell at these rates was manifested, when one Bank suddenly offered to draw at 4s. 5d., and the rate for private rose to 4s. 5¼d. to 4s. 5½d. The Bank sales were soon made, and the drawing rate was lowered to 4s. 4½d., at which it closes for six months' sight bills; private 4s. 5d.—no sellers, and no private buyers. Rates very weak.

# NEW YORK MARKETS.

—o—

## TEA.

Messrs. Beebe Bros. report as follows, under date 4th ultimo:—We have to report a rather dull market for Tea generally during the past fortnight, with sales from first hands of 4,500 half-chests Greens (nearly all new crop goods recently to hand, *via* San Francisco), 6,100 half-chests Japans, and 1,850 half-chests Oolongs. Of the Japans 2,100 half-chests were also new crop, and received *via* San Francisco. The market remains unchanged for both Japans and Oolongs, closing weak and somewhat unsettled. For new-crop Greens, sales since the 20th ult. indicate no change of importance in values as compared with the opening figures, though the market at the close is scarcely as firm. We quote prices realised for these thus far, in chops, as follows:—Moyunes, 89s. to 94s.; Twanki, or Teenki, 90s. to 94s.; and Fychow, 85s. to 88s., all gold, duty paid. The Scawfell has arrived since our last with a cargo of old-crop Japans from Yokohama.

The same firm offer the following remarks under date 18th Dec.:—Since ours of the 4th inst. sales of tea from first hands are reported to the extent of 1,300 half-chests Green, 9,300 half-chests Japan, 7,500 half-chests Oolong, and 700 half-chests Congou. Prices realised, while showing no material change, indicate no improvement whatever in the market. At the close some anxiety is manifested by holders to be quit of their remaining stocks of old crop goods, and the tendency is to a lower scale of quotations. We note the arrival since our last of the Emma, with a cargo of Japans from Nagasaki.

## SILK.

Messrs. Richardson's Circular dated 18th December is as follows:—The market for raw silk continues quiet, but prices are firm. The large arrivals both here and in London have led some to look for concessions, but it is clear that although the silk was hurried forward early in the season the crop will not realise more than the estimate—say 50,000 bales for China. As we have received an unusually large proportion of this estimate we have so much less to receive. The European market continues firm, with perhaps a shade of improvement. European manufacturers are now receiving orders for "satins," which means high prices for fine silks, both European and Asiatic.

Our throwsters are expecting to have business after the new year There is no change in quotations.

## ARRIVALS.

At HONG KONG.—From Sunderland, Nov. 23, Stanley; from New York, Rocket; from Cardiff, 25, Garibaldi.

At SINGAPORE.—From Cardiff, Nov. 27, Blanche.

## DEPARTURES.

From SHANGHAI.—For New York, Nov. 6, Masonic; 13, Charger.

From SINGAPORE.—For Liverpool, Nov. 25, Khimjee Oodowjee; for Hamburg, 24, Varuna; for New York, 22, George Green.

## COMMERCIAL POSTSCRIPT.

—o—

Messrs. Ashton and Co. have issued a Circular announcing that Mr. Ellis Gilman (son of the senior partner) is this day admitted into the firm.

The North China Insurance Company (Marine), whose head office is in China, and for which Messrs. Ashton and Co. have been acting as agents, has opened a branch office in London, under the care of Mr. John S. Mackintosh, who has hitherto had the management of the company in China. The address is 34, Clement's-lane.

BOARD OF TRADE RETURNS.—The Board of Trade returns were issued yesterday. The imports, which are brought down to the end of October, although nearly a million in excess of the returns for the corresponding month of 1866 and 1867, are nearly two millions below those of September last. The returns for that month were, however, unusually high, being over three millions in excess of those of August, and have only been exceeded four times in thirty months. The total value of the imports in August was £21,492,619. The exports are made up to the end of November. In that month their total value was £14,143,493, which not only shows a deficiency as compared with the corresponding months of 1866 and 1867, but is no less than £2,733,405 less than the returns of the previous month of October. In only four out of thirty-three months have the returns fallen below those for November last. The usual abstract of these returns will appear in our next issue.

The Mexican dollars brought by the last West India packet have been sold at 59¼d., showing a decline of ⅛d from the last price. The bar silver is not yet disposed of.

A Circular from Messrs. R. S. Butterfield and Co, of Bridgehouse Mills, Haworth, and Duke-street, Bradford, announces the retirement of Mr. R. S. Butterfield, and the transfer of the business to Messrs. Redman and Holt, who will continue it at the same address.

## SHIPPING.

ARRIVALS NOT IN THE TABLES.—Off Ballycotton, from Rangoon, for Liverpool, Duke of Wellington; Dec. 31, at London, from Shanghai, Hastings; Nov. 18, at Monte Video, from Hong Kong, Amadine; Dec. 31, in the Downs, from Colombo, Queen Bee; at London, from Colombo, Veronica. Jan. 1, at Deal, from Shanghai, Janet Ferguson; at Liverpool, from Rangoon, Estrella; Dec. 29, at Cuxhaven, from Batavia, Triton; Jan. 2, at London, from Shanghai, Mary Whitridge; Dec. 30, off Dungeness, from Batavia, for Amsterdam, Eensgezindheid; 28, at Santander, from Manila, Virgen del Carmen; 31, at Nieuwe Diep, from Batavia, President v. Ryckevorsel; 21, off Boston, from Padang, Argonaut; 22, at San Francisco, from Hong Kong and Yokohama, Great Republic (s.); Jan. 3, at London, from Shanghai, Crawshaw Bailey.

DEPARTURES.—Dec. 31, from London, for Cardiff and Shanghai, Lord Macaulay; 26, from Shields, for Singapore, Petunia; 29, from Sunderland, for Singapore, Gulnare; 22, for Shanghai, Benmore (not the Benvenue as before reported); Jan. 1, from London, for Shanghai, Challenge; Dec. 30, from Liverpool, for Singapore, Lorton; Jan. 2, from London, for Shanghai, Silver Eagle; Dec. 31, from Liverpool, for Yokohama, Empress; from Clyde, for Hong Kong, via Liverpool, Windover; 2, from San Francisco, for Hong Kong, White Swallow; for Yokohama, China (str.); for Hong Kong, Golden Fleece.

SPOKEN.—Hellevoetsluis, Java to Dordt. Nov. 24, 1 S., 21 W.; Iron Queen, Sunda to Liverpool; Barbadian, London to Shanghai, Dec. 5, 11, S., 33 W.

LAID ON.—At London, for Ceylon, Avon; for Amoy and Chefoo, The Cedars; for Manila, Angela; at Liverpool, for Batavia and Sourabaya, Fanny Kirchner.

CASUALTIES.—The Benvenue, Brown, from London to Penang, arrived at Deal Dec. 23, and was supplied with an anchor and 15 fathoms of chain in lieu of others lost.

Advices from Rotterdam, dated Dec. 30, state that during a gale on the night of the 28th Dec., the Mary and Hlillegonda, thence to Batavia, got adrift in Brouwershaven Roads, and came into collision with the John N. Cushing; after striking several times she was towed to a safe anchorage, but was so much damaged that she would have to return to Rotterdam for repairs.

Advices from Amsterdam, dated Dec. 29, state that during the gale on the previous night the Sirius, for Sourabaya, the Alida, for Padang, and the Niphon, Vuyk, for Japan, broke their chains, and sustained some damage by collision.

MISCELLANEOUS.—The Golden Spur, Ronald, from London to Shanghai, which put back to Deal Dec. 29, sailed again on the 31st.

A telegram received at Liverpool December 31 announces that the Busturiana, from that port to Manila, had been wrecked at Sorsagon, near Manila.

The Bolton Abbey, Murphy, arrived at Liverpool, reported that on Oct. 11, in lat. 27 S., lon. 50 E., she spoke the Virgen del Carmen, from Manila to Santandar, with mainmasthead and mizenmast gone, but she required no assistance. (See Arrivals.)

The Triton, from Batavia, arrived at Cuxhaven Dec. 29, with loss of foremast.

The Indiana, Cooper, from London to Singapore and Bangkok, arrived in the Downs Jan. 2. She had been in collision the night previous, during a gale, and had foremast and bowsprit carried away, and received other damage.

## BIRTHS, MARRIAGES, AND DEATHS.

—o—

### BIRTHS.

BELL—On the 28th Dec., at 13, Windsor-street, Glasgow, the wife of Captain John Bell, of a daughter.

GINGELL—On the 26th December, at 344, Fulham-road, the wife of C. T. Gingell, of a daughter.

JACKSON—On the 21st Dec., at 4, Alexandra terrace, St. John's-wood, N.W., the wife of W. Jackson, Esq., of the Chartered Mercantile Bank of India, London, and China, Hong Kong, of a son.

MACLAGAN—On the 24th December, at 12, Carlton-street, Edinburgh, the wife of Robert E. Sinclair MacLagan, Esq., O.B.C., Ceylon, of a son.

MURTON—On the 30th Oct, on board the *Seringapatam*, outward bound for Shanghai, in lat. 23 deg. N., long. 20 deg. W., the wife of Capt. W. Murton, of a daughter.

PORTER—On the 19th December, at 117, Boulevard de la Reine, Versailles, the wife of James Porter, Commissioner of Customs, China, of a son.

### MARRIAGES.

NORONHA—PEREIRA.—On the 21st Nov., at the Roman Catholic Church, Hong Kong, Diocleciano Lucio Noronha, to Maria Filomena, eldest daughter of Manuel Luiz da Roza Pereira, Esq.

NORONHA—BASTOS.—On the 21st Nov., at the Roman Catholic Church, Hong Kong, Leonardo Noronha, to Maria Josefa, eldest daughter of Antonio Bastos, Esq.

### DEATHS.

EDWARDS—On the 14th Dec., at Southampton, aged 30, Edward Edwards, late of the P. and O. Company's steamship *Tanjore*, deeply regretted by his friends and fellow-officers.

Of the numerous Almanacks for 1869, one of the best is a new one entitled *Whitaker's Almanack*. Besides the usual contents of such a publication, it contains a large amount of information respecting the Government, Finances, Population, Commerce, &c., not only of the United Kingdom, but of British Possessions throughout the world; even the Chinese and Japanese Calendars are noticed and explained. It contains nearly 400 pages of small but very clear print, and is extraordinarily cheap at one shilling.

## NORTH GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, December 31.

The fate of the Bremen barque *Lesmona*, which was captured by Chinese pirates a few months ago, as the crew, with but few exceptions, were too timid to offer determined resistance, has created some sensation in the German papers, and opened the door for a smart discussion as to the expediency of making some general laws on the subject on the part of the North German Confederation. It cannot be said that the German sailors have less personal courage than those of other nations, and their patience under sufferings, and power of endurance in face of hardships, when exposed to shipwreck and other dangers more immediately connected with their calling, deserve all praise. It has been suggested that the new German flag is too new to fight for, as there are no glorious reminiscences attached to it to endear it to the hearts of the sailors; and, on the other hand, some stress is laid on the fact that there is no law making it incumbent on the crews to defend their vessel when attacked by privateers or pirates, and there is no inducement for them to do so, for any reward for such good conduct, or any compensation for wounds or loss of limbs, is quite voluntary on the part of the shipowners. It is therefore proposed to make some general regulations on the subject. It is worthy of remark that in this respect the old Hanseatic sea laws contained such enactments, and the sailors were not only compelled by law to offer armed resistance to freebooters and rovers on pain of punishment, but rewards were insured to them for acts of bravery, together with suitable pensions for loss of limb or if invalided in the service. In consequence of this discussion it is highly probable that a Federal law will be passed in the next session of the German Parliament, making due provision for such cases, and defining the responsibilities of the shipowners and those of the Confederation.

The Zoological Society of this city acknowledge in the local papers a number of valuable presents of animals received in the last few months from different parts of the world, among which are the following from the Far East:—A ring pheasant *(Phasianus torquatus)*, from China, donor, Capt. J. C. Reimer; a dwarf quail *(coturnix Chinensis)*, from China, Messrs. A. J. Hertz and Sons; two metallic coloured pigeons, from Java, Herr L. P. Schaetzler; several tortoiseshell turtles *(Chelonia imbricata)*, from the South Seas, Messrs. J. C. Godeffroy and Son; a makuk *(maccus cynamolgos)*, from Java, Herr Fr. Heimbock; a swan goose *(cygnopsi cygoides)*, from the East Indies, M. Chs. Chabert; and four fat-tailed sheep *(ovis platyura)*, from Mongolia, Messrs. Siemssen and Co., Foochow.

Herr Alexis Redlich, the Austrian Consul in Siam, has arrived here in his native city after a long residence in the East. In his official capacity he has had many opportunities of becoming well known to the late as well as the present King of the country, and, as a merchant, supplies the Court with many articles of German produce and manufactures.

### COMMERCIAL.

On account of the holidays the markets are virtually, though not officially, closed, and business generally is suspended till after New Year's-day. There is, however, no alteration in the prices of any articles of interest to your readers in the Far East.

### SHIPPING.

ARRIVED.—Sultan, from Hong Kong.

SAILED.—Apenrade, to Singapore; Taikun, to Shanghai; Heinrich, to Hiogo and Yokohama.

### SHIPPING AT BREMERHAVEN.

ARRIVED.—William Mitchell, from Rangoon (8,788 bags rice).

SAILED.—Orient, to Hong Kong.

---

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, December 31.

The debate on the Budgets in the Second Chamber of the States General has at length been brought to a conclusion. The day before Christmas, despite the strongest efforts of the Opposition, all the chapters were carried by a large majority, viz., Home Affairs by 44—20, Navy by 61—3, War by 56—11, Financial by 41—27, Ways and Means by 41—20, and Colonial by 50—13 votes. It was especially upon the instruction question that a smart debate ensued, which extended over several days, and which would have lasted still longer but for the fact that Mr. Koorders was prevented from speaking by illness. The debate upon the Colonial Budget was the most interesting; year after year the same arguments have been brought forward, but now the members have taken entirely new ground. Mr. Thorbecke said, "It was now time to ask—Could not the Indian Government be rendered more independent of the Dutch; is it still necessary to continue to force upon the Indian population our institutions and our laws?" Mr. Thorbecke further stated that he thought it the duty of any Liberal Ministry to deal with this question, in order that justice should be done to our Indian colonies. This was the principal point of the discussion, and notwithstanding that the debate led to no definite result, the India question has advanced another step towards solution, and, indeed, it was more than time that this precise point should be considered. The Government in India must be reorganised on a Liberal basis. That attention is being drawn to our colonies by other nations is proved by the report transmitted to the English Foreign-office by the British Legation at the Hague on our East Indian Possessions, a report in which only facts are given, without a word of comment: In this report Mr. Thurlow says that Java awaits only the touch of some magician's wand to entirely relieve the embarrassments of Dutch colonial finance, whilst he estimates the deficit at £250,000 yearly; indeed, every one knows that we alone profit from our East Indian possessions, and that we profit enormously. I think that Mr. Thurlow has rendered good service to the Liberal cause, and I echo the opinion of this Secretary of Legation that there should be a less protective commercial system. He goes on to say that the wealth which might be realised by throwing open to private enterprise the trade and industry of the Netherlands Indies cannot be estimated, and with him I think that this is an event which cannot be delayed long.

The Minister of the Colonial Department answered in a very long speech the large number of questions to which his attention was called by the members. Of course he promised much, and he even promised to bring in a Bill to revise the fundamental law for India; but his promises were given in such words that I do not expect much from them. His speech was a mixture of Liberal and Conservative principles, and showed conclusively that the only aim of Mr. de Waal is to be good friends with every one.

The Government has laid before the members a Bill to modify the concession granted to the East India Railway Company, for the construction of a railway from Samarang, *via* Soerakarta, to Djocjokarta. This company's original capital of f.14,000,000 has been found insufficient, a further sum of f.3,000,000 being needed to complete the undertaking. The managers, therefore, have made an appeal to the Government, and the Cabinet proposes to warrant the payment of interest upon a loan to the amount of f.765,000, being an augmentation of f.135,000 upon the sum previously granted. As soon as the members of the Second Chamber meet after the recess—early in the month of February—they will deal with this Bill, which will most probably be approved of.

The Minister of the Financial Department, Mr. van Bosse, has agreed to the objections made in the sections with regard to the equivalents he had proposed to cover the deficit resulting from the abolition of the stamp duty now levied on newspapers. He has abandoned the proposition to increase the import duty on tea, and he intends only to raise the duty on spirits by 3f. per 100 litres. It is generally supposed that the Stamp Duty Abolition Bill will be approved of.

### PRODUCE MARKETS, ETC.

COFFEE.—As the year draws to a close the trade have contracted their operations, but the market is steady.

RAW SUGAR.—The market is firm, but the transactions only include 1,256 mats Sourabaya, per Europa, No. 12½, at 32½f.; 542 mats do., No. 13½, at 33½f.; 840 mats Cheribon, ex Kaap Hoorn, No. 10 to 11½, at 30½f. to 31¾f.; 266 mats Sourabaya, ex Robertus Hendrikus, at 32f. to 33¼f. The stock in bond is 32,855,072 kilo.

RICE.—The market is rather more active. The following parcels have changed hands:—2,254 b. Sourabaya, ex Elizabeth, at 6¼f.; 862 b. Java, ex Anna, at 8f.; 1,925 b. Sourabaya, ex Johann, at 6¾f.; and 53,513 mats Saigon floating, per Venezuela, Wilhelmina, and Everhard.

SPICES are quiet. The quotations are as follows:—Nutmegs No. 1, 86c. to 88c.; No. 2, 78c. to 79c. Mace D, 134c. to 135c.; E, 129c. Cloves, No. 2, 28½c.; No. 3, 27c. to 27½c. Java Cinnamon, No. 3, 175c.; China, 82c. to 84c.

TEA.—No change in these markets. A few sales for consumption have been effected at previous rates. The Stinchair, from Foochow, has not yet arrived, but it is said that her cargo will be announced for sale next month.

JAVA TOBACCO.—The transactions only include 252 b. Java Temajang, 168 b. CD. Good covers for cigar purposes are very high priced, and high rates are also paid for qualities fit for the English market. The total stock is 31,686 bales.

TIN.—The statistical position of the market continues favourable. Banca has further advanced, and very large quantities have been sold, the last quotation being 63¼f.

COCOA-NUT OIL.—Prima Cochin has sold at 36¼f., but the stock is now completely exhausted. Prima Ceylon realised 32f. to 32½f.

MISCELLANEOUS.—Camphor dull. Prices for China and Japan 90c. Long pepper 17c. Cassia Vera, 1,390 b., ex Julie, sold at firm but secret prices; the 1,904 b., ex Waalstroom, also changed hands. Pearl-sago nominal, at 13f. Japan wax is much offered; the quality A is quoted 59f., B 58f., D 49f. Rattans, 3,350 bundles, ex City of Perth, and 6,171 bundles, ex Charlie Palmer, have been sold.

MONEY AND STOCKS.—The holidays have of course greatly interfered with business, and there is little change to notice. Transactions in all descriptions of goods have been of a retail character, and altogether confined to immediate wants. Prices in general remained nominally unaltered. The Home Funds have, in common with other descriptions of securities, recovered gradually, both in figures and tone, which is of course due in the main to the probability of affairs in the East being arranged by diplomacy. Dutch Two-and-a-Half per Cents., 57¼; Three per Cents., 60¼; Four per Cents., 88¼; Trading Company, 124½; Netherlands India Trading Bank, 94. The Bank rate remains unaltered.

### SHIPPING INTELLIGENCE.

ARRIVALS.—Dec. 15, at Brouwershaven, the Mary and Hillegonda, bound for Batavia, put back; 16, at Texel, from Saigon, Venezuela; 19, at Texel, from Batavia, Martha Bowker; 25, at Brouwershaven, from Batavia, County of Stirling; 26, at Texel, from Batavia, Nieuwe Waterweg.

PASSENGERS INWARD.—From Java, per L. J. Enthoven, Messrs. C. O. van Oordt and Harrevelt, officers of the E. I. Army.

## THE NEW CHINESE DIFFICULTY.

THE Yangchow affair appears, from the tenour of our last advices from China, to have been settled, more or less satisfactorily, without the necessity of an appeal to arms. But it has given rise to a discussion in this country of such a nature as to show that the course of events in China is now more narrowly watched by politicians at home than it has been for many years. The tone of the discussion shows, moreover, that the subject of our relations with China will, on the first favourable occasion, be once more elevated into a party question; the Liberal journals, as a rule, taking quite the Chinese view of the case, censuring the missionaries for being at Yangchow at all, and our consular and naval authorities for protecting them, while the Conservative writers loudly applaud the steps taken to vindicate the right of British subjects to go where they like, and do as they like, in China. In another column we reprint a lengthy and, it must be owned, an ably-written letter from Mr. C. W. DILKE (the member for the new borough of Chelsea), advocating the former side of the case; and following this will be found a leading article from *The Times*, supporting the same view, and a rejoinder on the other side from the *Standard*. At the first glance it certainly would seem only reasonable that English missionaries, pursuing their peaceful calling in a country with which we have a treaty of amity, should be protected by their Government from such atrocious mal-treatment as that suffered by Mr. TAYLOR and his companions. That such an outrage should be committed, too, at the time when Mr. BURLINGHAME is so loudly proclaiming that the Chinese Government, his employers, "invite us to come and plant the shining cross on every hill and valley" (these, we believe, are his very words), is an additionally aggravating circumstance, and strongly inclines us to demand that condign punishment be inflicted on the stubborn officials who would neither punish the authors of the crime nor compensate the victims. But then, it is urged on the other side—and not without some show of reason—had these missionaries any right to be at Yangchow at all? And even if they had a right to go there, were they justified in remaining when they found their mission unacceptable to the populace? Theoretically, of course, the treaty provides for the right of travel and residence in the interior; but, as far as residence is concerned, that should be practically limited to such places as are within some Consular jurisdiction, or at all events within easy reach of some protecting Power. Englishmen in China are exempt from the operation of Chinese law; if, therefore, they voluntarily place themselves in situations where none other exists, trust to it for protection, and find it wanting, can they reasonably demand that compensation for their losses or sufferings shall be extorted *vi et armis* from the Chinese? It must be owned that there are two sides to this question, however great may be our sympathy with the victims of the cruel outrage at Yangchow. Clearly the position of inland missionaries in China is at present very ill-defined, and we trust the revised Treaty will lay down some distinct and unmistakable law as to their rights and responsibilities when carrying their work into places where their safety depends entirely on the power and will of the native authorities to protect them from the effects of popular prejudice.

---

WITH the present number of the *London and China Telegraph* subscribers will be presented with a separate sheet containing, in a tabular form, the arrivals, departures, and due dates of all China mails, both out and home, for the year 1869. This will be, in fact, a condensed summary of the P. and O. and Messageries time-tables combined, so as to save the trouble of separate reference to two different tables; it will, we believe, be found useful by subscribers, to suspend in their offices, &c.

## SUEZ CANAL.

THE transit of a French vessel of war, the *Levrette*, across the Isthmus, in the presence of the GOVERNOR-GENERAL of British India and the COMMANDER-IN-CHIEF of the British Forces, affords the Canal Company an opportunity for natural congratulation, and is made the occasion of announcing a few facts and proposed arrangements connected with the great work. It appears that between the 15th October and the 15th November the quantity of soil excavated amounted to considerably more than two millions of tons, the total estimated by the contractors for a month's work. More than 17,000 workmen are now engaged on the work, and the excavation is being carried on by sixty powerful dredging machines, besides the wheelbarrows and tramway carriages used on the lakes and other parts of the line. The machines are kept at work night and day, and the twenty millions of tons remaining to be excavated out of the total of seventy-five millions, will, it is assumed, be raised in less than ten months.

A commission composed of scientific men, called in to consult with the chief officers of the company, recently met in Paris in order to decide on the rate at which vessels might be made to traverse the canal without injury to its banks, and also with the most economical effect as regards the interests of the company. These considerations involve others, such as the methods of towing, pilotage, influence of high tides in the Red Sea, the formation of basins to allow vessels to pass each other without danger, the lighting and keeping of the canal, and, lastly, the mode of calculating tonnage. The engineers are now studying these problems on the spot, and seem to have arrived at the following conclusions:—It seems to be admitted that steamers may be allowed to cross the Isthmus at the rate of about six miles an hour, and that sailing ships of more than fifty tons may be towed at the rate of about four miles an hour; these will, of course, have to pay for tonnage, but smaller vessels will be able to sail across the Isthmus without interfering with the larger craft. Side basins are proposed to be formed at distances of six or eight miles all along the line to facilitate the navigation. Every vessel of more than fifty tons will be required to take a pilot acquainted with the peculiarities of the navigation and with the day and night signals. The method of lighting the canal is now under examination, and the towing is proposed to be performed by horses until the steamers employed in the work are at liberty.

As regards measurement there is some difficulty; the company is authorised to charge a toll of eight shillings per ton; but as various countries have different modes of taking tonnage, an arrangement will have to be made to produce equality. If, as is said, a vessel set down at 300 tons in France would be rated at 250 tons in England and at only 150 tons in America, then the toll would amount to more than nine shillings per ton English and to sixteen shillings per ton American; an English vessel measuring 250 tons having to pay £120 transit duty, besides, in the case of sailing ships, towage and pilotage charges. The transit of a sailing vessel across the Isthmus will occupy from twenty-three to twenty-seven hours, while steamers will cross in sixteen hours.

---

IT was stated that the successful completion of the new Mediterranean Cable would be immediately followed by some movement in the long looked-for Red Sea line of telegraph to India, but the project seems to hang fire. In the meanwhile, it is a disgrace to our Government that no encouragement is given to an extension of the present telegraphic system—such as it is—to Singapore. A recent telegram from India says:—"A recommendation has been put forward "by Colonel ROBINSON in favour of a plan for laying a sub-"marine cable from the Bengal coast to Rangoon." How long will it be, we wonder, before Colonel ROBINSON'S recommendation is acted on? Somebody else will presently come forward with a counter-recommendation in favour of a land line down the Malay Peninsula; then will follow an almost interminable controversy as to the merits of the rival schemes; Government will look on with folded hands; and nothing will be done. Why does not Governor ORD, who has exhibited such remarkable energy in procuring new steamers for the colony, and in inaugurating other expensive undertakings, turn his attention to this matter, which daily becomes of more importance to the Straits Settlements?

## DEPARTURE OF THE CHINESE MISSION.

SOMEWHAT suddenly and unexpectedly Mr. BURLINGHAME has taken wing for Paris. His Excellency, accompanied by M. DESCHAMPS, left the Grosvenor Hotel and crossed the Channel on the 30th ultimo, leaving Mr. BROWN to follow at leisure with the Chinese members of the Mission; so that in a few days the Yellow Dragon-flag—which, by the way, has faded to a dirty white and is getting very ragged—will disappear from its present exalted position. This movement is explained by a paragraph which appears in the morning papers, stating that Lord CLARENDON and the Hon. ANSON BURLINGHAME have agreed upon the basis of the future policy of HER MAJESTY'S Government in relation to China. First, it is understood that it is necessary to observe existing treaty stipulations; secondly, that all negotiations should be conducted with the Central Government at Peking, and not with provincial authorities; and thirdly, that when any differences arise, before war shall ensue, they shall be referred to the Home Government for consideration. Lord CLARENDON is said to have instructed HER MAJESTY'S agents in China to act in this spirit and with these objects, and to caution all British subjects to pay due respect, not only to the laws of China, but to the usages and feelings of the Chinese people. Mr. BURLINGHAME will return to England during the session of Parliament to complete his negotiations.

THE MARQUIS D'ESCAYRAC DE LAUTURE, better known in China and to our readers by his former title of Comte D'ESCAYRAC, and who died last week at Fontainebleau, formed part of the scientific mission sent to China by the French Government at the time of the last expedition. He was made prisoner by the Chinese, together with Mr. (now Sir HARRY) PARKES, *The Times'* correspondent, and others, and suffered most severely by the cruel treatment to which he, like his unfortunate comrades, was subjected. His wrists were fearfully mutilated by the cords with which they were bound, and when he returned to the camp they were full of maggots. His constitution never recovered the shock it had sustained, and he died at the early age of forty-two years. Last spring he published an interesting study of the interior of China, in addition to his former contributions to the literature relating to the Far East.

## THE YANGCHOW DIFFICULTY.

The following letter on the Chinese difficulty has been published in *The Times* by Mr. Charles Wentworth Dilke, the newly-elected Liberal member for the newly-enfranchised constituency of Chelsea. It called forth articles of some importance in two of the leading journals, which we append:—

TO THE EDITOR OF "THE TIMES."

Sir,—In a leading article contained in your issue of the 16th of December you point out the danger that we may awake some winter's morning and find ourselves at war with China. "It takes eight weeks," you say, "to bring a despatch from Shanghai to Downing-street," and four months must be lost in putting a check from at home upon the action of our Consuls. You show that a case has just now occurred in which the Consuls have demanded of an empire with which we profess to desire a cordial friendship that she should compel certain of her officials to perform acts humiliating to the national pride, and calculated to provoke to war even so peaceable a race as the long-suffering Chinese. Two questions arise out of the demands which have been made and the manner of the making of them of such moment to the people of England that their discussion may be said to be a public duty, and upon these I venture to address you upon this occasion. The questions are:—

1. Whether Mr. Taylor's missionaries, by their residence at Yangchow, were not themselves breaking our treaties with the Chinese Government.

2. Whether we have not bound ourselves, both impliedly and expressedly, never to act as we appear to be acting at Nanking.

1. As for the matter of residence, it may seem an act of somewhat questionable wisdom, at a moment when everyone is assuming, without discussion, that British subjects have by treaty a general right of residence in China for any individual to come forward and attempt to show that no "right of inland residence" exists; such, however, appears to be the case. The Treaty of 1842 names only residence at the treaty ports. An Order in Council of February, 1843, prohibits British subjects from resorting for trade purposes to any but the treaty ports. The American Treaty of 1858 also expressly speaks of residence at the treaty ports, and the British Treaty of 1858 says that Englishmen shall enjoy at the new treaty ports the same privileges as they enjoy at the ports open under the old treaty, "including the right of residence," words which would hardly have been introduced had the treaty conferred upon British subjects the right of residence anywhere and everywhere in China.

It is, however, in the 12th article of the English Treaty of 1858 that there occurs the only passage upon the construction of which there can exist a doubt. "British subjects, whether at the ports *or at other places*, desiring to build . . . houses . . . churches, &c., shall make their agreement . . . without exaction." Even if it had been admitted that the italicised words meant nothing, no great harm would have been done; but it being a maxim among diplomatists that every word in a treaty must be made to mean something or other, Sir Frederick Bruce and Mr. Burlinghame, the Ministers of Great Britain and America, agreed that while, by the construction of the treaty, "or other places" could not be "general words," they had been intended to include the port cities, the word "port" being used for the mere quay or strip of land on which the foreign houses stand. In his famous despatch of the 1st of June, 1862, Sir F. Bruce spoke of himself as "not being able to demand the establishment of a Protestant missionary" at a certain town in such a way as to show that the "right of inland residence" never entered into his mind; and in a letter addressed to Mr. Seward in 1864 by the United States' Minister at Peking, and seen and approved by the Ministers of Great Britain, Russia, and France, he speaks of "the right of our citizens to buy, sell, and live in any part of the treaty ports," not in any part of the Empire, and this although the "most favoured-nation clause" of the American treaty would have conferred the right upon their citizens, had it been obtained for ours. These fragments of evidence as to the meaning of the 12th clause of the treaty of Tien-tsin are, however, worth little by the side of the well-known fact that our present Minister at Peking, Sir Rutherford Alcock, in the informal demands lately made to the Chinese Foreign-office for consideration before they are incorporated into our draught by the treaty shortly to be made with China, included this very "right of residence" supposed by many to have been long since granted, and that he has now, it is said, withdrawn the claim in consequence of representations which have been made to him of the inconvenience to both Governments which would be occasioned by the bestowal of the privilege in question.

As it may perhaps be asserted that certain clauses in the French or Russian treaties, securing special favours for the missionaries of the Greek and Catholic creeds, are extended to our Protestant preachers by the most favoured nation clause, it becomes necessary to examine these provisions in order that their bearing upon the right of inland residence may be ascertained. It is, indeed, clear, from the words of several of the treaties, that the right of travelling and preaching throughout China is granted to Christian ministers having passports, and it may accordingly be contended that it is but the enforcement of this right that is claimed in the present instance. Unfortunately, however, it is admitted that our missionaries had "settled" in Yangchow, and one of our demands is that a tablet of stone should be let us, declaring the right of the missionaries "*to reside and teach in the interior*;" a "right" of which the mandarin has doubtless, and for the best of reasons, never heard.

The so-called "right of residence" appears to be founded upon a fraudulent article in the French Convention of 1860, or rather upon words fraudulently inserted in the Chinese translation; for, by Article 3 of the French Treaty of 1858, it is the French text that in all cases governs. The article and forged translation are as follows:—

| CONVENTION. | "CHINESE TRANSLATION. |
|---|---|
| Conformément à l'Edit Impérial rendu le vingt Mars, mil huit cent quarante-six, par l'auguste Empereur Tao-Kouang, les établissements réligieux et de bienfaisance qui ont été confisquées aux Chrétiens pendant les persécutions dont ils ont été les victimes seront rendus à leurs propriétaires par l'entremise du Ministre de France en Chine, auquel le Gouvernement Impérial les fera délivrer avec les cimetières les autres édificesqui en dépendaient. | "It shall be promulgated throughout the length and breadth of the land, in the terms of the Imperial edict of the 20th of Feb. (? March), 1846, that it is permitted to all people in all parts of China to propagate and practise the teachings of the Lord of Heaven; to meet together for the preaching of the doctrine, to build churches and to worship; further, all such as indiscriminately arrest (Christians) shall be punished, and such churches, schools, cemeteries, lands, and buildings, as were owned on former occasions by persecuted Christians shall be paid for, and the money handed over to the French representative at Peking, for transmission to the Christians in the localities concerned. *It is, in addition, permitted to French missionaries to rent and purchase land in all the provinces, and to erect buildings thereon at pleasure.*" |

The history of the forgery of these words, and of a similar passage in the Portuguese Treaty, which has not yet been signed, is well understood in the Chinese Foreign-office, and is not unknown to the representatives of the Great Powers at Peking.

I do not wish to be understood to say that the missionaries have not at any time resided in the interior; all that is asserted is that if they have done so, it has been by a tacit understanding with the local Government, and that we cannot be called in to back them up with arms if evil consequences unfortunately ensue. The Chinese are not disposed to ill-treat the missionaries of England and America. The *Peking Gazette* of the 20th of October, 1865, declared that "it is allowed for missionaries to propagate their faith in the Empire," and in his despatch of the 27th of May, 1867, Mr. Anson Burlinghame wrote to the United States:—"The Chinese Government favours toleration, and has repeatedly informed me that it has no objection to Protestant missionaries, for the reason that they have never appeared to be political agents. I have never yet failed to secure from it a respectful hearing for the cause of Christianity, and such official action against local and exceptional outrage as was required." All that the Chinese demand is that as long as we insist upon the extra-territoriality of our subjects, that so long their permanent residence in the interior, out of reach of the Consuls who alone have authority over them, should not be recognised even when it is permitted.

If it be asked why, when we had the Chinese at our mercy, we neglected to ask for permission to our citizens to dwell where they would in China, we shall find that our reasons were mainly selfish. It being remembered that the treaties secured the extraterritoriality of our people as a consequence their residence out of the reach of our Courts and Consuls would have been attended with the gravest inconvenience to ourselves. So well is this fact understood by our officials at Peking, that it is reported that our representatives upon the unofficial commission, which has for many months been sitting at Peking to discuss the decennial revision of the treaties, have not gone to the length of asking for the absolute and unconditional grant of the right of inland residence. We ask only for the grant of the right of residence to certificated persons and for special trade purposes. On the other hand, the Chinese members of the commission are said to have offered to recommend to their Government that foreigners should be placed on the same footing as Chinese in all respects, provided that in the interior the extraterritoriality of foreigners be given up—a proposition than

Digitized by Google

which none can be more fair, and the cogency of which Sir Rutherford Alcock is said to have admitted by refusing to press for the grant of "inland residence."

2. The second of the questions arising out of the Yangchow affair is that whether the presence of a Minister at Peking does not impliedly, and whether our national adhesion to the "co-operative policy" agreed on between Sir F. Bruce and Mr. Burlinghame, M. Berthémy and M. Vlangaly, does not expressedly bind us to refrain from that practice of "sending gunboats to discuss treaties," to which we appear to have returned on this occasion.

The "co-operative policy" struck out by Sir F. Bruce in 1862, agreed to by the representatives of the Great Powers at Peking, and repeatedly approved by the Home Government, received its most authentic exposition in Mr. Burlinghame's great despatch in 1863, and in Mr. Seward's letter about the *Rover* case in 1867; but, as will be seen, Sir F. Bruce himself acted upon it in the case of the *Pearl* in 1862. Its principle is briefly this:—that as the old policy was co-operation between the Powers for the destruction of the Chinese Empire, the new policy shall be co-operation for its maintenance. The applications of the principle are easy enough, for, once admit that China is an independent nation, and you have only to apply the law of nations to her case. Certain applications were discussed between the Ministers in 1863 and 1864. It was agreed, for instance, that the duties of ships of war should be confined to preventing deeds of violence; to punish was not their business. In a letter of the 15th of June, 1864, Mr. Burlinghame wrote:—

"In no case is the citizen, or the Consul for him, to take the law into his own hands. This would relieve the Chinese Government from that responsibility which should attach to it, and render all friendly relations impossible."

Sir Frederick Bruce was even clearer in his language in the case of the *Pearl*, in 1862, when he wrote to the Consul implicated in the re-seizure of the ship:—

"Whether the Chinese authorities were right or not in claiming to confiscate the vessel, the course you adopted is utterly indefensible. You have taken upon yourself to solve by what is virtually an act of war a question which the Chinese offered to refer to Peking. You have placed me in the dilemma of weakening consular authority by disavowing your acts, or of attempting to justify what is both unjustifiable in principle and inconsistent with the scope and end of the language I have held to the Imperial Government on the relations established between the two countries by the presence of a Minister at Peking."

In another passage he said: "To appeal to force without a reference to Peking is to resort to the system which the Treaties of 1858 were intended to terminate." And again: "Though the seizure might have been unjustifiable, you were not justified in doing more than protest;" and he pointed out "the injurious effect of the action on the attempts I am making to place the relations of Great Britain on an international footing." Finally, he apologised to Prince Kung.

The desecration of the American cemetery at Yangchow in 1866 is another case in point, and there Commander Townsend, of the United States' steamship *Wachusett*, was severely reprimanded for letting his ship be used by Consul Sandford as the *Rinaldo* has been used in the present case. Prince Kung, in a most able State paper, dated the 29th July, 1866, laid down in the Yangchow case the law of nations on the point of reference to Peking. He writes:—

"I may remark that since the foreign treaties have been ratified, every affair growing out of them has been managed and settled by the Consul of the respective nation and the intendent of circuit; but if it were a more serious matter, which they could not settle between them, each party reported the case to their respective superiors at Peking, and waited until the Foreign-office had conferred with the Minister upon it, and each had instructed them how to act. This has been the uniform practice with all nations for these past years."

"The treaty between China and the United States has been in force many years, and every effort should be made to strengthen the peaceful relations between our countries, and not resort to force on every occasion with the expectation that it will carry a thing through. With what ideas does Captain Townsend thus take upon himself to land soldiers at Yingtse and Yangchow, and stir up strife and confusion? If your Excellency is appointed to reside in China to see that treaty provisions are carried into effect and observed, it is impossible to suppose that you can permit any subordinate officer to act just as he pleases, the meanwhile you neither seeing nor hearing anything that he does."

Mr. Williams, the *ad interim* United States' Minister, wrote to Captain Townsend to the same effect, and Mr. Seward's letter was even stronger than the memorandum of Prince Kung. In his despatch of the 20th of November, 1866, he wrote:—

"Every grievance or wrong committed or permitted by the Chinese local authorities, which is sufficiently grave to become the subject of threats or demonstrations of force, is sufficiently serious to be made the subject of an earnest representation to the Chinese Government. No such threats or demonstrations ought to be made without definitive instructions proceeding either from the Legation in China or from this Department."

In still stronger words he disadvowed the armed demonstration that had been made by Captain Townsend.

Sir Rutherford Alcock, our present Minister at Peking, does not seem hitherto to have publicly expressed an opinion upon the co-operative policy; but Mr. Williams, in his despatch of the 6th of January, 1866, states that Sir R. Alcock had given his adhesion to it in conversations at Peking; and, indeed, for him to refuse to walk in the footsteps of Sir Frederick Bruce would be for him to disregard the wishes of the Home Government, and make ridiculous his own position at Peking. On the side of China there is no reluctance to carry out the treaties. The Chinese Foreign-office has repeatedly acknowledged the binding nature of treaties, and has declared itself willing to make amends in all cases where treaty stipulations have been violated, and, in face of this readiness on their part and of the authorship of the co-operative policy upon ours, it is hard to see what can be the business of "Sir Henry Keppel with the *Rodney*, *Rinaldo*, and *Slaney*" at Nanking.

It would be difficult to exaggerate the importance of the news which is reaching us from China. We are returning to the old system of sending gunboats to discuss diplomatic questions with subordinate officials, in defiance of the agreement come to by the representatives of the Great Powers at Peking; we are ignoring the wise rule of the co-operative policy, that when differences arise between a consul and a mandarin the dispute shall be referred to Peking, and then to the consul's Government, before war shall be permitted to arise. Parties the most antagonistic and peoples the most distant are conspiring to force us into war with China—the traders of the treaty ports, making much money, but disappointed at not making more; the French, who, both ruler and people, have any, everything to gain by chaos; the war party in America; and, above all, Russia, are at work. The old, bad, world-wide party which, represented by the ex-slaveholders in America, has also its members among the indigo-planters of India and the opium-dealers of the further East—the party which never admits that the weak races have rights as against the strong—has now for object to "Indianise China," and these men, too, are driving us into war.

Were we but able to see the danger, and not to meet it, there were little use in being warned ourselves and in warning others; but not only may the people of England be reached by the evident justice of the Chinese case, not only may the Liberal parties now at the helm of State in America as in Great Britain stretch out a common hand of aid to China in her sorrows, not only may it be shown to our merchants that a rapidly increasing trade already amounting to seventy-five millions a-year is placed in serious jeopardy, but even to the bad party of oppression a strong appeal may be made, founded on their fears. Aggression by Britain in China, however ready France might be to co-operate with us in our acts, would not now be viewed by America merely with that horror which was shown there in 1859 and 1860. Such aggression, whether by England or England and France combined, would be that cause of war for which a strong party in America is seeking. Were war provoked upon the *Alabama* question, the mass of the Liberal party in America would stand aloof from it, and although a sentiment of national pride might finally lead them to support their Government, the war would be but half-hearted on their side. On the other hand, once let the cry be raised throughout America that the British are Indianising China, and New England and the North-Western States, instead of following doubtingly the lead of New York and California, would be the first to demand war to the death with Britain. Russia, too, would not stand idly by. Whether with good motives or with bad, a Power which already enriches China with a string of ports, an which in Southern Tartary is treading close upon the Mongolian's heels as he retreats towards the East, would not be willing to see England and France reap the harvest for which she is suspected to have toiled for years. Where honour and prudence combined to make care necessary, there should be no fear that a Ministry which includes Mr. Bright would err upon the side of action. But we may be taken unawares; the *Rodney* and *Rinaldo* may bombard Nanking; indeed, they should not have been ordered there unless they be ready to bombard it if our demands, however extravagant, should be refused; and, once a shot fired, our war party will prick up their ears, and it may be too late to counsel caution, and to stand by to see that no check is put to the new-born confidence and trustfulness of China. Let us no longer have one diplomacy for Europe and another for Asia; let us remember that we are not now alone in the East, but that America is there to watch us.

It will be well if the English public should not stop here—should not be content to demand of its Government that war should not arise with China by the acts of our Consuls, or gunboat captains, or our merchants, but that the disinterested part of the community should go on to provide that the revision of the treaty of 1858—which might have been made last year, but which will certainly occur this year or next—should be made in a kind spirit. A commission has already been sitting for many months at Peking to consider our proposals, as yet made only by our Minister and our merchants at the ports, and without authority from home; and the heads of the Chinese Foreign-office—no imbecile officials of the old stamp, but intelligent and educated men—have already been heard to say that if we persist in such demands as that of the abolition of local dues in the port, they may have to tell their Emperor, "Sire, a bullet through the head is preferable to a lingering death."—I am, Sir, your obedient servant,

76, Sloane-street, Chelsea. CHARLES WENTWORTH DILKE.

(THE TIMES.)

It is hard to imagine a case in which there could exist more reasons against war than can be given against such a quarrel as that which has been impending between Great Britain and China. A letter which we publish this morning enforces with considerable weight of argument the same view of the immorality and impolicy of hostilities of this kind as that we supported a few days ago. The telegraphic intelligence of Thursday, that the British fleet has by this time received reparation for the insult to the missionaries at Yangchow, is far from detracting from the practical and present importance of the question. Our correspondent, indeed, makes out almost too strong a case. Any one of the grounds he states might be enough to establish the immorality and impolicy of a contest like this. In the first place, it is more than doubtful whether the missionaries, the aggressions on whom have occasioned the embroilment, are persons who are entitled to represent their injuries as breaches at all of the treaties with this country. As Mr. Dilke points out, the treaty right of residence in China under the protection of British laws is limited to certain specified port-cities. Foreigners do often reside elsewhere in the Empire, and Christian missionaries may, when provided with passports, travel and preach. But the legal position of missionaries permanently settled in districts other than the treaty-towns is essentially distinct from that

Digitized by Google

of foreigners resident in the designated localities. In the latter case they reside in China in their own right as British subjects, with a claim to all the privileges stipulated by treaty; but in the former they are there at their own risk, and, at the highest, by the connivance of the Chinese Government. The question, therefore, of violations of private right in their persons is a matter between them and the Chinese Government, and not one between China and Great Britain. It would have been open to the negotiators of the Treaties of 1842 and 1858 to insist on an extension of the English right of residence in China to the whole of the country. They certainly had the power to compel such a concession, but they had not the will. Our correspondent asserts that not merely has no British Treaty done this, but even that an article to that effect in favour of missionaries which does appear in the Chinese translation of the French Treaty of 1858 is a simple forgery. It is at least abundantly clear that it would have been most inexpedient for our diplomatists to require such a concession from China. Every right implies a duty; but such a right as this, that an Englishman might at his own caprice take up his residence in any quarter of China, and maintain his exemption there from all local jurisdictions, would have imposed an utterly impracticable duty on Great Britain itself. Its consuls in China would be, under such circumstances, responsible at once for the extravagances of their countrymen and for Chinese excesses, stimulated by English eccentricities. The events of the last few weeks show to what an intolerable burden this might grow.

For the British protectorate to be compatible either with our own dignity or with Chinese independence, it must then be restricted to special localities in that huge region. It probably is so restricted by treaty. But the official acts which have brought us into the present embarrassment can be judged and condemned without reference to the merits of any particular question, abstract or practical, respecting the nature and limits of our treaty rights. A body of English residents at a certain place have in this case obtained the aid of an English naval commander, not to defend them against actual or threatened violence, but to procure for them restitution and compensation for alleged wrongs they have already suffered. A procedure like this might be sufficiently satisfactory on the coast of Africa if British merchants had been plundered by a negro chieftain; but to treat the Chinese Empire as though it were a mere geographical name, and as a region where each city is to be dealt with as a separate entity having no subordination to any political whole, was not even formerly thought justifiable except on proof of the inutility of remonstrating with the central authority. To pursue such a line of conduct now, however, is to contradict our own deliberately adopted policy; it is suicidally to throw away the fruits of the last sharp struggle, the very object of which was, by the wresting of a right to keep a resident Embassy at Peking, to hold the Imperial Cabinet itself answerable for the offences of its local officials. The commendable tendency of the Chinese policy of England in late years has been to deal directly with the Empire, and to make the central Government feel that we have direct relations with it, and are entitled to hold the acts of its subordinates its acts. China may have lost in recent times its coherence as an empire, but it has not lost it so entirely that the Court of Peking is incapable of appreciating a sentiment such as this, and to a certain extent, even in its present decadence, of acting upon it. That it does comprehend it the mission of Mr. Burlinghame is a symptom; but the recent demonstration of the *Rodney* and *Rinaldo* at Nanking, if approved at home, cannot but be accepted by the Court of Peking as a sign that Great Britain does not comprehend it herself. If the old policy, which we had thought abandoned since Lord Elgin's expedition, is to be resumed, it will be well, at any rate, to relinquish forthwith the new policy. For naval officers to assert the prerogative of private war against provincial cities, and then for their exploits to become the subject of negotiations at Peking, opens up a vista of never-ending diplomacy, at which an English imagination shudders.

Let it be clearly understood what it is which in our view really constitutes the objectionableness of our recent warlike proceedings. It is not so much that we are offended at the odd spectacle of Christian missionaries haggling about the amount of compensation for persecution they have drawn on themselves by the exercise of their vocation, or that we censure the infliction of chastisement on a Chinese town on the score of the infringement of a British right which may turn out to be no right at all. It is not that we should deprecate war even with China, when the loss is so very certain and the gain so very problematical, on the ground that the decrepitude of the Chinese Empire exempts it from accountability for the conduct of its district officers. We hold unreservedly such a ground to be wholly untenable. But if the right of these English missionaries to reside away from the treaty ports had been ever so incontrovertible, and their injuries ever so justifiable a pretext for hostilities, we should have been equally discontented with the act of an English admiral in claiming satisfaction direct from the offending city, instead of leaving it to the accredited representative of his own Government to exact the penalty, whatever it might be, from the Chinese Government. The British Government is, in fact, pledged against such a course. It is the duty, recognised not merely in theory but in practice, of its Minister at Peking to be the medium for the assertion of the rights of British subjects in China. A British commander would be bound to protect his countrymen against actual or threatened violence, just as it is the duty of individuals in this country, though they be not police constables, to prevent murder. But he has no more title to set on foot an armed negotiation with Chinese officials on his countrymen's behalf than an individual at home has, after witnessing a murder, to put the murderer to death. If he would have had those functions formerly, the appointment by his Government of a resident Plenipotentiary to the Court of Peking must be taken to have amounted to an abdication by his Government of such a right for the future. It is sufficient, perhaps, if the matter is considered from this point of view, and in its bearings solely on the relations between our Government and the Chinese; but it cannot be disguised that conduct like that to which we have referred might in times of international agitation lead to grave embarrassments in the relations also between Great Britain and the other nations interested in China. France, the United States, and Russia, we are told, would claim it as a fair inference from English acts and declarations of the past few years that this country had given up the system of isolated interference in the affairs of China. It may be doubted how far, if at all, we can be considered to have pledged ourselves to any such policy of "co-operation;" but it is, at all events, inexpedient to countenance a course of action on the part of our naval officers which, imitated as it would be by those of our allies, might put the peace, not of China alone, but of Europe and America, at the mercy of the discretion of any two captains who might find their theories at variance as to the right and duty of punishing some offending Chinese mandarin for his conduct to the countrymen of one of them.

(THE STANDARD.)

"His Excellency" Mr. Burlinghame, who has been accredited by the Chinese Government to the world at large, has not hung out his yellow flag from the windows of the Grosvenor Hotel in vain. The mere presence in Europe of an American Ambassador from China has apparently had the effect of giving a new direction to that latent hostility towards British subjects in contact with inferior races abroad which is nourished in certain sections of the Liberal party. Any of our consuls in China who may rashly offer a spirited resistance to outrage or insult at the hands of Chinese mandarins must expect to wear the crown of martyrdom, at last laid down by Mr. Eyre, now that the side of Asiatic violence and treachery is represented by a citizen of the United States. Mr. Reid, the missionary whose eye was knocked out by the crowd of Chinamen at Yangchow, will derive comfort as a Christian from knowing that whether or not he succeeds in forgiving his enemies himself, they are at all events sure of prompt forgiveness from some amongst his countrymen.

At the Shanghai Consulate that transaction assumed a very simple aspect. It was simply an outrage committed by the Chinese; unfortunately not the first, and, still more unfortunately, not likely to be the last. It is probable that only one course of action suggested itself to Mr. Medhurst, at any rate only one was possible, consistently with the performance of his duty as the guardian of British interests in the district. This was to demand from the native authorities such reparation as could be made, and to demand it in the only way which could be expected to have any effect with a Chinese official—with some display of physical force. He accordingly went up the river with the *Rinaldo*, and if it had not been for the singular behaviour of the officer in command of that vessel the whole affair would have begun and ended before the news of it was sent home. The delay, however, in obtaining satisfaction from the Viceroy at Nanking, which followed the withdrawal of the *Rinaldo*, while unfortunate in some respects, conclusively justified the necessity of accompanying the application for redress with a demonstration of force. What the Viceroy had been prepared to concede to a claim advanced in a manner he was able to comprehend, he at once refused when the only remaining consideration in its favour was its abstract justice. The British Consul was compelled to go back to Shanghai in search of another argument, on a level with Chinese understanding, in place of the absent man-of-war. The interval which thus elapsed gave people in this country an opportunity to speculate on the probable issue of the negotiation. Sundry writers in the Liberal press jumped to the conclusion that the difficulty would give rise to a war, an apprehension which we ventured at the time, foreseeing the course which the British representatives on the spot would pursue, to treat as preposterous. Still our contemporaries would have it that there was going to be a war with China, till the telegram in advance of the next mail reported the satisfactory arrangement of the affair on the reappearance of the British flag before Nanking. Hereupon the Liberal policy became obvious. Aggrieved British subjects had been righted. It was clear that the Chinese must have been wronged. The Viceroy of the Two Kiangs had been humiliated, instead of the Englishman abroad, whose humiliation would have been so sweet. It was necessary to hold up to public indignation an admiral and a consul who had been guilty of patriotic conduct in the face of insults from an inferior race. It could not be endured, more especially at a time when we were enjoying the honour of entertaining on our soil an American Ambassador from Peking, that a British bully should tyrannise (with a couple of gunboats) over a weak Power like China, with no more than three hundred and sixty millions of inhabitants. The new member for Chelsea, unable to restrain his feelings till the 19th of February, rushed to *The Times* with two columns of proof that his country must be in the wrong, and that "an old, bad, world-wide party," consisting of various extraordinary persons, on whom some other eccentric adjectives are bestowed, was "driving us into war."

In truth, the party who would, if their policy were carried out, drive us into war before they knew what they were doing, consists of Mr. C. W. Dilke and any companions in opinion that he may have—of people, that is to say, who fail to see the difference between the Chinese and a European nation. It is maintained that, because we have established a Minister at Peking, we must never again help ourselves to justice when we are wronged by provincial mandarins. We must negotiate every complaint through our Minister at the capital, and the Tsun-le-Yamen or "Foreign-office," as admirers of China in this country please to call it. Proceedings must be regularly conducted. Sir Rutherford Alcock must get his report from the Consul of any district where an outrage against the rights of Europeans may be committed, must address a despatch to Prince Kung, convince him in a polite and diplomatic manner that the native authorities have been to blame, and induce him to give orders to the mandarin concerned that "right be done." Of course, that would be the proper routine to follow, if a French provincial prefect maltreated a British subject residing in his jurisdiction, and no other routine would be tolerated by the Government of a civilised nation; but then the Government of a civilised nation would, in the first place be keenly alive to the disgrace involved in the commission of an outrage by one of its own officers on a foreign resident; and, in the second, would have the power of making the subordinate officer obey any orders it might choose to give. Unfortunately, the Government of China would neither care what hap-

Digitized by Google

pened to the foreigner, nor be able to control the mandarin. It might be able to cut off his head in an emergency, but to control him in details would be practically impossible in a country governed by local despotism, where the Supreme Government never troubles itself about particular interest, nor cares about doing justice to individuals if its broad objects are attained. Let us consider how the orthodox method of procedure in the case of outrage committed on Europeans at one of the treaty ports would work. We will assume that, on a false charge of violating the treaty, a steamer owned by a British subject is seized by a local mandarin and confiscated. Say this happens within the jurisdiction of the Canton Government. First of all the steamer is tried, in accordance with the provisions of Mr. Wade's convention with Prince Kung on the subject of Custom-house seizures. The British Consul sits with the Custom-house agents, but has no power of influencing their decision. A few weeks having elapsed, all the legitimate resistance which can be offered is exhausted. Months, indeed, may have been spent thus, but we will assume the most favourable circumstances. The Consul might then address a report on the subject to the Minister at Peking, and three weeks or a month would elapse before the despatch could reach its destination. The delays which then ensue cannot be calculated. The officials of the Foreign Board take months sometimes to answer a communication. Under the most favourable circumstances they might then send down orders to Canton directing renewed investigation into the circumstances of the seizure, and further despatches would be sent backward and forward between Canton and the capital. If the British representatives were earnest, persevering, and importunate, orders might at last come down for the release of the steamer. A year or so after her seizure the British owner might be informed that he could have his vessel again on application to the Custom-house authorities. They, having foreseen for some time the course which the negotiations were taking, would be careful, in revenge for the trouble which had been given them, to injure the vessel in every possible way, and would strip her of every movable article on board. Reduced to half her original value, the owner, having lost her services for twelve months, might recover possession. Do any of our readers imagine that all this is a mass of extravagant suppositions? If so, let us inform them that it is not a fictitious case at all. Exactly in the way we describe, a steamer, called the *Prince Albert*, belonging to a Chinese British subject, residing in Hong Kong, named Quok-a' Cheong, was seized, a year or two ago. Owing, possibly, to the fact that the owner was under colonial and not consular jurisdiction, the British consular authorities moved very languidly in the matter, were only driven into action at all by determined efforts on the part of the Governor of Hong Kong. They negotiated the whole affair in accordance with what Mr. Dilke would consider a correct view of our relations with the Chinese Empire, and more than twelve months after the seizure—a vast sum of money having been meanwhile absorbed in legal expenses—the vessel was given up at Canton in the spring of the current year, denuded of everything which could be stolen out of her, down to movable parts of her machinery. People who read the China papers will be familiar with many similar cases. Where property only is involved the consuls do not like to incur the responsibility of resisting oppression by force, and local mandarins get their own way very often. It is cheaper for the sufferers to submit than to prosecute a claim. The mandarins go as far as they dare, and are only deterred from committing acts which would make foreign residence in, or commerce with, China impossible, by knowing that outrages of too serious a character may perhaps be promptly dealt with on the spot by British men-of-war. If they were relieved of this consideration altogether, in accordance with the policy now recommended to us, and knew that they were only responsible to Peking, whatever they chose to do, the protection of British residents from personal outrage, to say nothing of extortion, which they constantly have to tolerate as it is, would be no longer possible. Things would be done by provincial mandarins which, if dealt with at the capital on the principle *qui fecit per alium fecit per se*, would be enough to plunge us into war a dozen times over, while the local official, successfully staving off imperial censure by delays and pretended investigations, would be encouraged, by personal immunity from the consequence of his acts, to maltreat the handful of foreigners at his mercy more shamefully than ever.

The truth is that China is not what we mean by a civilised country. Her rulers are astute enough to have learned by this time the art of claiming international rights, but they are not sufficiently advanced to comprehend the idea of reciprocity. Their instinct leads them to look upon foreign intercourse as an evil, to resist every concession sought for, to bar the way against the advance of improvement and progress. The people may be easily stirred up to commit safe acts of violence against foreigners, but they have no spontaneous enmity to strangers, and are delighted to avail themselves to the utmost of the advantages which may be derived from foreign intercourse. Witness the way in which they make use of foreign steamers on the Yang-tsze and the coast. Every step which we may make in opening up and developing China is an enormous material gain for all persons concerned, and every new improvement which we may introduce into the country will be accepted with avidity by the people as soon as it is understood. No important step can be taken, however, as long as we behave towards a lot of narrow-minded Asiatic chiefs as if they constituted an enlightened Government, and represented a Power in the foremost ranks of civilisation. There cannot be any real international equality between ourselves and the "Court of Peking." People apply European names to the institutions of semi-civilised countries till they fancy them endowed with all the attributes with which such names are connected in Europe. The Court is simply an obstacle which stands between the countless millions of the Chinese Empire and the blessings of civilisation. The advantages which Europeans might reap if they were the bearers of these blessings are as nothing beside those which would accrue to the Chinese if the foreigners were not tied hand and foot as it is, by the necessity of respecting the ignorant obstructiveness of the native rulers. Capital has long been forthcoming for the construction of railways in China. The most desirable lines have been pointed out, and Europeans have travelled about the country and proved their practicability, but the Court of Peking cannot be persuaded into granting its august consent, and foreign companies who are prepared to do more for the good of the empire than the Manchoos and the Ming dynasty together have done in a thousand years, wait with folded hands while people are being deluded into believing the head-quarters of that official corruption and imbecility which spreads like a disease over China a Government like those of England and France.

# Commercial.

## ARTICLES OF IMPORT.

### TEA.

Our market during the fortnight has been very quiet, the amount of business being even less than usual at this holiday period; but the few sales made have been at rather lower prices for most kinds, the demand being still very limited, and totally inadequate to carry off the supplies daily arriving. There have been no public sales of either India or China Tea since the date of our last.

The demand for siftings has not been so strong, and prices have given way further, Kaisow kinds having been sold at 7½d. per lb. Broken-leaf kinds have been sold to a fair extent at ½d. per lb. decline. Fair to good common have been sold at 1s. to 1s. 0½d. per lb., at which there are now buyers. Fair to good Kaisow kinds show no improvement, prices still ruling very low. Fine to finest Kaisows have only been taken in small quantities at about former prices. Paklin kinds sold at low prices at the last public sales. Amoy kinds show no change. Common to fair black-leaf kinds have sold ½d. per lb. lower, fair quality having realised only 1s. 1d. per lb. Fair to good medium have sold to a moderate extent, but prices have ruled in favour of buyers. Fine to finest have only been taken in small parcels, at rather lower prices. New-make Canton kinds show no change. Oolongs remain very difficult of sale, and prices are in some degree nominal. In Souchongs there has been a moderate amount of business at the recent decline. Flowery Pekoes show no alteration. Scented Teas: Capers remain much as before. Orange Pekoes have still been difficult to move, both the Canton and Foochow kinds. Uncoloured Japans have been inquired for, but we are still without arrivals.

GREEN TEAS.—In these there is but little alteration to notice; the demand has been moderate, but prices on the average show but little variation.

### SILK.

We cannot report any improvement in our market; the same depression exists, and there is no prospect of the coming revival so long expected. To sell any quantity of silk is impossible, and the small business from day to day doing is at decidedly easy rates. If a better inquiry should set in with the new year it would probably be then only for consuming wants, and would be conducted cautiously, as prices are too high for speculation on this market, and stocks too large at these prices. To induce business on any scale lower prices are generally unavoidable; the unsatisfactory consumption going on is a proof how great a check the ruling rates of the last six months have been to business.

### COTTON.

Up to the period of closing for the Christmas holidays the Liverpool market remained steady, but quiet. Business was resumed on the 28th ult., when a considerable improvement on the previous tone of the market was manifested. Holders were less anxious to press sales, and the consequence was that prices from the commencement were more against the buyer, and before the close quotations were officially advanced ⅛d. per lb., both on the spot and for arrival. The increased strength then exhibited has since been further consolidated. The better accounts from Manchester have inspired confidence, and, with a very general and extensive demand, prices have made a further upward movement, quotations being advanced ⅛d. per lb. The supplies offering are on a much reduced scale, and the attention given to arrival cotton is more important. The current quotations on the spot will be found elsewhere. For sales "to arrive" the following have been the latest rates paid for East India:—Dharwar, fair merchants, at sea, 9d.; Oomrawuttee, fair new merchants, ship named, 8¾d.; Comptah, fair new merchants, September sailing, 8¼d.; and Western Madras, fair, sailing August and September, 8d.

In the London market there has also been a marked improvement since the reopening, and prices are fully ¼d. per lb. higher, the current rates being as follows:—Madras: Tinnivelly, 7⅞d. to 8¼d.; Northern and Western, 7⅞d. to 8d. Coconada, 7½d. to 7½d. Scinde, 7d. to 7⅝d. Bengal, 7d. to 7⅝d.

### COFFEE.

A moderate but not active demand exists for most descriptions. The scanty quantities brought to auction this week have found buyers on previous terms, and as no further public sales will be held until Wednesday, the 6th inst., the Colonial market is steadily maintained by private contract. Foreign of common quality is however less firm, and floating business is reported on easier terms. By private contract moderate quantities of Plantation Ceylon have been placed on fully previous terms, and there has also been a disposition to buy Native sorts, but the prices offered being below the requirements of holders no sales of importance have been effected.

The following is a summary of the business done in Ceylon Coffee during the past year:—

The shipments from the island within the crop year, which in the two preceding seasons had declined, has for that ending on the 30th September last, not only recovered but considerably exceeded the pre-

Digitized by Google

vious highest amount. The excess as compared to 1867 is 6,332 tons, and compared to 1865, the previous greatest shipment, is 3,991 tons, the greater part of which excess was consigned to this country, and mostly to London. This increase would not alone probably have caused any important depression in prices, but with a large extension in the production of Plantation sorts on the Continent of British India, with a larger supply also of Native kinds from that source, and the abundance of common qualities in most other European ports, a general depression of some extent ensued. Prices of Plantation declined 1s. at the opening, and at this reduction remained steady for some weeks, and the good coloury qualities of the new crop brought forward as early as the last week in January were steadily taken at extreme rates. Commoner qualities, however, as they have since in a more marked degree, manifested a downward tendency. With this exception the fluctuations for about five months were limited to 1s. to 2s. per cwt., but as against the same portion of 1867 prices were 5s. lower. Very abundant supplies brought to auction early in May met an almost equal demand, and although common sorts sold lower, the finer commanded higher terms. Afterwards, however, even with lighter supplies, the market became weaker, and in June, with heavy quantities in auction, prices gave way during the month 4s. to 5s. per cwt. A slight recovery took place in July, but again in August, when the heaviest auctions of the year were brought forward, a further reduction of 1s. to 2s. took place. Prices were unsteady, and for the bulk of the supply depressed in September, for while fine bold quality realised 86s., second size of equal colour sold at about 76s., small 67s., and small gray 57s. The downward tendency continued until about the middle of October, when prices being 5s. to 7s. per cwt. lower than in January, a reaction at length took place, the advance by the end of the month being 2s. to 3s. This was afterwards fully maintained or slightly exceeded at the end of November. In the present month, however, the desire to buy has been less general, and good coloury qualities only have commanded full terms, and prices are still about 3s. lower than a year ago for all but the qualities above middling, which are on a par.

The extent of the stock of Native on the 1st January with the supplies of the season have allowed sales of good extent throughout the year, and transactions have continually, or with little intermission, been reported partly speculative, but mostly for actual delivery, the market having, until recently, taken a course adverse to investment. Good ordinary was worth 53s. at the opening in January, and during the month declined to 51s. 6d., in February to 50s, in March to 48s., afterwards advancing to 50s. Fresh imports of the new crop brought this price in April. The value fluctuated from 48s. to 50s. in May, declined in June to 47s., and being freely offered declined gradually until about the middle of August, when business was done at 43s. 6d. to 44s.; a reaction to 45s. took place in September, but the market was afterwards dull, and in October the price fell to the lowest point of 43s. 6d. At this reduction the general attention of buyers was drawn to the article; rather large quantities changed hands, and prices advanced almost daily until the end of November, when 50s. 6d. was obtained, or 7s. above the lowest quotation for the year. From this point some reduction has been established this month, and the closing value is about 49s. 6d.

Of the imports of other East India in bags this year, of foreign kinds Singapore has supplied 19,500 bags, Manila 16,050 bags, of Java, chiefly *via* Mauritius, 6,700 bags—total 42,250 bags. The Java was mostly disposed of at 64s. to 72s. In consequence of the unfavourable state of the market during the greater part of the year sales of Singapore and Manila have not been readily effected at relatively low prices. Of the former good Bonthyne sold in January at 71s. to 72s., and in February at about the same rates; in March at 69s., in May 63s. 6d., declining until August, when sales were made at 60s. to 61s., and in October at 56s. to 60s., prices being since rather firmer. Good pale Manila sold in January and February at 56s. to 63s., in March at 53s., April 54s. 6d., May 52s. to 53s.; the market was afterwards very dull, with declining prices, and in September business was done at 46s. to 48s. 6d., in October at 46s. to 46s. 6d. up to 47s. 6d., afterwards rising to 50s., which has since been rather exceeded.

---

TIN.—On the 21st ult. the smelters declared a further advance of £3 per ton, which movement so aided the upward tendency of foreign tin that both Straits and Banca immediately rose £2 per ton. This advance has since been maintained, present quotations being £108 10s. for Banca; £108 to £108 10s. for fine Straits, on the spot; and £109 for Straits afloat. A parcel of Straits has realised £110 with three months prompt, and a fair business is being done for cash at the above-quoted rates. In Holland the market is firmer, 63½ guilders having been paid for cash parcels, and 64¼ ex next sale. The deliveries during the past month have been very large.

CAMPHOR.—The speculative feeling mentioned in our last has been lost, and prices, both spot and to arrive, have receded, business being reported in good quality at £6 10s. per cwt., and to arrive, per Nestor, £6 5s. is talked of.

CLOVES.—Penang are scarce, and in inquiry from 11d. to 1s. per lb. Those afloat per Alvington will meet a ready sale. Zanzibar: The arrival per St. Bede has been offered, comprising 413 bales. Demand continuing, and stock being small of both Penang and Amboyna, very extreme prices were realised, viz., 4⅛d. to 4¼d. for good; 4d. to 4⅛d. for fair; and 3⅞d. to 5d. for dull to very low. 74 bales retired for further higher prices.

CINNAMON.—Prices being extremely high, and the quantity afloat fast increasing (being, on 11th November, 3,749 bales, against 2,950 bales last year), has caused several importers to avail themselves of the present market and realise. Consequently 561 bales and 460 bags chips have been offered and mostly sold, prices showing great irregularity, but establishing a general decline of 6d. to 10d. per lb.; really fine quality being scarce is held for stiff prices.

GALLS.—China: Very large quantities have been brought to auction, partly old, and partly of recent import, when demand being good (principally of a speculative character) all were placed, fair bold slightly broken commencing at 47s. 6d. to 48s. 6d., but market now firm at 48s. 6d. to 49s. Of the quantity offered, viz.: 1,555 boxes, 685 boxes were of recent import, per Clara Babuyan. To arrive parcels are offering at 47s. 6d. without guarantee of quality. Japan: Of the recent large arrival, per Pampero, only 69 boxes have as yet been offered; these realised 48s. 6d. for average quality sound, damages 41s. to 42s. 6d.

GUMS.—Benjamin: This article shows but little alteration. 7 cases bright almondy Singapore brought £8 2s. 6d. to £8 5s.; and of 100 cases 3rds only 30 sold at £1 15s. to £4 17s. 6d. per cwt.; for good marbly, 1 case good at £5, and 1 case good 2nds at £10. No Siam or good quality Sumatra offered. Damer: Without any actual alteration for the better qualities, which are scarce; low kinds most unsaleable, and lower. The sales have comprised 327 cases, odds and ends, which were chiefly bought-in as under:—Batavian at 90s. to 97s. 6d., which latter quotation is value of fine. Singapore was partly quitted at 87s. 6d. to 88s. for very good. Nondescript kinds ranged from 42s. to 45s. Ceylon held for 52s.; low and very dark 23s. to 38s.

HOLLOWAY'S PILLS.—INFLAMMATION CONTROLLED.—All persons should be forewarned by the present sudden atmospheric changes that their maintenance of health depends upon rectifying disorder in, and expelling impurities from, the system, without unnecessary delay. Cases of internal inflammation in the throat, lungs, liver, and bowels are perpetually happening during the winter, and loudly call for a certain curative, such as Holloway's Pills—they supersede blood-letting, mercury, antimony, and similar dangerous treatment. No invalid will be at a loss to treat his complaint on the surest and safest principles who carefully reads through the printed directions folded round every box of these Pills. No danger can result from using this medicine, which may be accounted "The Antidote for Inflammation."

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships, and repair and refit of

STEAM MACHINERY AND BOILERS.

Their large Granite Dock is 307 feet in length, fitted with a caisson-gate, and with a centrifugal steam pump of great power, ensuring despatch in all states of the tides. At average spring tides this dock can receive vessels drawing 16 to 17 feet, and during the autumn and winter months 18 feet. Their two smaller docks, also built of granite, can receivevessels drawing 12 to 13 feet.

The premises comprise a large smithy and boiler shop, carpenters and boat-builders' shops, an

ENGINEERS' WORKSHOP,

fitted with lathes and tools driven by steam,

AN IRON FOUNDRY

for castings up to 5 tons weight, and a BRASS FOUNDRY.

The different departments are superintended by experienced Europeans, viz, engineer, blacksmith, and shipwrights.

The Company keep on hand copper and metal sheathing, spars, timber, paints for iron vessels, and all material for dockyard use.

A DRY GODOWN for reception of stores of vessels requiring to discharge them.

Good quarters for officers of ships under repair in the dock.

Amoy, 16th December, 1867.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## WHARVES.

### SINGAPORE.

NOTICE.

THE undersigned call the attention of Masters and Agents of Vessels discharging at this Port to the great advantage to be gained in point of convenience, despatch, and economy, by making use of their WHARVES at NEW HARBOUR.

With the assistance of Steam Cranes, a general cargo can be landed easily in a few days—or in about one-fifth of the time usually occupied discharging in the roads.

There are large, dry, and very commodious brick Godowns on the Wharves, which vessels have *free* use of for cargo while discharging.

The trouble and disputes with, and pilfering of cargo common among boatmen are avoided by vessels using the Wharves.

Cartage of cargo to the town (which is within easy distance) is guaranteed to be not more than lighterage rom the roads, and the coolie hire discharging alongside is less.

There is always a large stock of the best English and Welsh coals on the premises, which are supplied to steamers at the lowest market price, and vessels going alongside to take in or discharge coals pay *no* wharfage.

Vessels discharging cargo pay a wharfage of 20 cents per ton—a trifling charge when the immense advantages gained are taken into consideration.

Arrangements have been made by which all repairs to ships or steamers can be done with despatch while the vessels are lying alongside the Wharves.

There is an efficient European pilot on the premises and, when required, a steam tug is always available.

**THE BORNEO COMPANY (LIMITED).**

Singapore, April 6, 1868.

### COWASJEE DINSHAW.

# TANJONG PAGAR DOCK COMPANY

(LIMITED).

## VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th inst. In the high tides of the North-East Monsoon there will be a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is now in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

**LONDON AGENTS.**

The next inward mail, with dates from Shanghai to the 9th, and Hong Kong the 15th of December, will be due on the 25th inst.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer *Ripon*, arrived January 8.—From Hong Kong: Mr. Walsh, Mrs. Galton, three children and servant. From Galle: Mr. Keppel Jones.

To Southampton, per P. and O. steamer *Delta*, expected to arrive January 15.—From Penang: Mr. and Mrs. Buchanan, Miss Douglas.

To Gibraltar.—From Hong Kong: Miss Pardo, Lieutenant D'Ory.

To Suez.—From Hong Kong: Mr. Moller.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Pera*, from Southampton, Jan. 9.—To Hong Kong: Mr. E. Ashdown. To Ceylon: Mr. and Mrs. J. Kydd and child, Mrs. Duncan, Miss Allen, Mr. Bowles.

Per P. and O. steamer *Ripon*, from Marseilles, Jan. 17.—To Shanghai (*via* Bombay): Mr. Dawbarn. To Singapore: Mr. J. Steel, Mr A. M. Skinner. To Batavia: Mr. D. Albers, Mr. W. Walker. To Ceylon: Miss Black, Mr. W. K. Nicholson.

Per P. and O. steamer from Suez, Jan. 24.—To Singapore, *via* Bombay: Dr. Carl Ritter Von Scherzer.

Per P. and O. steamer *Tanjore*, from Marseilles, Jan. 24.—To Hong Kong, *via* Bombay: Mr. W. Pomeroy, jun.

Per P. and O. steamer *Ceylon*, from Southampton, Jan. 23.—To Hong Kong: Miss Gazalet, Mr. R Pottinger, R.N., Mr. and Mrs. C. Browne and child, Mr. A. F. Angus, Mr. J. T. Middleton. To Singapore: Mrs. Burn and child, Miss Stevens, Miss Maxwell.

Per P. and O. steamer *Syria*, from Marseilles, Jan. 31.—To Batavia: Mr. Doornik, Mrs. Van Delden and daughter, Mr. G. Van Delden, Mr. M. Van Delden, Mr. and Mrs. B. Decker.

Per P. and O. steamer from Suez, Feb. 7.—To Singapore: Mr. and Mrs. Stahlknecht.

Per P. and O. steamer from Suez, Feb. 14.—To Shanghai (*via* Bombay): Mrs. Gubbay, jun.

## Summary of News from the Far East.

### JAPAN.

Yokohama advices extend to the 20th Nov. The outward mail of Sept. 25 was received on the 18th Nov. The following summary of news is from the *Japan Times*:—

The principal feature of this number of the *Overland Mail* must necessarily be the report of the autumn meeting of the Yokohama Race Club, for nothing else has happened of any importance, and very little attention would have been paid to it if there had. Two thoroughly home feelings Englishmen do manage to conserve during their exile in the East—their love of sport and respect for its great festivals, and during our spring and autumn race meetings business is as carefully suspended as on the Derby day in London. Bankers and merchants array themselves in the peculiar raiment of the Turf, post-captains don tight trousers and the traditional white hat; and we do not despair of seeing, some of these days, a parson in a horseshoe pin. "Favourites" are backed heavily against "fields," "pots" are upset, and men "plunge" on the Yokohama "Turf" as at home; with the gratifying and very satisfactory difference, however, that the favourites as a rule are not worth fifty pounds a-piece, that the pots do not hold more than a few *rouleaux* of silver coin; and that no plunger can ever dive deep enough to hurt himself, the five to ones and the six to fours being generally laid in the humble Mexican of common life. Our owners and trainers and jockeys are gentlemen; jostles and crosses are always unintentional and seldom claimed, for "milking" and "roping" and "nobbling" are sciences of which we are in a happy state of ignorance; and, therefore, the three days' holiday which we take twice a year in beautiful weather, and on probably the prettiest racecourse in the world, is time well spent in harmless, healthful enjoyment. Our little history of life in Japan in fortnightly chapters would be very incomplete if we failed to give due prominence to our record of the races.

We have to apologise for an error in our last. Tsurunga, to which the Tokugawa family has retired, is not on the West Coast. There is a town of that name there, for which we mistook it. The place in question is between this and Osaka.

Preparations are again in progress for the Mikado's promised visit to Yedo. If he come at all, he will come by the *Tokaido*. No official intimation has yet been received by the Foreign Ministers, but common report alleges that he has already left Kioto. It is impossible to guarantee the correctness of the statement, nor indeed is it a certainty that he will move at all at present. All that is really known on the matter is that at the post towns along the road, the *honjins* (official halting-houses) are being put in order, and that a bridge of boats is being constructed across the Logo. It is of great importance that his Majesty should, if possible, visit his Northern Capital, but under present circumstances the move would be attended with great danger. We have taken the opportunity of suggesting to the Japanese Government a method of extrication from their difficulty.

The rebellion in the Northern provinces languishes. There is strong reason to believe the Governmental statement that Wakamatz has fallen, though the friends of the rebels persist in denying it. Both sides give a different colour to each event, even when they are agreed on its occurrence, and do so flatly contradict each other that reliable information can seldom be got for weeks after any circumstance of importance has happened. For instance, the *Kaiyo-mar* was reported to have been seen in Sendai Bay. The rebels' friends in Yokohama immediately gave out that she was blockading the port there and preventing the landing of southern reinforcements. The Government people tell us that she had lost her rudder and was there refitting. This statement is confirmed by a letter received by a foreigner here from a correspondent on board the ship, and the discrepancy between this and the other statement is manifest enough—and a sufficient warning to readers abroad not to put credence in all they hear from Japan.

Digitized by Google

We must not omit to notice, among the events of the fortnight, a ceremony which must have signalised to the Japanese in a very distinct manner the friendly feeling with which the Government of the Mikado is regarded by that of Her Majesty. On the 6th Nov., at half-past ten, the British troops in garrison attended a general parade on the Swamp Concession, when a royal salute was fired to commemorate the fact of the Mikado's coming of age, and a march past took place before two of his representatives here, Higashi Kuzé and the Sahyo Oudaisho, Governor of the Northern Provinces. Sir Harry Parkes was on the ground, and after the review the Japanese nobles accompanied him to the British Legation, where a sword, sent out by H.M. Government, was presented to an officer of the name of Nakai, as a mark of honour and reward for his gallantry on the occasion of Sir Harry Parkes being attacked on the 22nd of March at Kioto. It will be remembered that this officer and another, Goto Shiojiro, who is now at Osaka, engaged and killed one of the men who attempted to assassinate Sir Harry on that occasion; Nakai was wounded. A corresponding mark of honour will be given to Goto Shiojiro at Osaka.

Japan has received another unwelcome guest in the form of a new ally. H. E. M. Von Polsbroek, as Plenipotentiary for his Majesty the King of Sweden and Norway, signed a treaty of friendship, commerce and navigation on the 11th Nov., with Higashi-Kuze Chiujyo, Terashima Tozo, and Iseki Saiyemon, as Plenipotentiaries for H.I.M. the Mikado of Japan. Thus is added another to the list of Powers without a proper governmental establishment, over whose subjects no sufficient control can be exercised, and who have yet the benefit of the ex-territorial clause. Such treaties are mere blinds to mask the gift of a Consulate to some trader; an office unpaid, but carrying with it indirect advantages, of which many who take such posts do not hesitate to avail themselves to the full, in the competition with their less favoured neighbours.

### LATEST INTELLIGENCE.

The Northern Rebellion has collapsed. The foreign Ministers have been officially informed of the unconditional submission of Aidzu; his capital is in the hands of the Imperial troops.

The Mikado's visit to Yedo is now a certainty. On November 17th the foreign Ministers were officially informed that his Imperial Majesty had left Kioto on the 20th of the last Japanese month (the 14th Nov.), that he would halt at Oiso on the 20th, at Funjisawa on the 21st, at Kanagawa on the 22nd, and at Sinagawa on the following day, making his entry into his northern capital on the 24th Nov. The Tokaido being completely to be occupied by the retinue of the Mikado foreigners were requested by the native authorities to refrain from using it from the 20th to the 24th Nov. A convenient place was to be prepared for them at Kenisawa, in Kanagawa, where, on the 22nd, they might witness the procession.

## CHINA.

—o—

### NEWCHWANG.

The Commissioner of Customs makes the following remarks in his quarterly report about the beancake machinery lately erected at this port:—"After no little trouble the machinery for the fabrication of pulse cake, brought to this port by Messrs. T. Platt and Co., has been successfully erected. When in motion it attracts crowds of Chinese, not only from all parts of the town, but also from adjacent villages. Some defects which may considerably retard the commencement of profitable manufacturing have, it is understood, been discovered; it is to be hoped that they will be satisfactorily remedied. The inhabitants of this province are exceptionally free from the superstitions which elsewhere have to bear the responsibility of arresting progress. The machinery will have to dread nothing from those dogged and obstructive ideas which are attributed to the natives in other portions of the Empire. The connection between the native manufacturers and the native exporters, who, it may be said, monopolise the trade, is much less intimate than would at first sight be supposed. The first are almost all Northern Chinese, born and brought up here; the second are almost entirely from the South. Between those two, then, there is no community of interest. The first are purely manufacturers; the others, with one or two exceptions, are, so far as produce is concerned, purely exporters. The very existence of these exceptions proves a dissatisfaction on the part of the latter of the two classes; for, in each case, the southern firm diverted a portion of its capital into this new channel merely in order to, to a certain extent, free itself from the bondage of the native millers. Yet, naturally, owing to the requirements of the southern traders' legitimate business, such an opposition has never exceeded somewhat narrow limits. It is, therefore, to be presumed that the exporters will gladly support the far more extensive scheme originated by Messrs. Platt and Co., when it, in addition, holds forth the inducement of a lower price. Two difficulties, however, will have to be submitted to; the first is the necessity of purchasing, with ready money, all produce during at least two or three years; the second is the unavoidable granting of credit, or receiving, in barter, commodities that probably cannot at once be disposed of. And these two difficulties, of course, resolve themselves into the indispensable devotion to the enterprise of a very large capital. But under existing circumstances, this need cannot be considered an obstacle. To avoid the second of the difficulties which I have suggested, the wealthy firm in the hands of which the undertaking now is, might find it advantageous to itself to forward to the south all that it fabricates."

### SHANGHAI.

From this port we have news to Nov. 26, five days later. No later mails had been received from home in the interval. As usual, we preface our correspondent's letter with a few extracts:—

The *North China Herald* says:—The following further particulars have been furnished us regarding the expulsion of a native Christian teacher from Kia-hing, to which we alluded on the 12th November.

A licensed native minister connected with one of the missions in Shanghai has been ruthlessly cast out of the city of Kia-hing-foo, something *a la* Taylor. He has been studying for the ministry several years past, and preaching nearly every day in one of the chapels of Shanghai. Within the last six months, having finished his course of study, he was licensed to preach, and having secured a house at Kia-hing-foo, about half-way between here and Hang-chow, he moved there with his family, consisting of a wife and one child. Since the Yangchow affair there have been signs of trouble, and he pursued his work with caution. He never opened his place for public preaching, as is done in the open ports, but confined himself to efforts among his neighbours and acquaintances, carrying on his work in a quiet and unobtrusive way. Some time since an uncle of his landlord tried to squeeze him, on the ground that he was connected with foreigners, threatening to have him turned out of the city if he did not comply; and on Saturday a Ningpo friend, who had assisted him in renting the house, was seized and cast into prison, and later in the day was brought bound to the native assistant's house by some fifty or sixty men from the magistrate's office. These latter proceeded to put the missionary's things out of the house, destroying some and stealing others; the balance were taken outside of the city. It was about ten o'clock on Saturday night when they made the attack, and near daylight on Sunday morning before their victim got on board a boat. This is not only a violation of treaty, but contrary to Chinese custom. As this native Christian stands connected with an American Church, we shall probably have a chance to see what course the representatives of that Government intend to pursue in such cases.

The following items are from the *Recorder*:—

Mr. Medhurst received payment on the 20th Nov. of the sums claimed as compensation both in the Wei-quan Barrier affair and also in the Yangchow business; and he was also waiting for the placards, which had been stuck up in various directions, to have due effect, before leaving. Of course, so soon as he is gone they will be pulled down again.

We hear that the British subjects of Chinese descent in this port have set on foot a petition to Sir Rutherford Alcock to rescind his notification concerning clothes; but suggesting that, if they must wear a distinctive costume, it should be the national dress in the time of the Ming Dynasty.

A private but reliable correspondent informs us by the mail just arrived, that Mr. Wade is to succeed Sir Rutherford Alcock as Minister at Peking.

We are informed of an incident strikingly illustrative of the manner in which the Chinese authorities regard the relative status of the native and foreign element in the Burlinghame mission. It seems that Colonel Poston was commissioned to hand Prince Kung a picture representing Mr. Burlinghame and his suite; but that, instead of receiving it graciously his Royal Highness handed it back to his attendants in a great huff, asking how it was that Mr. Burlinghame was represented sitting while the Chinese were standing.

The notification issued on November 10 with respect to the Cheefoo Gold Mines, although apparently disappointing, need not, we think, be hastily taken in that light; as it is quite possible that it is only a preliminary step towards demanding of the Chinese the right to work the mines upon some conditions which will meet existing difficulties. It is not likely that those interested in maintaining order in China will be willing to leave to chance the question whether a number of diggers are to come into hostile collision with the Chinese authorities. Matters have gone so far that there is scarcely a doubt that a large number of men will find their way to Chefoo, and it will be an act of great temerity for the foreign Powers to allow such an event to come upon China without urging the native officials to make due preparation to meet it. We are disposed very much to doubt the accuracy of Sir Rutherford's declaration that digging for gold is *per se* contrary to Treaty.

Some of our readers may have heard of a strange incident which happened to the Danish Envoy sent out some time ago to conclude a treaty with China, who had the greatest difficulty to find his way to any place at Peking, and at last got out of it by following a respectable looking Chinaman, who, it turned out, went at last to the residence of the American Minister, Mr. Burlinghame, who received his unexpected guest with his usual kindness and hospitality. We hear that a very similar mishap befel the new American Minister, for whom the Chinese authorities do not appear to have made any preparations, so that he first found great difficulty in getting carts to take him on to Peking; and when they arrived at the city discovered that the gates were shut. One of the party having a passport, showed it to the gateman, who said that the bearer of it

Digitized by Google

could go in, but nobody else; and after a great deal of consultation, the only way discovered to get out of the difficulty was for the American Minister, his family and party to go into the city nominally as the attendants of the lucky gentleman with the passport. The incident hardly speaks well for Chinese international courtesy.

The *Yuen-tsze fei*, which arrived on the 13th of November, brought down four disappointed diggers from Chefoo, who found themselves unable to make enough for it to be worth while to face so rough a life during the winter months. The impression is still held to that there is plenty of gold to be got at in the quartz; but the washing does not seem profitable. The men seem to think that they have been prevented from finding out the best spots.

Our obituary contains a notice of the sudden death of T. T. Meadows, Esq., H.B.M.'s Consul at Newchwang. The deceased was appointed Consular Interpreter at Canton, July, 1843, and at Shanghai, January 1st, 1852; he was in charge of the Vice-Consulate at Ningpo during 1857 and 1858; was appointed Consul at Newchwang in Manchuria, December 22nd, 1858; was acting Consul at Shanghai from July 23rd, 1859, until April 10th, 1861, since which time to the day of his death he has held the Consulship at Newchwang. His work on the Taiping rebellion obtained him considerable reputation, and like all his writings was characterised by exhaustless erudition and an unconventional and independent vein of thought. Mr. Meadows' decease took place without any warning; he retired to rest in good health on the evening of the 13th, rose early and sat down to his writing desk, as was his wont, on the morning of the 14th, and then without complaining of any pain fell down suddenly dead.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Nov. 24, 1868.

Since I wrote you by French mail we have received no later news from your side. The only topics of interest in the Settlement are the final arrangement of the Yangchow affair (to which I will refer farther on), and an announced alteration in the pilot regulations which have hitherto been in force at this port. The change made in these latter is one suggested by the Chamber of Commerce —compulsory pilotage is abandoned, and the control of the pilots by the harbour-master only is modified.

It would seem as though a reactionary movement against foreign influence in China is fated to manifest itself at certain intervals, the native officials forgetting that just about the time that the recollection of their last humiliation is fading from their memories we are recovering from the fatigue of having punished them. Thus, while personal violence was offered to foreigners at Yangchow, and the rights of property were set at nought by the Hwaiguan Hoppo, the authorities at Tamsui combined both these amusements with gross insults, addressed to the British Vice-Consul. That gentleman, however, having requested the aid of an English gunboat and an American sloop, soon brought the Tamsuiting to his senses. The persons who affronted the Vice-Consul have been dismissed; four of the ringleaders in the assault have been sentenced to a month's cangue each; a hortatory proclamation has been issued to the people, and a full indemnity for the loss of property has been promised. Each day's experience demonstrates more forcibly than the last that there is but one way to deal with the Chinese—that reference to treaties is mere waste of time, and that force, sharply called into play, is the one and sole argument which they understand. I have already told you how successfully this argument was applied at Nanking. It has in like manner worked at the Hwaiquan, the Hoppo of which has eaten humble pie, and offered full compensation for all the wrongs done under his orders. At Yangchow its operation has been fully manifested, everything demanded there has been unconditionally granted, and Mr. Medhurst is now expected back in Shanghai by the next steamer. It is strange that the ill-feeling which is manifested should be altogether on the part of the officials. Of this we have recently had a very good illustration in the case of Mr. Cooper, who, as your readers know, left Hankow some months ago with the intention of exploring a practicable route from the west of China through Thibet and Assam. Having been compelled to abandon this design, he tried to reach the old caravan route from Bhamo to Calcutta. Accordingly, being at Bathang, a twelve days' march from the frontier of Yunan, he started for A-teng-tsze, a trading mart in the north of Yunan. On his road he met no difficulties save that of obtaining food, the natives having been warned not to supply him. However, he contrived to reach the small town of Tonglan. Here he arrived at a most inopportune moment. It is well known that the south-western part of Yunan is now a separate principality, under the sway of a Mahometan ruler. Now Tonglan is a station on the frontier line between Imperial and Mahometan territory, and just before Mr. Cooper's arrival the mandarin of this place, who had for some time acted as a sort of mediator between the two parties, declared decidedly for the Imperialists. He ordered Mr. Cooper back to Wei-si, having reached which place an attack was made by Chinese soldiers, from whom Mr. Cooper was obliged to seek refuge with the magistrate. This latter, having invited him to stay at the yamen, kept him a close prisoner, and endeavoured to rob him of his money, rifle, sword, revolver and field-glasses. Mr. Cooper thereupon tried to escape and fly to Bathang, but was overtaken, brought back, and treated with more rigour than before. Here, however, an unexpected accident of fortune befriended him. The chiefs of some neighbouring aboriginal tribes demanded his liberation, and having obtained it, conveyed him in safety to A-teng-tsze, whence he had no difficulty in reaching Bathang. During his imprisonment he received constant presents of fruit, eggs, and fowls from the people of Wei-si, who thus protested against the cruelty and oppression of the mandarins. Mr. Cooper is at present at Hankow, but his arrival in Shanghai is daily expected.

From Hankow there is very little to report, except the dedication of the new Church of St. John the Evangelist, which was performed by the Lord Bishop of Victoria on the 7th inst. The energy of the Hankow community deserves the highest praise. It was not until last January that the clearing of the ground was commenced, but of course the funds and plans were in full readiness before that time. The building fund amounts to Tls. 5,900, one-half of which was contributed by H.B.M. Government, and the other half raised by voluntary contributions. The community have also subscribed an additional sum of Tls. 270 for the purpose of laying out and fencing the church compound. The church has been built from plans drawn by Mr. Kidner, of Shanghai.

From Japan our most important item of news is the report of a heavy gale which within the last fortnight has passed over the north-west coast, and has caused the total loss of no less than eight native-owned steamers. The *Japan Times* reports that "the northern rebellion has collapsed, the foreign ministers have been officially informed of the unconditional surrender of Aidzu, and his capital is in the hands of the Imperial troops." The Mikado has just concluded a treaty with Sweden and Norway. You, no doubt, have already heard of the sword sent out by the British Government to the Japanese nobleman who killed one of Sir Harry Parke's assailants at Kioto. It was formally presented to him the other day in the Queen's name, and the opportunity was, of course, taken of expressing much good feeling on both sides. It will probably be in the recollection of your readers that some months ago a foreign vessel, in possession of a lot of Chinese coolies, was found drifting on the coast of Japan, near Hakodadi. After a long course of investigation it has been discovered that she was an American ship, called the *Cayalta*, which cleared from Callao with a freight of plantation coolies. Under ill-treatment the coolies rose, and flung every one of the crew overboard, with the exception of the captain, who, on the intercession of the Chinese cook, was spared, with the understanding that he was to bring the vessel into a Chinese port. The first land made was the Amoor coast, and here the captain, having gone ashore, never (so the story goes) came back. The coolies, after waiting some time, put to sea again, and finally drifted on the coast of Japan. The matter is now, I believe, in the hands of the Japanese authorities.

P.S. The news has just arrived of the death of Mr. Thomas Taylor Meadows, Her Majesty's Consul at Newchwang. The cause of his death is said to have been aneurism of the transverse portion of the arch of the aorta.

---

## HONG KONG.

From Hong Kong we have advices to Dec. 2. The outward mail of Oct. 9 was received on the 18th Nov., with London telegrams to Oct. 30, and telegrams three days later had been received by the extra P. and O. steamer *Sultan*. The present mail, it will be seen, brings only six days' later news, and little of interest had occurred in the interval. We take the following items from the local papers:—

The *China Mail* says:—"We receive from the North a confirmation of the news that next year several new ports will be opened. Nanking on the Yangtze, Wenchow, north of Amoy, and Lienchow, on the next coast of the Canton province, are reported on indisputable authority to be certainly opened to foreign trade in the fall of 1869 or the spring of 1870. The favourite project of the Canton authorities, the fostering of trade with Hainan by vessels entering, clearing, and reporting at the Canton Customs, is now definitely rejected. Haik'ou will be thrown open, and the port upon the peninsula will doubtless give an impetus to the sale of opium and piece goods which cannot fail to be beneficial to the colony of Hong Kong. All visitors to Hainan have been struck by the numbers of the Hong Kong registered junks which are always found in harbour there, and the profitable trade which has hitherto been monopolised by Canton firms would, if the port were opened, be shared by the merchants of Hong Kong.

"Mr. Consul Swinhoe has been appointed by the British Minister to visit the ports mentioned, and those places in the interior which are reputed to possess undeveloped mineral resources. His first expedition is to be the coal and iron-fields of Nanking, and from his scientific acquirements favourable results and intelligent reports may be safely expected."

The *Daily Press* states that on the 20th November the splendid premises on the Praya, formerly occupied by Messrs. Dent and Co., were put up at auction by the trustees of the estate. The sale drew together a very large attendance, notwithstanding the unpleasant weather. The lots, with the buildings thereon, were put up separately, beginning with the most eastern wing, next door to Messrs. Gilman and Co.'s building. The first bid was 40,000 dols., and after only a slight competition it was knocked down to Messrs. Smith, Archer, and Co., at 57,000 dols. The western wing on the corner of the Praya and Peddar's Wharf was started at 55,000 dols., and knocked down at 61,000 to Messrs. Melchers and Co.

Digitized by Google

The centre building, formerly used as offices, was started at 20,000 dols., and by slow bids of 500 dols. finally reached 30,000, at which figure it was knocked down to Messrs. Rozario and Co. The bidding was confined to only a few parties, who had no doubt fully determined their limits, and accordingly there was little competition.

## PHILIPPINES.

### MANILA.

Advices from Manila, to the 25th November, state that the people of the Philippines are generally in favour of the new government in Spain. No declaration has yet been made by the Governor-General, but the whole of the proceedings which have lately taken place in Spain have been published in the Goverment *Gazette*. This action on the part of the Governor-General is tantamount to a tacit acknowledgment of his sympathies with the Revolutionists. The news of the disturbances in the mother country does not affect trade, everything being quiet throughout the islands. It is generally anticipated that the authorities will formally recognise the Provisional Government, and that Manila will become a free port.

## STRAITS SETTLEMENTS.

### SINGAPORE.

Advices from this port extend to the 8th December. No later advices had been received from home since the arrival of the mail of October 23, reported in our last. The *Straits Times* gives the following summary of news :—

Admiral Keppel, after having visited Bangkok, Saigon, Sarawak, and come back here, has gone to Penang in H.M.S. *Salamis*.

The Governor continues at Penang, and there has been no meeting of the Legislative Council so far as is known here.

The election of a Municipal Commissioner took place on the 3rd Dec., when the Hon. W. H. Read, M.L.C., was chosen by a large majority of ratepayers.

Perhaps the event of the fortnight has been the sudden dismissal, by his Grace the Duke of Buckingham and Chandos, Her Majesty's Secretary of State for the Colonies, of the Registrar of the Supreme Court in Penang. The facts we believe to be as follows :—It forms part of the Registrar's duty to collect and account for the fees of Court. The Shroff employed by Government for this purpose, who forms part of the Court establishment and was in the office long before Mr. Maxwell became registrar, turned rogue and embezzled a part of the money which he collected, and he did so in a very ingenious way. The sums received were jotted down in his cash-book quite correctly, but the addition was wrong. The amounts he used for his own purposes were from time to time deducted from the total at the foot of the page. This seems to have gone on for some time without detection, because Mr. Maxwell, while checking the entries in the cash-book, omitted, or failed from press of work, to check the additions. The roguery of the Shroff was discovered about August last, we believe, by Mr. Isemonger, of the Auditor's-General's office, and the defalcations were found to amount to some 800 dols. The defalcations were then found to have been begun long before Mr. Maxwell took the office, and in the time of his predecessor. Mr. Maxwell was then in Singapore on his way homewards on leave. He was ordered back to Penang again to examine into the circumstances of the case, as he was responsible to Government for the money. He paid up the amount, prosecuted the shroff before two magistrates, and got him convicted and sentenced to one year's imprisonment—a punishment which we must characterise *en passant* as totally inadequate to the rascality of the Shroff. By the punishment of the actual culprit, ordinary people would think that the ends of justice had been substantially attained, and that, so far as Mr. Maxwell was concerned, a reprimand for his negligence in not looking sharper after his Shroff would be amply sufficient. Mr. Maxwell was known to be, although comparatively young, a diligent, hard-working official, well educated, and fully competent to fulfil the duties of the important office which he held. He was, moreover, from long residence, well acquainted with the place, had had considerable experience, gave the public every satisfaction, and was popular with the natives and Europeans alike. All this went for nothing in the eyes of his Grace of Buckingham. What appears to others venial looseness is, in his Grace's mind, a crime of the deepest dye, unpardonable, and to be expiated by deprivation of office, or, in other words, ruin for life, for in some cases this might have been the result, and it is not his Grace's fault that this will not happen in Mr. Maxwell's case.

It is said that the Governor, Sir Harry Ord, in reporting the matter to the Colonial-office, made every representation in Mr. Maxwell's favour, and that his recommendations were backed up by the heads of departments in the Colonial-office. The Duke of Buckingham, however, was obstinate, insisted upon dismissal, and he, therefore, must bear the whole odium of an order of unnecessary harshness which inflicts gross injustice on a deserving public servant.

The original sin is so small and the punishment so disproportionate thereto, that one is apt to imagine that there must be something else behind which the public do not know of—some concealed motives which influenced the Duke to perpetrate an act of such savage purism, and this may be so, but it is idle to speculate upon this. The Duke may have had in view solely the good of the service, although it may be difficult for us to see this ; or he may have been aiming at securing a nice little piece of patronage, some £1,200 a-year, or he may have been indulging the spite he seems to entertain against lawyers, and especially chief justices ; but, whatever may have been his motives, they cannot palliate in the least degree the uncalled for, we might almost say, brutal severity of his order.

It is a matter of question whether the Duke of Buckingham had power to dismiss the registrar. Under the old charter he had not ; under the new he has. Now the defalcations took place while the old charter was in force, and none but the Chief Justice could take cognisance of or exert control over the officials of the Court. This is a point which we trust to see thoroughly sifted.

### PENANG.

The Duke of Buckingham's cavalier treatment of Mr. Maxwl the Registrar of the Supreme Court at Penang, seems to have created considerable excitement among the Penang community, and to have aroused great indignation. The *Penang Gazette* has a sensible article on the subject, in which it gives expression, in temperate but forcible language, to the general opinion on the subject.

Mr. Maxwell has been seven years in the service ; first as clerk to the Recorder of Penang, then as senior sworn clerk to the Registrar in the Supreme Court (during which period he was called to the bar), then as J. P. and Acting Police Magistrate in Province Wellesley, and, last of all—two years ago—as Registrar of the Supreme Court.

The *Gazette* says that his appointment gave general satisfaction, and that none more fit could have been made. "It is not our object to condole with Mr. Maxwell so much as to point a moral. Let our officials, and our old Indian officers especially, look to themselves. As it was in Mr. Maxwell's case to-day, so may it be, with any one of them to-morrow. Let them expect scant courtesy under the colonial system. Do their work however admirably, they will be counted unprofitable servants. Let them make a slip, and neither age nor station, nor length of service, nor individual merit, will weigh a straw in the balance. The urbanity and generosity of the old Indian Government towards all her servants has been exchanged for red-tape and narrow-minded routine. What has been solemnly done in Downing-street will be repeated from the Colonial Secretary's Office in Singapore as often as it suits the Governor, and every official, from the Chief Justice, who may give an independent vote at the Council Board, to the parish clerk, who may croak an unmusical *Amen*, will find himself no better than a tenant at will.

"Mr. Maxwell's dismissal will, we are confident, be resented by all classes of society as an insult to the feelings of the colony, and will not tend to increase the popularity of our Governor ; for, however he may affect to deplore the result of his reference home, it cannot be doubted that, had he represented the matter in its proper light, Mr. Maxwell would still be Registrar of Penang."

In Bangkok, on the 11th of November, the young King, H.M. Prabat Somdetch Pra Paramindr Maha Chula-long-korn Pa'n Klou Chouyu-hua, was crowned in state in presence of all the princes and grandees of his kingdom, of foreign consuls, and the principal European residents and naval officers in port. The new reign promises to be liberal in its policy.

# Commercial Report.

## CHINA AND JAPAN IMPORTS.

YOKOHAMA.—The demand for staple grey goods continued after the departure of the last mail, and both settlements and deliveries were satisfactory. At the close, however, a threat of the Government to introduce a paper currency, which foreigners will not accept, had frightened the dealers, and business had been brought to a standstill. Black Velvets remained as reported in our last, good qualities, absent from the market, being in full inquiry. The demand then noted for Taffechelass was subsiding, and other cottons were not wanted. Woollens had remained inactive ; the demand for Black Camlets had slackened, and hardly anything else was asked for except blankets, of which there were no stocks. Cotton has again declined. The current quotations were as follows :—Cotton Yarn, Nos. 16 to 24, $47.50 to 48.50 per picul ; 28 to 32, $51 to 52 ; Grey Shirtings : 7 lbs., $2.50 to 2.55 per piece ; 8.4 to 8.8 lbs., $3.05 to 3.12. White Shirtings, $2.80 to 3.60 ; T-Cloths, $1.90 to 2.40 ; Camlets, S., $16 to 17 per piece ; Cloth, Broad, $1.50 to 2 per yard ; Medium, $1 to 1.75 ; Blankets $0.80 to $0.90 per lb. ; Iron, Nail Rod, $3.10 to 3.40 per picul ; Hoop, $4.25 to 4.50 ; Lead, $7.50 to 8.

TIENTSIN.—There had been a good business doing during the interval in Plain Cottons and Grey Shirtings, the latter being quoted two to three candareens higher.

SHANGHAI.—A moderate business had been transacted in grey goods since the departure of last mail, though the prices current had generally been unsatisfactory. About 60,000 to 65,000 pieces of Grey Shirtings had been placed from first hands, at gradually declining rates ; the closing quotations being Tls. 2 to 2.03 for 7 lbs., and Tls. 2.16 to 2.19 for 8.4 lbs. ; 9 lbs. to 9.12 lbs. were dull of sale at Tls. 2.60 to 3 per piece. The

Digitized by Google

stock was materially reduced owing to the absence of arrivals from England and large re-exports. These latter for the three weeks ending 21st Nov. had mounted up to the large total of 42,000 pieces. Further supplies were daily looked for, and it was far from certain if any recovery could be expected until the spring season began, and even then stocks were likely to be very heavy. T-Cloths had been in less request than during the previous fortnight, but there was no material change in value to report; 6 lbs. were quoted Tls. 1.40 to 1.55 per piece, and 7 lbs. Tls. 1.65 to 1.90, the latter being for very finest quality; 8 lbs. 36 in. remained low in price, ordinary goods ranging from Tls. 2.05 to 2.15 per piece. White Shirtings were slightly higher during the early part of the fortnight, but had since receded, and best 66 reed could not be placed at over Tls. 2.35 per piece; 56 reed were worth Tls. 1.95 to 2. Drills: American showed no change in price, but transactions had been only to a limited extent. English and Dutch were lower, with a moderate demand. Jeans: In English no sales were quoted; American goods (40 yds.) had been placed from first hands at Tls. 4.78 per piece, and subsequently resold at Tls. 4.95 per piece. Sheetings: A small inquiry had existed for American, and sales of ordinary makes from secondhand had taken place at Tls. 4.07 to 4.10 per piece. Best Cloth was worth rather over these figures. Fancy Goods: Moderate sales of Dyed Brocades and Dyed Spots were reported at last rates. Damasks were difficult to place, and Gentian Shirtings were much wanted. In Chintzes a good business was reported at last rates. Black Velveteens show a rise, while Blue and Black Velvets had not maintained their former price. Woollens: Camlets (S.S.) had been placed at slightly lower prices for assortments, owing to a fall in value of Scarlet, Dark Blue and Orange. Long Ells were also lower in price, for both Scarlet and Assorted. In Figured Orleans there was little change to note. Lastings had been in good inquiry at quotations. Black being specially asked for, while sales of Crape Lastings were reported at Tls. 5.30 to 5.40 per piece. Metals: Nail Rod Iron: without arrivals, the market had been quiet, and prices were unchanged. Fine to good assortments, Tls. 2.30 to 2.60. The closing of the Northern markets would reduce demaud, and any great addition to stocks would cause a decline in prices. Lead: 5,235 piculs had been exported; the stock was almost nil; prices had advanced 4 mace to 5 mace per picul. Sales of LB had been made to arrive at Tls. 5.8, and Tls. 6 was asked. Coals: Small arrivals had somewhat strengthened the tone of the market. There had been three arrivals only, one from Wales and two from Australia. Cardiff part cargo, sold at Tls. 11.25. English, no transactions. American, in fair request and firm.

HANKOW.—Improved businesss in Piece Goods had been transacted. Grey Shirtings: During the early part of the fortnight sales of 8¼ lbs. were made at Tls. 2.1.3. to 2.1.5, but an advance of 5 candereens had since been established, and quotations were, 8¼ lbs., Tls. 2.1.5 to 2.2.; 7 lbs., Tls. 2 to 2.0.3; the demand continued very trifling. T-Cloths had been little wanted, only 7 lbs. met with any attention. Drills in better inquiry, and prices for American 5 candereens to one mace higher. White Shirtings: 64 to 66 reed in moderate request. Fancy Cotton Goods: Most descriptions were comparatively neglected. Dyed Brocades and Damasks had been in small demand. Woollens and Worsteds: Camlets and Long Ells found buyers in limited quantities, but at low rates. Lastings had been little inquired for. Figured Orleans were firmer, for good assortments. Lead had been sold at Tls. 6.4 to 6.5.5, but the demand was satisfied, and the quotation was Tls. 6.1 to 6.2 per picul.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated Nov. 30:—Cotton Yarn: There were no transactions during the early part of the interval, but a few small parcels have been taken during the past few days at about former figures, dealers refusing to make any concessions. Piece Goods: Three vessels with general cargoes have arrived from London, bringing considerable parcels of manufactures, and in view of the expected early arrival of further supplies, importers have become more anxious to sell, while dealers, on the other hand, are holding off and buying only for actual wants. A parcel of 18,000 pieces 8.4 lbs. Grey Shirtings was offered a few days ago by one of the leading importing houses at $2.67½, two months time, but the intending buyers refused to pay over $2.65, and the negotiations fell through; but the fact of goods being offered on such terms has had a depressing effect, and it will require some time for the market to recover. Common White Shirtings, Assorted Brocades and Spotted Shirtings, and 30 yard English Drills are the only goods that have not declined in values, and this is solely because stocks are light, and also that relative values for some time past have been lower than those of other descriptions. A sale of 840 pieces 30 yard Jeans has been made at $4.50 per piece, but there are no buyers of Drills, owing to the lateness of the season, and quotations for all American Cottons are now quite nominal. Woollens: Only a limited business has been done. Long Ells have been entirely neglected, and are quoted 10 cents lower. Scarlet Spanish Stripes are not wanted, and very weak, but there is some inquiry for Assorted—best qualities—at former values. Blankets still find favour, and have further advanced. Lastings and Camlets are firmly held, but the only sale has been a small parcel of common Lastings at $13.40 per piece. Metals: There is a better feeling in the Iron market, especially for Nail Rod, which is 15 cents per picul dearer. Wire and Steel are easier. Lead is wanted, and tends upwards. A considerable business has been done in Tin, but at a marked decline, holders being willing sellers. Quicksilver is unchanged. Coal: Receipts amount to 1,900 tons English (1,350 to consumers); 2,320 tons Welsh (1,120 to consumers); 1,860 tons Australian (1,395 to consumers); and 512 tons Anthracite, to consumers. The only sale has been 250 tons Sydney, ex godown, at $8.50 per ton, but there are sellers, ex ship, of cargoes at our quotations. Ginseng: There is very little inquiry, and offers made are below the market, which is rather weaker. A sale of 24 casks Crude, out of condition, has been quitted at $110½ per picul. The current quotations were as follows:—Cotton Yarn, Nos. 16-24, per picul, $105 to 122.50; Nos. 28-32, $136 to 144. Grey Shirtings, 7 to 7¾ lbs., per piece, $2.40 to 4.45; 8 to 8¾ lbs., $2.75 to 2.82. White Shirtings, $2.45 to 3.20. Woollen Goods:—Long Ells, per piece, $8.85 to 8.65; Camlets, SSS, $15.75 to 16.75; SS, $16.50 to 16.75; Iron, Nail Rod, per picul, $2.40 to 2.65; Hoop, $3 to 2.85; Bar, $1.85 to 2.20; Lead, $6.40 to 7. Coals, afloat, per ton, English steam, $11 to 10.05; American anthracite, $12.50 to 12.

## CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—Business during the fortnight had been on a moderate scale, and settlements, consisting principally of good common to good medium sorts, did not exceed 1,500 piculs. Although prices again show a downward tendency, the business done had been too small to affect them to any extent; quotations, therefore, must be considered almost nominal. Arrivals had come forward freely, and stocks were heavy. The quality of late supplies was considered to be somewhat better. The Havilah and Queen of the Age had sailed for New York with 1,258,516 lbs., the Alexandria and Brave were loading for the same port. Quotations:—Common, $19 to 22 per picul; good common, $23 to 24; medium, $25 to 26; good medium, $28 to 30; fine, $30 to 35; finest, $36 to 40; choice, nominal.

SHANGHAI.—Black: An important business in Congous had again been transacted, settlements being 11,620 chests, made chiefly during the early part of the fortnight. Natives, taking advantage of the demand, recovered the decline quoted in our last, and though at the close there was less disposition shown to purchase, they were by no means eager sellers, and the market closed firm, but quiet, at the advance. Settlements for the fortnight, 11,620 chests; reshipments on owners' account, 2,239 chests; stock, 50 chops, or 16,810 chests. The quotations (duty paid at exchange 5s. 10½d., freight £2. 10s.), were as follows:—Hohow, common, 11¾d. to 1s. 0½d.; Oonam, common, 1s. to 1s. 0½d.; Ningchow, common to fair, 1s. 0½d. to 1s. 1¾d.; Oopack, common, 1s. 0½d. Green: In Green Teas, also, transactions had been large, American buyers being still the principal operators. Fine to finest Moyunes had been the most in request, and these, especially the latter, had ruled rather higher. Common to medium grades, on the other hand had been comparatively neglected, and were again easier. Settlements had been irregular, but a fall in them of ½ to 1 tael was quoted. Settlements and reshipments consisted of 30,640 half-chests Tienkai and Moyune, at Tls. 36 to 45½; 4,198 half-chests Fychow, at Tls. 28 to 36; 3,551 half-chests Shanghai-packed, at Tls. 24 to 34; 715 half-chests Pingsuey, at Tls. 33. Settlements for the fortnight, 38,463 half-chests: re-shipments on owners' account, 611 half-chests; stock, 142 chops, or 76,291 half-chests. Quotations (exchange, &c., as above) were as follows:—For Fychow and Moyune Teas: Gunpowder, 1s. 5½d. to 3s. 6d.; Imperial, 1s. 2d. to 2s. 9d.; Young Hyson, 11¼d. to 3s. 1d.; Hyson, 1s. 1¼d. to 3s. 3d.; Twankay, 8¼d. to 1s. 6d.

HANKOW.—Only one chop had been purchased, 261 chests, at Tls. 14¾ per picul, but 2,748 chests had been forwarded to Shanghai. There was no stock remaining. Export of Tea from 1st January to 18th November, 1868, 44,579,200 lbs.; from 1st January to 18th November, 1867, 34,707,142 lbs.

KIUKIANG.—Black Teas: Arrivals from the country were reported as about 3,300 chests, being on a liberal scale for the time of the year, of these only 220 half-chests common Ningohow had been settled at Tls. 14½ per picul, the remainder having been forwarded to Shanghai for sale. Quotations were—Ningchows, common Tls. 14½; Hohows, no settlements. Export from 1st January to 20th November, 1868, 153,668 chests; export from 1st January to 20th November, 1867, 109,837. Stock, 102 chests. Green Teas: No business whatever was reported in Green Teas, and the arrivals were said to be falling off. About 40,000 packages further would, it was estimated, complete the season's yield.

FOOCHOW.—The following is from Messrs. Odell and Co.'s Circular, dated 20th November:—Our last report was dated 6th inst., since when there has been almost a total cessation of business. Congous.—Transactions have been limited to the settlement of a few small parcels of common kinds required to complete the lading of a vessel for Australia, and one for the Continent. On English account there have not been any transactions, buyers waiting much lower prices. The teamen continue very firm holders, and as yet are unwilling to accede to a decline of more than Tl. 1 to 1½ per picul. Arrivals from the country have been but small, though there are about 30,000 chests still to come to hand to complete the season's supply. Souchongs.—About 280 chests have found buyers. Oolongs.—There have not been any transactions, holders still refusing to meet the views of American buyers. Scented Teas are in but little request. Flowery Pekoes.—A few parcels have been taken on Indian account. Settlements for the fortnight have been: Congou, 1,709 chests, at Tls. 9.8 to 19.3 per picul, ship off. Souchong, 289 chests, at Tls. 19 to 25.3, do., do.; Oolong, nil; Scented Teas, 1,020 boxes, at Tls. 22.8 per picul, ship off; Flowery Pekoe, 480 chests. at Tls. 20.8 to 30.8, do., do.

CANTON.—Daring the early part of the fortnight there was some inquiry for scented teas, resulting in quite liberal settlements, considering the lateness of the season, and at prices about equal to last mail's quotations. Holders of Capers were rather firmer in their demands, owing to the scarcity of any desirable parcels of this description. The buying had been confined principally to one or two parties. The stock of country Congou remained as last advised, 2,220 chests. The following were the settlements reported:—Scented Orange Pekoe, 2,000 boxes at Tls. 18 to 31; Scented Caper, 11,000 boxes at Tls. 17 to 23; Gunpowder, 1,600 boxes at Tls. 16 to 20; Canton Congou, 1,200 ½-chests at Tls. 17 to 18.

### SILK.

YOKOHAMA.—The market had been active during the fortnight, but supplies had not been so heavy as before. Prices for all descriptions had been generally fully maintained, and even the extreme price of $1,060 had been paid for an extra good parcel of Hanks. There was no improvement to be noticed in the quality of the Silk that had reached this market. Silkworms' Eggs: The season may now be considered closed, the total export was estimated at about 2,000,000 cards, against 800,000 last year. The current quotations for Silk (laid down in London at exchange 4s. 5½d.) were as follows:—Hanks—Mybash, Sinchu, &c., extra, 37s. 8d. to 40s. 7d.; best, 35s. 0d. to 36s. 11d.; medium, 32s. 0d. to 33s. 11d.; inferior, 29s. 8d. to 31s. 3d.; Oshu, extra, nominal, 37s. 8d.; best, 33s. 11d. to 35s. 9d.; medium, 28s. 7d. to 30s. 6d.; inferior, 24s. 10d. to 27s. 1d.; Coshu, best, 32s. 5d. to 33s. 11d.; medium, 28s. 3d. to 30s. 2d.; inferior, 26s. 4d. to 27s. 6d.; Sodai, best, nominal, 30s. 2d.; medium, 27s. 6d. to 29s. 0d.; Etchesen, best, 26s. 4d. to 27s. 6d.; 2, 22s. 7d. to 24s. 6d.; inferior, 18s. 9d. to 20s. 8d.; Mashta, best, 23s. 9d. to 25s. 3d.; inferior, 18s. 9d. to 20s. 8d.

Digitized by Google

SHANGHAI.—Under date 24th November Messrs. Skeggs and Co.'s Circular contains the following:—Business was quiet during the early part of the fortnight, but there has since been a good deal of brisk buying, and settlements now amount to about 1,600 bales, at prices still on the advance. Exchange is again lower, but, as usual, has been more than discounted by the prices paid, and it almost seems as if the Native dealers had the entire command of the market, and had only to name their own terms and still find purchasers. The advance on Tsatlees averages about 10 taels on the good and best grades, whilst for fours, fives and commoner kinds, 15 taels will hardly cover the rise. Tls. 590 has been offered for Chooping's chop, but he still holds out for more; "Dragons" and "Yakees" have been taken at Tls. 575 to 580, and a few bales of "Donkeys" and "King Johns" have been settled at Tls. 577½ for thirds alone; "Red Peacocks" have been sold at Tls. 500. Hainins are 10 to 20 taels up. Kaihings show a similar rise for ordinary chops, and Chincums, though very irregular, are also dearer. The finest Re-reeled Hainings have been taken at previous rates, but dealers being anxious to sell the commoner descriptions, submit to a slight decline, and the same may be said of Re-reeled Tsatlees. Trams and Organzines are very scarce, and firmly held for long prices. Our export has now reached over 38,000 bales, but the dealers still very decidedly affirm that the total will not exceed 48,000 to 49,000 bales.

### SHARES.

Hong Kong and Shanghai Bank, New, 3½; Old, 21 per cent. premium
Hong Kong Gas Company, 42 dols. per share.
Hong Kong and Whampoa Dock, New 6; Old, 25 per cent. disco unt.
Union Dock Company, 20 per cent. discount.
China Traders' Insurance, 400 dols. premium.
Hotel shares, 55 per cent. discount.
Hong Kong and Macao Steamboat Company, 6 per cent. discount.

The following is from Messrs. Sharp and Co.'s Circular:—

EXCHANGE.—Since the departure of last mail sterling rates have declined 1 to 1½ per cent. On the opening of business Bank paper was placed at 4s. 4⅝d. and 4s. 5d. six months' sight, but the demand at these rates was considerable, and they could only be obtained for a short time. Some demand for credit bills at 4s. 5d. six months' sight has existed, the supply of paper, however, has not been large, and 4s. 4⅝d. has in some instances been obtained. The Calcutta steamers left on the 20th inst., and there has been but little demand since for rupee paper. Tenders for H.M. Treasury Bills at thirty days' sight have been invited as usual, and offers of 4s. 4d. and 4s. 4⅛d. were accepted, but only a limited demand was found to exist. The estimated amount of business by the present opportunity is about £320,000, say £130,000 Bank Bills, and £190,000 private paper, and seven lahks rupees. The greater portion of this latter amount was sold prior to the departure of the Calcutta steamers, but subsequent to that of the last English mail.

*Bullion.*—No business has been done in Bar Silver, and the price is nominally 8½ per cent. premium. Large shipments of Sycee have taken place from Shanghai, but the demand for remittance to India is very limited, and only a small quantity has changed hands. The present quotation may be given at 6¾ per cent. premium.

*Shares.*—The Share Market has been exceedingly quiet during the past fortnight, and quotations remain much the same as those given for last mail. A few Old Bank have changed hands at 21 premium, and a small parcel of New was placed at 3½; but there are few, if any, more sellers at this rate; the stock is very firm, and any future business will no doubt be done at an advance on these rates. Several parcels of New Whampoa Dock have been placed at 25 discount, but there are no further sellers at this rate. A few Steamboat fetched 6 discount, but there are no more to be had at this price. In other kinds of stock there has been nothing doing, and rates must be taken as more or loss nominal.

# Shipping Intelligence.

## ARRIVALS.

At YOKOHAMA.—From New York, Nov. 17, Alcoyne.

At SHANGHAI.—From Cardiff, Nov. 19, Albatross.

At HONG KONG and CANTON.—From London, Nov. 20, Roslin Castle; 22, Whitehall; from Liverpool, 21, Malvina Vidal; from Sunderland, 23, Stanley; from Cardiff, 25, Garibaldi; from Newcastle, 20, Carmelita and Ida; from Havre, 28, Taffarette; from Hamburg, 22, Esmeralda; from New York, 23, Rocket.

At MANILA.—From Liverpool, 21, Ercilla.

At SINGAPORE.—From London, Dec. 3, United Service, Petchelee; from Liverpool, 7, Malacca; from England, 3, H.M.S. Himalaya; from Cardiff, Nov. 27, Blanche; Dec. 7, Sadowa; from Glasgow, 4, Kinfauns Castle.

At PENANG.—None.

## DEPARTURES.

From YOKOHAMA.—For New York, Nov. 9, Havilah; 11, Queen of the Age.

From SHANGHAI.—For London, 14, Polmaise; for New York, 20, Banian.

From FOOCHOW.—For London, Nov. 10, Ironside; for Falmouth, 6, Alexander.

From HONG KONG and CANTON.—For Falmouth, Nov. 16, Ta-lee; for New York 16, Princess of Wales.

From MANILA.—For London, 16, Jamaica (via Cebu), 16, Palm Tree; for Liverpool, 21, Clytie; for Falmouth, 19, Havfruen; for Cadiz, 20, Florida Blanca; for Boston, 19, Competitor; for New York, 20, W. Wilson.

From SINGAPORE.—For Liverpool, Nov. 25, Khimjee Oodowjee; for Hamburg, 24, Varuna.

From PENANG.—For Bordeaux, Dec. 1, Aurelie.

## VESSELS LOADING.

At YOKOHAMA.—For London, Johanna Marrie; for New York, Alexandra, Brave, N. B. Palmer, Glendoveer.

At SHANGHAI.—For London, J. M. Joshua, Zeminda; for New York, Dartmouth, Falcon, Golden State, Etha Rickmers, Laurel, Sir William Wallace.

At FOOCHOW.—For London, Ocean Chief.

At HONG KONG and CANTON.—For New York, Sterling, Louisa.

At MANILA.—For Cork, Lord of the Isles, Serafin; for Falmouth, M. Lopez; for New York, Frederick.

At SINGAPORE.—For Bordeaux, Deux Freres; for Boston, Elizabeth.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To New York, £3 10s. to £3 15s. per ton, and $45 per P.M. strs.

At SHANGHAI.—To London the rate is £2 10s. per ton of 50 cubic feet; the steamer Ajax is loading at £3 per 40 feet. To New York vessels on the berth are loading slowly at £3.

At FOOCHOW.—To London: £2 10s. per ton.

At HONG KONG and CANTON.—There is less inquiry for vessels to load homewards, and in local business the only demand is for Yokohama at low rates. The Excelsior (388) has been fixed to load at Canton, for United Kingdom or Continent, at £2 15s. per ton; Trinculo (310), Singapore to United Kingdom or Continent, £3; if to United States, £3 5s.; Bertha (232), Singapore to New York, £3 5s. per ton.

Digitized by Google

At MANILA.—No settlements have been made.

At SINGAPORE.—The Petchelee is laid on for Liverpool at £2 15s. per ton for dead weight and light freight, and the Kinfauns Castle will also load for Liverpool at the same rate, and for Glasgow at £2 17s. 6d. per ton; the steamer Ajax, expected from Shanghai, has engaged cargo for London and Liverpool, taking sago flour at £3, coffee at £3 7s. 6d., measurement goods at £3 10s. per ton.

At PENANG.—There are no settlements to report, but suitable vessels are wanted to load for Europe.

At BATAVIA.—Large arrivals have taken place during the month both of free and chartered vessels, and rates have declined. The bulk of this season's crop has now been shipped, and we look for a gradual decline in rates. Our present quotation for sugar to Holland is 75f. per last, gross weight delivered, equal to about £3 10s. per ton net weight.

## SHIPPING POSTSCRIPT.

—o—

ARRIVALS NOT IN THE TABLES.—Jan. 10, at Falmouth, from Batavia, Lotus; from Akyab, Athena; at Liverpool, from Manila, Elena; at Queenstown, from Rangoon, Mathilde; Dec. 23, at Boston, from Manila, Wild Rover; Dec. 28, at New York, from China and Japan, Alaska.

DEPARTURES.—Dec. 7, from Liverpool, for Shanghai, Conqueror; from Margate Roads, for Singapore, Assecuradeur; 11, from San Francisco, for Hong Kong, Windward; 26, from Boston, for Hong Kong, Formosa.

LAID ON.—At Liverpool, for Shanghai, M. E. Nelson.

SPOKEN.—Northumberland, from Batavia, Nov. 26, 2 N., 23 W.; a small barque, of Bremen, Cardiff to Batavia, 6 N., 27 W.; James Shepherd, London to Shanghai, Sept. 24, off the North-west Cape.

## THE NEW STEAMSHIP "DECCAN."

This fine vessel, the latest addition to the Peninsular and Oriental Company's fleet, built and engined by Messrs. William Denny Brothers, of Dumbarton, was taken to Stokes Bay for an official trial on Thursday, the 7th inst. The *Deccan*, which closely approximates in size and burden to the celebrated *Himalaya*, is one of the large class of steamships provided by the Peninsular and Oriental Company to meet the requirements of their new postal contracts in the East, and will leave Southampton for India in the course of a few days. Her principal dimensions are as follows:—Length between perpendiculars, 345 feet; breadth of beam, 42 feet; depth of hold, 30½ feet; builders' measurement, 3,001; gross tonnage, 3,128. She is fitted with engines of 600 nominal horse power (indicating 2,730 during Thursday's trial), diameter of cylinders 76 inches, and length of stroke 4 feet; and has a four-bladed propeller of 18 feet 10 inches diameter, with a pitch of 27½ to 30½, weighing 12½ tons. Two runs at the measured mile showed a mean speed of 13·733 knots per hour. On leaving Stokes Bay the *Deccan's* head was put to sea, and she ran round the Isle of Wight, steaming from the Warner Light (a stiff westerly breeze which was found to be blowing outside the Wight compelling her to run several miles out to sea) to the Needles in two hours thirty-five minutes. After rounding the Island a visit was made to the company's sailing ship *Indus*, bound to India with a cargo of machinery, which has been detained by adverse winds for over a fortnight at the Mother-bank, where a large fleet of fine windbound vessels is lying waiting for a favourable change of wind. Among the gentlemen on board the *Deccan*, which is commanded by Captain J. R. Kellock, were Messrs. Hadow (chairman), Engledue, L'Estrange, Thornton, C.B., and the Hon. R. Melville, directors; Messrs. Allan and Bailey, managing directors; Messrs. Edmund Yates, Rea, and Bidwell, of the General Post-office; Sir William Anderson Rose, Captain T. Black, Mr. Andrew Lamb, Mr. R. Stirling Begbie, Dr. J. Weblin, F.R.C.S., Mr. T. Summers, Captains Weeks, Methven, Christian, Jamieson, and Kirton, Mr. A. Gray, Mr. Pinsent, and other officials of the company. During the trip a sumptuous *dejeuner* was served in the *Deccan's* noble saloon, presided over by Mr. Hadow, who, after the usual loyal toasts had been duly honoured, proposed, "Success to the *Deccan*, and the Health of her Builders." In the course of his remarks the chairman said that the directors were determined, by building ships of large [size and tonnage, to carry out the arrangements of the Government in a liberal way, and he hoped and believed that the new contracts would prove equally advantageous to the Government and the public, and be highly benefical to the great and increasing traffic with India and the East. He expressed the perfect satisfaction of the directors with the manner in which the Messrs. Denny had completed the *Deccan* in every department. Mr. Denny responded to the toast in a humorous speech, and proposed "Success to the Peninsular and Oriental Company," which was acknowledged by Mr. Hadow. A sister ship to the *Deccan*, to be named the *Hindostan*, of 3,000 tons and 600-horse power, is building at Messrs. Day and Co.'s ironworks at Southampton, and will be ready for sea in August.

## TELEGRAPHIC COMMUNICATION WITH CHINA.

The *Daily Telegraph* last week had the following short article on the need for direct telegraphic communication with China, and the letter appended below appeared in the columns of the same paper:—

"The new understanding announced with respect to the relations of England and China does not really involve anything very new. The result of the conversations to which the report alludes is simply that the existing regulations shall in future be more stringently enforced on both sides. At the same time, it must be admitted, circumstances do lend additional importance to the greater freedom of intercourse between the two countries, while they tend to banish the risk of war. Were China opened up by railways and spanned by telegraph wires, it would through force of habit begin to lose its present dread of foreigners, and the danger of attacks on our countrymen would disappear. But many even of those who know China will scout such an idea as absurd. China, the most stubbornly antiquated of countries, echoing with the sound of the railway whistle! The notion might seem as preposterous as the plan of making a railway to the moon. Nevertheless, with all their hatred of foreigners, the Chinese have a keen eye to the main chance. Let them see that a thing is profitable, and, after hesitating for a time, they will use it. Show them that railways and telegraphs will pay, and in the course of a generation the Stephensons and the Wheatstones of the West will have effected a vast change in the Celestial land. Already, indeed, the appliances of modern civilisation have done much to shorten the distance between the West and the East. Take one striking example of the fact. Kiakhta is a town on the border line between China and Asiatic Russia. A telegram sent from that town at half-past ten on Saturday morning last arrived at our Foreign Office on Sunday morning. Some time ago it was a boast that, by means of pony mails, letters could be sent from Peking to Kiakhta in three weeks. But let a telegraph be constructed between that capital and the frontier town, and London might communicate with Peking in a single day. Thus our diplomatic agents in China could at once receive instructions direct from head-quarters, and the risk of war between the two countries would be proportionately lessened. The great fact, however, is, that the telegraphic agency has at last made its way even into the remote, untravelled wilds of Central Asia, and that the most distant and most thinly peopled countries are obtaining the means of instantaneously communicating with the centres of civilisation."

TO THE EDITOR OF THE "DAILY TELEGRAPH."

SIR,—The importance of the remarks made in your leader of this day on the above subject can hardly at the present time be overrated. It is surprising that, with so many of our fellow-countrymen engaged in the China trade—so enormous and important in its amount and character—no really solid efforts have been made to reach that country by the electric wire. Sooner than incur the risk of warfare through want of ready communication, it is not too much to say that the entire expense of construction of such a line would be a proper undertaking for the British Government, and at the same time would be the truest economy. I have bestowed some thought on the means of establishing such communication, and firmly believe that no great difficulty exists. There may certainly be at first some objections by the Chinese to suspended wires and railway cuttings, but the landing of submarine cables at the several ports can meet with no objection, and the valuable nature of the productions of China shows that, when established, whether as a national undertaking or through private enterprise, such a scheme would be very remunerative; while the known strong spirit of commerce in the Chinese character will materially enhance that result. It is only surprising that British energy has not yet solved this comparatively easy problem, and given us cheap and certain telegrams to and from China.—Yours, &c., KIAKHTA.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

BERGER—On the 10th Nov., at Yokohama, the wife of Capt. Ernest A. Berger, 10th Regiment, of a daughter.

BILLOWS—On the 28th Nov., at Singapore, Mrs. E. C. Billows, of a son.

GREEN—On the 26th Nov., at Hong Kong, Mrs. Tho. Green, of a son.

SHELFORD—On the 1st Dec., at Tanglin, the wife of Thomas Shelford, Esq., of a son.

### MARRIAGES.

MASINS—ELLIOTT.—On the 5th Dec., at the Presbyterian Chapel, Singapore, by the Rev. W. Jeffreys, William Masins, of Bangkok, to Jane, daughter of Robert Elliot, of Cheltenham.

MORRIS—OLEA.—On the 8th Nov., at the Cathedral, Manila, Samuel J. Morris, Esq., late of Tientsin, to Senorita Dona Soccorro, youngest daughter of Don Joaquin de Olea, Commandante Visitador de los Carabineres. No cards.

SITWELL—WILSON.—On the 7th Nov., at the British Legation, Yokohama, by the Rev. M. B. Bailey, M.A., Isla Ashley Sitwell, to Sidney Mary Beckwith, eldest daughter of the late Colonel John Alexander Wilson, Royal Artillery.

THOMSON—PETRIE.—On the 19th Nov., at Hong Kong, by the Rev. D. B. Morris, John Thomson, Esq., to Isabel, daughter of Capt. P. Petrie, R.N., of Port St. Mary House, Isle of Man.

YULE—ALEXANDER.—At Peterhead, on the 5th Dec., by the Rev. Dr. Kinsow, A. H. Yule, Esq. (formerly of Yokohama, Japan), to Susan, only daughter of William Alexander, Esq., of Springhill, Provost of Peterhead.

### DEATHS.

LITTLE—On the 4th Dec., at Bonnygrass, Sarah Sophia, wife of the Hon R. Little, Esq., M.D.

MEADOWS—On the 14th Nov., at Newchwang, suddenly, Thomas Taylor Meadows, Esq., H.B.M.'s Consul at that port.

SURIN—On the 26th Nov., at Penang, Amalia, relict of the late Henry Surin, aged 53 years.

## OUR RELATIONS WITH CHINA.

IN our last issue we chronicled the departure of Mr. BURLINGHAME and his associates from London; we now hear that the Chinese Mission is domiciled in Paris, where a handsome residence has been procured in the shape of some splendidly furnished apartments in a house in the Champs Elysées, recently vacated by the Marquise de CAUX (lately Mdlle. ADELINA PATTI). A correspondent says that Mr. BURLINGHAME is bearer of an autograph letter from the Emperor of CHINA to the Emperor NAPOLEON; a most remarkable document, nearly half a yard broad, and more than two yards long, written in two columns, in Chinese to the right, and Mantchou to the left, and surrounded by dragons with five claws, emblems of the Celestial Empire. The Mission is to be received at the Tuileries on an early day.

The paragraph noticed in our last, which may be taken as a sort of semi-official exposition of the manner in which Mr. BURLINGHAME'S Mission is to be dealt with by our new Foreign Secretary, elicited some comments from the leading journals on either side, which (as usual) we reprint, that they may be placed on record. The comments of *The Times* — which are hardly consistent in their tone with the articles not very long since published by that journal on the treaty concluded by Mr. BURLINGHAME at Washington, may be summed up as follows:—Whatever may be the form which our relations with China may take, whatever the rights we insist upon, and whatever the means we may think necessary for securing them, the regulations just agreed to by Lord CLARENDON and Mr. BURLINGHAME will be equally advantageous. All that they will provide is that no act of hostility shall be committed against the Chinese Empire until the Imperial Government has been appealed to for satisfaction, and that satisfaction having been refused, the British Government in London decides that the refusal justifies the use of force. The spirit of our relations with China, too, may be much modified if Her MAJESTY'S agents and the English settlers and traders act on Lord CLARENDON'S instructions, and "pay due respect not "only to the laws of China, but to the usages and feelings "of the Chinese people." How far men have a moral right to enter foreign countries, or how far this liberty should be made an indispensable element in the mutual relations of States, are questions which need not be now discussed; but such a right might form a very legitimate subjectof negotiation with China. Here, however, other considerations enter. The Chinese very reasonably say that they are perfectly ready to admit Englishmen and other foreigners to travel and dwell in the interior of the empire, but that in that case the strangers must be subject to Chinese laws, and a Chinese in England or Australia is subject to the laws of the country. But by treaty all Englishmen are subject and responsible only to their own Consuls, and this privilege they are not willing to give up. Hence, there does not seem any chance of an agreement, for Englishmen do, in fact, deliberately acquiesce in their exceptional position in order to be secure from the jurisdiction of the Chinese authorities, whom they very naturally suspect and fear.

The *Standard*, on the other hand, takes alarm at the untoward consequences that are only too likely to follow any new difficulty that may arise in China, if we were laid under a formal engagement to use no active means of obtaining justice or redress without a reference to the Home Government. According to that arrangement the Chinese Government would be certain of three to four months' impunity, no matter what outrages it might commit. If half the members of the British legation at Peking even were seized by the native authorities and thrown into prison, or put to the torture, the British Minister would have to refer the "difficulty" to London, and wait from Christmas to May before he could lift a finger to compel the liberation of his colleagues. Such a mad promise as that which is talked of would be tantamount to the withdrawal of every British man-of-war from Chinese waters. What would be the use of an admiral and a fleet on the coast of China if they were never, under any circumstances, to act on their own responsibility, but in all cases were to remain torpid till news of any outrage could be sent home to this country, and orders on the subject received from the Home Government?

Possibly both views run a little to extremes; but we confess a leaning to the latter. As may be inferred from our remarks last week, we by no means advocate a system that would allow any act of imprudence committed by a wandering missionary, an over-adventurous merchant, or a Consular officer impressed with too exalted a sense of his own importance, to involve us in another China war; yet it is easy to see that apart from such agencies as these, circumstances may often arise in which the necessity of suspending all action, during a long period, may not only preclude any satisfactory settlement of a "difficulty" but may involve those concerned in it in very serious danger. It must be remembered that these "Chinese laws," to which British subjects are enjoined "to pay due respect," do actually sanction torture and imprisonment at the mere caprice of a local mandarin; in no single case, as far as our recollection goes, have the Chinese laws given adequate redress for wrongs inflicted on foreigners, unless aided by direct pressure from without; how then can foreigners be expected to show "respect" for them in the true sense of the word? We are to respect also the "usages and feelings" of the Chinese people—in other words, their superstitions and prejudices. Now, if this means that we must defer to the overweening assumption of domineering officials, bear with resignation the fanatical hatred of the *Literati*, and meekly accept the designation of "foreign devil" and any other term of contumely and opprobrium the *canaille* may think proper to lavish upon us—why, it is really going a little *too* far. In Mr. BURLINGHAME'S eyes, too, it no doubt means that we must also accept that curious embodiment of the "usages and feelings" of the Chinese—the mythical "Feng-shiu" doctrine—as a perfectly satisfactory reason against the introduction into that country of railways, telegraphs, or any innovation of modern science If such a policy as this is to be the upshot of Mr. BURLINGHAME'S negotiations with Lord CLARENDON, it will be equivalent to giving up all we have struggled and fought for since Lord ELGIN'S first mission to China.

## OUR RELATIONS WITH CHINA.

(THE TIMES.)

An announcement which has just been made promises to be a new era in the relations of this country with those States and nations which are not included in the comity of Christendom. It is said that Lord Clarendon and Mr. Burlinghame have agreed upon the basis of the future policy of Her Majesty's Government in relation to China. The stipulations of existing treaties are again declared binding; all negotiations shall be conducted with the central Government at Peking, and not with provincial authorities; and thirdly, when any differences arise, they shall be referred to the Home Government for consideration. These two latter points are of the highest importance. For years this country has been represented at the Court of Peking, and, as far as diplomatic arrangements can insure the regular and methodical conduct of business, China is in the same position with respect to us as any European State. There is a Minister Plenipotentiary, a Secretary, and a second Secretary; there are *attachés*, a chaplain and doctor, and the whole apparatus of negotiation. Yet the instinct of consuls and merchants and naval officers is to settle mattors in the old high-handed way, just as if we knew nothing of the Empire except one or two ports where we had forced our trade. The first impulse of an offended missionary or an irascible commander is that the British authorities that may happen to be on the station shall take up a dispute and at once demand a settlement from the nearest official. What may be the position of this governor, prefect, or magistrate, what may be his responsibility for the alleged offence, his power to punish for it, or prevent a renewal of it, seems never to be considered. According to the received traditions, every town must be held responsible for the acts of any one who lives in it or near it, and any British officer has the right of applying the available force of England to obtain what, in the opinion of the European community, is a fitting satisfaction. Even the assent of the British Minister at Peking seems to be thought hardly necessary, it being taken for granted that he will see with pleasure the zeal and promptness of his countrymen. If the account of the new agreement be correct, it will not be any longer in the power even of the British Representative to set hostilities in action against the Empire or any part of it. If any difference arise, it shall first be laid by

Digitized by Google

the Minister before the Peking Government; and if satisfaction be not obtained, the Minister shall refer it home to Her Majesty's Government. If these stipulations be confirmed and observed, we shall at least get rid of the abuse of local war—the power of any commander to act on his judgment and enter on hostilities which may not only be unjust in themselves, but may involve this country in serious trouble.

We are not of those who, in deference to either theory or sentiment, would lessen the security of our fellow-countrymen abroad in regions where they are pursuing their legitimate business, adding by their industry to the comforts of the English people and the wealth of the English State. Nor do we lose sight of the reasonable argument that our relations with foreign countries must be regulated by the respective civilisation of those countries. It may be allowed that a half-civilised people, unaccustomed to respect the rights of foreigners, or a Government which, regardless of morality with respect to its own subjects, is equally wilful towards strangers, cannot be placed in the same class as France or Prussia. But whatever may be the form which our relations in China may take, whatever the rights we insist upon, and whatever the means we may think necessary for securing them, the regulations we have mentioned will be equally advantageous. All that they will provide is that no act of hostility shall be committed against the Chinese Empire until the Imperial Government has been appealed to for satisfaction, and, that satisfaction having been refused, the British Government in London decides that the refusal justifies the use of force. It will be said, perhaps, that such a regulation is very well in theory, but that China is at the other side of the world, our countrymen there are liable to ill-treatment which only a demonstration of force, or the actual use of force, may be able to avert, and that from the nature of the case full authority ought to be left in the hands of those who represent Her Majesty. This argument has a certain force, but it may be answered that no necessary freedom of action would be taken away. Undoubtedly, under any circumstances, a British officer would have the right to protect British residents from any popular attack or outrage. This would rest on the broad ground of self-defence, and cannot be touched by any agreement respecting procedure. It would hold equally on the coast of France or any other civilised country. The question is whether, a wrong having been already committed, or some cause of quarrel having arisen, war shall be made by the Minister or even by a consul. Now, it is evident that this is a delegation of authority which should only be made under the pressure of the most overwhelming necessity, since it entirely takes the decision out of the hands of Government and Parliament, and gives a distant official the power of controlling and taxing the whole nation. A little reflection will show that the Home Government will soon be able to direct Chinese matters with the greatest ease. Very shortly we may hope to see the telegraph extended to the most distant parts of Asia, and then a few hours will suffice to bring the news of any dispute, and in a day or two the Minister and the officers on the station will receive directions how to act. The telegraph, indeed, seems likely to give a fortunately fatal blow to the system of armed negotiation. The naval officer who is always appearing before somebody's seaport to demand satisfaction about some matter which people at home have never heard of is the representative of a spirited, but not over wise nor always successful, bearing towards foreign nations. His occupation will soon be gone. It will not take four months to communicate with China or the western coast of the New World, and, though a Chinese or a Mexican Governor may be as provoking as heretofore, the Queen's servants, civil, military, or naval, will have to wait for orders instead of chastising the offender on their own account.

It is not only this prudent regulation respecting acts of hostility which gives a character to the agreement; the spirit of our relations with China may be much modified if Her Majesty's agents and the English settlers and traders act on Lord Clarendon's instructions, and "pay due respect not only to the laws of China, but to the usages and feelings of the Chinese people." In this matter a great deal must be left to the judgment, good feeling, and good taste of our countrymen; and though it is most difficult to lay down rules and to define where the rights of foreigners end and their illegal assumptions begin, yet we will venture to say that an able man, with the sense and tact of a gentleman, will hardly ever make a blunder. It is not pleasing to find that the preachers of religion are among the most unfortunate in their relations with the people whose well-being they declare to be their chief object. It was to obtain reparation for something done to the missionaries that Mr. Medhurst was lately instructed to open negotiations at Nanking "with a strong naval squadron at his back." We cannot but think that if due respect be paid, according to the Foreign-office directions, to the laws of China and the usages and feelings of the Chinese people, we shall not have missionaries first getting into trouble by railing at a people's religion and then demanding to be "welcomed back by the prefect," and to have "a stone engraved sketching the circumstances of the riot, condemning it, and recording the results," one of the chief of those results being the punishment of the Literati," whom these too zealous evangelisers seem to look upon as their most deadly enemies. This affair brings us, however, to the question which we must sooner or later face—that of the right of foreigners to travel or settle in China, and there to do and say what they please. It may be that it is our duty to support our countrymen in a certain right even when we do not admire the use they make of it. We must confess to a desire that China should be completely opened to European people, as European countries are to Chinese. How far men have a moral right to enter foreign countries, or how far this liberty should be made an indispensable element in the mutual relations of States, are questions which we need not discuss; but such a right might form a very legitimate subject of negotiation with China. Here, however, other considerations enter. The Chinese very reasonably say that they are perfectly ready to admit Englishmen and other foreigners to travel and dwell in the interior of the Empire, but that in that case the strangers must be subject to Chinese laws, and a Chinese in England or Australia is subject to the laws of the country. But by treaty all Englishmen are subject and responsible only to their own Consuls, and this privilege they are not willing to give up. Hence, there does not seem any chance of an agreement, for Englishmen do, in fact, deliberately acquiesce in their exceptional position in order to be secure from the jurisdiction of the Chinese authorities, whom they very naturally suspect and fear. We may hope that in a few years, as the Empire is permeated by European commerce and ideas, its institutions may be so much trusted that Englishmen will not be afraid to commit themselves to the interior, in reliance on native police and native law. When this time arrives, the admission of foreigners to full rights of residence will not be long delayed.

(STANDARD.)

Lord Clarendon, according to semi-official announcements, has inaugurated his *régime* at the Foreign-office by making a series of promises to the Chinese Embassy. It is impossible to say correctly that these promises form the basis of a new understanding, or of a new treaty to supersede that of 1858, because they simply bind this country, and do not affect the action of the other Government in any way. They are not preliminaries to further negotiation, because they do not even tend to advance a settlement of any pending questions. They are, in fact, simply fetters which the new Foreign Minister has fastened upon his own limbs, in gracious acquiescence with suggestions which would seem to have been made to him by the representative of Peking. They are playfully called bases of a future policy, and in detail are as follows: Treaty stipulations to be observed; all negotiations to be conducted with the central Government of Peking, and not with provincial authorities; all difficulties as they arise, before being made the subject of war, to be referred for consideration to the home Government; finally, British residents in China to pay due respect not only to the laws, but to the "usages and feelings" of the Chinese people. It is only courteous to assume that Lord Clarendon knows what he means by this last basis; but British subjects, eager to regulate their conduct in accordance with the wishes of their Government, will be not a little puzzled with the task before them. The usages and feelings of the Chinese prompt them to shave their heads, amongst other things, to wear dirty clothes, and chin-chin Joss by means of fire-crackers and burnt paper in all crises of their lives. Is the Hong Kong merchant to do the same? To omit an annual pilgrimage to the graves of one's ancestors is a great outrage on propriety in the eyes of a Chinaman who has been well brought up; but how shall Englishmen in China, who are unfortunate enough not to have any ancestors that they are aware of, set about the accomplishment of this duty? If it is only incumbent on British residents to respect without imitating the "usages" of China, is it understood that any Englishman who may be an involuntary witness of a Chinese execution, for instance (recent events at Amoy will furnish a case in point), and who sees a fellow-creature tied to a cross and cut up into mincemeat before his eyes, shall obey Lord Clarendon's maxim, and politely assure the presiding officer that such processes "belong number one good custom?" Before now Chinese in the employment of foreigners have asked for an advance of wages, to enable them to buy girls who have pleased their fancy, and there cannot be any ambiguity in such cases as these. The new "basis" would certainly make it incumbent on British masters to provide the money required, where the "feelings" of their retainers would be so deeply involved. The missionaries may, perhaps, be left to fight their own battles; but it is not quite easy to see how Christianity can be preached by apostles bound to show due respect for any wooden deity with a red face and a brass nose who may be particularly cherished in their neighbourhood. It was an ancient usage with the mothers of Shanghai to throw all female children they could not conveniently maintain into a frightful murder-house, known as the "Baby Tower." The children were thrown alive into this ghastly receptacle, and left to die at their leisure on the heaps of putrid bodies below. Certain French sailors, without that respect for the usages of the Chinese which Lord Clarendon inculcates, took upon themselves to batter the Baby Tower into a heap of ruins, which any visitor may still see during an afternoon walk from the foreign settlement; but if the municipal authorities of the native city, protected by Her Majesty' new Foreign Secretary, should build up the broken walls once more, no British subjects, consistently with the injunctions of their Government, could interfere to prevent the native women from resuming the "old custom."

The last clause in the bases of our future policy is, of course, simply nonsense; but some of the others may, if really imposed as rules of conduct on British diplomatists and consuls, be productive of infinite mischief, and go far to throw our relations with the Chinese Empire into a worse confusion than that from which they were partly extricated by the Treaty of Tientsin. *Apropos* to recent events at Yangchow, we have already dealt with the necessity of leaving our representative at liberty to bring pressure to bear in an emergency on provincial mandarins, instead of leaving every difficulty to be settled by negotiations between the Minister at Peking and the head of the Chinese Foreign Board. The main argument which we used was also put forward by a correspondent at Shanghai, in that same journal, *The Times*, which now placidly announces the new policy as if it were a scheme calculated to put all our relations with the Celestial Empire on a satisfactory footing. The central Government has not practically the power of controlling provincial mandarins in matters of detail. In spite of the fact that centralisation is the leading idea of the Chinese political system, it is combined with a system of local independence which only leaves the head of a department responsible to his next superior for its general tranquillity. The provincial mandarin probably gets his appointment by giving some one in authority a gigantic bribe, and he goes down to his Government resolved to make the speculation pay. In order to do this he must keep the department in order, so that it is not a nursery of insurrections, which might threaten the peace of the supreme Government, and if he is stationed on the coast he must try and manage his relations with foreigners so as to avoid giving rise to a difficulty in which his superiors might be involved. If he gives trouble to Peking by failing in either of these objects it is likely enough that he will be degraded and ruined, but he knows quite well that the means to be employed are within his own discretion. To state the case more accurately, it does not occur

Digitized by Google

to him that the supreme Government would think of interfering with his choice of means. To expect that if John Smith is treated with injustice by the authorities at Foochow the central Government would look into the merits of the case and send word to the governor of Fehkien or the Taoutai of the city, that in the case of John Smith such and such reparation was to be accorded, would be to manifest total ignorance of the way in which the Government of China is carried on. To tie the hands of British consuls by imperative restrictions which should prevent them from managing their own grievances with the local mandarins in any case, no matter what might be its exigency, would in effect be giving up our countrymen into the hands of the Chinese. The mere delays involved in transmitting despatches to and from Peking, through a country scarcely raised above barbarism in the matter of internal communications, would render appeals to the central power in many cases altogether valueless; and to expect, even in cases where delay might not be finally fatal to justice, that any good result would ensue from such appeals would be to ignore the lessons taught by our past experience in China.

Great, however, as the evil results of the threatened restriction in reference to provincial negotiations would be, the effect of any formal engagement not to undertake hostile measures in China till the difficulty, whatever it might be, had been referred to the Home Government in England, would be still more disastrous. According to that arrangement the Chinese Government would be certain of three to four months' impunity, no matter what outrages it might commit. If half the members of the British Legation at Peking even were seized by the native authorities and thrown into prison, or put to the torture, the British Minister would have to refer the "difficulty" to London, and wait from Christmas to May before he could lift a finger to compel the liberation of his colleagues. You must put extravagant cases to test principles, and if even that is a difficulty not likely to arise, it must be remembered that in a country like China the risk of personal outrage where less important persons than Secretaries of Legation might be concerned, is by no means remote. Such a mad promise as that which is talked of would be tantamount to the withdrawal of every British man-of-war from Chinese waters. What would be the use of an admiral and a fleet on the coast of China if they were never, under any circumstances, to act on their own responsibility, but in all cases were to remain torpid till news of any outrage could be sent home to this country and orders on the subject received from the Home Government. Where a Minister abroad can telegraph to his Government at any time in five minutes, it is a matter of course that no important question should be dealt with until the Foreign Secretary has been consulted; but with far distant countries we cannot venture to have any relations whatever unless we can trust our own agents to act in the right way without special instructions in an emergency. Under such regulations as those which are foreshadowed by Lord Clarendon's bases residence in China would be as hazardous to British subjects as residence in Abyssinia proved to be for Mr. Cameron, and, what is perhaps a still more serious consideration for the public, relations with China would infallibly bring us into some embarrassment from which we could only extricate ourselves by means of a full-blown China war. If we give up the advantage of negotiating with the Chinese at Peking, and submit to the arrangement which the Chinese Government is now anxious to force upon us, we surrender all the benefits which we have received at so great a cost, and forfeit the advantages of our power and civilisation. The Chinese have not failed to observe that while the Minister at Peking is entrusted with the confidence of his Government and the control of a naval force, foreign questions cannot be treated with contempt. It is impossible to shelter themselves from the consequences of bad faith under cover of prolonged delays, or escape from a difficulty by wearing out the patience of a foreign Power when the foreign Government is always effectively represented by a diplomatist at Peking with a fleet at hand and authority to use it. Pondering over the inconvenience of all this, it was apparently suggested to the Chinese Government that it would be very pleasant to reverse the arrangement, and have all negotiations with European Powers carried on by a Chinese representative in Europe. In fact, Prince Kung must have been supplied with a "happy thought"—hoodwink the European Powers; get them to give up the advantages they obtained by the late war, and permit China to enjoy such advantages instead! The Chinese Embassy is endeavouring, with great ingenuity, to carry out the brilliant idea. Is it within the bounds of possibility that any British Minister can be blind enough to fall into the trap?

(CHRISTIAN SPECTATOR.)

Intelligence has just reached England that full reparation has been awarded the British Government by the Chinese authorities. We are glad to believe it has been without even the threat of bombardment; the employment of terror in a missionaries' quarrel would be a disaster to the cause of missions in China, for which nothing could compensate. The very appearance of the *Rinaldo* on their behalf will prove a more serious obstacle to the mission work than their unavenged wrongs would have been. Mr. Taylor, in his appeal on behalf of China, published during his last residence in England, says that "the dispute between the British and Chinese authorities about the celebrated lorcha *Arrow*, which ended in the bombardment of Canton, greatly intensified the hatred of the Cantonese (many of whom are scattered over the country, more especially in the free ports) towards the foreign residents in China." He himself has suffered from this hatred of foreigners, and has found it the greatest hindrance to his work. He has now unfortunately been the occasion of its increase; he will be associated in the memory of the inhabitants of Yang-chan and the viceregal court at Canton with their humiliation. It was an act of justice to punish the rioters, and Christian missionaries may rightly seek the protection of the law. It is altogether a different thing when appeal is made to a foreign Power, and the securing of justice will be regarded as a token of foreign supremacy. We do not hold Mr. Taylor responsible for the appearance of the gunboat; it may fairly be said that when the consul took the matter up it had passed out of Mr. Taylor's hands; it was an attempt to defend the rights of all foreign residents, and the fact of its concerning missionaries was but an accident in the matter. We are willing to grant all this; and our deepest sympathy is with the sufferers, our indignation against the author of the tumult. But it was an error of judgment to appeal to the consul at all; the fact that the affair would pass out of Mr. Taylor's hands, and that he would be powerless to prevent whatever measures might be deemed necessary to overawe the Chinese, should have prevented his doing so. The British residents seem to have been in this case, as they mostly are, eager to read a sharp and decisive lesson to the natives. It is not an empty utterance of missionaries that they are ready to "take joyfully the spoiling of their goods," and "rejoice that they are counted worthy to suffer for Christ." These missionaries have proved their patience and self-sacrifice. We regret the more that, first an error of judgment, and then the inexorable chain of consequences, should have associated their names with those of military commanders, and their cause with that of British supremacy in a foreign land.

## THE BRINDISI ROUTE.

The Florence correspondent of *The Times* writes as follows:—

A letter from Brindisi, published in the Milan *Perseveranza*, enumerates the obstacles to the much-desired passage of the Indian mail through Italy, and cites as prominent among them the want of through trains between Susa and Brindisi. It says:—

"The traveller who has been so unfortunate as to try this new route is obliged to take a ticket at Bologna, and again to register his luggage, at risk of losing the train. When he gets to Susa he has the pleasure of awaiting at that village for several hours the departure of the Fell Railway which is to convey him beyond the Alps. Are these the inducements held out to travellers to choose the Italian route? Better could hardly be done in the interest of Marseilles."

The writer then proposes various means of attracting travellers to take this route, and especially the establishment of weekly express trains, taking only travellers going through to Brindisi or Susa, all of which has been repeatedly suggested. He is greatly mistaken, however, if he imagines that the several hours' waiting at Susa is the fault of the Fell Railway; or that the Mont Cenis Company would not be too glad to see such delay done away with. It seems the fate of the little mountain railway to be made the scapegoat for the faults of its two big neighbours. It would be most happy to take up its travellers immediately on their arrival at Susa and convey them at once to St. Michel, but then they would have to pass several hours at the latter place instead of the former, waiting for the train to start for Paris. Since the November snow storm, which for three days caused delays, the Mont Cenis trains have run most regularly, performing the journey frequently rather within the stipulated time of five and a quarter hours. It is the opinion of practical men, however, that, to insure regularity in the winter season, six hours should be allowed for the journey, at least until the managers of the line have had the benefit of a full winter's experience. During the thirty days from the 12th of November to the 12th of December the average time of the trains was five hours and twenty-three minutes. In spite of this you will be surprised to hear that the old diligence has appeared again upon the mountain, and, what is more, that it gets a good deal of custom, not merely from nervous old ladies, who think they must inevitably be sent flying over precipices if they risk themselves in Fell's climbing machine, but also from persons who justly consider the Mont Cenis Railway to be, as Captain Tyler declared it, as safe as any railway in existence. This is simply on account of the detention at Susa. Of the pleasantness of that place you may judge from the fact that in the middle of winter people prefer passing their nights in a diligence to enduring the wretched accommodation it affords. The hotel is of the most inferior description, and as for the buffet at the station, although sufficiently roomy it is detestably conducted; the foods and drinks afforded are extremely bad, and at exorbitant prices, and one is usually stifled with the smell of bad petroleum. To avoid all this, some people are glad to get at once into the diligence, and a friend who arrived here two days ago tells me that on Wednesday, at St. Michel, he saw thirty-six persons arrive by those conveyances from Susa. The conductors had *Service du Mont Cenis* on their new caps, and it looked quite like a revival of the old coaching system. It is absurd to suppose that anyone would rather pass eleven hours cramped in a cold diligence than five hours and a half in a comfortable railway carriage. It is the horror of Susa that has set the diligences rolling again. My friend reached Susa at 9 P.M. The examination of the baggage, much less rigorous and annoying than it used to be, was over in less than an hour, and had a fast train been ready he might have been in Florence at noon the next day, or might have been in bed in Turin before midnight. Instead of that he had to stay at Susa until 4.30 A.M., and reached Florence at 8 P.M. This is obviously a faulty state of things, unfair to the travelling public and very unfair to the Mont Cenis Railway. Wherever the fault may lie it is for the Italian Government to see to it if it desires to get the Indian mail to pass through its territory. As matters at present stand no one can advocate its doing so.

THE REPORTED LOSS OF THE GUNBOAT "GNAT."—There is some reason to believe that the telegram received from Hong Kong under date December 15, reporting the loss of H.M.'s gunboat *Gnat*, is incorrect. Mr. Donald Macgregor, of the Oriental Coal Company (Leith), writes as follows:—"I am glad to be in a position to inform you that I have a letter dated Labuan, November 3, in which the colliery manager of the Oriental Coal Company's mines writes that the *Gnat* was to coal next day (the 4th). I am, therefore, induced to believe that the *Gnat* will have escaped the gale encountered by the *Rainbow*, belonging to the Singapore Government, which put back to Labuan on 7th November."

# Monetary and Commercial.

It is stated that the meetings of creditors and shareholders of the Commercial Bank Corporation of India and the East, directed by the Master of the Rolls to be called to consider the proposed arrangement, will be held on the 18th and 19th inst. The creditors will meet at the Guildhall Coffee House, on the 18th inst., at twelve o'clock at noon, and the shareholders at the same hour and place on the 19th. Notices convening the meeting have been posted, and Mr. Holyland, the official liquidator, has sent to each creditor and shareholder a copy of a report which he has prepared setting forth the present position of the liquidation, and the grounds upon which it is desirable that the proposed arrangement should be confirmed. From this report we extract the concluding passages as follows :—

The salient points of the arrangement are—1. All the litigation is to be stopped, and further litigation is to be prevented. 2. The creditors, including those whose claims have been disputed, are to receive 17s. in the pound, in full satisfaction of their claims, without interest. The official liquidator is of opinion that this arrangement is expedient in the interests both of the creditors and of the shareholders. It is desirable in the interests of the creditors for this reason—the Master of the Rolls has more than once intimated his intention not to allow any further division of the assets until the suit instituted by the Old Bank against the Corporation has been heard and the accounts between the two banks have been taken. The official liquidator is advised that in the ordinary course of procedure the result of the accounts could not be finally ascertained within two years, and if there were an appeal to the House of Lords a much longer period would elapse before the time arrived when the assets could be divided. It is obviously desirable to avoid this delay, and to close the liquidation as early as possible. The creditors are therefore asked to accept the 17s. in the pound, and to release the shareholders from any further call, unless it should prove necessary to make one in order to produce the 17s. in the pound. The uncalled liability of the shareholders is £15 per share, but most of the shareholders are insolvent, and have not paid the first call of £10 per share. The official liquidator is of opinion that if the £15 per share were called up it would produce a sum sufficient to pay a little more than 1s. in the pound to the creditors, but it would be considerably reduced in amount by the costs of the litigation. The short question, therefore, for the creditors is whether they will accept 17s. in the pound now, or wait an indefinite period for a somewhat larger dividend. The advantage of the arrangement to the shareholders is obvious. If the litigation goes on, the official liquidator is advised that the £15 per share must be called up. If the arrangement be carried out, there is a reasonable prospect of avoiding a further call.

The annexed letter (say the *Daily News*) rightly urges the necessity of reforms in our telegraphic communications with the East. This is a matter which will probably excite louder remonstrances every succeeding month from the mercantile community, who will naturally become the more impatient of the existing dilatory and untrustworthy system in proportion as the superiority of the facilities presented by the Atlantic and other submarine cables is pressed upon their attention. The list referred to by our correspondent enumerates the full particulars of thirty-four messages transmitted within the last twelve months from Galle to London, and which took on an average 6·62 days in transit between those two points :—

TO THE EDITOR OF THE "DAILY NEWS."

SIR,—If you can bring your great influence to bear on the Government, and induce them to provide a direct telegraphic line to Galle, you will confer an inestimable benefit on the commercial interests of this country. The losses sustained during the last few years on the single article of tea from China would have paid the cost several times over. This loss for the present season alone I estimate will amount to not less than £2,000,000. You will see from the enclosed list of messages received by one firm last year, from China *viâ* Galle, the vexatious irregularity and delay to which the trade is subjected; and the telegrams, as received, have been as unintelligible as their transmission has been irregular; nor can any improvement be expected until direct submarine cables are substituted for the wretchedly-worked roundabout land lines now in use.—I am, &c., A CHINA MERCHANT.

A portion of the bar silver by the West India packet, together with a supply from other quarters, was sold at 5s. 0⅝d. per ounce, showing no change.

The remittances made to Japan for the purchase of silkworms' eggs for France and Italy have been on a very large scale.

We are informed that the business of Messrs. Benyon, Harding, and Co., tea brokers, of Mincing-lane, will henceforth be carried on as that of tea and colonial brokers, under the style of Benyon, Harding, and Templer, by reason of Mr. J. L. B. Templer having become a partner in the firm.

At an extraordinary meeting of the Credit Foncier Company, held at the City Terminus Hotel, a series of resolutions were carried reducing the number of the board to a maximum of five and a minimum of three, giving power to the general meetings to remove any or all of the directors on a previous notice of twenty days, increasing the number of shares necessary to qualify a member of the board, and reducing the remuneration of the directors from £6,400 to £2,000 per annum. The titles of governor and deputy governor of the company are to be abolished, and the more ordinary distinctions of chairman and deputy chairman are to be substituted in their stead.

At the meeting of the Union Marine Insurance Company (Limited) of Liverpool and London, the directors will recommend a dividend of 12½ per cent. The favourable results of the company's operations will, moreover, enable the directors to place £50,000 to the credit of a reserve fund, independently of which a considerable sum will be carried forward as unappropriated reserve.

The directors of the Ocean Marine Insurance Company will, at the annual meeting of shareholders on the 1st of February, recommend the payment of £1 per share bonus, and 5s. per share for interest, in addition to the 5s. per share paid in July, both free of income-tax.

The directors of the London and Provincial Marine Insurance Company have agreed to recommend to the shareholders at the ordinary general meeting, to be held on the 4th of February next, the payment of interest for the half-year ending 31st of December, 1868, at the rate of 10 per cent. per annum, free of income-tax.

At the meeting of the Colonial Bank the report showed an available total of £38,606, exclusive of a previous balance of £3,783, and recommended an ordinary dividend of 6 per cent. and an extra distribution of 1 per cent., being at the rate of 14 per cent. per annum for the half-year ended the 30th of June last, leaving a balance of £7,390, of which £4,000 is to be carried to reserve, thus raising that fund to £140,000.

Messrs. Townend Brothers, of 9, Mincing-lane, intimate that Mr. Charles Bovet has been admitted a partner in their firm, which from this date will be conducted under the style of Townend Brothers and Bovet.

Messrs. R. F. Duus and Edward Harley Brown announce that they have established themselves as ship insurance and general agents, under the firm of Duus, Brown, and Co., at No. 9, Fenchurch-street.

The business hitherto carried on under the name of Mr. W. W. Ker will be continued under the style of Messrs. W. W. Ker and Co., in conjunction with Mr. William Paterson and Mr. Henry Minchin Simons.

The amount of bullion by the P. and O. Company's steamer Pera, from Southampton, on the 9th inst., was, in gold, to Bombay, £5,085; to Madras, £823; in silver, to Bombay, £68,000; to Hong Kong, H.M. Government, £24,688; to Foochow, £1,500; total in gold, £5,908; in silver, £94,188.

## BOARD OF TRADE RETURNS.

The returns of the Board of Trade for the month and eleven months ended 30th November last, an abstract of which appeared in our last issue, were published on the 31st ultimo. The following shows the total declared value of British and Irish produce and manufactures exported during November in the last three years :—November, 1866, £15,080,430; November, 1867, £14,879,739; November, 1868, £14,143,493. It is thus shown that the export trade diminished during the month, by comparison with the corresponding month of the two previous years. The reduction is almost entirely owing to a diminution of £638,632 in the total amount of our cotton shipments, those of cotton yarn showing a decrease of 22 per cent. in value and 23 per cent. in quantity, and those of cotton manufactures 7 per cent. in value, and 9½ per cent. in quantity. The woollen trade has been in a better condition, and the shipments show an increased value of 2½ per cent. in yarns and 5 per cent. in finished goods. Silk manufactures also figure for an improvement of 6 per cent., linen manufactures 5 per cent., and haberdashery 12 per cent.—the latter furnishing an indication of reviving activity in our colonial business. It is evident now that the total exports for the present year will not reach the figures of the last two years. The official statement for the eleven months stands as under :—Eleven months, 1866, £173,913,222; eleven months, 1867, £167,931,378; eleven months, 1868, £164,824,654.

The next point of interest in these returns is the fact that in the month of October the imports of foreign and colonial articles exceeded considerably in value those of the same month in the two previous years, as will be seen by the following :—October, 1866, £20,671,693; October, 1867, £20,577,923; October, 1868, £21,492,619. In the month of November, for which *quantities* only are given, there was a large increase in the imports of cotton (chiefly from British India), the month's receipts being 962,528 cwts., against 469,373 cwts. in November, 1867, and 645,227 cwts. in November, 1866.

We annex a summary of those figures which relate to our Import and Export trade with China and other countries in the Far East :—

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern Ports have somewhat improved since our last issue. Coal freights from the Northern outports still continue dull; with but a small demand for tonnage.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 45s. meast. To Nagasaki: 45s. weight, 50s. meast. To Shanghai: 40s. weight, 45s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or meast. To Penang: 30s. weight or meast. To Ceylon: 20s. to 25s. weight, 35s. meast. At New York to China: $12 to $15 per ton of 40 cubic feet

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama, £43. For Shanghai: £45. For Hong Kong: £33. For Galle: £24. From Newport, Cardiff, or Swansea per ton.—For Yokohama, £2 3s. For Hong Kong: £1 17s. For Manila: £1 15s. For Singapore: £1 5s. For Galle: £1 4s.

The Admiralty have invited tenders for the conveyance of a fire engine, to be shipped from the Thames, for Galle.

## CASUALTIES.

The Benvenue, Brown, from London to Penang, which arrived at Deal, Dec. 23, had lost an anchor and fifteen fathoms of chain.

Advices from Rotterdam, dated Dec. 30, state that during a gale on the night of the 28th Dec. the Mary and Hillegonda, thence to Batavia, got adrift in Brouershaven Roads, and came into collision; after striking several times she was towed to a safe anchorage, but was so much damaged that she would have to return to Brouwershaven for repairs.

Advices from Amsterdam, dated Dec. 29, state that during a gale on the previous night the Sirius, v. Hilten, for Sourabaya; the Alida, Visser, for Padang; and the Nyphon, Vuyk, for Japan, broke their chains and sustained some damage by collision.

A telegram received at Liverpool Dec. 31 announces that the Busturiana, from that port to Manila, had been wrecked at Sorsogon, near Manila.

The Bolton Abbey, Murphy, arrived at Liverpool, reported that on Oct. 11, in lat. 27 S., lon. 50 E., she spoke the Virgen del Carmen, from Manila to Santander, with mainmast head and mizenmast gone, but she required no assistance. (See Arrivals.)

The Indiana, Cooper, from London to Singapore and Bangkok, put back to Deal, Jan. 2. She had been in collision on the night previous during a gale, had foremast and bowsprit carried away, and received other damage. She subsequently returned to the West India Docks.

The Ruffine, Le Bahe, which sailed from Sunderland, Dec. 23, for Shanghai, put into Ostend, Jan. 3, very leaky, having struck heavily on the Goodwin Sands, and would probably have to discharge.

The Sourabaya Packet, Olivier, from Batavia to Amsterdam, was towed into Ramsgate, Jan. 4, with loss of anchors and chains, having struck the ground off Dungeness.

The Kate Cleather, from Singapore, arrived at Shelborne, N.S., Dec. 17; had sustained damage and lost sails.

## MISCELLANEOUS.

The Golden Spur, Ronald, from London to Shanghai, which put back to Deal Dec. 29, sailed again on the 31st.

The Juanita, Bartols, from Havre to Bangkok, put back to Falmouth Jan. 2.

At ASCENSION, Nov. 25, Satellite, from Foochow, and sailed for Falmouth; Dec. 6, Geraint, from Singapore, and sailed 7 for London; 12, Louis, from Manila, and sailed 13 for Marseilles; 13, Aleyone, from Shanghai, and sailed 14 for London; Tewkesbury, from Manila, E. A. Oliver, from Foochow for London.

Off ASCENSION, Dec. 7, Coulnakyle, from Foochow; 9, H. F. G. S., from Singapore; 11, No. 752, 4th d.p., from Foochow, for London; 13, Vertrouwen, from Batavia, for Amsterdam; Ravensbourne, from Colombo; 14, Havelock, from Shanghai, both for London.

At ST. HELENA.—Nov. 28, Pasaroeang Hollanders, from Batavia, and sailed 29 for Amsterdam; 30, Elena, Vaca, from Manila, and sailed for Liverpool; Dec. 1, Antje, Hooy, from Batavia, and sailed for Rotterdam; Marcellus, White, from Shanghai, and sailed 2 for London; 2, George Croshaw, Alexander, from Bangkok, and sailed for Falmouth; 3, Guiding Star, Bishop, from Shanghai, and sailed for London; Osborne, Stamper, from Swatow, and sailed 5 for Falmouth; 4, Ferozepore, Woolterton,, from Bangkok, and sailed for Queenstown; Tientsin, Jarman, from Foochow, and sailed 5 for Boston; Cornelis, Croese, from Batavia, and sailed 6 for Amsterdam; Everhard, Keenche, from Saigon, and sailed for Falmouth; Velocidade, Wyvill, from Shanghai, and sailed for London; 7, Min. Thorbeeke, Kannegieter, from Batavia, and sailed 8 for Amsterdam; Aureliana, Sarachaga, from Manila, and sailed 7 for Santander; Caroline, Boyson, from Hong Kong, and sailed for Falmouth; Anna Digna, Lucas, from Batavia, and sailed 8 for Amsterdam; 8, Havelock, Madden, from Foochow, and sailed for New York; 9, Luzon, Dimelow, from Macao, and sailed for London; 10, Jesus, Arriandiaga, from Manila, and sailed for Corunna; Asphodel, Bayfield, from Shanghai, and sailed for New York; Flora, Minto, from Singapore, and sailed for London; 11, Abdul Medjid, Mowat, from Ceylon; Tony, Petersen, from Yloilo; 12, Cortgene, Wemmerus, from Batavia; Hoek van Holland, Bakkers, from Batavia.

Off ST. HELENA.—Dec. 2, Dr. Petermann, from Foochow; 6, Malta (English barque), from Penang; 9, Helena and Anna, from Batavia; Eastern Chief, from Singapore; 12, Recife, from Japan, for London.

At TABLE BAY.—Nov. 21, Kron Prinz, v. Preussen, Musack, from

Digitized by Google

Batavia, and sailed 25 for London; 23, Minden (?), Bell, from London, and sailed 26 for Shanghai; Wild Hunter, Bostance, from Batavia, and sailed 26 for Bremen; 27, Josephine Amedee, Lagarde, from Hong Kong, and sailed 28 for Havre; 24, Java, Rouvier, from Texel, and sailed Dec. 2 for Batavia.

### LAUNCHES.

On the 1st inst. a fine composite screw steamer was launched from the Deptford yard of James Laing, Esq., for the firm of Messrs. Textor and Co, silk merchants, of China and Japan. The vessel is of the following dimensions, &c., viz.:—Length of keel, 190 feet; over all, 209 feet; beam (moulded), 26 feet; depth to main deck, 13 feet 6 inches; spar deck fore and aft, with clear height of 6 feet 6 inches; gross register, 690 tons; and she is rigged as an hermaphrodite brig. Her engines are by Mr. John Key, of Kirkcaldy, horizontal direct-acting, diameter of cylinders 40 inches, length of stroke 24 inches, working by patent surface or jet condensers as required, circular boilers of ¾-inch plate tested to 80 lbs. water pressure, and working pressure 35 lbs. The vessel is planked with American elm up to turn of bilge, thence upwards with East India teak, all fastened with Mr. Laing's improved yellow metal fastening bolts and nuts. Will class at Lloyd's 16 years A 1. Her lines are extremely fine, and it is expected she will be very fast under sail or steam. Her passenger accommodation is also unexceptionable. The ceremony of naming the vessel the C. J. Textor was gracefully performed by Mrs. Carnes, the wife of Captain Geo. Carnes, under whose command she will, when completed, proceed hence to London to take cargo and passengers for Singapore, Chinese ports, and Japan, on which coast she is intended to trade.

THE "CHINA" LIFEBOAT.—I have to report (says Mr. Rowell, of Teignmouth) the following service of the *China* lifeboat of the National Lifeboat Institution, stationed at this port, in rescuing the crew of the trawler *Start*, of Brixham. At 10.20 A.M. on 5th inst. that vessel was observed trying to beat to windward to obtain the shelter of Battitcombe Bay, a gale blowing at the time from the S.W., with a considerable sea. Just then she lost her mast in a squall, and thereupon the lifeboat was launched with the greatest promptitude, and proceeded to her assistance, she being about two miles dead to leeward at the time. Shortly after the boat was launched the men were observed to leave their vessel, and the lifeboat made all speed towards them, and after a long and heavy pull rescued the crew of four men, who where much exhausted. The lifeboat now started for home, but after nearly one hour's hard pulling the crew found they could make no headway against the gale and tide, so bore up for Dawlish, where they landed at 2.40 P.M. amidst the cheers of hundreds of people. The steamer *Ostender*, of this place, had during this time proceeded to the wreck, placed men on board, and got a towline made fast, but hardly had she begun to tow her a head, when the smack went down stern foremost, in consequence of the great damage she had sustained from the fall of her mast. The gale still blowing as strongly as ever, the lifeboat was left at Dawlish until the wind went down. This valuable lifeboat was contributed to the Lifeboat Society some years since by Foreign residents in China, the fund having been chiefly raised through the indefatigable exertions of W. H. Harton, Esq, of London, an active member of the committee of management of the National Lifeboat Institution, who was then staying at Hong Kong, Messrs. Gilman and Co., and other firms at the last-named place.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships, and repair and refit of

STEAM MACHINERY AND BOILERS.

Their large Granite Dock is 307 feet in length, fitted with a caisson-gate, and with a centrifugal steam pump of great power, ensuring despatch in all states of the tides. At average spring tides this dock can receive vessels drawing 16 to 17 feet, and during the autumn and winter months 18 feet. Their two smaller docks, also built of granite, can receive vessels drawing 12 to 13 feet.

The premises comprise a large smithy and boiler shop, carpenters and boat-builders' shops, an

ENGINEERS' WORKSHOP,

fitted with lathes and tools driven by steam,

AN IRON FOUNDRY

for castings up to 5 tons weight, and a BRASS FOUNDRY.

The different departments are superintended by experienced Europeans, viz., engineer, blacksmith, and shipwrights.

The Company keep on hand copper and metal sheathing, spars, timber, paints for iron vessels, and all material for dockyard use.

A DRY GODOWN for reception of stores of vessels requiring to discharge them.

Good quarters for officers of ships under repair in the dock.

Amoy, 16th December, 1867.

## WHARVES.

### SINGAPORE.

NOTICE.

THE undersigned call the attention of Masters and Agents of Vessels discharging at this Port to the great advantage to be gained in point of convenience, despatch, and economy, by making use of their WHARVES at NEW HARBOUR.

With the assistance of Steam Cranes, a general cargo can be landed easily in a few days—or in about one-fifth of the time usually occupied discharging in the roads.

There are large, dry, and very commodious brick Godowns on the Wharves, which vessels have *free* use of for cargo while discharging.

The trouble and disputes with, and pilfering of cargo common among boatmen are avoided by vessels using the Wharves.

Cartage of cargo to the town (which is within easy distance) is guaranteed to be not more than lighterage rom the roads, and the coolie hire discharging alongside is less.

There is always a large stock of the best English and Welsh coals on the premises, which are supplied to steamers at the lowest market price, and vessels going alongside to take in or discharge coals pay *no* wharfage.

Vessels discharging cargo pay a wharfage of 20 cents per ton—a trifling charge when the immense advantages gained are taken into consideration.

Arrangements have been made by which all repairs to ships or steamers can be done with despatch while the vessels are lying alongside the Wharves.

There is an efficient European pilot on the premises and, when required, a steam tug is always available.

THE BORNEO COMPANY (LIMITED).

Singapore, April 6, 1868.

HOLLOWAY'S PILLS.—GOOD DIGESTION.—With the weather alarmingly changeable, and the cold almost penetrating the very sources of life, the skin will become inactive and the digestion impaired unless corrected by suitable means. Holloway's Pills are universally acknowledged to be the safest, speediest, and best correctives of indigestion. Loss of appetite, acidity, flatulency, and nausea are a few of the inconveniences which are remedied with ease by these purifying Pills. They strike at the root of all abdominal ailments, they excite in the stomach a proper secretion of gastric juice, and regulate the action of the liver, promoting in that organ a copious supply of pure, wholesome bile, absolutely necessary for digestion. These Pills remove all distension and obstruction.

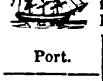
| Hong Kong | Geraint ..... | A1 14 yr. | E.I.D. | To follow |
| Yokohama (Kanagawa) | Cedric ..... | A1 10 yr. | E.I.D. | With des. |
| Ditto ..... | Aurora Australis ..... | A1 13 yr. | E.I.D. | To follow |

For Freight or Passage apply to KILLICK, MARTIN, and Co., 10, George-yard, Lombard-street, E.C.

## INDIA AND CHINA.



GELLATLY, HANKEY, SEWELL and CO., will despatch the following high-class SHIPS from the East India Docks, as under:—

| Port. | Ship. | Ton. | Class. | To Sail. |
|---|---|---|---|---|
| Calcutta..... | Knight Bachelor..... | 1405 | AA1 | Jan. 20 |
| Bombay..... | Brit. Admi. | 1268 | AA1 | Jan. 20 |
| Bombay..... | Coldinghme. | 1072 | AA1 | Feb. 5 |
| Madras and Masulipatam | Pembrokesh. | 721 | A1 10 yrs. | Jan. 20 |
| Shanghai ... | Dilkhoosh ... | 816 | A1 12 yrs. | Jan. 25 |
| Shanghai ... | Albuera ..... | 774 | A1 15 yrs. | To follow |
| Yokohama and Hiogo... | C. J. Sextor | 690 | A1 16 yrs. | Feb. 15 |

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., No. 8, York-street, Manchester; or 27, Leadenhall-street, E.C.

STEAM TO JAPAN.—To leave the East India Docks on the 15th February, with leave to call at St. Vincent, the Cape, and Singapore, to coal for Yokohama and Hiogo, the splendid new composite screw steamer C. J. TEXTOR, A1 16 years at Lloyds, 690 tons register. This fine high-classed vessel has beautiful accommodation for cabin passengers, and presents an unusually good opportunity to shippers, as she will steam the whole way out.

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., 8, York-street, Manchester; or 27, Leadenhall-street, London, E.C.

To sail Jan. 23.

DIRECT for COLOMBO, the beautiful clipper ship, SARAH WATSON, A1 10 years, 457 tons register. W. C. H. HOFFMAN, Commander; West India Docks. This magnificent vessel, just arrived from Tuticorin after a very rapid passage of ninety-six days, offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

COLOMBO.—The new clipper SHOOTING STAR, A1 10 years, 900 tons; St. Katharine Docks. This fine vessel presents the best opportunity to passengers and shippers of fine and perishable goods, as she will not carry guano or chymical manures.

ELLIS and SONS, 17, Gracechurch-street, E.C.

Regular line of Packet Ship. To sail on January 15.

FOR HONG KONG, the well-known Workington-built clipper, DUNMAIL, A1 14 years, 771 tons register, PETER THOMPSON, Commander; East India Docks.

For Freight or Passage apply to SHAW, LOWTHER, & MAXTON, 2, Royal Exchange-buildings, London, E.C.

Regular Line of Packet Ship. To follow the "Dunmail."

FOR HONG KONG, the well-known clipper, GRESHAM, A1 10 years, 965 tons register, L. C. BRAYLEY, Commander; East India Docks. This ship is celebrated for her rapid passages and sound delivery of cargo, and has superior accommodation for passengers.

For Freight or Passage, apply to SHAW, LOWTHER and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Last shipping day, 5th February.

FOR SHANGHAI DIRECT, the clipper ship WEYMOUTH, A1 12 years, 829 tons register; S. W. GIBSON, Commander; loads in the East India Docks. This ship has made some of the fastest passages hence to Shanghai on record (vide Lloyd's), and is noted for discharging her cargo without damage.

For Freight or Passage apply to NORRIS & JOYNER, 60, Cornhill, E.C.

## DINNEFORD'S FLUID MAGNESIA.

THE Medical Profession for Thirty Years have approved of this Pure SOLUTION OF MAGNESIA as the best remedy for ACIDITY OF THE STOMACH, HEARTBURN, HEADACHE, GOUT, and INDIGESTION; and as the best mild aperient for delicate constitutions, for LADIES, CHILDREN, and INFANTS, and for regular use in WARM CLIMATES.

DINNEFORD & CO.,
CHEMISTS, &c.,

### THE MAILS, &c.

According to the time tables of the respective companies, the two next inward mails, namely, the French mail leaving Hong Kong Dec. 25, and the English mail of Dec. 29, are due within two days of one another, the former on the 6th and the latter on the 8th proximo. We learn, however, by the present mail's advices, that owing to accidents to two of the Messageries steamers (the *Phase* having broken down, and the *Imperatrice* having got ashore in the Shanghai River), the departure of the French mail was likely to be delayed, and telegrams of a later date show that it did not leave Hong Kong until the 3rd January, or nine days late.

The next inward mail will therefore be that of Dec. 29, due here on February 8.

The latest telegrams from Hong Kong are those dated Jan. 3, in advance of the French mail above alluded to; they were received on the 20th inst.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P and O. steamer *Syria*, arrived Jan. 22.—From Shanghai: Mr. McPharlane. From Singapore: Mr. E. Tolson, and two second-class passengers. From Penang: Mr. Maxwell, Lieut. and Mrs. Lawder. From Galle: Mr. Cameron.

To Southampton, per P. and O. steamer *Nyanza*, expected to arrive Jan. 29.—From Yokohama: Mr. Goff. From Hong Kong: Mr. Murray, Mr. John Steele, and one second-class passenger. From Galle: Mr. and Mrs. Wilson, Mrs. Hudson, Miss Archibald, Captain Skottowe.

To Gibraltar: From Hong Kong: Mr. Pais.

By last Bombay mail, per P. and O. steamer *Columbian*.—To Suez, from Singapore: Mr. A. McDonald, Mr. J. Blythe.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Ceylon*, from Southampton, Jan. 23.—To Shanghai: Mrs. Cooper and child. To Hong Kong: Miss Gazalet, Mr. R Pottinger, R.N., Mr. and Mrs. C. Browne and child, Mr. A F. Angus, Mr. J. T. Middleton. To Singapore: Mrs. Burn and child, Miss Stevens, Miss Maxwell. To Ceylon: Miss Green, Mr. J. S. Lawrie.

Per P. and O. steamer *Syria*, from Marseilles, Jan. 31.—To Shanghai: Mr. M. Cassel. To Hong Kong: Mr. A. Corner. To Batavia: Mr. Doornik, Mrs. Van Delden and daughter, Mr. G. Van Delden, Mr. M. Van Delden, Mr. and Mrs. B. Decker, Mr. W. Walker. To Singapore: Captain and Mrs. Shaw. To Ceylon: Mr. L. Liesching.

Per P. and O. steamer from Suez, Feb. 7.—To Singapore: Mr. and Mrs. Stahlknecht.

Per P. and O. steamer *Massilia*, from Southampton, Feb. 6.—To Yokohama: Col. Brasyer, C.B., Mr. J. N. Silver. To Shanghai: Mr. A. Sykes. To Hong Kong: Mr. F. F. Freman. To Ceylon: Mrs. O'Grady. Miss Carey.

Per P. and O. steamer *Pera*, from Marseilles, Feb. 14.—To Hong Kong: Mr. J. H. Roberts, Mr. C. F. Harton. To Batavia: Mr. T. F. C. Borger.

Per P. and O. steamer *Ripon*, from Southampton, Feb. 20.—To Ceylon: Mrs. R. S. Maclagan and child, Mr. H. Walker.

Per P. and O. steamer *Delta*, from Marseilles, Feb. 23.—To Hong Kong: Captain T. S. Roberts.

Per P. and O. steamer from Suez, March 7.—To Shanghai: Mr. and Mrs. Reine.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

The present mail brings Yokohama advices to December 2. The Pacific mail steamer which left San Francisco on the 4th Nov., and the P. and O. steamer *Norma*, with the English mail of Oct. 9, arrived on the 1st December. Mr. F. J. Angier, the senior proprietor of this journal, was among the passengers by the former.

The following summary of news is from the *Japan Times*:—

The Mikado has arrived in Yedo. This has been the great event of the fortnight, and we have strong reasons to hope it is pregnant with good for foreign trade, as well as indicative of cessation of civil war, consolidation of the Government, and restoration of tranquillity in Japan. Already a start seems to have been given to some branches of trade in Yedo, and by next opportunity we hope to be able to announce a decided change for the better. The name of that city, we may mention by the way, has been changed, for official purposes, to Tokei, but for the present it will, of course, be commonly called by its old name.

The Mikado passed through Kanagawa, rather slenderly attended, on the 24th ultimo, and a place was prepared for foreigners to witness the procession. All Yokohama turned out to see the show, and we think we are quite right in saying that all came back disappointed. The entry into Yedo on the 26th was a far different, a very impressive, sight. With the exception of the writer and the artist for the *Illustrated News*, no foreigner was present, to our knowledge, except some members of the British Legation, and it is a noteworthy fact that the British flag was the only foreign ensign flown in Yedo in honour of his Imperial Majesty's visit.

Of the political significance of this very important move, and of its probable results, we shall defer discussion for the immediate present; but there is one point to which we must refer, as bearing upon an article in our leading columns, in which we remark upon the way in which journals abroad, and public opinion by them, are led astray by sensational letters and telegrams from this country. One of our contemporaries, to whom allusion was made in our last, still persists, in spite of the most authoritative and reliable assertions to the contrary, that Wakamatz, the capital of Aidzu, still holds out against the Imperial troops. There is not the slightest doubt that it fell on the 6th November, the defeated chief and his son formally surrendering their swords on the 8th. A singular little incident has come to our knowledge which strongly supports, as little incidents often do, the official news. A Japanese noble was entertaining some foreign friends a few days ago, when, in the midst of the feast, arrived an officer with despatches from the North. He was introduced to the company, after performing the duty for which he had come, and gave a most picturesque and touching account of the scene of the surrender. Aidzu's town had been completely surrounded and all supplies cut off, and after enduring as long as possible great privations—when at last all his ammunition had been exhausted, long after his rice and salt—nothing was left him but surrender. Proper arrangements having been made, the garrison marched out of the place, and the fallen chief placed his sword in the hands of the Imperial Commissioner. These, "the living soul of a Samurai," were immediately restored to him—and such, during this trying scene, was the dignity and noble bearing of the man that "even we his enemies," said the Southern officer, "could not refrain from tears at the sight." His memorial to the Emperor is said by Japanese to be a document of a very remarkable character. It will perhaps be officially published, and it is to be hoped that the Mikado will be advised to commemorate the happy event of his attaining his majority by treating with clemency an indubitably brave man, and one whose "rebellion" is perhaps little more than a mistaken idea of duty.

Digitized by Google

Shonai has also surrendered, we hear on the best authority, and thus the civil war is virtually over. A few predatory bands of masterless men, with no other means of livelihood than their swords, will doubtless be prowling about the country for some time, but no chief of name is now in arms against the Mikado. The rebellion is crushed.

Some time ago a special committee of the Chamber of Commerce was appointed to draw up a Minute upon the proposal by the Japanese to revise the silk and tea duties on a basis of five per cent. upon the average values of those articles for the last three years. We gave our own views on the subject when the committee was appointed. The report is ready, and will be submitted to the Chamber to-morrow. The same subject has been under consideration of the newly-established Chamber of Commerce at Hiogo.

The committee appointed to relieve us of the municipal deadlock has its report also ready, and will present it to the land renters on the following day. The municipal director has meanwhile been flourishing the auctioneer's hammer. On the 19th ult. Mr. Benson, on behalf of the Japanese Government, sold in this way eight lots of land situated at the back of those lots set aside for public purposes on the ground reclaimed since the fire of 1866. Each lot consisted of 437 tsuboes, and an upset price of 4 dols. per tsubo had been fixed. There was a fair competition, and the result was as follows :—

| Lot. | Price p. tsubo. Dols. | Buyer. | Total. Dols. |
|---|---|---|---|
| 177 | 14.25 | Valmale and Co., | 6,227.25 |
| 178 | 12.07 | Smith, Baker and Co., | 5,274.59 |
| 179 | 14.35 | Hoyt, | 6,270.95 |
| 180 | 12.86 | Grosser and Co., | 5,619.82 |
| 181 | 12.25 | Smith, Baker and Co., | 5,353.25 |
| 182 | 14.40 | „ | 6,292.80 |
| 183 | 13.15 | Neels, Witte and Co., | 5,746.55 |
| 184 | 12.50 | V. Comi, | 5,462.50 |
| | | | 46,247.71 |

These are tremendous prices, and we doubt much their being ultimately remunerative to the purchasers. The propriety of the municipal director selling is a moot point, much discussed by those interested. Either he has taken some hundreds of dollars out of the pockets of hard-working and not over paid professional men, and put them into his own, or he has done the work for nothing for the Japanese Government—work which he certainly never was meant to do when he was elected by this community, and which he has no right to do so long as his legitimate work is so far in arrear as it is. He has been asked pretty plainly on which horn of the dilemma he prefers to sit, but has vouchsafed no reply.

The new Bishop of Victoria is at present in Yokohama. He preached, christened and confirmed on Sunday last, and dedicated the cemetery besides ; by no means a bad day's work ; and did all bishops labour as hard, and we may say without flattery, as conscientiously and diligently as Bishop Alford—the *nolo episcopari* would, very probably, be something more than a *facon de parler*.

NAGASAKI LIGHTHOUSE.—The Japanese authorities have erected a lighthouse on the north end of Iwosima. (It is not known when a light will be exhibited.) The tower is constructed of iron, hexagonal in shape, surmounted by a gallery with iron railings, the whole painted white, with gilt ball on the top. The base of the tower is 189 feet above the sea, and is placed on the end of a narrow ridge 1¼ cable inside the extreme north point.

## CHINA.

—o—

### SHANGHAI.

From this port we have advices to the 9th December. The English mail of Oct. 9 arrived out on the 26th Nov., and the French mail of Oct. 18 was four days overdue when the present homeward steamer left. The latest telegraphic news from London was to Nov. 15, received *via* Kiachta on the 7th December. On looking through the files of local papers we find but few items that are not embraced by our Correspondent's letter.

The *Evening Courier* says :—"It is rumoured that Mr. McLeavy Browne, who holds the appointment of first Secretary to H. E. the Hon. Mr. Burlinghame, has applied to be recalled. Should this be granted it would be a serious loss to the Embassy."

Two heavily-armed gunboats, of 500 tons burthen, will shortly arrive for service against pirates. It is said that their officers receive their commissions direct from Peking. The *Titan*, Chinese surveying vessel, is armed with muzzle loading Armstrong guns.

The *North China Herald* says :—

Our readers have no doubt seen in our advertising columns an offer for sale of the copyright and plant of the *Recorder* newspaper. This step is owing, we believe, to the intended departure from Shanghai of the present editor of that paper, who goes to take charge of the leading journal in Hong Kong at the end of this year. We shall regret to lose from Shanghai a colleague with whom we have always worked in most friendly rivalry, and from whom we have always experienced courtesy.

George Phillips, Mr. T. T. Cooper's (Christian) Chinese Interpreter, has arrived from Hankow, with the purpose of accompanying Mr. Cooper to India, whither that gentleman intends shortly to proceed, with the intention of trying to cross, from the opposite direction, the route between Assam and Szechuen from which he was turned back by the Chinese.

We are informed that Mr. Myburgh, who for several years took the lead of the Bar of the Supreme Court, and attracted considerable respect, both by his personal and professional qualities, has decided not to return to Shanghai, but to stay in England, whither he had gone with the intention of being away only temporarily.

The *Recorder* mentions an amusing illustration of the manner in which the Chinese officials regard military rank. It may be recollected that Mr. Forrest not very long ago visited the Futai of Chekiang at Hangchow, Ma, the official at present appointed to succeed Tseng as Viceroy at Nanking. On that occasion Major Crossman accompanied Mr. Forrest, Mr. Jamieson, of the Consular service, being also of the number. Cards were sent in indicating the rank of the various persons, and in due course chairs were forwarded for the visitors ; a four-bearer chair for Mr. Forrest, ditto for Mr. Jamieson, and a very diminutive tumble down bamboo chair for the military mandarin. This plan, however, did not exactly meet Major Crossman's ideas ; and he was so little regardful of Chinese prejudices as to take one of the four-bearer chairs and leave the little one for Mr. Jamieson.

Sir Rutherford Alcock has notified a new set of Pilot Regulations, which seem likely to meet the requirements of the service. The clause making the employment of pilots compulsory upon vessels, which pressed unfairly upon coast and river steamers, has been abolished. The Regulations are understood to have been approved by the other treaty representatives, but have not yet been notified.

The French policeman who shot a Chinaman in the country has been tried, and sentenced to three months' imprisonment and a fine of 100 francs. A compensation of 200 dollars is to be given to the family of the deceased. The punishment awarded is the smallest laid down in the Code in cases where, through carelessness or other such cause, a loss of life has been occasioned.

We have lately heard of one of the most ingenious instances of Chinese cheating that has perhaps ever been put upon record. One of the river steamers had occasion to purchase a few tons of coal from a native, and it was found, when they were put into the furnace, that they would not burn at all. Upon investigation it proved that they consisted of stones painted black.

A correspondent writes to us from Tientsin, under date Dec. 1 : —"The weather here is still mild, and the river free from ice."

The *North China Herald* says :—"One of the most feasible schemes that has yet been suggested for a railway in China is the construction of a line along the banks of the Grand Canal, from the Yangtze to Ching-cheang-pu, on the old bed of the Yellow River. The district passed through is populous, the traffic along the canal immense, and the line could be constructed at a minimum of a cost. It is well known that the bed of the canal is in some places higher than the surrounding country, which is only saved from inundation by the solid banks which enclose its waters. These banks offer a ready-made road on which to lay the iron rails. Repairs to the embankment are needed in places ; and the promise to make these and to keep them in repair would be a trifling 'consideration' for a company to offer, to obtain the required permission. They could even hold out a prospect of strengthening the bund by widening it ; for it is, at present, hardly broad enough to admit two lines of rail. The boon to the inhabitants, of the embankment being thus entrusted to reliable hands, would be incalculable, and should, even in a Chinese mind, overrule any scruples as to injury to the boating trade likely to result from steam competition. Another point is, that the line in question would interfere with no property or graves. This, it will be remembered, was one objection raised by Prince Kung when H. B. M. Minister addressed him on the subject. A railway running straight across country, as railways would do, would level graves, upset houses, and generally disturb property to an extent which the Chinese mind feared to contemplate. Along the banks of the canal no such danger would exist ; the line would simply run along the top of a public bund, and would meet neither graves, houses, nor other obstruction in its course. It would be difficult to prove that even Feng-shuey would be disturbed."

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Dec. 8, 1868.

In my last letter I announced the satisfactory closure of the Yangchow negotiations. My sources of information were then ordinary report, but there has since appeared the following notification from Mr. Medhurst, accompanied by translations of the papers referred to :—

### NOTIFICATION.

YANGCHOW, Nov. 26, 1868.

The undersigned has much satisfaction in announcing for general information that a due measure of redress has been afforded for the outrage committed upon British subjects in this city in August last, and that the Huai-Kuan and Chinkiang difficulties have been satisfactorily adjusted.

In the matter of Yangchow the local authorities who held office at the date of the outrage have been dismissed, and indemnity has been paid on account of the losses and injuries sustained by

| Losses of missionaries and servants, inclusive of repairs to premises ... ... ... ... ... | Tls.1,128.40 |
| Injuries (subject to opinion of H.M.'s Minister as regards increase or decrease of amount) ... ... | 500.00 |
| Chinese landlord and carpenter 270.90 dols. ... | 197.75 |
| | Tls.1,826.15 |

A proclamation by the Viceroys Tseng and Ma and Futai Ting has likewise been extensively promulgated, and another by the Commissioners Li and Ying (translations of which are appended); a large and handsome stone tablet has been erected upon Mr. Taylor's premises, bearing a cautionary inscription (a translation of which is also annexed); the missionary party, including the female members, have been invited back and formally reinstated; two of the ringleaders in the riot (one of them recognised by Mr. Taylor as the individual who robbed the ladies and led the plunderers up-stairs) have been sentenced—one to the cangue for two months and banishment into slavery for life on the frontier, the other to the cangue for two months and banishment for three years; and a sum of taels six thousand has been lodged in the hands of the undersigned as a guarantee that a literary graduate named K'o, who has absconded (the sole member of the gentry against whom any positive evidence has been forthcoming), shall be produced and duly punished by the local authorities within the time specified by law for the discovery of such offenders, failing which the local authorities themselves are to be dismissed from office.

As regards the Huai-Kuan Barrier, compensation has been made on account of losses sustained by the British subjects concerned, as well as on account of the losses and injuries sustained by their servants, as follows:—

| | |
|---|---|
| Compensation to Mr. Canny ... ... ... ... | Tls. 506.20 |
| Compensation to his shroff for losses and expenses... | 303.72 |
| Compensation to Mr. Bean's shroff for losses ... | 43.80 |
| Compensation to Mr. Canny's and Mr. Bean's shroffs for ill-usage ... ... ... ... ... ... | 58.40 |
| Compensation to Mr. Bean for value of goods lost sight of, to be refunded provided said goods are produced within a given time ... ... ... | 896.00 |
| | Tls. 1,808.12 |

The guarantee of six thousand taels (Tls. 6,000) above referred to is likewise to be held liable, during its retention, for any further damages which the Superintendent of the Huai-Kuan Barrier may be proved to have occasioned in contravention of the Treaty.

In connection with Chinkiang, the only difficulty experienced was in the peaceable occupation of certain premises rented by Mr. Taylor within the city walls. These have been duly made over to him, and a lease formally signed and recorded.

This satisfactory solution of difficulties, which at one time assumed very serious proportions, is mainly due to the hearty co-operation of H.M.'s senior naval officer, but for whose energy in taking up the matter in the first instance, and perseverance in carrying it through to the end, a less happy result might have been looked for. W. H. MEDHURST, H.B.M.'s Consul.

MA., Governor General of the two Kiang and Imperial Commissioner for Foreign Trade, etc., etc.

TSENG, lately Acting Imperial Commissioner for foreign trade and Governor General of the two Kiang, etc., etc.

TING, Governor of Kiangsu;

hereby issue a proclamation for general information.

Whereas the preaching of religion is sanctioned by treaty and all persons are at liberty to become proselytes thereto, according as it suits their convenience, without compulsion either for or against.

We, therefore, issue this proclamation to give the population, civil and military, of these districts to know, that it is required of them that they carefully observe the treaty which has been concluded by our most Gracious sovereign the Emperor, and that they must not annoy religious establishments, nor raise pretexts for disturbance; nor must they treat foreign travellers with wanton disrespect. Every wilful offender will certainly be visited with heavy punishment without hope of pardon.

Obey with trembling.

A special proclamation, issued on the 27th day of the 9th month of the 7th year of Tung-chih (11th November, 1868).

TRANSLATION.

Notice to be engraved on stone tablet, and placed within Mr. Taylor's premises at Yangchow.

The Prefect of Yangchow.

Whereas this house has been rented by the British subject Taylor, under the sanction of his Consul, and of the local authorities.

No idle or improper persons are allowed to enter and create a disturbance. Offenders will be arrested and punished.

Obey with trembling.

A special notice. Obey.

TRANSLATION.

LI, Commissioner of the Salt Gabelle, etc., and,

YING, Taoutai of Shanghai, Superintendent or Kiang-nan Maritime Customs, etc., hereby issue a proclamation for general information.

Whereas, we have received the instructions of their Excellencies the High Ministers for Foreign Trade Ma and Tseng, to adjust matters at Yangchow, we find that on the 22nd day of August, 1868, evil disposed persons excited the people of Yangchow to enter the house rented by the British subject Taylor and others, and violently assault and plunder the inmates, so as to lead to their eventual ejection from the premises; some of them in a seriously wounded condition, and whereas the local authorities were clearly guilty of having neglected to avert the evil in the first instance, it therefore became the duty of the high authorities, after clear examination into the circumstances, to order the degradation of the city officials, the condign punishment of the ringleaders, the grant of due compensation to the sufferers, the repair of the house, and the restoration of its former inmates.

All this having been done as a matter of simple justice, it now becomes our further duty to issue a public proclamation, and this proclamation is therefore issued for the purpose of making it clearly understood to all men, high and low, that British subjects possess the liberty to enter the inner land for the pursuit of their lawful purposes, under a treaty granted by his most gracious Majesty the Emperor, and that any one who presumes to insult or annoy such persons, in any way, shall meet with condign punishment. Local authorities everwhere, moreover, are to see that they extend due protection to British subjects who may have occasion to appeal to them for assistance or redress.

Let all tremblingly obey.

A special proclamation issued on the 15th day of the tenth moon of the seventh year of T'ung-chih.

(18th November, 1868.)

On the payment of the six thousand taels mentioned in Mr. Medhurst's notification the steamer *Tung Che* was released. It was found impossible to go up to Hwai-quan in consequence of the rapid decrease of water in the Grand Canal; but the goods last stopped were allowed to pass, and an apology was received from the Hoppo. Mr. Taylor is now in peaceable possession of his house at Yangchow. Mr. Medhurst returned to Shanghai on the 1st inst.; the *Rinaldo* left Chinkiang on the 25th November, while the *Rodney* and *Icarus* are only waiting for spring tides to enable the former to come down in safety. The graduate K'o is believed to be in Yangchow, where the yamen runners are seeking him, under the pretext of being unable to find his whereabouts. But as the Prefect and city magistrate will be deprived of their seals at the end of two months if they do not bring him to justice, this process cannot be continued longer than for that period. He has already been sentenced in anticipation to banishment for life beyond the frontier. During the stay of the troops at Yangchow two parades were held on an extensive ground outside the West gate, to reach which the entire breadth of the city had to be traversed. Thousands of Chinese flocked to each spectacle, and expressed unbounded wonder at the rapidity of Snider firing, and the ease with which the Armstrong guns were manipulated.

On the whole, the expedition has proved a marked success, and will no doubt leave a lasting impression on the native mind. I trust that something similar will take place at Takow, for which port the *Rinaldo* started on the 3rd inst. She took down Mr. Swinhoe, who, under express orders from Peking, is to attempt the diplomatic part of the proceedings. This part will, of course, as in Mr. Medhurst's case, be merely the declaration of an ultimatum, with an appeal to force. The Takow people have committed numerous outrages, which have evidently been inspired by the officials. The last of which I have heard was the burning of Dr. Maxwell's house during his absence from home; but this is merely one out of a long catalogue. Each year proves that the "gunboat round the corner" policy is the only policy likely to succeed in China; we have nothing to expect from the honour and liberality of the nation.

The event of the fortnight has been the annual dinner of the Sons of St. Andrew. But one criticism has been passed upon it—that the speeches were good, but the viands and wines abominable. Many persons actually ate nothing, and one indignant Scot wrote to the papers, complaining that he had on his return home at two o'clock in the morning to ring up his servants in order to get wherewithal to stay his hunger. The match between the Shanghai Rifle Club and the Rifle Association of Hong Kong and Yokohama was completed on the 27th November. The weather was very unfavourable, the first day being intensely cold, and the second blowing in gusts now from the right, now from the left. This will account for the smallness of the score. The eight competitors fired each ten shots at each range, the result being:—

| 200 yds. | 400 yds. | 600 yds. | Grand Total. |
|---|---|---|---|
| 178 | 195 | 108 | 481. |

The scores made by the Shanghai Club and the Hong Kong Association on the two former occasions were as follows:—

| Dec., 1867. | 200 yds. | 400 yds. | 600 yds. | Total. |
|---|---|---|---|---|
| Shanghai. | 192 | 206 | 121 | 519 |
| Hong Kong. | 223 | 209 | 126 | 578 |
| May, 1868. | | | | |
| Shanghai. | 180 | 196 | 118 | 494 |
| Hong Kong. | 189 | 202 | 138 | 529 |

Digitized by Google

The North China branch of the Royal Asiatic Society have just concluded the purchase of an admirable and probably unique collection of books on China, the property of Mr. Wylie, whose name, as agent in Shanghai for the British and Foreign Bible Society, is familiar to many of your readers. Mr. Wylie is about to return to England, and thus the Society have had the chance of securing his library, the privilege of access to which will, it is hoped, attract many new members to the Society's ranks. Much uneasiness was felt here about the fate of the *James Shepherd*, which sailed from London on the 9th June, with passengers and cargo, but I am happy to say she arrived safely at Wusung yesterday. The last steamer to the North for the season sailed on the 4th inst., and there is just a chance of her having to winter at Tientsin, as the cold weather is reported to be setting in with great severity.

From Chefoo we still hear flourishing mining reports, but latterly the search for gold seems to be neglected in favour of lead. A lode of sixteen inches thick was struck some weeks ago, and a miner, who is said to have had much experience in Mexico, estimates the silver contained in it at 5 per cent. Another party met with a specimen of ore, which, on analysis, proved to be a rich oxide of antimony associated with sulphurets of lead, iron, and zinc, but with hardly a trace of silver. It would appear, therefore, that the mineral wealth of the Chefoo fields is only now being for the first time learned.

As to general matters it is rumoured that the Chinese Government are about to open several new ports, and that Mr. Swinhoe has been appointed by Sir Rutherford Alcock to visit the places mentioned and report upon their trading facilities. I fear, however, that this indication of native advance is delusive. It is also said that the Imperial Government have decided upon taking active measures to suppress piracy, and that to this end two heavily armed gunboats of 500 tons burthen have been ordered from England. The *Titan*, which is at present employed as a marine surveying vessel, has been armed with Armstrong guns, which formerly belonged to the Customs Artillery Corps. This looks like business, but will probably end in smoke.

### THE LAST COOLIE TRAGEDY.

The following interesting particulars concerning the mysterious coolie ship which recently arrived at Hakodadi, and which proves to be an American vessel called the *Cayalti*, have appeared in the *Shanghai Recorder*, that journal being indebted for them to the courtesy of the captain and officers of the U.S.S. *Iroquois*:—

There were forty-one Chinamen on board, who said that in October last year they were taken on board the *Providenza*, a coolie ship, at Macao, with some 300 others, and were taken to Callao, and there some forty-seven or forty-eight were transferred to the *Cayalti*, the remaining two or three being put on board at Callao. This vessel cleared from that port on the 16th January of this year for Pascamayo and Cherepe, on the coast of Peru, the coolies being intended for the sugar plantations near these ports. They were all put into the main hold and kept there, their food being brought down to them by a Chinese cook. On the morning of the third day out they rose, threw off the hatches and assaulted the men on watch, four in number, with hatchets, spades, and other weapons. The mate was cut on the left shoulder with an axe; he attempted to shoot one of them with a revolver, but it missed fire. He then mortally wounded two of them with a knife, when the crowd rushing on him he was forced to jump overboard. Another European — it is not known what his position was on board—rushed into the cabin below and jumped through a stern port into the water. Just above this port was the mark of a bloody hand, from which it is conjectured that he was wounded. It was stated that the other two men who were on deck also jumped overboard, and that the Chinamen lowered a boat and despatched them with knives while struggling in the water. On return they hoisted the boat, and an anchor was got up and brought to the gangway. The other four men were during this time kept confined in the forecastle, and when the boat returned they were fastened to this anchor and thrown overboard. The Chinese cook interceded for the captain, who was then told that as he was a very good man they would spare his life if he would take them to China, to which he consented. He is stated to have had two revolvers, with which he threatened the coolies, but on their telling him that if he shot any of them he would be killed, he abstained from using them. They stated that one Chinaman fell from aloft and was killed, and that eight others were killed in the fight. They say that the captain went into his cabin and brought out a great number of pieces of money and gave it to the seven or eight ringleaders, who distributed it in different proportions among all the Chinamen on board.

After this, they say, they had very severe weather, and when about four months out they came to an island surrounded by ice, where the people were dressed in furs and rode in sledges drawn by dogs. This is supposed to have been somewhere near the coast of Kamskatcha. There they lost their anchor, during a gale, and were driven before the wind. The men said that they made a stay at that place for some three or four weeks, and that the captain was sent on shore, accompanied by the Chinese cook, who, as above-mentioned, had saved his life, in order to purchase provisions; and they added that neither of the two had returned, the captain having taken this opportunity to effect his escape. The details connected with this part of the subject are not clear, some of the men saying that a note was sent off to the captain from on shore, but two witnesses, whose statement was very distinct, declared that the captain had himself told some of the men from on board, who had gone on shore to induce him to come back, that he would not return. The men were in possession of hoods, fur robes, and other articles, evidently purchased in the icy regions; and some of the copper was off the vessel, but, strange to say, she did not make any water.

After losing their anchor and being driven out to sea, they made their way to Volcano Bay, to the north of Hakodadi, having in the mean time visited some islands, where they purchased provisions. After arriving in Volcano Bay they waited about for some two weeks, when they got two Japanese pilots to take them into Hakodadi. The ship coming into port without any colours, was immediately boarded by the Consular authorities, and as no papers could be found she was handed over to the Japanese, by whom she was taken in charge and moored. The story that the Chinese gave at first was, that after being out for some time they were left below without food, and, after standing hunger for three days, they came on deck and found that everyone was gone. The coolies are at present in prison at Hakodadi, and the matter awaits the action of the United States authorities.

It is worthy of note that the names on the crew-list were all Spanish; and it is presumable that the mutiny probably took place in some degree in consequence of this fact. It was stated by the Captain of the Portuguese ship *Dollares Urgarte*, before the Court at Macao, that when the *Cayalti* left Callao she took with her about 15,000 dols. in specie.

### THE BURLINGHAME MISSION.

The *Supreme Court and Consular Gazette* of Dec. 5 has the following article:—

After the Treaty of Tientsin had been concluded and ratified the various foreign representatives at Peking soon found it desirable to lay out some line of policy which would be effective in forcing the Chinese to act up to the stipulations agreed to in that instrument. At a very early period a disposition to evade the treaty provisions became manifest; and it also became clear that, unless great care and vigilance were used, the privileges which had been granted to foreign nations would soon be rendered of little or no effect. Under such circumstances, it was obvious that combined action on the part of the foreign representatives was not only desirable, but almost essential to the maintenance of our treaty rights. A policy of co-operation thus naturally sprang up, and, until recently, was strictly adhered to in all measures of any importance affecting foreign interests. The attitude adopted by the foreign representatives was, however, always of a conciliatory and friendly nature. They had no desire to appear before the Chinese as a hostile phalanx, against which it was necessary carefully to guard; but were content rather to take the position of a friendly council, willing to discuss all the bearings of the various measures which from time to time it was desirable to adopt; and anxious to obtain the views and to respect the wishes of the Chinese authorities, so far as these were compatible with the reasonable maintenance of the rights which had been conceded by treaty, and which were essential to the simple but important object of being able to conduct our trade without unreasonable restrictions and prohibitions. With the fact before them, that in the course of a few years the whole of the treaty would become a subject for reconsideration and readjustment, it was naturally considered undesirable to stand very firmly upon points of minor importance; and no desire was shown to do otherwise than to give the utmost consideration to all reasonable requests made by the Chinese authorities.

Up to a certain point there appeared every reason to believe that this plan of action would be productive of satisfactory results; that it would give the Chinese time to discover the means of carrying out the obligations which they had contracted towards the Western Powers, and enable the latter to further their trade with the country in such a way as would be conducive to the interests no less of China herself than of foreign nations.

Such, briefly, was the scope and aim of the co-operative policy, which, it will be seen, originated from the nature of the circumstances themselves, and was not exclusively an idea of the Hon. Mr. Burlinghame, although, no doubt, that gentleman was much identified with it, and, in from time to time giving advice to the Chinese, he succeeded, while he was still Minister for the United States, in showing himself capable of taking such comprehensive views of Chinese questions, as to command on their part so much esteem and respect as ultimately resulted in his being appointed their Ambassador to foreign nations.

While matters were thus going on two ideas seem to have occurred to the Chinese officials. First, that they would do well by obtaining advice from foreigners, and secondly, that they would do better by being advised by people in their own employ than, as hitherto, by consulting only with the foreign Ministers. Not content with reasonable and fair concessions, they gradually became desirous to pare down the provisions of the treaty, so that the whole advantage might be upon their side; that, while we afforded them a large Customs' revenue, aided them in the maintenance of order, and were of service in many other ways, they might indefinitely put off taking any steps towards removing the various obstructions to our trade.

The requests made by the Chinese gradually increased in extent and importance, until it became clear to them that they were not likely to obtain the countenance and support of the foreign Ministers in their attempts to stretch every doubtful or difficult

Digitized by Google

point in their favour; and it was thus that the aid of Mr. Hart was called in, and that three or four years ago we discovered that his visits to the capital were becoming more frequent, and now find that they have culminated in his taking up his residence permanently at Peking, and there establishing the headquarters of what still goes by the name of the Inspectorate of Customs.

The Hon. Anson Burlinghame, late United States Minister, seems to have aided in no small degree in fostering the line of action which has led to the present state of affairs. That the Chinese should have chosen him as their ambassador for the purposes of carrying out a retrogressive policy shows that they had full confidence that his views and wishes were in accordance with their own. In leaning thus towards the Chinese, it is probable that he was not altogether acting in opposition to the views of his Government, who, for reasons whose policy we find it difficult to understand, appear to be willing to uphold the Chinese Government in measures which are clearly opposed to the interests of progress, but which, it seems to be imagined, will tend to the stability of the present ruling Powers. In the new Treaty between this country and the United States the strange spectacle is presented of a great and advanced nation joining hand in hand with an obstructive and exclusive country, in measures distinctly designed to stay the march of progress and civilisation, the desire seeming to be to keep up the present state of things, however defective, as long as it is possible to do so.

These various circumstances have all combined to make the Chinese authorities disposed to listen to foreign advisers, and to seek such aid in the management of their affairs; and it is impossible not to believe that the inspectorate now rising up at Peking is designed to be something very different to what was intended by the Inspectorship of Maritime Customs.

## HONG KONG.

The present mail left Hong Kong on the 15th December. The outward French mail of Oct. 18 was received on the 30th November, and the succeeding English mail of Oct. 23 (with London telegrams to Nov. 13) on the 5th December. The news received by this opportunity contains more features of interest than for many months past.

The *China Mail* furnishes the following item of news:—The occurrences of the past fortnight have not comprised any incident of startling interest. A rifle match has been fired between the Rifle Clubs of Hong Kong, Shanghai, and Yokohama—7 rounds at 200, 400, and 600 yards. The first scored a total of 533; the second, 481; the third, 589. The Yokohama Club is therefore the winner. The weather in Hong Kong was very unfavourable for practice. A cricket match was played last week between two elevens drawn from the 73rd Regiment and from the Hong Kong Cricket Club; it was won by the former, who scored a total of 193 against their opponents' 164. His Excellency Sir Richard MacDonnell and Lady MacDonnell have returned from their northern trip. While at Shanghai, his Excellency was invited to the St. Andrew's dinner.

In the police court Mr. E. A. Vaucher appeared on a summons, at the instance of Mr. Marty, administrator of the estate of the late Mr. Garretta. Mr. Francis (on Mr. Gaskell's behalf) appeared for Mr. Marty, and asked Mr. May to adjourn the hearing for a week. Mr. May said, all parties agreeing, he would accede to the application. Mr. Vaucher was called upon to enter upon his own recognisance in the sum of 1,000 dols., and the summons was accordingly ordered to stand over till the 15th December.—The proceedings are understood to have relation to the expenditure by Mr. Vaucher of certain trust moneys belonging to Garretta's estate.

The cup subscribed for and prepared by the Chinese residents for presentation to the Hon. W. T. Mercer, lately Acting Governor and Colonial Secretary of Hong Kong, is now on exhibition at the premises of Lee Ching, Queen's-road. It is one of the most massive and handsome pieces of silver plate ever made by the Chinese, and will be a magnificent ornament to the recipient's drawing-room. It is thoroughly Chinese in workmanship and in design, and stands over two feet high, is nearly a foot and a-half broad, and is four feet in circumference round the outer edge. Standing upon three gorgon-like massive claw-feet, the bowl is beautifully traced with carvings of Chinese scenes, executed in characteristic Chinese style, while on one side is neatly cut the following English inscription:—"Presented to W. T. Mercer, Esquire, by Kwok Acheung, Cheung Ashau, Wo Hang, Tso Tak, and other Chinese residents of Hong Kong, 1868—'Long shall we remember you like the genial sun; your ocean-like kindness constantly benefits us.'"

On the opposite side this inscription is as neatly engraved in Chinese, with the addition of a few of the donors' names not given on the English side. The contributors number, we believe, three times seven; and whether or not there be luck in odd numbers, their appreciation of Mr. Mercer's many good qualities has taken a very graceful form. Of the value of this fine piece of silver the metal weighs 310 dollars, while altogether the cup has cost 650 dollars. One of the finest features of this presentation plate is the head-piece which forms the lid; it is composed of three dragons, whose coils (in frosted silver) form the body of the bowl-cover; the three heads give an elegant finish to the upper part, the central and largest dragon head being the centre piece. We understand that the cup will be open to view until the departure of the next mail.

We much regret to learn that the *Gnat*, a composite twin-screw gunvessel similar to the *Dwarf*, was wrecked on the shoals off the S.W. part of the Island of Balabac, in the Palawan group, on the 15th November last. Commander Theobald sent Acting-Lieutenant Kelham (in a ship's boat, we presume) to Iloilo, Island of Parray, one of the South Philippine group, a distance of about 300 miles. Lieutenant Kelham has chartered the Spanish merchant steamer *Sud Ouest*, and has gone to pick up Commander Theobald and the crew. No mention is made of loss of life, or of the possibility of saving the vessel; Lieutenant Kelham hopes to arrive at Manila in the *Sud Ouest* about the 15th December. The *Leven* sailed for Manila last night (Dec. 14).

Leon Boerbon, formerly proprietor of the Argus Hotel, dropped down and died very suddenly on the 1st, about eight o'clock, while on a visit to a friend resident in Queen's Road. Disease of the heart is said to have been the cause of death; and as the evidence of qualified medical attendance was in due form, no inquest was deemed advisable.

We understand that the police have been on the alert lately for the purpose of discovering the whereabouts of a Chinese military officer, of the rank of Major, who was believed to have absconded to this colony after committing a most cold-blooded murder on one of his own subordinates at Canton. The man has not yet been discovered, in so far as we are informed.

A contributor to *Notes and Queries on China and Japan* for November communicates the following paragraph on executions in Hong Kong:—"The somewhat ghastly account which a Hong Kong journal gave of the last execution here induces me to state, as a scientific fact, and not wholly uninteresting to the readers of *Notes and Queries*, that of all the pirates and murderers hung in this colony, at any rate for the last three years, not one has been found to have had the neck broken. The medical man, who gave the information to the journal referred to at the last execution, hardly spoke with usual professional caution, for I may state, on the best authority, that the sufferer, though an unusually tall and heavy man, was found on dissection to have the odontoid process completely in its natural position. I imagine that this is not to be attributed to any anatomical peculiarity attaching to the Chinese, but rather that the common theory of the cause of death in hanging is erroneous."

At the annual meeting of the China Traders Insurance Company, held on the 7th Dec., the report showed 35,000 dols. to be carried to reserve fund; 35,000 dols. to be divided pro rata amongst contributing shareholders, and a general dividend of 350 dols. per share.

At a meeting of the Hong Kong Fire Insurance Company it was resolved to pay a dividend of 300 dols. per share from existing funds; to wind up the present company on the 31st December, 1868; and to reconstitute the company on Jan. 1, 1868, and register it under the Limited Liability Act.

An important meeting of the Hong Kong Chamber of Commerce took place on the 14th Dec., an account of which will be found below.

The *China Overland Trade Report* says:—It is rumoured that some changes have taken place in the gambling farm, the old company having thrown up the speculation with the hope of inducing the governor to lower the monthly fee, but the *ruse*, for such it was, proved unsuccessful, and a new bid was immediately accepted from Wo-hang, a native merchant of position among the Chinese, of reputed wealth, and well-known to the foreign community. The farmer comes into possession to-day, the 15th Dec., and it is understood that he pays slightly under 18,000 dols. a month for the monopoly.

### CHAMBER OF COMMERCE.

The half-yearly general meeting of the Hong Kong General Chamber of Commerce was held on Dec. 15th. Present, Messrs. Helland (vice-chairman, presiding), S. D. Sassoon, E. R. Belilios, V. Kresser, J. F. Buxey, W. J. Bryans, J. P. Duncanson, C. M. Bosman, A. Zimmern, E. Delbanco, J. Arnhold, W. N. Olmsted, and W. Kaye.

The Chairman said it was with pleasure he saw so many members present on this occasion, and he supposed that the able remarks of the *Daily Press* of that morning had stirred up their consciences. This was the second time that the meeting was called for, the first notice not being sufficient. The business was very limited, the passing of the report drawn up by the committee being all which was before them; and he would be happy to hear anything which members might wish to add to or diminish from the said document. The chairman then read the report, which was exceedingly short.

Mr. Belilios here rose, and addressed the Chamber regarding a paragraph in the report in reference to opium revenue levied by the Chinese Government. He said he was disappointed to find that the Chamber's Committee had not looked upon themselves as identified with those members more nearly connected with the opium trade. Many gentlemen closely connected with that trade were members of the Chamber, and, in justice to them, the Committee ought to have taken up the matter of the opium squeezes with more energy than had been done. He would therefore propose that one of the opium merchants should be requested to take counsel with the Committee, in order that something should be

Digitized by Google

done in the matter. They ought to contend for the freedom of the port; the subject of whether or not the levy was increased or decreased was a secondary consideration. And they ought not to allow Chinese cruisers to annoy the trade, and the Chinese Government to place Custom-houses where the junks of this port were bound to pass. If they gave the Chinese an inch, they would soon have a yard; and without a European inspectorate, who could tell what the mandarins would not do? They thus gave the Chinese unlimited authority to do what they liked, and the natives would levy duties upon shirtings as well as opium, if they chose.

The Chairman replied that the subject of the alleged opium squeezes had been fully considered by the committee; and on reference to the treaty it was found that the Chinese had reserved to themselves the right, the distinct right, of increasing or diminishing the duty on opium. (Here the chairman read the 1st clause of rule 5th of rules respecting trade and dues, by which transit dues are regulated.)

Mr. Belilios: But we must defend the freedom of the port.

The Chairman continued to say that they had done so. An attempt had been made to establish a sort of custom-house in this colony, which had been met by the strongest measures on the part of the authorities. The man who was to have acted disappeared, else he would have most certainly been flogged publicly through the streets of Hong Kong.

Mr. Belilios said that such audacity as had been shown by the Chinese was unprecedented, and had never been found in any nation before. Hong Kong was not a free port at present. We did not allow our own Government to levy duties on anything it chose; but the Chinese cruisers were allowed to do so at our very doors. The article read by the chairman applied only to goods after landing in Chinese territory; and the Chinese, the speaker said, were blockading our port.

The Chairman: Not now, so far as I believe. The whole thing has been exploded.

Mr. Belilios insisted that the levies were in existence at the present moment.

The Chairman remarked that if they only applied to opium the Chamber had no right to interfere.

Mr. Belilios was certain that the spirit of the treaty was never intended to convey an allowance of such acts. They ought now to try to defend the freedom of the port.

The Chairman again said that the attempted fixture of a house at this port had been frustrated.

Mr. Belilios again observed that levying without European inspectors was an unparallelled piece of audacity.

The Chairman admitted that so far, and said that the audacity had been treated as such by the authorities. Had Mr. Belilios anything to put to the meeting?

Mr. Belilios then proposed that the subject be considered by the Chamber, and that one of those more intimately connected with the opium trade should assist the committee.

Mr. Buxey seconded the proposition.

Mr. Bosman said that the rule read by the Chairman applied to transit dues only, and not to other dues. A junk going from this port to Cambodia had to pass the Chinese Custom-house outside and pay dues there levied; and that surely interfered with the trade of the colony. There was nothing in the treaty to justify this, and as a Chamber of Commerce, they ought to deal with the question. He would suggest that the paragraph in the draft of report be struck out, and the question be reconsidered.

Mr. Sassoon said it would be much better to strike it out altogether, as it would do injury to the opium trade to pass over such a question lightly. They should say to the Chinese that they would fight them if unjust dues were levied.

It was then unanimously carried to delete the paragraph referring to the establishment of Custom-houses, and the report of the committee was thereupon passed. It is as follows:—

"The committee have but little to bring before the meeting on the present occasion. The following subjects are those which have come under their consideration:—

"*Correspondence between Mr. Hart, Inspector-General of Customs at Peking, and this Chamber.*

"In the appendix will be found copies of a letter received from Mr. Hart, Inspector-General of Customs, and the reply of this Chamber. Hong Kong being a British colony and a free port, the working of the Chinese Customs Department does not much interfere with business here; still Mr. Hart's letter expressed his willingness at all times to meet the views of the representatives of mercantile bodies with regard to the just administration of the Revenue Departments all over the Empire; and it is hoped this friendly relationship between the head of the Foreign Inspectors of Customs and the different mercantile communities in China will lead to results conducive to the public good.

"*Changes in the Dates and Hours of Departure of Mails.*

"The Chamber, as mentioned in last report, addressed the Acting Colonial Secretary on this subject, and in the Appendix will be found the reply from the Colonial Secretary's office, with copy of a letter from the Postmaster-General's department in London.

"*Revision of the Treaty.*

"The letters in the Appendix from Consul Robertson, in Canton, and the reply from the Chamber, contain all the information required upon this subject.

"*Funds of the Chamber.*

"The accounts of the Chamber for the past half-year have been audited by Messrs. Riddell and Nelson, and are annexed hereto. It will be seen that there is a balance against the Chamber of 478 dols. 93c, against which, however, subscriptions to the Chamber circulars up to date have yet to be collected, amounting to 350 dols. The other funds of the Chamber, 10,000 dols., remain on deposit in the Hong Kong and Shanghai Banking Corporation, and Chartered Mercantile Bank of India, London, and China."

On the Chairman remarking that this was the business of the meeting, it was observed by some members that the resolution of Mr. Belilios had to be disposed of.

The Chairman said that this meeting was called for the adoption of the report only.

Mr. Delbanco remarked that he did not see that any strictly legal interpretation should be given as to what was to be decided; and if an important question was raised, such as the present, something should be done.

The Chairman replied that it was very easy for those to talk so who had not the trouble attached to such matters, but there had been very little desire shown to do anything upon any matter touching the trade of the colony; and two meetings had to be called before anything could be done. The position of member of committee was a most thankless and ungrateful one. Perhaps Mr. Delbanco would join the committee, and then something might be done.

Mr. Delbanco: No, no; I beg your pardon. You might then speak of winding up the Chamber altogether. But when a subject of importance arises it ought to be dealt with; and the members, he was sure, had the greatest confidence in the committee.

Mr. Bryans said that the meeting was one at which anything could be discussed. The Chamber at Shanghai had discussed the measurements and Chinese clothing; and it was an argument in favour of doing so that a large meeting, so difficult to get up, was now gathered together.

Mr. Bosman had no doubt that the duties of the Committee were very arduous, judging from the report. (Laughter.) He had one suggestion to make, viz., that something should be done in obtaining the privilege of posting letters on board the French packets up to the time of departure, the same as they did on board the P. and O. steamers. He understood that it was only a little matter of delicacy between the French mail-agent and the Postmaster (which no doubt could be arranged), which prevented it at present.

The Chairman said that was a very good suggestion.

Mr. Belilios' motion as to the opium was then put to the meeting. It is as follows:—"That the Chamber should take cognisance of the extra squeezes that are now being levied by the Chinese Government under the guise of tax they are entitled to according to the treaty; and that, in doing so, the committee be requested to ask the assistance of one or two members who are connected with the opium trade, who may point out means to remedy the evil."

The Chairman thought that a special committee ought to be appointed to consider the question; but he was afraid that the resolution did not meet the case, because the Chamber had already taken cognisance of the opium question.

Mr. Sassoon said that no steps had been taken by the Chamber; the Governor had been memorialised by the community, but the Chamber had done nothing.

Mr. Kresser spoke favourably of the motion.

Mr. Bryans rather considered that the Chamber was assuming that there was an evil to remedy before they had proof that the evil existed. If the duties alluded to were not levied in violation of the treaty, then there was no evil to remedy; nor was there any evil if the levying of those duties had ceased. They could only remonstrate.

Mr. Bosman assured the Chamber that the levy had not ceased, for he saw it yesterday, when seven or eight war junks and one or two cruisers were overhauling outgoing junks a few miles outside.

The motion having been put by the Chairman, was duly carried.

Mr. Sassoon next proposed that, as the former Parsee member of committee had gone away, another Parsee gentleman ought to be placed upon the committee to represent Parsee interests. He would propose Mr. Buxey.

Mr. Bryans seconded the proposition, and it was duly carried.

Mr. Bosman then proposed:—"That the committee take into consideration the advisability of the necessary arrangements being made for posting letters on board the French packets up till the time of departure of the steamers, as is now done on board the P. and O. steamers, and address the authorities on the subject.

The resolution, having been seconded by Mr. Bryans, was unanimously carried; and the Chamber adjourned, after passing a vote of thanks to its vice-chairman for presiding.

## CHINA TRADERS' INSURANCE COMPANY.

The third ordinary meeting of shareholders in this company was held at the office of the general agents, Hong Kong:—

Present:—Messrs. Helland (in the chair), G. Heard, A. Heard, Viscount de Cercal, Messrs. (Hon.) Taylor, Kaye, Delbanco, Mellish, Olmsted, Captain Sands, Duncanson, Da Costa, Chaindler, and Shung.

The following is the printed report of the committee:—

"The committee have now the pleasure of waiting upon the

Digitized by Google

shareholders with a report of the working of the company during the past twelve months.

"The amount of premium collected in Hong Kong and China, between the 1st of November, 1867, and the 31st October, 1868, and the amount collected at the foreign agencies within that period, of which the general agents have received advice, after deducting all sums paid as bonus and commissions and adding interest, amounts to 320,010 dols. 22c. The outstanding averages and claims not yet settled amount to 39,689 dols. 53c. (it is expected that this item may be somewhat reduced). The annexed accounts have been audited by Mr. J. B. Taylor and Mr. E. Delbanco, the last-named gentleman having been appointed to take the vacancy caused by Mr. William Kaye having joined the committee. In accordance with the articles of association, the meeting will have to elect auditors for the coming year; Mr. Taylor has resigned, and Mr. M. P. Jukes has offered himself for election.

"It will be seen from these accounts that after carrying forward to the next year's accounts 20,000 dols. for premia received in respect of risks taken before October 31st, but not yet terminated, and after carrying forward dols. 39,689.53 to suspense account, to meet unsettled claims put forward, and writing off dols. 1,856.04 from preliminary expenses, there remains a balance to the credit of profit and loss account, in respect of transactions already closed, of 140,000 dols., and the committee recommend that this sum be declared available for distribution as profits of the company for the year.

"The apportionment of this sum, if appropriated as being so distributable, will under the 132nd clause of the articles of association be as follows:—the sum of 35,000 dols. to be carried to the reserve fund and invested by the committee; the sum of 35,000 dols. to be divided pro rata among contributing shareholders, and the sum of 70,000 dols. or 350 dols. per share to be paid to shareholders as general dividend.

"In accordance with the 86th clause of the articles of association, two members of the present committee (Mr. Helland and Mr. Kaye) retire from office at this meeting, but being eligible, offer themselves for re-election.

"Hong Kong, December 3rd, 1868."

The Chairman having proposed, and Mr. Mellish having seconded the adoption of the report, the same was unanimously carried by the meeting.

Mr. Kaye proposed that Mr. Delbanco be re-elected, and Mr. Jukes elected, as auditors for next year; which, being seconded by the Hon. J. B. Taylor was unanimously approved.

It was then proposed by Viscount de Cercal, and seconded by Mr. G. Heard, that the retiring directors should be re-elected.

The Chairman then congratulated the members on the satisfactory termination of the business of the year, and expressed a hope that the future years would be similarly successful.

The meeting then terminated.

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

Dates from this port are to the 22nd Dec. The English mail of Nov. 6 arrived out on the 10th Dec., and the French mail of the 18th Nov. on the 21st Dec. The latest telegraphic news received from London was dated Dec. 8. The following is the *Straits Times* summary of news:—

H. M.'s troop steamship *Himalaya* sailed for Hong Kong on the 8th Dec. with the 75th Regiment on board.

The Ocean Steam Company's steamer *Ajax* arrived here from Hong Kong on the 14th Dec., and after taking in a considerable amount of Singapore produce, about 2,000 tons, sailed for home at noon on the 19th instant. She looks none the worse for her involuntary dive into the Shanghai river.

H.M.S. *Salamis*, with Vice-Admiral the Hon. Sir Harry Keppel and Lady Keppel on board, sailed for China on the morning of the 15th Dec.

During the past fortnight very little has occurred which calls for particular notice, or which possesses any interest to any one unacquainted with local questions or events.

The Municipal Commissioners have published an estimate of the municipal revenue and expenditure for the next year, from which it appears that a deficit of some 22,000 dols. is anticipated. This is somewhat ominous when we consider the questions of the waterworks and drainage.

Some Hoey disturbances of the peace have marked the fortnight, but they have been of no consequence and have been easily quited by the police.

The area of the colony, according to the Penang papers, has been recently increased by the rediscovery (mark the word) of several islands, yclept Dindings, off the Perak coast, which are now to be forthwith colonised, being found suitable for sugar canes and other produce.

The Governor continues at Penang, and no political news is stirring, except rumours as to official changes, which would appear to be the following up of the first blow at the old Indian officials in Mr. Maxwell's case. Another Indian official of long service and considerable ability is to be pitchforked a step or two down the ladder in order to make room for *un homme nouveau*. Such i the rumour, and the manner of doing it—by replacing one Indian official by another who vacates his place for the new man—must be confessed to be a master-stroke of ingenuity, if it were not so glaring as to look almost stupid.

At the last moment, while going to press, we learn that the Legislative Council was closed on the 19th inst. in Penang, and we have been favoured with a copy of the Governor's speech. It recounts the legislative labours of the session, and with regard to finance, says ominously that "the Auditor-General's flourishing surplus will possibly be reduced on the settlement of certain outstanding accounts with the late Government." We omitted to mention that the abstract of revenue and expenditure for the quarter ending 30th Sept. has been published. We find that the surplus of revenue from 1st April, 1867, to 30th September, 1868, is some 80,000 dols. odd, while the loans amount to some 97,000 dols. odd. This is supposing the Indian Government pays up all debited to it, and includes only partially Government House, and does not include the new steamer. Where will the colony be if the Indian Government insists upon repudiation?

Advices from Penang inform us that the good people there are getting up two addresses, European and native, to their late registrar, Mr. Maxwell, sympathising with him on the injustice done him by the Duke of Buckingham and Chandos. The *Gazette* will have it that his Grace in his action in the matter has gone clean against the sacred rules and regulations of the Colonial service; that his summary dismissal is contrary to all precedent—is not only unnecessarily harsh and unjust, but quite illegal and *ultra vires*.

# Commercial Report.

—o—

## CHINA AND JAPAN IMPORTS.

YOKOHAMA.—A slight show of activity in the beginning of the fortnight soon died out, and the arrival of the J. C. Munro and Star of the East from London, with general cargoes, had reduced the market to complete stagnation. Cessation of native business on account of the Mikado's visit to Yedo is also thought to have assisted this effect. The current quotations were as follows:—Cotton Yarn, Nos. 16 to 24, $47 to 48 per picul; 28 to 32, $50 to 51; Grey Shirtings: 7 lbs., $2.45 to 2.50 per piece; 8.4 to 8.8 lbs., $3 to 3.10. T-Cloths, $1.90 to 2.40; Camlets, S., $16 to 17 per piece; SS., $14.50 to 15; Cloth, Broad, $1.50 to 2 per yard; Medium, $1 to 1.75; Blankets $0.80 to $0.90 per lb.; Iron, Nail Rod, $3.10 to 3.40 per picul; Hoop, $4.25 to 4.50; Lead, $7.50 to 8.

TIENTSIN.—The market for Piece Goods was firm. Grey Shirtings were quoted—8¼ lbs., Tls. 2.2.8; White Shirtings, 64 reed, Tls. 2.3.5. T-Cloths were quiet.

SHANGHAI.—Cottons: A very small business had been transacted throughout the fortnight, partly owing to the closing of the Northern trade for the season and to the limited stocks of Plain Cottons. Grey Shirtings had met with purchasers at Tls. 2.1.5 to 2.1.9 for 8¼ lbs., and Tls. 2.0.2 to 2.0.5 for 7 lbs., which latter were scarce. White Shirtings had been dealt in to a small extent, as also T-Cloths and Drills. Fancy Cottons continued dull of sale, at low prices. Woollens and Worsteds, although very cheap, attracted no attention. Coals: No arrivals of importance had added to the stocks during the fortnight, and the market had been quiet, with prices not materially changed. The arrivals had been:—From Great Britain, 1,160 tons; from America, 369 tons; from Australia, 2,150 tons; from Japan, 350 tons—in all, 4,029 tons, of which 1,460 tons were to order. Quotations:—G. E. Grey Shirtings, 7 lbs., Tls. 2.0.3 to 2.0.7; 8¼ lbs. to 8½ lbs., Tls. 2.1.5 to 2.1.9; G. E. White Shirtings, Tls. 1.9.5 to 3; T-Cloths, Tls. 1.4.0 to 2.4.5; Iron, Nail Rod, Tls. 1.9.5 to 2; Fair to Good Assorted, Tls. 2.1.5 to 2.5.0; Hoop, Tls. 1.8.0 to 2; Flat and Round, Tls. 2.4.5 to 2.5.0; Lead, Tls. 5.5.7 to 6; Tin Plates, Tls. 4.3.0 to 4.8.0.

HANKOW.—The market for piece goods had been dull, and prices for many descriptions had declined. Grey Shirtings had been sold at Tls. 2.1.4 to 2.2.0 for 8¼ lbs., and Tls. 2 to 2.0.5 for 7 lbs. White Shirtings, 64 to 66 reed, and drills had been in moderate request. T-Cloths were lower five candareens to one mace, and at this decline sales to some extent had been effected. Fancy cottons had been little inquired for. Woollens and Worsteds: The demand for these goods had been small, and in most instances quotations were lower. Lead: Purchases had been made at Tls. 6.4.0 to Tls. 6.5.5 per picul.

FOOCHOW.—The business done during the interval had comprised 1,100 pieces 8¼ lbs. Grey Shirtings at $2.95 per piece, 250 pieces Turkey Red Shirtings at $3.20 per piece, and 350 piculs Lead at $8 per picul (against tea).

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated Dec. 14:—Trade generally is very dull and dragging, and the prospects for any improvement are still very remote. Cotton Yarn: There is a rather better feeling in the market, and holders are demanding slightly higher rates for Nos. 16 to 24, but dealers, though holding only limited stocks, are very unwilling to respond, and but a very small business has been done. The higher numbers are unchanged in value. Piece Goods: The business done has been very unsatisfactory, being limited in extent, and at prices in favour of buyers, some importers showing themselves desirous to sell, but the generality of holders are asking prices much over quotations, knowing that dealers are carrying very light stocks, and anticipating an improvement in the market after the China New year. During the early part of the fortnight no sales were reported, but latterly small parcels of Grey Shirtings and T-Cloths have been quitted, and within a few days past one lot of 24,000 pieces 8.4 lb. Grey Shirtings has been placed at $2.65, 10 weeks prompt. As evidencing the present condition of the market, and the native views as to its future, we would remark that only a few thousand pieces of this parcel were taken by a dealer, the balance being divided amongst several compradores in the employ of foreigners. The northern trade being over for the season, there are no buyers of American Cottons or English and Dutch imitations, and quotations are entirely nominal. The sale of Dutch Drills reported was

Digitized by Google

made of goods to arrive two months hence. Woollens: All descriptions share in the general depression, excepting Blankets and Lastings, which maintain their former values, stocks being comparatively light. Sales of the latter cannot be effected at the moment, dealers being occupied in working off their former large purchases. Metals: Iron of all kinds is very firm. The recent advance in Lead has been partially lost, additions having been made to stocks, and further supplies being shortly expected. Tin is steady. Tin Plates easier. Quicksilver is quite neglected and very weak. Coal: Receipts aggregate 1,770 tons Welsh, and 5,155 tons Australian (about half to consumers). Sales have been 460 tons Welsh at $11.25 and 500 do. Australian at $7.25, both parcels ex ship. Ginseng: There is no change to note. The demand is still slack, but holders continue fairly firm. Sales have been 33 casks fine Crude at $141, and 17 do. at $120 to 130 per picul. The current quotations were as follows:—Cotton Yarn, Nos. 16-24, per picul, $115 to 122.50; Nos. 28-32, $130 to 145; Nos. 38-42, $147.50 to 155. Grey Shirtings, 7 to 7¾ lbs., per piece, $2.40 to 2.37; 8 to 8¾ lbs., $2.65 to 2.80. White Shirtings, $2.35 to 4. Spanish Stripes, per yard, $1.02 to 1; Long Ells, MM Scarlet, per piece, $8.45 to 8.70; Camlets, SSS, $13.50 to 21; Iron, Nail Rod, Nos. 1 to 6, per picul, $2.50 to 2.70; Hoop, $2.90 to 2.80; Bar, $1.85 to 2.25; Lead, large, $6.40 to 6.95. Steel, English, per tub, $4.30 to 4.25. Coals, afloat, per ton, English steam, $11 to 10.05; American anthracite, $12.50 to 12.

## CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—There had been a fairly active demand for tea during the fortnight, and settlements were computed to be about 3,000 piculs, principally for America, and consisting of most grades. Prices generally were easier, and late purchases had been made at slightly reduced rates; supplies had not been in excess of the demand, stocks therefore remained with little change. Quotations:—Common, $18 to 21 per picul; good common, $22 to 23; medium, $24 to 26; good medium, $27 to 29; fine, $30 to 34; finest, $35 to 40; choice, nominal.

SHANGHAI.—Black: This market had remained firm during the fortnight, and a fair business had been done for the period of the season. Settlements were 5,188 chests, nearly all of very inferior quality. The stock left was firmly held for current rates. Settlements for the fortnight, 5,188 chests; reshipments on owners' account, 1,488 chests; stock, 42 chops, or 13,011 chests. Quotations (duty paid, exchange for credits, at 5s. 10½d. per tael, and freight at £2 10s. per ton) were as follows:—Shanghai-packed, common, 10d.; Ooonam, common, 11¾d.; Ningchow, common to fair, 1s. 0¾d. to 1s. 1¼d. Green: There is little or no change to report in Green Teas. Finest kinds were still wanted at full rates, while medium and common grades being in very full supply were easily dealt in. The business done had again been chiefly for the American market, but over 6,000 half-chests Pingsuey, and a few parcels of common Fychow and Shanghai-packed descriptions had been taken for England. Settlements and reshipments consisted of 26,727 half-chests Tienkai and Moyune, at Tls. 35 to 46.4; 1,721 half-chests Fychow, at Tls. 29½ to 37; 6,112 half-chests Pingsuey, at Tls. 28¾ to 39; and 4,165 half-chests Shanghai-packed, at Tls. 25½ to 30½. Settlements for the fortnight, 35,242 half-chests; re-shipments on owners' account, 3,483 half-chests; stock, 126 chops, or 70,587 half-chests. Quotations (duty paid, exchange, &c., as above) for Fychow and Moyune teas were as follows:—Gunpowder, 1s. 5½d. to 3s. 6d.; Imperial, 1s. 2d. to 2s. 9d.; Young Hyson, 11¼d. to 3s. 1d.; Hyson, 1s. 1¼d. to 3s. 3d.; Twankay, 8¼d. to 1s. 6d.

HANKOW.—Business since last mail consisted of the settlement of one small chop for Russia, at Tls. 14.7.5 per picul, and the shipment of about 1,500 chests to this. The season is said to be closed. Quotations were:—Oonam, common, Tls. 14.7-5; export of tea from Jan. 1, 1868, to Dec. 3, 1868, 44,860,250 lbs.; export of tea from Jan. 1, 1867, to Dec. 3, 1867, 34,932,381 lbs.

KIUKIANG.—Black Teas: Teamen had continued to send forward to Shanghai, immediately on arrival, the few parcels coming to hand, and no settlements are advised. Export from Jan. 1 to Dec. 4, 1868, 154,342 chests; June 1 to Dec. 4, 1868, 151,242 chests.

FOOCHOW.—The following is Messrs. John Odell and Co.'s report, dated December 4:—Our last report was dated 20th ult., since when a fair amount of business has been transacted. Congous.—Business on English account has continued on the most limited scale, holders still refusing to make any important concession in price, though occasionally a chop has been settled on slightly easier terms during the past day or two; about 3,000 chests have been taken by Continental and American buyers, at the decline noticed in our last. Souchongs.—A few settlements are reported at full rates. Oolongs.—American buyers have shown considerable anxiety to effect purchases, and nearly the whole of the supply on offer has been taken at prices showing a reduction of 2 to 3 Taels per picul on last season's rates. Many of the settlements are not yet reported, but the unsold stock does not exceed 12,000 ½-chests, and it is unlikely that there will be any further arrivals from the country. Scented Teas have been in limited request at previous quotations. Flowery Pekoes.—A further small quantity has been taken for India. About 1,000 packages (broken and damaged) Tea, ex *Sovereign of India*, have been sold by auction, and realised full prices. Settlements for the fortnight have been:—Congou, 5,496 chests, at Tls. 8.3 to 18.8 per picul. Souchong, 733 chests, at Tls. 17.8 to 32.8; Oolong, 77,650 half-chests, at Tls. 18.8 to 30.3; Scented Teas, 4,240 boxes, at Tls. 9.3 to 24.8. Our quotations are:—Congou: Dust to broken leaf, Tls. 8.3 to 12.8 per picul; low ordinary to common kinds, Tls. 13.8 to 16.8; good common to common flavoury, Tls. 17.0 to 18.8. Oolong: Common cargo, Tls. 17.0 to 18.5; fair to good, Tls. 21.0 to 23.0; superior to fine, Tls. 26.0 to 31.0; choicest, Tls. 36.0 to 40.0.

CANTON.—The demand for scented tea had continued during the interval, but had been confided almost exclusively to two parties. Little if any change had taken place in prices. The few finer parcels of Caper on offer were held for full prices, and the settlements reported were chiefly of lower grade tea. Stocks of all kinds were very much reduced. The holders of the 2,220 chests country Congou were still very much too high in their ideas to meet the views of buyers. The following were the settlements reported:—Scented Orange Pekoe, 6,500 boxes at Tls. 16.50 to 28; Scented Caper, 12,000 boxes at Tls. 16 to 22.50; Canton Young Hyson, 1,300 boxes at Tls. 17.

### SILK.

YOKOHAMA.—Purchasers had kept steadily in the market through the fortnight, and since the receipt of home telegrams to October 27 some large transactions had ensued, good hanks had become very scarce, and prices for these and also for medium qualities had advanced fully $30 to $50. One noticeable feature had been considerable arrivals of silks from the northern districts, due, it is understood, to the partial termination of hostilities there. Large parcels of Oshu and Etchesen in particular had come down; the best of the former had obtained $930, and of the latter $680, and it is said even $730. Settlements were estimated at 1,400 bales, and stocks were reduced to 700 bales. The current quotations (charges paid to London at exchange 4s. 5d.) were as follows:— Hanks—Mybash, Sinchu, &c., extra, 39s. 3d. to 40s. 5d.; best, 36s. 2d. to 38s. 1d.; medium, 33s. 7d. to 35s. 5d.; inferior, 29s. 10d. to 32s. 5d.; Oshu, extra, nominal, 36s. 7d. to 37s. 4d.; best, 33s. 7d. to 35s. 5d.; medium, 29s. 1d. to 31s. 8d.; inferior, 24s. 3d. to 28s. 0d.; Coshu, best, 32s. 1d. to 34s. 3d.; medium, 28s. 9d. to 30s. 11d.; inferior, 24s. 3d. to 28s. 0d.; Sodai, best, nominal, 29s. 10d.; medium, 26s. 1d. to 28s. 9d.; Etchesen, best, 27s. 3d. to 29s. 1d.; 2, 24s. 3d. to 26s. 6d.; inferior, 20s. 5d. to 23s. 5d.; Mashta, best, 24s. 3d. to 26s. 1d.; inferior, 20s. 5d. to 23s. 5d.; Hatchogee Tussah, 23s. 5d. to 25s. 0d.

SHANGHAI.—The following is from Messrs. Skegg's and Co.'s report, dated 8th December:—A much quieter feeling has prevailed throughout the fortnight, and settlements only amount to about 700 or 800 bales. Purchases consist mostly of medium and common Tsatlees, at from Tls. 450 to 500, and though, perhaps, slightly easier in some instances, have been too irregular to admit of any alteration in quotations from those of last mail. A few bales of Chooping's Chop have been settled at Tls. 592½, with a proportion of 3½ and 4½'s; and Blue Peacocks have fetched Tls. 542½. Kahings and Chincums are firm at previous rates, and for a small lot of Long Reels Tls. 410 to 415 proportion price for Nos. 1 and 2 is wanted. Re-reeled Hainings and Tsatlees of best quality are held for last mail's prices, but inferior sorts are very irregular, and rather lower. The few Trams and Organzines on the market still maintain their high value. Equally high prices are still paid in the country, so that the dealers are very firm in their demands, and it would require almost a total cessation from buying to force any material decline on them, now that the estimated quantity left available for shipment appears so much in favour of holders. Settlements to date are about 40,000 bales, which, with 3,000 bales on this market, and 4,000 to 5,000 bales still to arrive, will keep the total well within 50,000 bales for the season, 48,000, in fact, being the general estimate.

CANTON.—There was but little inquiry during the early part of the fortnight, and prices, except for the finer kinds, were rather weaker, without being quotably lower, but since the arrival of the English mail a much greater desire to buy had been manifested. The demand ran very much on finer descriptions of silk, and had caused them to be more firmly held. A considerable business was being steadily done in Cocoons by one buyer, who had been purchasing them as fast as they were offered. Re-reeled Cumchook of good quality continued in request, and prices had advanced about $10. From the country reports stated the amount of silk to come forward as quite small and prices higher. We give the following as settlements and quotations:—Tsatlee, 160 bales, at $510 to 550; Loong Kong, 80 bales, at $515 to 540; Kow Kong, No. 3, 140 piculs, at $478 to 492; Re-reeled Cumchook, 250 boxes, at $555 to 570; Cocoons, 300 bales, at $577.

## EXPORT OF TEA AND SILK, SEASON 1868-69.

## ARRIVALS.

At YOKOHAMA.—From London, Nov. 24, John C. Munroe; 27, Star of the East.

At SHANGHAI.—From Liverpool, Dec. 7, Cleta; from Cardiff, Nov. 28, Onward; Dec. 6, Abbotsford; 7, Gabalva; from Hamburg. Nov. 29, Hong Kong; from New York, Dec. 7, Virgilia.

At HONG KONG and CANTON.—From London, Jan. 7, Red Deer; 13, Dunkeld; from Cardiff, Dec. 3, Cutwater; from Liverpool, 13, Sirene; from Hamburgh, Nov. 30, Uranus.

At MANILA.—From Liverpool, Nov. 26, Amigos; 28, Ardanza.

At SINGAPORE.—From Newcastle, Dec. 10, Maury; 19, Coleroon; from Newport, 12, Kvernbitr; from Rotterdam, 13, Catharina.

At PENANG.—From London, Dec. 18, Alice.

## DEPARTURES.

From SHANGHAI.—For London, Nov. 28, Zemindar; for Boston, Dec. 7, Kjbenhavn.

From FOOCHOW.—For London, Ocean Chief; for Continent, Skjold.

From HONG KONG and CANTON.—For London, Dec. 8, Ajax (s.), for Channel; Dec. 2, Excelsior; for Havana, 8, Lucie.

From MANILA.—For Falmouth, Dec. 4, Signe; for Cork. Nov. 26, Serafin; 30, Lord of the Isles; for Channel, Nov. 16, San Fernando; Dec 2, Exonian; for New York, Dec. 2, Frederick.

From SINGAPORE.—For Liverpool, via Mauritius, Ajax (str.); for Boston, Dec. 19, Elizabeth; for New York, via Penang, Bertha and Pauline.

From PENANG.—For London, Dec. 22, Ajax.

## VESSELS LOADING.

At YOKOHAMA.—For London, Johanna Marrie; for New York, Alexandra, N. B. Palmer.

At SHANGHAI.—For London, Elmston, J. M. Joshua; for New York, Burnside, Falcon, Laurel, Dartmouth, E. Rickmers, Sir W. Wallace.

At FOOCHOW.—For London, Kelso, Roslin Castle; for New York, Elizabeth Nicholson, Surprise.

At PENANG.—For London, Alice; for Boston, Simon.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: £4 per ton of 50 cubic feet. To New York, £3 10s. per ton of 40 feet.

At SHANGHAI.—To London and United States the rate remains unchanged.

At FOOCHOW.—To London: £2 10s. to £3 per ton. To United States: £3.

At HONG KONG and CANTON.—Homewards the principal inquiry has been via Saigon at from £3 5s to £3 10s. per ton, and via Bangkok at from £3 to £3 5s. per ton. For London direct the Kelso and Roslin Castle have taken the berth in Whampoa at £2 15s. and £2 10s. per ton, respectively.

At MANILA.—For the U. K. there are no settlements to report. The Norwegian barque Anna, has been taken up for New York, at $12 gold for 4 bales hemp.

At SINGAPORE.—To United Kingdom, £3; to New York, £3 5s. to £3 15s.

At PENANG.—To United States, The Simon, chartered at Singapore, fills up at £3 15s.

# COMMERCIAL POSTSCRIPT.

The amount of bullion by the P. and O. Company's steamer *Delta*, from Southampton on the 23rd inst., was in gold to Galle, £5,000; to Madras, £993; to Bombay, £14,500; in silver to Bombay, £80,200; to Calcutta, £15,400; to Hong Kong, £24,635; to Shanghai, £7,500; total in gold, £20,493; in silver, £127,735.

## SHIPPING.

ARRIVALS NOT IN THE TABLES.—Off South Foreland, from Rangoon Matilda; Jan. 21, at London, from Singapore, Annie Florence; 24, at Queenstown, from Rangoon, Advance; at London, from China, Alcyone Maitland.

DEPARTURES.—Jan. 23, from London, for Hong Kong and Foochow, Kaisow; for Cardiff and Hong Kong, Thetis; — from Cuxhaven, for Shanghai, Taikua; 22, from Falmouth, for Shanghai, Willy Rickmers, after repairing; from Liverpool, for Manila, Nicholrs.

LAID ON.—At London, for Shanghai, Rollo.

SPOKEN.—Alecono (?) (barque), Shanghai to London, 86 days out, Dec. 2, 24 S., 3 E., Vier Gezusters (Dutch barque), Padang to Rotterdam, 5, 35 N., 33 W.; Sparkling Foam, Shanghai to London, 115 days out, Jan. 7, 36 N., 32 W.; Sarah Nicholson, Shanghai to London (?). Nov. 16, 30 (?) S., 36 E.; Malta, Penang to London, Dec. 7, 15 S., 7 E.; Arabella, Newport to Colombo. Nov. 5, 3 N., 24 W.; Constance, Rotterdam to Hong Kong, Dec. 4, 3 N., 27 W.

# LATEST TELEGRAMS

## RECEIVED VIA GALLE, JANUARY 14.

### JAPAN.

YOKOHAMA, DEC. 16.—Hakodadi has been besieged and taken by a rebel fleet of seven vessels. The assault was headed by foreigners. Her Majesty's ships *Satellite* and *Argus* and the French war vessel *Venus* have proceeded to Hakodadi. The foreign community are in safety, and have not been molested.

### CHINA.

HONG KONG, DEC. 29.—Grey shirtings and water twist dull and unchanged. Cotton, Bengal, fair medium, $17; Tea quiet, but unchanged. Total exports (China and Japan), 125,000,000 lb. Exchange on London.—Bank bills, six months, 4s. 4¾d.

SHANGHAI, DEC. 23.—Grey shirtings, 6½ catties, 8¼ lb., 2·10 to 2·15 taels. Cotton, Shanghai, 15 taels; Tea, firm; Silk, heavy and declining; No. 3 Tsatlee, 600 taels. Settlements since the departure of last English mail, 1700 bales. Export to date (China and Japan) from commencement of season, 55,000 bales. Exchange on London—Bank bills, six months, 5s. 10¼d. Freight.—Tea, £2.

## RECEIVED JANUARY 20.

HONG KONG, JAN. 3.—The markets here and at Shanghai are quiet and unchanged since the departure of the last mail. The China Tea report to date amounts to 130,000,000 lb. Stock in all China, 30,000 chests. Only five ships loading, the season being virtually over.

# BIRTHS, MARRIAGES, AND DEATHS.

## BIRTHS.

BOWMAN—On the 11th Jan., at 22, Burnley-road, Clapham-road, S.W., the wife of J. D. Bowman, Esq., of a son.

CRAWFORD—On the 4th Dec., at Hong Kong, Mrs. D. R. Crawford, of a daughter.

ELLES—On the 11th Jan., at Wimbledon-common, the wife of Jamieson Elles, Esq., of a daughter.

LEWES—On the 3rd Dec., at Shanghai, Mrs. W. F. Lewes, of a son.

PRYCE—On the 9th Jan., at Llwyn-y-groes Hall, the wife of John Pryce, Esq., late of Batavia, of a son, stillborn.

SOLBE—At Chefoo, the wife of Edward Solbe, Esq., H.B.M.'s Consular Service, of a son.

ULLETT—On the 15th Jan., at Wascotes-hill, Bassedon, the wife of R. B. Ullett, Esq. a son.

WRIGHT—On the 18th Jan., at 22, Kildare-terrace, Westbourne-park, London, the wife of James Hanson Wright, Esq., of Shanghai, China, of a son.

## MARRIAGES.

ADAMS—ARMSTRONG.—On the 3rd Dec., at Shanghai, M. C. Adams, Esq., of Japan, to Mary L., relict of the late Capt. P. B. Armstrong, and third daughter of J. W. Phillips, Esq., Monmouth, England. No cards.

ALLEN—SKINNER.—On the 14th Dec., at St. John's Cathedral, Hong Kong, by the Rev. William Robert Beach, M.A., Isaac Winter Allen, son of the Rev. James Allen, Islington, London, to Lucy Lee White, daughter of the late Mr. James Skinner, Dawlish, Devon.

BOIS—WHITE—On the 15th Dec., 1868, at Colombo, Ceylon, by the Right Rev. the Lord Bishop of Ceylon, assisted by the Rev. Mr. Rowlands, Frederick William Bois, Esq., to Mary Elizabeth, daughter of James Thomas White, Esq., all of Ceylon.

MACINTOSH—CAMPBELL.—On the 10th Dec., at St. John's Cathedral, Hong Kong, by the Rev. William Robert Beach, M.A., Lachlan MacIntosh, Esq., of Shanghai, to Flora Anne, third daughter of the late William Campbell, Esq., of Ederline, Argyleshire.

MASINS—ELLIOTT.—On the 5th Dec., at Singapore, by the Rev. W. Jeffreys, William Masins, of Bangkok, to Jane, daughter of Robert Elliott, of Cheltenham.

RATHBONE—HERVEY.—On the 9th Jan., at the Oaks, Londonderry, by the Rev. G. Galbraith, rector of Lower Comber, S. G. Rathbone, Esq., of Allerton, near Liverpool, to Eleanor Augusta, widow of Felton F. W. Hervey, Esq., and second daughter of Acheson Lyle, Esq., of the Oaks, Londonderry.

ROSE—BOWMAN.—On the 12th Dec., at St John's Cathedral, Victoria, Hong Kong, by the Rev. W. R. Beach, Colonial Chaplain, John Falconer Rose, of Nairn, N.B., to Hannah Bowman, of Walthamstow, Essex.

YULE—ALEXANDER.—On the 5th Jan., at Peterhead, by the Rev. Dr. Rinson, A. H. Yule, Esq. (formerly of Yokohama, Japan), to Susan, only daughter of William Alexander, Esq., of Springhill, Provost of Peterhead.

## DEATHS.

AHRON—On the 8th Dec., at the residence of Dr. Krause, Mr. Moritz Ahron, of Hamburg, aged 24 years.

BROOKE—On the 23rd Nov., at Yokohama, Anne Constance Brooke, aged one year.

CAUTHERLEY—On the 22nd Sept., drowned, at sea, from the ship *Mikado*, off the Crozet Isles, South Indian Ocean, William Samuel, second son of Charles Samuel Cautherley, of Baldock, and grandson of the late Rev. Samuel Cautherley, vicar of Royston, Herts aged 18.

LAVERS—On the 31st Dec., at Hill, near Southampton, William Bertham, only son of M. G. Lavers, Esq., of Croydon, Surrey, aged 12 years.

RAWLING—On the 13th Jan., at his residence, 4, Home-park-villas, Stoke, Devonport, Mr. Matthew Rawling, aged 69 years.

ROBINSON—On the 10th Jan., Nea Eva Emily, eldest daughter of Sir Hercules and the Hon. Lady Robinson.

SCHEBACH—On the 10th Nov., at Chefoo, Mr. J. H. C. Schebach, aged 32 years.

## THE SUEZ CANAL.

The following letter relating to the opening of the Suez Canal has appeared in *The Times*. Whatever may be the weight to be attached to its calculations, its tone indicates that it proceeds from one who fails to share the hopes with which the possible success of this great work should be regarded by all the friends not only of commercial progress, but of the peaceful enterprise of France:—

"Sir,—The shippers and shipowners from whom the director and English representative of the Suez Canal Company has received 'numerous inquiries concerning the precise time when the canal will be opened to the general navigation, in order that they may make timely preparations for the coming event,' will feel grateful to that gentleman for a little further information in addition to that communicated by his letter of the 8th inst., published in the City Article of *The Times*.

"It is the more gratifying to all practical men who take interest in the coming event to receive this authentic and positive assurance from the fact that the telegraphic announcement that a French man-of-war had actually passed through the canal was somewhat denuded of its importance by a letter which appeared in *The Times* on the 29th of December. The directors would hardly have taken the step of calling public attention to so important an event if they had regarded it in the same light as did the English party which happened to pay a visit to the canal at the same time. 'Some little way on,' that is to say, in the basin of Lake Menzaleh, says the reporter, 'we met a small French sloop, the *Levrette*, endeavouring to make her way from Port Said to Suez, supported on barrels and caissons.' . . . . . 'It can hardly be considered a fair trial, proceeding as she will be obliged to do from Ismaila to Suez by the Fresh Water Canal.' The great expense of telegraphic communication was no doubt the cause that these details were omitted in the despatch, published by the directors of the canal, which informed the public of the transit of this man of war.

"The point on which it is now desirable that the English representative of the Suez Canal Company should throw further light has become known in England for the first time in consequence of the letter just referred to. It is the circumstance that one of the most critical operations on which the completion of the canal depends is the filling of a dry basin thirty-five miles long, once a portion of the Red Sea, and known as the Bitter Lakes. The canal authorities hope that this will fill, we are told, in seven or eight months. The coating of from two and a-half to three yards of salt, which covers this large area, bears witness to the energy of the evaporative power of the climate.

"Within less than a hundred miles of this evaporated lake is another and very famous basin, at a level so far depressed below that of the Red Sea as to be exposed to nearly an inch and a-half of additional barometrical pressure. Into this basin, which is longer, although narrower, than that of the Bitter Lakes, the river Jordan, the river Arnon, and one or two smaller streams have poured their entire volumes for the last 4,000 years, without having yet succeeded in raising the surface of the lake to the level of the sea. This well-known fact heightens the interest of the question which is now submitted to the directors of the Suez Canal.

"What is the actual hydrographic area of the Bitter Lake Basin? What is its actual depression below the level of Lake Menzaleh? What is the evaporation of the locality in inches per annum?

"If the two dimensions of thirty-five miles by twenty-four miles, which are given by the English travellers as those of the area of the basin are correct, and if the level be such as to require no excavation for the canal, it is a simple calculation that gives the result, that a body of water equal to that contained by sixty miles length of the Suez Canal must be poured into the basin continuously every twenty-four hours, for twelve months, to fill the basin.

"This supply would require a current at the rate of 2½ miles per hour through the canal. How far the sandbanks, at a slope of 5 to 1, would resist abrasion by this current, may, perhaps, be explained.

"An ordinary formula (hydraulic formulæ are far from being in a satisfactory state) gives the head required for producing a current of this velocity at somewhere about 6in. per mile. To keep up the flow, therefore, from Lake Menzaleh, at this rate, the surface of the Bitter Lakes must be at a depressed level of some 17ft. 6in. below the surface of the Mediterranean. How much has been allowed for this hydraulic requisite? For every foot that the surface of the Bitter Lakes rises above this level the current will be proportionately slackened.

"It is true that when the 12½ miles cutting east of the Bitter Lakes is completed, the waters of the Red Sea may be admitted, and the double supply will have the effect of expediting the filling of the basin. But a fall of 6in. per mile over the 35 miles to Lake Menzaleh is equivalent to a fall of 14in. per mile from the Bitter Lakes to the Red Sea. What will be the effect of the current thus caused on that part of the canal?

"If we add that observations as to evaporation made by the Bombay Geographical Society are such as to raise the question whether the exhalation from the area of the Bitter Lakes may not amount to 12ft. per annum, in which case the above figures would have to be increased by nearly 50 per cent., it is obvious that we have reason for waiting with some anxiety for the reply of M. Lange.

"I am, Sir, your obedient servant,

"Jan. 14." "F. R. C.

## LABUAN COAL.

(MITCHELL'S STEAM-SHIPPING JOURNAL.)

If good steaming coal could be procured at a moderate price in the Eastern seas, it would have an important effect on the navigation of those seas by steamships. The heavy cost for fuel at present is, and has been, the chief cause of the slow progress made in the extension of our steam trade with the East. From reports issued at intervals we have been led to expect considerable assistance from the mines at Labuan. We have kept our readers cognisant of the progress made in the development of mining industry in that island, and have published several communications on the yield of the coal and its burning properties; but as the statements put forward at different times have been so very contradictory, we think it will be of interest to steamship owners and the shippers of coal to give an epitome of the latest official information furnished to the Colonial Office, with the opinions of the officers of several of Her Majesty's ships, and engineers' reports to the Admiralty.

As a rule, the deeper the coal from the surface the better it is found, and this may account in some measure for the condemnatory reports which have been so extensively circulated. In June, 1863, Labuan coal was tried on board the *Scout*, and was said to burn too quickly, and to give off too much smoke and flame to be fit for the Royal Navy. The chief engineer of the *Rifleman* reported—"not fit for the service." The *Vigilant* said—"makes large quantity of soot and clinkers. Steams very indifferently." In 1864 the *Pelorus* reported that this coal could be used economically at reduced speed, requiring slow consumption; the ashes were repeatedly mixed with the coal and reburnt, the amount of clinker being 7·2 per cent.; smoke black and dense; steam generated very quickly, but the increase of consumption was greater in ratio to increase of speed. On board the *Scylla* it was found to generate steam quickly while the fires and tubes were clean; but owing to the fires requiring to be clinkered every four hours, and cleaned out every forty-eight hours, the steam fluctuated very much when working at high speed. Tubes needed cleaning out every twenty-four hours. Clinker 3·3 per cent., and ash 14 per cent. Ship expended in twenty-four hours 37½ tons, instead of 27 tons. The *Adventure*, also, found it burn very well for about four hours, after which the flues became dirty, and full speed could not be maintained. We might quote from thirteen other reports made by engineers of Her Majesty's ships in 1865 and 1866, but it may suffice to say that the whole of those officers found that Labuan coal, burnt by itself and without mixture, consumed rapidly, and gave considerable trouble in attending to the furnaces and cleaning out the tubes. In August, 1868, Mr. Loxdall, chief engineer to the *Rifleman*, in compliance with order, certified that he found it very good for steaming purposes, giving out great heat, burning fast, forming a great quantity of clinker and soot, but leaving a small amount of ash. He considered it inferior to Welsh by 25 per cent. To this Commander J. W. Reed, of that ship, appends a few remarks. He says his engineer's report is more favourable than those of former years relating to the same description of coal on board the vessel. But the fact is, that Labuan coal, fresh raised from the pit's mouth, is very good, but that, owing to its light character, it deteriorates rapidly, especially when exposed under unfavourable circumstances. Some of the coal received from the mine was so bad that steam could scarcely be kept up with it, and sometimes it failed entirely. "Stuff," he says, would, moreover, come out of the funnel in large flakes of burning soot, which set fire to the awnings and endangered the safety of the ship. The general average of loss or difference in consumption between Labuan and Welsh coal in former years was estimated at 33 per cent., but the reduction to 25 per cent. he attributes to the fact that the present engineer of the ship is a careful, scrupulous officer, and for the period over which the working extended, and the result of which was embraced in the report, the best quality of Labuan coal was supplied. During the long employment of Captain Reed in charge of the survey of the China Sea he has taken in coal for his ship at several of the ports, and his experience leads him to the conclusion that Labuan coal is inferior to Welsh, but equal or superior to many other descriptions of coal sent into the Eastern markets, and that it will obtain a good character, if the people at the mines supply it of first-class quality and in proper order. On Sept. 12 last Mr. Guyer, chief engineer of the *Dwarf*, reported that the coal supplied at Labuan was of a very good quality, higly inflammable, producing little ash and clinker, and consumption about the same as Welsh coal at 100 revolutions of the engines. His only objection to its use was its being 15 per cent. lighter than the average of Welsh coal. This is the latest and, we may add, the most favourable report yet received, by the Lords of the Admiralty, on the use of Labuan coal for the generation of steam; we presume, therefore, that the *Dwarf*, when at Labuan, was fortunate in procuring this fuel before it had degenerated by exposure to the elements, or that the miners have reached a seam of harder substance. The lower the strata, the greater must be the pressure; and, consequently, the coal being denser, would be heavier, not consume so rapidly, and take up comparatively less storage room. Admitting, however, its inferiority to Welsh steam coal, we have the authority of thirty-nine engineers of the same number of Royal Navy ships in the Eastern Seas that Labuan coal has been used most extensively, and alone, in getting up and maintaining steam. Nearly all these reports agree in recommending a mixture of one-third Welsh with two thirds Labuan; and this being now done on board Her Majesty's ships, the smoke is lessened, and, if the coal be of the right sort, steam can be got and kept. When the coal furnished for mixture is of an indifferent quality, this proportion of Welsh to Labuan, we believe, is not sufficient for the purpose. On the 31st Dec., 1864, the Chief Engineer of the *Adventure*, troop ship, 1,794 tons and 400-horse power, reported that he could not keep full speed for more than six hours when burning one-third of Welsh with two-thirds of Labuan. As a set-off to this report, we should observe that, about the same time, the furnaces of the *Severn*, 2,767 tons and 500-horse power, were fired with an admixture of 140 tons Welsh to 80 tons Labuan, and this proportion was found to keep steam well, with 11 per cent. of ash and very little clinker or smoke. On board

Digitized by Google

Queen's ships, smoke in great volume is objectionable, inasmuch as it indicates a vessel's position, and this, in war time, would betray her to an enemy. Welsh, therefore, is preferred on that account, and also on the score of cleanliness; but the combination of Labuan coal with the former produces smoke of a less dense character than that emitted from North-country coals. This complaint of the quantity and density of smoke, from so many officers in Her Majesty's service, is proof that smoke-consuming apparatus is not patronised by the Admiralty. The contract price paid by the Admiralty for Labuan coal is £1 per ton, and English coal purchased recently at Manila by Captain Reed, of H.M.S. *Rifleman*, at sixteen dollars per ton, was, that officer says, inferior to the former. There is economy, therefore, in supplying the navy with Labuan coal, if it can always be had at that price. Commercial shipping and foreign ships of war are not supplied so cheaply. Commandant Van der Burg, of the Dutch frigate *Den Briel*, declares that he paid lately at the rate of eight dollars a ton for coal at Labuan, and considered it cheap on those terms. Supposing a fair quality coal for steam navigation can be got in Labuan at the latter rate, its advantages in the future spread of commerce cannot be over-estimated.

## HOW TO GOVERN A COLONY.

Under this heading the following letter lately appeared in the *Star*:—

SIR,—When Mr. Money visited Java some years ago he thought he had discovered a brilliant solution of this problem. It is a pity that he does not now visit Singapore, and give the British public an account of the manner in which the Colonial Office deals with its dependencies. His second book might not prove so attractive as his first, but it would be of great service to his fellow-subjects in the colony, instructive to the public at home, and salutary, and in the end advantageous, even to Downing-street itself.

What the colonial system of government of a Crown colony is might be vaguely conceived from this short result of it—viz., that in the space of one year and a half, during which it has been tried here, it has created such deep and widely-spread dissatisfaction, not to say indignation, that public meetings, addresses to the Secretary of State, and even petitions to Parliament, are now the order of the day in a busy mercantile community, which before had little love of local politics, but devoted itself to its own private and absorbing occupations. But a slight sketch of our experience will convey a more exact notion of the system, and I shall endeavour to compress it within the limits of two or three letters.

From its foundation by Sir Stamford Raffles in 1819, till 1867, this settlement was not only thriving and prosperous, but in the main contented. It was, with its elder sisters, Penang and Malacca, a dependency of India, receiving its governor and laws from Calcutta—the former armed with no great powers—preserving order, promoting public works, and administering its finances with the strictest purity and economy. The Government of India suffered its Straits Settlements to enjoy unlimited freedom of trade, even in days when a custom-house was thought as necessary a "note" of civilisation as a gallows, and this freedom attracted not only English and other European merchants, but crowds of Chinese, Indians, and Malays. Unhappily, some years ago, just as the death knell of old John Company was sounding, it occurred to some Singaporeans that it would be an advantage to the place if it had a Legislative Council of its own, and were made independent of India. The idea gained ground, negotiations between the Indian and Colonial Offices followed, Treasury and Horse Guards were consulted in their turns, and after a brief delay of ten years the Straits Settlements were handed over to the Secretary of State for the Colonies. This transfer was "inaugurated" on the 1st of April, 1867. A governor of the West Indian type was sent out, and a legislative council was constituted, consisting, besides the Governor, of the Chief Justice, the Brigadier-General, an Indian officer new and indifferent to the Straits, the Colonial Secretary, an old Straits official, an amiable and popular man, the Attorney-General, a local lawyer of very moderate endowments, the Treasurer, the Auditor, and the Colonial Engineer, the last an officer in the Indian army, and also for some time acting as aide-de-camp to his Excellency. With these officials were associated four non-official members, of the Governor's selection, from the men of station and influence in the colony, and who from their local knowledge and experience certainly formed the most valuable portion of the council. Practically, however, their number was reduced to three, as the fourth lives in Penang, 400 miles off, and consequently seldom or ever attends the meetings. Hardly had this council been sworn in when its table was flooded with Bills of the most portentous kinds. I glean the following from the Straits Government *Gazette*:—Laws to amend the laws of merchant shipping, harbours, and pilots; laws to codify criminal and legal procedure; laws to regulate hackney carriages, succession to property, gunpowder, suitors' funds, fees of court, legal practitioners, and exportation of arms; laws to amend stamp and excise laws; laws to interpret laws; laws to constitute a new supreme court and court of appeal; laws for the preservation of the peace, for preventing contagion among cattle, and regulating passenger ships. Such were the modest tasks set before our legislators by the new Governor. People laughed at first, and asked if Bedlam had been let loose on the colony; but their merriment ceased when it leaked out, as it did before long, although reporters were not allowed to attend the debates, that the majority of the Council had no discretion as to supporting or opposing any measure proposed by the Governor, for one of the secrets of the Colonial Office for "good" government consists in imposing upon every official the obligation of voting for the Governor on peril of suspension or dismissal.

Thus the non-official members, who alone represent the public voice, found themselves powerless in the face of the disciplined majority, who always voted by word of command. Many of the above ambitious schemes died a natural death from their own innate absurdity, but a great number of Bills were passed, the chief of which were either encroachments upon that freedom in all that concerns trade which has been the life-blood of Singapore, or attacks upon the natives.

Thus, one measure, on the model of the Liverpool Emigrant Passengers' Act, threatens to throw the whole of the Chinese passenger traffic into the hands of the Dutch, who have a convenient harbour only a few miles off. Another law introduced the principle of compulsory pilotage in these waters, where pilotage and everything else appertaining to shipping and trade was always free as air. As to the natives, they were made liable to deportation at the will of the Governor, and their marriage, funeral, and other religious ceremonies were taxed by the imposition of ten dollars, or £2 4s. 6d. for every procession.

The effect of such measures on them has not been slow. It is said that at least one hundred thriving Chinese traders and shopkeepers fled from Penang through fears of being secretly informed against and deported; and when, more recently, a blight fell upon the sugar-canes, this was regarded as a curse brought on the land by its new rulers, and about 2,000 Chinese deserted their farms and left the settlement.

Yet, bad and mischievous as the Government have been, it is doubtful whether they have created so much irritation and annoyance as that monkey-like restlessness which meddles with everything, and threatens everything, and will leave nothing alone. Thus the municipal bodies were threatened with remodelling; that of Singapore was, indeed, one day menaced with total abolition off the face of the earth if it ventured to insist upon its claim for bricks which the Government had contracted to supply, but which were now wanted for other more personal purposes. Grand juries were to be abolished, lunatic hospitals and leper asylums, institutions founded and maintained by voluntary contributions, were to be put on a new footing, a poor rate seemed for a moment almost looming in the distance, and as a climax, should the revenue prove inadequate to meet the extraordinary expenses in which the new Government had involved the colony, it was threatened with the imposition of import and export duties, which, as they would be the ruin of the colony, clearly proves, if further proof be needed, how utterly unfit the present Governor is to rule a commercial colony like this of the Straits Settlements.

Another of the Colonial Office's secrets of Government did not come to light until the Legislative Council began to dabble with the constitutions of the Supreme Court. In common, not only with their countrymen at home, but with every people who know anything of political liberty, the Singaporeans thought it an universally-acknowledged principle that judges should be irremovable, that is, independent of the local executive Government. The Straits judges, like their Indian colleagues, had always been subject to no other authority than that of the Secretary of State, and they and their office owed much of respect which they commanded, both from Europeans and Asiatics, to this position of independence.

It was with astonishment and indignation, then, that the people of this settlement learned that this principle was quite inconsistent with the colonial system; they learned that judges are liable to suspension and even removal by the local Executive. Large public meetings were held both here and at Penang, and the Duke of Buckingham was earnestly appealed to not to introduce into the settlement a principle so new and so odious to every class of the community. But with the news that the Spaniards were declaring "the irremovability of judges" a fundamental principle of a free Government, came a despatch from the Duke, telling the colonists that they did not know what was good for them; that the principle of judicial independence would not work even with the great judges of England, if they were not kept straight by a powerful bar and an enlightened press, and that colonial judges, an inferior tribe, given to local, personal, and political controversies, must, failing the powerful bar and enlightened press, be subjected to suspension and removal on the spot. Here was a fresh flower of the colonial system; our courts were to be formed on a continental model, and no doubt the Colonial Office would take good care that none but Mr. Phunkies should ever sit in them. What the effect the profession of principles so much more natural in a French prefect than in an English statesman has been in this colony, it would be difficult to describe. It is enough to say that the Duke of Buckingham's reply has given fresh strength to the irritation and disgust which "the colonial system" has excited throughout these settlements, and that an appeal to the House of Commons is in contemplation.

I hope in another letter to give some idea of the financial doings of this new Government.—I am, &c., A SINGAPORE MERCHANT.

Singapore, December, 1868.

MASSACRE OF CHRISTIANS IN KOREA.—The following, apparently from a French source, appears in one of our morning contemporaries:—"The *Missions Catholiques* says some journals have announced that 3,000 Christians of the kingdom of Corea, in Asia, had been put to death for the faith. We would not reproduce the statement without having first acquired a certainty of its authenticity. A communication from the directors of the religious seminary of Foreign Missions leaves unfortunately no doubt as to the gravity of the events in that dependency of the Chinese Empire. The prosecution, which commenced in March, 1866, by the martyrdom of nine missionaries, has been continued with increased cruelty. Instead of isolated arrests, wholesale prescriptions have been ordered, with the view of annihilating every vestige of Christianity. According to the letter in question, dated the 18th September, the number of persons killed is estimated at more than 2,000, of whom more than 500 were in Seoul, the capital. In the provinces the Christians are first questioned, but at the seat of Government they are strangled in prison without any form of procedure. Those who have escaped are fugitives in different parts of the country, and many have perished from want of food. A new law orders all strangers to present themselves before the mandarins of the district in which they may arrive, in order to declare whether they are Christians or not."

## ENGLAND AND CHINA.

MORE articles about the new "understanding" between Lord CLARENDON and Mr. BURLINGHAME. *The Times* points out the advantages of the new diplomatic arrangements with China, completed through Mr. BURLINGHAME, the Chinese Ambassador. Reservation, it now says, is made for cases of immediate danger to life and property. In such the British authority on the spot may at once call upon the commander of the naval force at hand, and put the services of that force in requisition without an hour's delay. But on occasions where no such danger exists, where there is no expectation of violence, and merely a conflict of claims, or dispute about rights, then it is to be understood that the British Consul shall, instead of summoning the captain of the nearest gunboat, put himself directly in communication with his superior at Peking. What with these "reservations," and the consideration that we may "hope" to see the telegraph extended to Eastern Asia "very shortly"—so that a few hours will suffice to bring the news of any dispute, and in a day or two the Minister and the officers on the station will receive directions how to act—*The Times* has come round to quite a cheerful view of the present and prospective state of our relations with China. It does not tell us, though, how soon —or how late—it is likely to be before the extension of the telegraph to China realises the somewhat utopian view of interchanging messages and instructions "in a day or two." The passive resistance of officialdom to enterprise in this direction, supplemented by the rigid, and in many respects ill-judged, system of economy commenced by the present Cabinet, does not give much hope of any efficient aid being given at present towards the carrying out of such a scheme. But we must wait, and hope.

---

MYSTERIOUS are the ways of colonial officials. Last year the Council of the Social Science Association addressed a memorial to the Duke of BUCKINGHAM, then Secretary for the Colonies, protesting against the system of licensed gambling inaugurated in Hong Kong. The DUKE seems to have thought it the best plan to let Sir RICHARD MACDONNELL answer for his own acts, and forwarded the document to him. A reply thereto was drawn up by the COLONIAL SECRETARY, under Sir RICHARD'S directions, and addressed to the Secretary of the Association, under date October 20, 1868; it was printed and appeared at full length in our issue of the 7th December, as well as in the *London and China Express* of the 4th December. But the Secretary of the Association to whom it was addressed never received it, neither did the Council—the body for whose enlightenment it was especially prepared—either see or hear anything of it, until brought to their notice in the columns of the *Telegraph* as above mentioned. Probably, also, its appearance in the *Express* would be the first intimation of its existence to the general public in Hong Kong. There cannot be a doubt that when the GOVERNOR caused the despatch in question to be addressed to the Secretary of the Association he intended it to reach that gentleman; by what bungling, we wonder, can his intention have been so completely frustrated?

---

ADVICES from Paris mention that the members of the Chinese Mission were officially received by the EMPEROR and EMPRESS yesterday. Mr. BURLINGHAME made a short speech, to which the EMPEROR replied in very gracious terms.

## THE YANGCHOW AFFAIR.

Now that the missionary affair at Yangchow has been brought to a termination by a demonstration of our armed forces in China, it behoves us to inquire further into the character of the mission which brought about the difficulty. Notwithstanding all that has appeared in the shape of letters to the editors of London journals, giving the Rev. Mr. TAYLOR and his coadjutors the highest praise for their zeal and faith as evangelical missionaries, it would appear that their religious training for that delicate service is of the most superficial character. Hence they, like fools, have rushed in among the heathen, where angels might fear to tread. If we are rightly informed, this particular mission is in a measure self-constituted, without having the supervision of any important missionary body in England to control their actions. It would appear that the Rev. Mr. TAYLOR entertains different opinions from his learned colleagues in China regarding the qualifications necessary for a competent missionary. He considers that no further education or religious training is required beyond that of being able to read the Bible, provided there is zeal and knowledge sufficient to preach the gospel, as on the highway, by itinerant preachers. He contends that more can be done in the way of conversion by young men and women of the humbler class of society than any other missions composed of learned sinalogues and medical missionaries. Hence he boasts in having selected the members of his mission from behind the counter and out of workshop; so that, with the exception of himself, the Yangchow mission was composed of a comparatively illiterate class of foreigners. Moreover, in addition to the wives of some of his missionaries, he chose to enlist the services of several young females; and, to complete the novelty of the mission, not only were the male members dressed in Chinese costume, but the women followed suit, with the exception of not being able to pinch their feet into "golden lily" boots, and waddle about with goatish gait, like the daughters of the "Flowery Kingdom."

Now it must be understood that this "sensational" mission was not the first one attempted at Yangchow; others of a more grave and earnest character had been tried many years ago by experienced missionaries of much zeal and learning, who had to contend with the subtleties of Chinese literati, where they are comparatively in greater numbers than at most inferior Chinese towns. These missionaries, we understand, finding that the field for their labours in that district was not so encouraging as in others, abandoned the station, which was afterwards taken up by Mr. TAYLOR and his party, who had made themselves somewhat ridiculous in their previous mission attempts at Hangchow. Before arriving in Yangchow Mr. TAYLOR was fully aware of the opposition he would have to contend with from the literati; and, instead of being deterred, he courted the obstacles in store, as evidence of his zeal in the cause. Therefore, what afterwards befel him and his followers was an eventuality easily to be foreseen, and the sufferers are not deserving of that sympathy for the dangers undergone, which they would fain rank with those of martyrs to Christianity. Not only has the general public at home withheld any expression of sympathy for their foolish actions, but we believe that the missionaries of all the recognised Protestant missionary bodies lament the occurrence. They hold that it has become a serious blow to the further propagation of the gospel by competent missions, especially at a period when their endeavours were being directed to the establishment of new stations in the interior of China, beyond the jurisdiction of the Treaty Ports.

As to the consequences of this ill-advised attempt to raise the seed of Christian doctrine on a barren soil, it is fortunate that, so far, no bloodshed or serious political complications have followed. This has been generally attributed to the prompt action of Mr. Consul MEDHURST in bringing physical force to bear upon his arguments of international polity. How far we give him credit for his conduct in the matter we shall not discuss here, as it would involve the whole question of foreign relations with China; but there is one point in the affair that it would be advisable the Foreign-office made note of in its instructions to Consuls in China. When they grant passports to missionaries intending to form mission stations in the interior, is it to be understood that the Consular authorities or the British Envoy at Peking are prepared to back the actions of every zealot by employing Her MAJESTY'S naval and military forces in his cause, although he

Digitized by Google

may have committed foolish or overt acts against the Chinese? We do not suppose that any of our Consuls in China would pretend to uphold a doctrine of this kind, yet in the Yangchow affair Mr. Consul MEDHURST seems to have acted on such an assumption. It is high time, therefore, that the granting of passports to missionaries bound for the interior should contain specified rules of conduct beyond which the Legation and consulates would not be responsible. We understand that the members of all legitimate Protestant missions in China would cheerfully accord with such restrictions as would keep up the respectability of their class in that extensive field for their labours. If on the other hand any and every person, male or female, who choose to call themselves missionaries, obtain passports with unlimited support from British representatives in China, then there will be no end to such affairs as that of Yangchow. It is the old story over again, of professed peace-makers propagating the faith at the point of the bayonet. As a nation, we profess to condemn such a policy on the part of our gallant allies in the Far East, while at the same time our own representatives are pursuing a similar course, which may ultimately drift us once more into a China war.

## RETURN OF THE EX-SHIOGOON'S BROTHER.

ACCORDING to a Paris correspondent, much interest was lately excited by the announcement of a sale of handsome furniture belonging to "Prince X.," in the Avenue de l'Imperatrice. Many people supposed it belonged to the Duc D'AQUILA, brother to the ex-King of NAPLES, and brother-in-law to the Emperor of BRAZIL; but in this they were mistaken. The furniture in question was, for a very short period, the property of Prince MIMBOUTAYOU, STOTSBASHI'S younger brother. MIMBOUTAYOU, called back to Japan much sooner than he anticipated, had to leave suddenly a mansion he had taken for three years from Prince RADZIVILL, at £1,200 per annum. Everything that could be conveniently removed, such as works of art, clocks, and bronzes, was packed up and sent to Japan, so that there remained only the larger pieces of furniture, carpets, &c. A splendid candelabrum bearing a hundred lights hung in the principal drawing-room. One of the oddest items is a suite of twelve servants' liveries, exactly similar to those of the Imperial household.

THE agitation in favour of the Brindisi route for the India and China mails is actively maintained on the Continent. At a meeting, recently held at Stuttgart, of delegates of the several railway companies interested in the traffic between Ostend and Brindisi, *via* Stuttgart, Munich, and the Brenner, it was resolved to propose at the final meeting to be held at Florence to start weekly an extra train in both directions, carriages to be provided with sleeping apartments and refreshment saloons, and to run the whole distance without change from Brindisi to Ostend, and *vice versa*, in thirty-three hours. This would be an important step in the right direction, but there is terrible maladministration on the Italian lines to be reformed before any practical good can result. An interesting letter inserted in our last issue tells how a stupid, unreasoning system of delays at Susa has so far put the Cenis Railway out of favour that diligences are once more coming into use. French intrigue to avoid a diversion from Marseilles has always been held up as the bugbear, but it is evident that Italian laziness and incompetency present quite as formidable obstacles.

WE recently stated, with reference to the conveyance of mails to and from China or Japan by the Pacific route, that letters only could be forwarded overland between New York and San Francisco, parcels and newspapers being sent *via* Panama. This statement was quite true, but it remains so no longer; the prohibition as regards the transmission of newspapers, &c., overland has been withdrawn, and in future no distinction will be made.

WE have been favoured by the Salt Chamber of Commerce, of Northwich, with a copy of a memorial addressed by that body to the Chinese Envoy on the subject of free trade in salt. The document unfortunately reached us just too late for insertion in our last issue. The question is an important one, but is evidently one in which Mr. BURLINGHAME can take no effective action at present, even should he take any interest in it—which seems doubtful.

## RUSSIAN TRADE WITH THE EAST.

The commerce of Russia with and by way of the East is progressing rapidly, and an official document published in the *Correspondance Russe* tells which direction the greatest chances are taking. During the period from 1857 to 1867 the Russian exports per Asiatic frontiers have more than doubled, while the imports have increased by more than one third. The following extracts from the document in question show both the general and recent increase:—

| | Exports. Roubles. | | Imports. Roubles. |
|---|---|---|---|
| 1857 ... ... ... | 11,945,598 | ... | 19,347,199 |
| 1866 ... ... ... | 21,858,803 | ... | 24,714,783 |
| 1867 ... ... ... | 24,639,548 | ... | 28,434,836 |

The exports, therefore, have more than doubled in the ten years, yet the rate of increase last year was over double the average; in the case of the imports the comparison of 1867 with 1866 is still more striking. It must be remarked, however, that 1865 and 1866 were bad years for exports, which were over twenty-seven millions in 1864; 1867, therefore, shows an increase of nearly a million of roubles over the largest former annual total.

The following comparison of the trade by the Asiatic frontier with other countries is important:—

| Exports. | 1866. Roubles. | | 1867. Roubles. |
|---|---|---|---|
| Turkey ... ... | 3,535,811 | ... | 2,590,164 |
| Persia... ... ... | 1,749,067 | ... | 1,316,816 |
| Steppes of Kirghizes ... | 5,251,867 | ... | 6,359,108 |
| Khiva... ... ... | 1,565,457 | ... | 486,897 |
| Bokaria ... ... | 877,182 | ... | 4,310,214 |
| Taschkent ... ... | 3,187,124 | ... | 5,478,177 |
| China ... ... ... | 3,146,222 | ... | 4,094,428 |
| England ... ... | 17,840 | ... | 3,500 |
| France ... .. | 528,233 | ... | 249 |
| | 21,858,803 | ... | 24,639,548 |

| Imports. | 1866. Roubles. | | 1867. Roubles. |
|---|---|---|---|
| Turkey ... ... | 4,553,048 | ... | 4,683,557 |
| Persia... ... ... | 5,221,161 | ... | 5,265,614 |
| Steppes of Kirghizes ... | 4,517,941 | ... | 4,343,777 |
| Khiva.. ... ... | 755,909 | ... | 1,421,200 |
| Bokaria ... ... | 3,454,319 | ... | 6,214,683 |
| Taschkent ... .. | 795,510 | ... | 867,870 |
| China ... ... ... | 5,331,923 | ... | 5,570,616 |
| Prussia ... ... | 5,332 | ... | 5,163 |
| Germany ... ... | 1,031 | ... | 361 |
| England ... ... | 5,696 | ... | 20,622 |
| France ... ... | 66,658 | ... | 41,214 |
| Austria ... ... | 6,255 | ... | 159 |
| | 24,714,783 | ... | 28,434,836 |

We see by the above tables that the imports into Russia from England had largely increased, while those from France and all other Western European countries had fallen off; the exports to England dwindled to one-sixth of the amount of the preceding year, and those to France almost to nothing.

As regards China there was an increase in the latter year under both heads, that of the exports from Russia amounting to thirty per cent. The Customs receipts on tea for the year 1867 are stated at 1,221,000 roubles; and the total commerce of Russia with Europe and Asia together to 510 millions of roubles, which is 71 millions in advance of 1866, and 124¾ millions above the average of the preceding ten years.

The same document gives the following information relative to navigation:—During the year 1867 there entered by the Transcaucasian ports of the Black Sea 1,426 vessels, rather more than half of which were in ballast, and by the Transcaucasian ports of the Caspian Sea and Astrakan 829 vessels, of which 140 were without cargo. Of this total number of 2,255 vessels 1,041 were under the Russian flag, 1,097 under the Turkish, 53 under the Persian, and only 64 belonging to other countries; the number of Turkish vessels, therefore, exceeded those of Russia by more than fifty.

Some of the items of exports by way of Asia are remarkable, as, for instance—cottons, 11,836.000 roubles; linens, 3,280,000 roubles; cotton yarns, 900,000 roubles; and silks, 115,000 roubles.

## SHIPS FOR THE CHINA STATION.

The Elk, twin screw (unarmoured, composite built) gun-vessel, Commander Algernon G. Woolton, has left Portsmouth Harbour for Spithead, where she will receive her ammunition previous to sailing for China. The Hornet, gunvessel, a similar craft to the Elk, Commander Duncan D. Davidson, has completed coaling in Portsmouth Harbour, will sail for China in company with the Elk, and both will be under convoy of the Juno, 6, armed screw transport, 400-horse power, Capt. E. Hardinge. [These two vessels were correctly reported in our issue of the 18th ult. as having been *commissioned* for China, but in the "Summary" of the same number were erroneously mentioned as having *sailed*. They, and the Juno, will proceed with all possible despatch.]

The screw steam corvette Cossack, 20, Captain John E. Parish, left Plymouth on Sunday, the 17th January, for the East Indies and China.

The Perseus, Basilisk, and Serpent, are ordered home from the China Station.

Vice-Admiral the Hon. Sir H. Keppel, K.C.B., now Commander-in Chief in China, will (supposing that Sir James Gordon's vacancy is to be filled up) be the next officer for promotion to the Admirals' List.

## NORTH GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, Jan. 12.

The last number of Dr. Petermann's *Geographische Mittheilimgen* contains an elaborate and highly interesting article on the present condition and requirements of the Amoor country, from the pen of Herr Fr. Aug. Luhdorf, a German merchant, who is at the head of a commercial house at Nicolayefsk, and has resided there for the last twelve years, having had occasion, moreover, during that period, to travel about the country in all directions, which gave him a good opportunity to study it in all its details; and he records in the above-mentioned article the result of his observations. Nicolayefsk, which was founded in the year 1852, now contains a population of 4,017, one half of whom (2,062) are soldiers, and 886 females. The number of buildings of all descriptions is given at 719, including the churches, barracks, and Government stores. The town contains a first-class naval hospital, with 200 beds, a public library, an officers' club-house, and other public institutions; but neither hotels nor inns of any description are to be found there, so that strangers, arriving there without friends or acquaintances, are often put to much inconvenience before they can find a suitable lodging—especially in the winter, when the houses are all occupied. The principal streets are lighted by oil lamps, and furnished with trottoirs for foot passengers. The approach to the town from the sea has been greatly improved during the last few years by the erection of lighthouses and beacons, and the laying down of buoys to mark the channel. The commercial statistics given are not very favourable, nor of a nature to raise hopes that the place will ever become an important commercial emporium. The number of merchant vessels that arrived there in 1860 was only seven, of 1,600 tons, with goods to the value of 370,000 roubles, whilst in 1867 the number of vessels was also seven, with a slight increase of tonnage and cargo, worth 470,000 roubles. Though in the table given there were some of the intervening years that showed greater results—the most favourable of which being 1862, when fifteen vessels, of 4,130 tons, arrived with merchandise valued at 1,100,000 roubles. The most interesting part of the paper is the author's description of Mandschuria, or the Eastern part of Chinese Tartary, which is densely populated, the number of inhabitants amounting to 1,477,312, according to Chinese returns, who are kept in order by an army of 67,800 men, quartered in different garrison towns spread over the three provinces. Much exaggeration has been published respecting the population of Mandschuria, some writers giving glowing accounts of several cities, with a million and a million and a half of inhabitants, whereas, according to Herr Luhdorf, they range from 5,000 up to 15,000 only. Great stress is laid on the importance of opening to free commerce the navigation of the Sungari, which has never yet been explored, so that it is impossible to say how far up the country it is really navigable. But to this the Chinese have always been resolutely opposed, and it can only be effected by diplomatic negotiations at Peking; for it is well known that the Governor of Aigoon, who concluded a treaty in 1858 with Count Murawieff, then Russian Governor General of Siberia, lost his head in consequence, and others will therefore be cautious of risking their lives in a similar way. "When one considers," says Herr Luhdorf, "that the whole of the Amoor country could draw its supplies of breadstuffs and other food from the banks of the Sungari at a much cheaper rate, it appears extraordinary that the Russian Government does not take serious steps at Peking to obtain this facility. Rye flour, which costs at Nicolayefsk 2 roubles 10 copeks per pood of 40 lbs., might be imported from the Sungari for 50 copeks; and oxen, that are paid for at Aigoon with 27 roubles each, can be bought at Zizikara for 7 roubles per head. To say nothing of the advantage of a great trade that would naturally spring up and open a vast market for Russian produce and manufactures, the political importance of the opening of the Sungari should not be overlooked, as a march of only seven days would bring a Russian army from the head of that river to the walls of Peking."

With regard to the commercial capabilities of the Amoor country, the author enumerates timber, firs and skins, salt-fish, isinglass, leather, and wool as the principal articles of export, which might be greatly increased; but he is of opinion that a great future is open to the coal beds on the Island of Sachalin, the free exportation of which fuel is not prohibited by the Russian Government; but it is much obstructed by natural difficulties, which must first be encountered, at the head of which he mentions the dangerous and unprotected state of the coast, which requires the erection of lighthouses, ports of refuge, and piers for loading cargo. He himself some years ago formed an association, under the name of the "Hadschi Bay Company," for the purpose of exporting the coal and timber of the island, and he sent the "statutes," or bye-laws, to St. Petersburg for the Imperial sanction, with a request for the needful "concession," but it was refused, on the ground of informality; notwithstanding which, he still thinks it would be a very lucrative and important enterprise.

The author above alluded to is the same gentleman who, in 1857, published one of the first works written on Japan, under the title of "Eight Months in Japan after the Treaty of Kanagawa" (Bremen, 1857), and of which I sent you a review that appeared in one of the earliest numbers of the *China Express*.

## HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, JAN. 12.

Notwithstanding that the members of the First Chamber of the States General have resumed the discussion of the Budget, a general dulness prevails in politics. The discussions in the Lords are only an echo of those held in the Second Chamber. The same objections and the same remarks are made by the Opposition, and of course the same arguments are used by the Minister of the Colonial Department to defend his policy, which has been accused of vagueness and indecision. Meanwhile, the greater part of the chapters are approved of either unanimously or by a very strong majority, and undoubtedly the remainder will also pass without lenghtened debate, because the Budget ought to have been sanctioned before the 1st January.

A moment ago I spoke of the dulness prevailing in political circles; and, indeed, to be able to record the present condition of political life, I ought to have the *petites et grandes entrées*, for receptions, soirées, and balls are now the order of the day at the Court, as well as in the hotels of the ambassadors and aristocracy. I do not possess sufficiently the talent of observation as to derive from the manner in which a Liberal M.P. is received by an ex-Conservative Minister, or from the behaviour of any *diplomat* towards a member of the actual Cabinet, whether the political barometer indicates changeable or settled weather. But this I may ascertain, that amidst the glittering of the *bougies*, uniforms and toilettes, the very noble representatives of a certain coterie are doing their best to impair the strength of their Liberal antagonists. Even in Liberal circles rumours are afloat with reference to an alteration in the Cabinet, and it is reported that Mr. Foek, the Minister of the Home Department, will probably be appointed Royal Commissary for the province of Dreuth, Mr. Thorbecke occupying his seat in the Ministry. But it is also reported that the King declines to approve of this alteration; and this, indeed, is most probable, now that the Cabinet has refused to confirm the appointment of Earl van Zuylez, ex-Minister of Foreign Affairs, as Ambassador at the Court of St. Petersburg.

Rumours also say that some of our "Lords" are treated with particular attention by our reactive politicians. But the debates in the First Chamber do not at at all confirm this *on dit*. They have even delined to make use of the lower class instruction question to trouble the Minister of the Home Department. This taciturnity about the instruction question is perhaps a consequence of the election of ex-Minister Mr. Heemskerk as M.P. for the district of Gorinchem (he obtained 1,157 votes, and his adversary, Mr. van Loon, 945 votes). He is understood to be the right man to bring in a Bill to alter the instruction law of 1857. The Conservative papers, however, say that such a proposal will not be made, because the Liberal majority will always prevent the passing of such a Bill. Of course all their hope is fixed upon the elections of next June, when they consider that the Liberals must be beaten upon the instruction question.

It is now officially stated that Mr. Koorders, the leader of the Opposition, is suffering from a disease of the throat, which prevents him from speaking in Parliament, and it is ascertained that he is so ill that all work is forbidden him. Of course Mr. Heemskerk will charge himself with the task of the member for Haarlem.

The first part was published a few days since of a work which will create the greatest interest in the Far East. I refer to the "History of the Culture System," edited by Mr. G. H. van Soest, and published by Mr. H. Nygh. This historical description is characterised by the greatest accuracy. It not only contains the origin of the several cultures, but also relates the history of the people of the India Archipelago. Of course this book is written in a liberal sense, which is proved by the few lines I copy from it:—"The cultures were first introduced in 1830, and reached in 1845 their highest point. But in 1850 it was already in decline, and since that year it has lost its reputation as a system. The monopoly has also lost its exclusive character; the Government shrinks from intervention, and inclines more and more towards rendering up the several branches of culture to private industry." The author has divided his work into four parts—first, the Netherlands Indies under the East India Company, 1800-30; second, the culture system of Van den Bosch; 3rd, the system under the management of Baud; and, lastly, the system from 1840 to 1850. This interesting book is dedicated to Dr. van Hoevell. Another work will also be published shortly, which perhaps will tend to fix more the attention of foreign nations upon our colonies. It will be written in the French language by Mr. Batel, who resided for a very long period in Java. The work was announced some days ago by the *Independance*.

Baron Gevers, our Ambassador at the Court of St. James's, has arrived at the Hague.

The Dutch Association for Promoting Industry has issued a circular requesting minute descriptions of the principal establishments of culture and industry in the Netherlands Indies. The association intends to publish the various descriptions, in order to promote industry as well in our country as in the colonies.

At Utrecht a Constitutional Association has been established to promote the extension of Conservative principles.

ROTTERDAM, JAN. 18.

As I predicted in my last letter, all the chapters of the Budget passed, either by a large majority or unanimously, the First Chamber of the States General, whereupon the members left the Hague till further convocation. The debate was of very slight importance. It is said that the members of the Second Chamber will meet early in February for the despatch of business. In my last I mentioned a rumoured alteration in the Cabinet, Mr. Thorbecke being assigned the vacant place of Mr. Fock, who was to be appointed Royal Commissary in Dreuth. The *Arnhemsche Courant* contradicts this rumour most positively, and asserts that there is yet no question at all of any alteration in the existing Ministry.

A most interesting lawsuit is now pending in the High Court at the Hague, viz., the Government of the Netherlands Indies *versus* E. Francis, ex East Indian functionary. The question is this:—Mr. Francis was discharged in 1851 from his post as East Indian functionary, with a pension of 6,750f. a year; but being appointed in 1851 president of the Java Bank, which office he held till 1863, his pension was not paid to him during those years, because the Government regarded him as a functionary of the State; but now Mr. Francis claims his arrears of pension, with interest at 6 per cent., giving a total of f.82,687.50, and this claim is approved of by the Court of South Holland, which condemned the Government to pay the

Digitized by Google

said sum to Mr. Francis. The Government has appealed to the higher Court, and the first proceedings took place some days ago, but did not lead to any definite result.

The *Nieuwe Rotterdamsche Courant* has published very bad news from Surinam and the Coast of Guinea.

On the 1st April a new Liberal paper, *Het Dagblad van Nederland*, will be published in the Hague. The editor is Mr. Maas Geesteranus, a most advanced Liberal.

### PRODUCE MARKETS.

TEA.—The cargo ex Stinchar, 1912/4 and 6892/12 chests China, will be offered in public auction on the 27th inst. The valuation is as follows:—588 chests choicest new season's Kaisow Congou, 105c. to 110c.; 465 finest new season's Kaisow Congou, 86c. to 88c.; 1,035 chests choicest new season's Lapseng Souchow, 122c. to 145c.; 228 chests finest new season's Kaisow Congou, 94c. to 100c.; 439 superfine new season's Kaisow Congou, 95c. to 112c.

COFFEE.—The demand has become rather more animated. Some parcels good ord. Malang sold at 35c., whilst there is a fair demand for yellowish to yellow sorts at 44c. to 54c., but there is no stock of these qualities. The transactions included 680 bags Java, ex Glenclune, at 44½c.; 1,461 bags Java, ex County of Stirling, at 40c. to 45½c.

SUGAR (RAW).—The market continues very firm, and even shows an improving tendency, so that rather higher rates have been paid; but nevertheless the transactions remain very restricted, because importers still decline to operate.

RICE.—The market is dull; 1,550 2nd Java Table, ex Caroline, sold at prices that did not transpire.

SPICES.—Very firm, with a fair demand. In auction were sold some lots of Mace and Nutmegs, but no particulars transpired.

TOBACCO.—In auction were offered 9,007 bags Java, which sold as follows:—1,455 bags LS at 33¾c.; 1,918 bags FvdP at 25 1-10c.; 4,273 bags Tanl at 42 3-5c.; 250 bags Tanl Blitar at 53¾c.; 1,111 bags MDG at 33c. The Bezoekie qualities were very inferior, but the low prices attracted many buyers.

CIGARS.—In auction were offered 130/m. Manila 2a Cortados, 1868, of which 50/m. were sold at 37¾f. to 40¾f., and the rest bought in at 38f.; 100/m. 2a Habanas were sold at 36¼f. to 37¼f.; 110/m. 2a Cortados at 35f. to 40¼f.

HIDES.—Since my last report transactions have been small, comprising only 2,000 p. Sourabaya Rinder, ex County of Stirling.

BANCA TIN.—The advance has made further progress. The speculative demand continues. The last prices paid are 67f. on spot, and 68¼f. for future delivery.

### SHIPPING INTELLIGENCE.

ARRIVALS.—Jan. 15, at Brouwershaven, for Singapore, Bilderdyk; at Texel, from Batavia, Copernicus, Johannes Martinus; from Saigon, Wilhelmina; from Batavia, Stad Doekum.

DEPARTURES.—Jan. 12, from Brouwershaven, from Batavia, Cornelia Hendrika; 14, from Brouwershaven, for Batavia, Mary Hillegonda; 17, from Texel, for Batavia, Almelo.

PASSENGERS INWARD.—From Java: per Copernicus, Messrs. Reuvekamp Gille and family, A. V. Eecen, G. Polman, G. Lap; per Bilderdyk: Mr. Bosch, Mr. Kuyk.

MISCELLANEOUS.—The Dutch Trading Company has chartered the following ships to convey produce from Java to Amsterdam: Bato, at 85f.; to Dordrecht: Nestor, at f.81.98c.; to Schiedam: General de Steurs, at f.83.99c. The Constantia will shortly sail with troops to Java.

## UNITED STATES.

Advices dated New York, Jan. 9, state that a Bill has been introduced in the Senate, providing a loan of $8,000,000 for thirty years, in bonds bearing interest at 6 per cent., to the American Asiatic Telegraph Company, to aid in laying a submarine cable between California and China.

A soldier named Cunningham was arrested lately at San Francisco for stabbing a Chinaman. He was brought before Judge Provines for examination, and the wounded Chinaman was offered as a witness against him. To this the prisoner's counsel objected, and, the Court expressing a wish to hear argument on the matter, the competency of such testimony was argued at length by Louderback for the prosecution, and Zach. Montgomery for the defence. The former contended that under the Fourteenth Amendment to the Federal Constitution and Civil Rights Bill all persons, regardless of race or colour, and not otherwise disqualified, are competent witnesses and entitled to the same rights and privileges in Courts of justice. The case was finally taken under advisement, and Judge Provines rendered his decision excluding the Chinese witnesses. He held that the Constitutional Amendment refers only to citizens, and was not intended to interfere with or abrogate any of the rules of evidence established by the laws of the States. Chinamen are not citizens, and consequently the law of the State excluding their evidence in cases where white men are parties must be considered in full force. As the present case depends on white men's testimony also, it was continued for further examination.

The Custom-house officers at San Francisco have seized a quantity of opium, valued at $40,000, for the violation of the Revenue laws. The drug was brought from China by the steamer *Great Republic*, and an attempt was made to smuggle it through.

## THE CHINESE MISSION IN LONDON.

(NEW YORK HERALD.)

As an early result of the offices of the Chinese Ambassador in London we have the broad admission and promise that England does not "desire or intend to apply any unfriendly pressure in order to induce China to advance more rapidly in her intercourse with foreign nations than is consistent with the safety and feelings of the Chinese people." In other words, England abandons entirely the position she formerly held with regard to China, and takes her place side by side with the United States in the resolution to treat the ancient empire in all respects as a responsible nationality. In order to see her own progress England has only to compare her present attitude toward the Eastern Power with the attitude she assumed in the opium war. That was in essence a war made to force on China a trade not "consistent with the safety and feelings of the Chinese people," and the most glaring example of "unfriendly pressure" known to the history of civilised Governments. British traders could make money by the cultivation and transportation of the seductive poison. True, its use implied more degradation and misery than millions of British missionaries could sufficiently denounce; but the men to be made miserable were only Chinese, and the Government that made laws against the trade was only the Government of China, so that honest and moral Power, Great Britain, fostered smuggling on the Chinese coast, supplied the smugglers with armed boats to fight their way in, and finally covered with its flag a war intended to substitute the will and wishes of Great Britain for the will and wishes of China in the government of the Chinese people. That was the most striking example of the British policy. British policy has been the same ever since, although somewhat less glaring in its assumptions of superiority to all law and morality.

It was left for Americans to set the first example of justice, humanity, toleration and even international decency toward the Government and people of China. We were the first of the civilised Powers to treat that nation as we would require that other nations should treat us—the first nation that did not make a cant of honesty and consider that the rules of right that governed our conduct in Europe or America were of no account in Asia. Our own laws had taught us tolerance toward every man's peculiar views, and not the narrow lesson of endeavouring to change the world because it was not measured out and framed in accordance with our notions. In short, our diplomacy, being the newest and latest diplomacy of the world, had in it more of the enlightenment, humanity and comprehensive statesmanship of this age than of the selfish traditions of the time that has passed away. Approaching the Chinese Government in this spirit we naturally had at once great advantages over other Powers. It was perceived that our motives and morals were different from those of the European Powers. The Chinese saw that we did not want to colonise, did not want to force trade, but only encourage its growth, and that we were willing to accord an advantage for every one extended. From the friendly relations thus established grew the treaty recently made between the Chinese Government and our own. One of the more remarkable results of that treaty was that it practically introduced a new member to the family of nations—brought China into the international circle, supported by the alliance and friendship of the United States.

This is the result that England more particularly recognises in her present action. China is guaranteed by us against unreasonable wars, and England, accepting the necessities of her position, relinquishes gracefully all intention and desire to use against the Chinese in the future such "unfriendly pressure" as she has never ceased to use since she gained her first foothold on the Chinese coast. She assents to the necessity of observing existing treaty stipulations; promises in any case of alleged grievance to lay these grievances honestly and fairly before the Chinese Government proper, and not build up quasi potentates as her fancy may dictate, and hold China to their bogus treaties; and finally agrees that the British flag shall not be used as a cover for warlike operations in China without direct authority from London. These provisions will prevent the troubles that have always been between China and the Powers that sought her shores for commerce, if straightforwardly acted upon, and it is satisfactory to see that there is some Power in the earth to force a recognition of the right kind of progress upon such an old and case-hardened sinner against all international rights as England has ever been.

### NEW YORK TEA MARKET.

The total receipts of tea from China and Japan during the year 1868 were 36,668,323 lbs.; the quantity withdrawn for home consumption was 33,829,984 lbs.; the exports were 1,904,018 lbs.; the stock on the 1st of January, 1868, was 8,425,985 lbs., on the 1st of January, 1869, 9,360,306 lbs.

The following is from Messrs. Beebe Brothers' Circular, dated 31st December:—Business in our staple since the 18th inst. has been quite moderate, and sales from first hands are limited to 1,750 half-chests Green, 1,800 half-chests Japan, and 1,000 half-chests Oolong. The market closes without change in values, but with some improvement in tone, holders showing less disposition at the moment to press their stocks to sale at current rates. As is usual at the close of the year, the trade generally are waiting the opening of the New Year, and the arrival of the early cargoes of new crop goods (now near at hand) before operating with any degree of freedom. The P. M. steamer *Alaska*, just in, delivers the Greens despatched from Shanghai October 15, and these constitute the principal addition to our supply since the 18th.

AN ORDER OF MERIT FOR THE COLONIES.—A recent despatch from the Duke of Buckingham to Sir John Young is published in the Ottawa *Gazette*, in which he states that Her Majesty has been graciously pleased to sanction such a modification of the statutes of the Orders of St. Michael and St. George, originally instituted by King George III. in connection with his Majesty's Mediterranean possessions, and now presided over by a prince of the Blood Royal, together with such an enlargement of its numbers as will render it available as a reward of distinguished merit or services in any part of Her Majesty's colonial possessions.

A TELEGRAM dated Stockholm, the 18th January, says:—"The session of the Diet was opened to-day. The Speech from the Throne declares that the friendly relations subsisting between Sweden and foreign countries are unaltered, and notifies the conclusion of Treaties of Commerce with Siam and Japan. It moreover announces a loan of three million rix dollars for railway purposes."

# Monetary and Commercial.

The meetings of creditors and shareholders of the Commercial Bank Corporation of India and the East directed by the Master of the Rolls have been held this week. The meetings were well attended, and a resolution was passed at each of them, with but one dissentient, approving the proposed scheme of arrangement.

The ordinary meeting of the Chartered Mercantile Bank of India, London, and China will be held on the 18th May, when the proprietors will be called upon to fill the vacancy in the board occasioned by the retirement of Sir Frederick James Halliday, K.C.B., on his being appointed a member of the Council of India.

At the meeting of the shareholders in the City Bank, held on Tuesday, the report, which stated the net profit for the half-year at £43,028, was adopted, and a dividend at the rate of 7 per cent. per annum declared. The chairman in a few remarks congratulated the meeting upon the results of the past half-year's working, which he considered were the more gratifying when the Bank minimum of 2 per cent. had ruled for more than five out of the six months.

A notification has been issued requiring creditors of the China Merchant Insurance Company and the Bombay Mody Insurance Company, to send in their claims to the agents in London, Messrs. D. D. Cama and Co., before the 31st March next.

A striking contrast to the miserable exposures of commercial frauds that have been so numerous of late is afforded by the action of Messrs. Jno. Samuels and Co., of Manchester. This firm, having an extensive connection with China, suspended payment in 1865, in consequence of other failures involving them in heavy losses; the creditors, however, agreed to accept a composition of ten shillings in the pound, which was duly paid. To-day we have received, with great pleasure, a circular announcing that Messrs. Samuels are prepared to pay immediately the entire deficiency of ten shillings in the pound to all their old creditors.

The failure is announced of Messrs. Morgan, Melbourne, and Co., merchants, of Leadenhall-street and of Batavia. Their liabilities are set down at £500,000. Rumours have been current of other impending stoppages, but they remain without confirmation.

At a recent meeting of the Glasgow Chamber of Commerce the subject of export duties levied on Japan tea and silk came under consideration, and a resolution was passed, affirming the expediency of a fixed export duty being substituted for the *ad valorem* duty charged under the present system.

It is stated that recent advices from Labuan give satisfactory prospects of the working of the coal mines by the Oriental Coal Company. There is already a steady outturn of coal, and attention is being paid at Singapore and elsewhere to its valuable peculiarities for steam and gas purposes. At the same time the working even on its present scale has been brought to yield a surplus over expenses. The accounts confirm the impression that the quantity available is practically inexhaustible.

It was recently notified that the Spanish Provisional Government had decreed that goods shipped in foreign vessels to the Spanish West Indies and the Philippines would be charged only the same rate of duty as if they were shipped in Spanish vessels. A mercantile correspondent, however, states that the fact has not been officially intimated to the Spanish Consulates, and that the only information they have is that furnished by the *Gazette* of the 23rd of November.

With reference to the Netherlands India Railway Company, Messrs. Baring Brothers and Co. notify that the second interest coupon of the fully paid-up shares will be paid on the 15th inst., with f.22.50, at their office. The fourth coupon, due the same day, on the 4,000,000f. Four-and-a-Half per Cent. obligations of that railway, is also announced as payable by Messrs. Horstman and Co.

The annexed announces the intended date of the opening of the Suez Canal:—

"SIR,—Having received numerous inquiries from shippers and shipowners desiring information respecting the precise period when the Suez Canal will be opened to the general navigation, in order that they may make timely preparations for the coming event, will you permit me to inform them that the Suez Canal will be completed and opened to the general navigation of all countries on the 1st of October this year? The width will then be 100 metres (328 English feet) at the water line, and 22 metres (74 English feet) at the bottom of canal, with a depth of eight metres (26 feet English).—"I have the honour to be, Sir, your obedient servant,

"DANIEL A. LANGE, Director and English Representative of the Suez Canal Company."

Messrs. Theodore and Athelstan Angier (sons of the late S. Haynes Angier, ship-broker, &c., of Cornhill) announce that they have entered into partnership under the firm of Angier Brothers, and will carry on the business of ship and insurance brokers at No. 69, Cornhill.

The business of Lambert, Whyte, and Co. will in future be carried on under the style of W. A. Whyte and Co., 9, Mincing-lane.

The promoters of the projected Pacific Cable—between California and China—are not idle. A Bill has been introduced into the Senate to sanction a State loan of eight million dollars in aid of this undertaking.

## EXPORT OF COTTON GOODS TO THE FAR EAST.

The following is a summary of Mr. Sam Mendel's tables for the present month, which contain details of the quantities of cotton manufactures and yarn shipped from the ports of London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Singapore, Batavia, Manila, and Ceylon during the month ended 16th January, 1869, compared with the corresponding months of 1868 and 1867.

To HONG KONG AND WHAMPOA.—Plain Cottons: 1869, 2,259,388 yards; 1868, 6,469,662 yards; 1867, 3,415,395 yards; decrease, 1869 against 1868, 4,210,274 yards. Coloured Cottons: 1869, 68,425 yards; 1868, 198,805 yards; 1867, 135,020 yards; decrease, 1869 against 1868, 130,380 yards. Printed Cottons: 1869, 9,000 yards; 1868, 89,496 yards; 1867, 121,510 yards; decrease, 1869 against 1868, 80,496 yards. Cotton Yarn: 1869, 58,240 lbs.; 1868, 366,350 lbs.; 1867, 146,030 lbs.; decrease, 1869 against 1868, 308,110 lbs. Value: 1869, £51,456; 1868, £130,249; 1867, £85,586; decrease, 1869 against 1868, £78,803.

To SHANGHAI.—Plain Cottons: 1869, 10,984,015 yards; 1868, 14,502,005 yds.; 1867, 8,771,185 yds.; decrease, 1869 against 1868, 3,517,990 yds.; Coloured Cottons: 1869, 349,453 yds.; 1868, 453,300 yds.; 1867, 1,914,659 yds.; decrease, 1869 against 1868, 103,847 yds. Printed Cottons: 1869, 201,968 yds.; 1868, 169,980 yds.; 1867, 333,640 yds.; increase, 1869 against 1868, 32,988 yds. Cotton Yarn: 1869, 2,000 lbs.; 1868, nil; 1867, 73,132 lbs.; increase, 1869 against 1868, 2,000 lbs. Value: 1869, £202,509; 1868, £248,759; 1867, £246,224; decrease, 1869 against 1868, £46,250.

To JAPAN.—Plain Cottons: 1869, 2,431,070 yds.; 1868, 6,387,600 yds.; 1867, 677,830 yds.; decrease, 1869 against 1868, 3,956,530 yds. Coloured Cottons: 1869, 34,800 yds.; 1868, 480,980 yds.; 1867, 178,400 yds.; increase, 1869 against 1868, 446,180 yds. Printed Cottons: 1869, 3,600 yds.; 1868, 78,660 yds.; 1867, 93,600 yds.; decrease, 1869 against 1868, 75,060 yds. Cotton Yarn: 1869, 620,144 lbs.; 1868, 1,079,580 lbs.; 1867, 158,020 lbs.; decrease, 1869 against 1868, 459,436 lbs. Value: 1869, £80,340; 1868, £179,956; 1867, £35,152; decrease, 1869 against 1868, £99,616.

To SINGAPORE AND PENANG.—Plain Cottons: 1869, 4,638,487 yards; 1868, 5,804,202 yards; 1867, 5,455,709 yards; decrease 1869 against 1868, 1,165,715 yards. Coloured Cottons: 1869, 605,205 yards; 1868, 272,790 yards; 1867, 920,632 yards; increase, 1869 against 1868, 332,415 yards. Printed Cottons: 1869, 312,096 yards; 1868, 60,152 yards; 1867, 512,201 yards; increase, 1869 against 1868, 251,944 yards. Cotton Yarn: 1869, 109,225 lbs.; 1868, 124,645 lbs.; 1867, 118,830 lbs.; decrease, 1869 against 1868, 15,420 lbs. Value, 1869, £102,343; 1868, £97,772; 1867, £157,819; increase, 1869 against 1868, £4,571.

To BATAVIA.—Plain Cottons: 1869, 1,395,228 yards; 1868, 1,017,875 yards; 1867, 2,972,886 yards; increase, 1869 against 1868, 377,353 yards. Coloured Cottons: 1869, 961,772 yards; 1868, 860,066 yards; 1867, 1,735,489 yards; increase, 1869 against 1868, 101,706 yards. Printed Cottons: 1869, 346,048 yards; 1868, 546,241 yards; 1867, 1,591,587 yards; decrease, 1869 against 1868, 200,193 yards. Cotton Yarn: 1869, 20,035 lbs.; 1868, 68,390 lbs.; 1867, 58,540 lbs.; decrease, 1869 against 1868, 48,355 lbs. Value: 1869, £54,491; 1868, £52,614; 1867, £154,854; increase, 1869 against 1868, £1,877.

To MANILA.—Plain Cottons: 1869, 1.408,826 yards; 1868, nil; 1867, 1,228,857 yards; Coloured Cottons: 1869, 1,997,827 yards; 1868, nil; 1867, 821,352 yards; Printed Cottons: 1869, 281,495 yards; 1868, nil; 1867, 6,400 yards; Cotton Yarn: 1869, 23,748 lbs.; 1868, nil; 1867, 22,889 lbs. Value: 1869, £75,620; 1868, nil; 1867, £51,657.

To CEYLON.—Plain Cottons: 1869, 2,305,230 yards; 1868, 1,695,775 yards; 1867, 3,676,448 yards; increase, 1869 against 1868, 609,455 yards. Coloured Cottons: 1869, 103,172 yards; 1868, 55,806 yards; 1867, 348,080 yards; increase, 1869 against 1868, 47,366 yards. Printed Cottons: 1869, 393,202 yards; 1868, 34,950 yards; 1867, 630,320 yards; increase, 1869 against 1868, 358,252 yards. Cotton Yarn: 1869, 16,400 lbs.; 1868, 26,450 lbs.; 1867, 11,500 lbs.; decrease, 1869 against 1868, 10,050 lbs. Value: 1869, £44,412; 1868, £31,209; 1867, £106,270; increase, 1869 against 1868, £13,129.

## FREE TRADE IN SALT.

The following statement has been addressed to the Chinese Envoy by the Salt Chamber of Commerce, Northwich:—

"Sir,—Considerable correspondence on the subject of the salt trade has taken place between the representatives of the Empire of China and Great Britain during the last twenty years, and it is needless to go over the whole ground again.

"The Salt Chamber will, therefore, only refer to the last official communications between Sir Rutherford Alcock and Prince Kung, under the dates of 19th July and 1st August, 1866. On the one hand, it was submitted that the revenue of China would be much benefited by an European trade in salt, and that the British article which would be presented to the Chinese people was undoubtedly superior. It was also submitted that a relaxation and alteration in the ancient laws of China regarding salt had already taken place. On the other hand, Prince Kung urged, whilst admitting these facts, that a great number of people, amounting to some millions, were employed in the manufacture, porterage, and transportation of salt, and would be thrown out of employment and deprived of their livelihood.

"Now the Chamber begs to advance, that whether the salt comes from Europe, or from elsewhere, the amount of native labour employed upon its transport would be the same. Foreign ships might bring it to the one port only, and from thence it could be distributed by native merchants, and native junks. It may be that Chinese junk owners, accustomed to illicit traffic, would object to any alteration, but their objection ought surely to have no weight with the Government.

"The Salt Chamber begs further to submit that the labouring classes would benefit from the free trade in salt, independently of the inestimable value of obtaining a necessary of life in a pure condition.

"The ships which bring the salt would need a return cargo, to furnish which, the grass of China, required in Europe for paper-making and spinning, and the oil from seeds grown and pressed in China, would be purchased by the British to an immense extent. In this way both a vast amount of employment would be offered to the Chinese people, and the salt which they need would be paid for in grass and oil, for which they have at present no sufficient market, for want of the means of cheap transport to Europe. For instance, the British merchant might bring a cargo of salt, which he could afford to sell at Shanghai at £3 per ton, and might take in return a cargo of oil or seeds, worth from £20 to £30 per ton. Thus a single ship load, of the average size, would furnish a sum equal to about £40,000, available for the employment of Chinese labour.

"In forming these conclusions we are guided by what has occurred in India. Fifteen years ago our export of salt to that country hardly existed. In consequence, however, of the Government admitting British salt upon fair terms, the import has now reached nearly 300,000 tons per annum, and the Indian labourer (the Molunghee) has left the salt swamps of the Ganges to cultivate jute, linseed, and rice. The trade in jute, which was as small as that in salt, has increased to 700,000 bales per annum. The trade in oil seeds, &c., which scarcely figured in our Calcutta exports before the alteration in the duties on salt, has increased to tens of thousands of tons. The wages of the poor Molunghee have been tripled, the revenue of the Indian Government derived from salt has risen in consequence in a few years a million and a-half of pounds sterling. The salt smuggler has almost disappeared, and a necessary of life is given in a pure state to the consumer at a lower price than he paid before for a very inferior article. It must also be borne in mind that an import of European salt into China could only be the growth of years, so that any immediate disturbance of Chinese labour, such as the Prince of Kung apprehended, is an impossibility.

"The salt trade has always led the way in the development of free commercial intercourse between nations. The greatness of the Port of Liverpool, which is the centre of half the trade of the United Kingdom, is mainly due to the vicinity of the salt beds of Cheshire. The ships laden with salt went out to America, and the result has been the enormous cotton trade with that country. Ships laden with Salt went out to Africa, and the result has been the creation of the palm oil trade. And more recently, ships laden with salt went out to Calcutta, and the result has been the great trade in the new fibre of jute, linseed, and of various other articles of Indian produce.

"We therefore point with confidence to these facts, and ask the great Chinese people to follow the course which has been attended with such advantages in the countries we have named, especially in India.

"The Shanghai Chamber of Commerce, through its President, Mr. Tyson, has published many documents to prove the extreme desirability of a trade in salt, to assist in opening up a trade with Europe in raw produce.

"Mr. Consul Winchester, of Shanghai, has proved by many reports that it would be considered an inestimable boon by the Chinese population in his district if they could get European salt.

"We, the salt manufacturers of Great Britain, have at our disposal, in a situation which is unequalled for the facilities of distribution over the world, inexhaustible beds of the purest salt, in the immediate vicinity of equally pure beds of coal, and are thus able to manufacture and deliver our produce at a rate which permits us to distance all competitors. We seek extension of our trade, and we point to the past as evidence of the fact that free trade in salt in this country has enabled us to increase our manufacture within the last half century from about one hundred and fifty thousand tons to a million and a-half tons, and we have always found that the countries thrown open to our trade have been equally benefited by an extension of trade in their own produce.

"We have no doubt from past experience that such will be the case with the Empire of China, and leaving this most important matter in your hands, we have the honour to remain, Sir, with great respect, your most humble servants, "THE SALT CHAMBER OF COMMERCE.

"H. E. FALK, President.

"JOHN MOORE, Secretary.

"To his Excellency the Hon. Anson Burlinghame, &c., &c., &c., London."

## ARTICLES OF IMPORT.

—o—

### TEA.

The public sales of China were concluded on the 20th inst. The quantity offered was 16,016 packages, and about 13,000 packages were sold, all being "without reserve." The auctions have passed steadily, and prices for the common to fair grades of red and black-leaf Congous, though irregular, were generally rather firmer. Some breaks of medium to fine black-leaf Congou, "with all faults," sold from 1s. 7d. to 1s. 11d., being full rates. Caddy boxes of red and black-leaf teas went generally at lower rates. Oolongs and green teas sold easier.

The following review of the trade of the past year is from Messrs. Arthur Capel and Co.'s Circular:—

During the past year tea has fluctuated more than usual. The market opened with a large demand both for export and the trade, causing a gradual advance in the price of all kinds of Congou, which was further stipulated by speculative purchases to some extent, owing to the prospects of our stocks being reduced to a point lower than for some years past. The price of common Congou was forced up rapidly, until at the end of May the quotation was 1s. 3½d. to 1s. 4d. per lb., although the better kinds showed but little sympathy in the upward movement. This great advance checked the deliveries, the trade and exporters both holding aloof from it, and the speculation generally being in weak hands suddenly collapsed, and there has since been a very dull and drooping market, and the price of common teas has receded to within ½d. to 1d. per lb. of the opening prices of the year. The market has been further depressed by the extraordinarily large exports of the current season, which have completely overwhelmed it, and resulted in most serious losses to all concerned, the prices paid in China being much too high, especially for so large a quantity, whilst the anxiety to get teas home, both by overland route and by steamers, in addition to the numerous clippers, has resulted in excessive quantities arriving at one time, and to markets already overweighted, and buyers have thus been able, with a continuous fall in prices, to supply themselves in small quantities, at rates bearing no relation to the cost in China, whilst the great bulk still remains unsold, the supplies in stock and afloat being greatly beyond our immediate requirements.

The import trade, as might be inferred from the foregoing, has again been carried on at a heavy loss, notwithstanding the profit realised in the spring on common to fair qualities, nor can it be a matter of surprise that this should be so, the shipments for the early part of the season being nearly double our requirements for the same time, and at prices which could only have been justified by an export far below our wants. As long as importers hurry on the shipments early in the season, as has been the case of late, we can see no chance of a remunerative result, as the trade seeing such excessive shipments lose all confidence in the stability of prices, and will only buy in small quantities. Thus whilst in China the settlements are made by thousands of packages, they are sold here in hundreds, and even should prices in China fall to a level with those now current here, if shipments are sent forward on as large a scale as this season, they must result unprofitably, owing to a general pressure to sell, and the impossibility of finding buyers for the greater portion of them on arrival. The home trade has on the whole been prosperous, the rising markets during the first half-year having enabled dealers to realise large profits, but the second half of the year has, owing to a continuous fall in prices, been less satisfactory. The deliveries for home consumption show a large decrease; this, however, is partly owing to the stimulus given last year to duty payments by the publication of the clearances of individual firms which has now ceased, but mainly to the heavy payments in November, 1867, in anticipation of an increase of duty. The export trade shows considerable expansion, the great bulk arising from increased shipments to the Continent, but a portion to America, of common to medium Green Tea, whilst an entire cargo of uncoloured Japan was also shipped to that market.

The statistics compare unfavorably with last year. Imports have reached 153,000,000 lbs., against 124,744,000 lbs. last year. The deliveries show a decrease, the total being 141,766,000 lbs., against 143,000,000 lbs.; home consumption being about 4,750,000 lbs. less; whilst exports show an increase of about 3,500,000 lbs. The stock we estimate at 88,644,000 lbs., against 77,359,000 lbs.; the quantity arrived but not included in stock being in both years about 7,000,000 lbs. The quantity afloat of China Tea is 49,530,000 lbs., against 39,152,000 lbs., and of India Tea 3,184,000 lbs., against 2,356,000 lbs. This includes the 7,000,000 lbs. arrived not taken into stock.

INDIAN TEAS.—The market for these has ruled irregularly throughout. The system of selling everything by public auction without reserve, owing to the little competition at the sales, reduced prices for medium kinds to a very low point, parcels in many instances not realising within 3d. to 4d. per lb. of their intrinsic value; but since this system has been abandoned, and a considerable quantity sold by private contract, and the teas at public auction sold with reserve, there has been more steadiness in the market. Prices for fine to finest kinds have ruled high, especially of new season's teas, and we must again point out that it is only by attention to quality that the growth of Indian teas can be rendered profitable. The imports again show an increase, being 8,132,000 lbs., against 7,084,000 lbs., while the deliveries also show favourably, the total being 7,319,000 lbs., against 6,223,000 lbs.

JAPAN TEAS.—The market for uncoloured early in the year was much depressed, and sales difficult to make, even at low prices; latterly they have been more in demand, and supplies now due would meet with a ready sale. The coloured kinds have generally followed the markets for China Greens, but the common to fair sorts have not been saleable when similar grades of China tea could be got.

BLACK TEAS.—Congous: Siftings gradually advanced in price until Moning kinds were quoted 10½d. per lb., and Kaisow 11½d. to 1s. per lb.; they have now given way, the quotations being 7½d. for Moning kinds, and 7½d. to 8½d. for Kaisow sorts. The demand for broken-leaf and fair to good common has been strong, but prices have fluctuated greatly, rising to 1s. 2d. to 1s. 4d. in the spring, from which there has been

Digitized by Google

a gradual decline to 10½d. to 1s. 1d. per lb. Medium kinds have been comparatively difficult of sale. The new Kaisows have, as a rule, been very inferior, and prices which, for fair kinds, opened absurdly high, have given way from 6d. to 8d. per lb.; the few really fine have commanded extreme prices. The Monings have not been equal to last season, being generally wanting in strength. The trade and exporters have given the preference to the Oonfah teas, which have proved superior to former years. Fine Pak Lings early in the season sold very well, but good kinds were difficult of sale from the first, and latterly fair quality has sold at from 1s. 2d. to 1s. 4d. per lb., being very low prices; new make Canton kinds early in the year sold very well, but latterly the market has been overweighted, and they have ruled extremely low, say from 1s. 1d. to 1s. 4d. per lb. for fair to good. Oolongs have been most unsaleable, except for very superior high burnt kinds, which in the spring sold at extreme prices, but the supplies of this season have not been liked by the trade, and they have only been saleable at prices far below those usually current. Souchongs have not been as good this year as last; a few found buyers at from 2s. 3d. to 2s. 8d. for finest chops, but prices rapidly receded to the extent of 3d. to 4d. per lb., and even at this decline there is but little demand. Flowery Pekoes have sold at improved prices. Scented Seas: Capers have been in good demand throughout, but prices have given way to the extent of 2d. to 3d. per lb. during the year. Orange Pekoes: Canton kinds have been very difficult of sale throughout, even at a low range of prices. Foochow kinds have not sold so well this year—the quality has not been so fine as last year. Medium kinds have been very difficult of sale, even at prices ruling 4d. to 5d. per lb. below last year. Fine have sold comparatively well.

GREEN TEAS have on the whole met with a fair demand, but the supplies have been more than the deliveries, and prices have in consequence ruled lower than last year. The demand for export during the summer and autumn months was larger than usual, and afforded some relief to the market, especially in common to medium kinds of Young Hyson, Imperial, and Gunpowder. Twankays have been readily saleable throughout at full prices. Hysons have been fairly saleable, but prices uncertain. Fine Moyune Young Hysons have given way in price, also Gunpowders. Imperials were very unsaleable at one time, but the shipments to America greatly relieved the market. Ping Sueys have sold fairly well, but prices opened from 2d. to 4d. per lb. below the previous year, and from this there has been a further decline in the finer kinds, but the medium qualities, in half-chests, have sold rather better. Canton Gunpowders of this season have met with but little inquiry, except for the finer kinds; prices of common to medium have been low, say from 1s. to 1s. 3d., whilst low kinds have been done at 9d. to 10d. per lb. Of Young Hysons there have been scarcely any to hand.

We extract the following remarks from the *Produce Markets Review*:—

The year which has just closed has, we fear, been one of the most disastrous in the history of the Tea trade. At its commencement, however, appearances were somewhat encouraging, for, although prices were low, there was every prospect of an improvement, and for some time large profits were made, while the market continued to rise rapidly. This was especially the case with low Tea, and a rise took place before the end of January. This rise was, however, principally confined to common and Broken Leaf Congou, the former of which, owing to extensive speculative purchases, was forced up by the end of May to 1s. 4d. per lb.—an advance of 4d. since the beginning of the year. Although the trade at the commencement of the rise bought freely, yet as a rule they stood aloof as soon as prices showed an important advance, and purchased only for immediate wants; but the rise must have had a considerable influence on the sale of tea by retailers, for we find that the official returns for this year, so far as they have at present been made up, exhibit for the first time since the duty was reduced, a falling off in home consumption. It was not to be expected that a rise brought about by speculation and only partially supported by the trade could continue for any length of time, and it is not surprising therefore that the fall in value should have been rapid and disastrous. By the middle of July there was quite a panic among those who had speculated in common tea, and their efforts to realise had led to a fall of 1½d. per lb. from the highest point. The reports of enormous shipments in China which reached this country early in August caused a further depression, and quotations of low tea receded to within 1½d. of where they had been at the commencement of the year. Meanwhile, other descriptions had not risen in the same proportion, and some only nominally; but the advance alluded to in common Congou seemed to affect the demand for all classes of tea, and nearly all, except perhaps the very finest, shared more or less in the decline. By the middle of August the market became steadier, and a good deal of tea bought on speculation having by this time been disposed of, the trade began to buy, but the bulk of their purchases consisted of the common kinds. Indeed, it became more and more evident that the character of the demand was changing, and that fine teas were decreasing in consumption, while the lower and medium kinds were daily increasing in use. The new season's Kaisows began to arrive early in September; but their quality was very unsatisfactory, and was undoubtedly much worse than that of the first arrivals of the previous season. This would have been of less consequence had they been purchased in China at moderate rates; but, unfortunately, the news of the prices paid in England for common Congou, early in the year, had reached China at the time when the merchants were buying new season's teas for shipment, and they were encouraged or compelled to pay rates for all kinds—although an important advance had taken place in common Congous only—which left them little prospect of obtaining a profit here, even had no fall taken place, and which, under existing circumstances, exposed them to very heavy loss. The demand for new teas was anything but active, and there was soon a decline of from 3d. to 4d. on the medium and common sorts, while the sale of the finer kinds was very limited, although they realised prices that appeared very high when their quality was considered; but even these rates were reported to be unremunerative to the importers. The quantity exported from China continuing to exceed that of previous years, there was a pressure to realise at public sale, and some parcels were forced off at a decline of 6d. per lb. on the opening prices. Common Congou had by this time fallen to within a ¼d. per lb. of the point at which it stood in January last. The new Monings, when they came to hand, proved to be much superior to the Kaisows, and this was confirmed by further arrivals; indeed, speaking generally, we may say that their superiority has, throughout the season, been very marked. Early in October the demand for low tea improved, and an advance of about ¼d. to ½d. per lb. was established, a further advance being obtained about a month later, in consequence of an export demand, so that the price of common Congou may be said to be about ¾d. per lb. higher than it was at the commencement of last year. There is still, however, a very large quantity of inferior tea unsold, which will eventually have to be disposed of at the price of common Congou, and, although we look for a large demand during the spring, yet, the stock of inferior tea being so large, we think the tendency of prices for this class will be decidedly downwards. On the other hand, tea of desirable quality and strength is likely to maintain its present value. The consumption of Indian tea continues to progress satisfactorily, and throughout the year prices generally have been moderate. The inferior character of the crop of Foochow tea has lately compelled many grocers to resort to the use of Indian teas for mixing. The new crop has not yet arrived to any great extent, but, so far, the teas are, on the whole, fully up to the average of late years, especially as regards flavour. It is much to be regretted that the Indian tea trade is not often a prosperous one, either for the importer or the grower; but when the enormous prices which have been paid for land, the difficulties and expense of bringing it under cultivation, and other minor matters are taken into consideration, the result can surprise no one. These matters, however, are merely temporary obstacles to the development of a trade destined in a few years to figure conspicuously in our list of importation, and to assume a proportion now little dreamt of.

## SILK.

Since the departure of the last mail the Silk Market has been very lifeless, and an impression is general that we shall experience a decline in prices before the business can revive. Buyers hold off most determinedly, and as stocks are increasing it seems unlikely that the present range can be maintained. Red Peacocks can be bought at 23s. 6d., and some fair parcels of Tsatlee have been sold at 22s.; a large parcel of 1, 2, and 3 Cat Chop having been placed at that price.

The following remarks are from Messrs. Kilburn, Kershaw, and Co.'s Circular:—The market is in the same dull and depressed state as when last reported; hardly any business has been done, or is still doing, owing to the continued firmness of holders and the absence of all speculative, or even ordinary activity in the market. Thus the New Year opens with large stocks and a very unsatisfactory rate of consumption. This state of things cannot last much longer, for it is evident that buyers will not come freely on the market, except at decidedly lower rates; it has been a struggle for months past between importers and buyers, and the result is that a diminished consumption has told against increasing arrivals, until the stocks have reached that point which renders the ruling quotations of the day unduly high; the tendency of prices, therefore, is downward, and lower prices seem inevitable; and it is probable that importers must make the first move to induce business on any scale. The market during the last six months has been entirely crippled by the high rates ruling in the East, which have caused more difficulty in the way of business here than either adverse politics or quiet trade; undue firmness has prevailed in consequence, and manufacturers who have profited too well by the experience of the last two or three years have naturally brought their operations within the narrowest compass. In China, Japan, and Bengal there appears the same wild game played; the higher the cost, the greater appears the desire of some people to be interested, and the more cheerful and sanguine their hopes of profit, seeming to disregard altogether the experience of the past, and ignoring the advices to be cautious, which, mail after mail, have gone out from the home markets. Thus it has been this season, and five-sixths of the silk to be shipped from China and Japan has come forward to Europe to an almost certain loss, and certainly at unjustifiably high prices. A *resume* of the London market is unnecessary; suffice it to say that, beyond a good business during part of February, extending to May, when prices, which had previously declined to the lowest point of the year, say 22s. 6d. for Red Peacock, and 27s. 6d. for best chop 3rd Tsatlee, steadily rose under good daily business to 25s. 6d. to 31s. There have since been but fitful moments of hesitating operations and over-sustained prices, with the exception of a few days in October, when rather more business was done; the result at the close of the year being a decline of 1s. to 2s. from the highest moment, leaving the market nominal at 20s. to 21s. for common Tsatlees, 23s. 6d. for Red Peacock, and 28s. 6d. for chop 3rd Tsatlee, being about the same prices as at this time last year; with total stocks of silk increased by 25 per cent., viz., 34,560 bales, against 27,423 on 1st January, 1868, the increase being almost entirely on China Silk. The market is still affected by the steady imports of direct silk to Lyons, which, since the opening of the China season, have been supplying the French wants, owing to the more current disposition of those importers, and thus keeping their manufacturers off our market, which of late has been too high for them.

COFFEE.—The demand for Ceylon has become less active, and at the last auction, held on the 19th inst., several parcels of Plantation and the whole of the offers of Native were bought in for want of buyers at the terms previously current. The sales of Plantation amounted to 581 casks, 27 tierces, 56 barrels, 168 bags, triage at 30s. 6d. to 47s., small 59s. 6d. to 65s., low middling to middling 66s. to 75s. 6d., bold 76s. 6d., peaberry 73s. to 82s. 6d. In addition 202 bags sea-damaged pale Manila realised 43s. 6d. to 50s. 6d. per cwt.

COIR GOODS.—Only a moderate supply of Yarn has been offered,

Digitized by Google

consisting chiefly of Ceylon, for which the demand was not active, and prices ruled with irregularity, being in some cases about £2 lower. 312 bales Ceylon Yarn sold, middling to good middling £35 5s. to £38 15s., good and fine £41 to £55 15s., very fine £58 to £65 15s., also 66 tons in dhoils, common £27 to £29, middling £31 to £33 10s., good middling £34 to £36. 2 bales 6¼ tons Ceylon Fibre partly sold at £18 to £25.

COCOA NUT OIL.—There is a steady but not active demand for Ceylon at the current quotation, viz. £46 to £47.

CUTCH —At a recent sale 400 boxes fine Pegu, F.B.C. mark, realised 30s. to 30s. 6d. per cwt., and 197 boxes, elephant mark, 30s. 6d.

GAMBIER.—Of 301 bales offered at auction, about 130 bales sold—sound at 16s. 9d., first-class damaged 16s. 6d.

GUMS.—Benjamin: Of 81 cases Sumatra 11 cases sold, good seconds £10 10s., thirds £4 5s. to £4 15s., the remainder thirds bought in at £4 15s. to £5 10s.; 6 cases Siam dark block bought in at £8 10s. to £9 10s. Copal: Of 235 chests Manila 205 chests rough Kowrie sort sold steadily at 34s. to 35s.; 30 mats Lisbon sold at 35s. Of 42 casks Benguela 37 casks sold at 90s. to 91s. 6d., one lot inferior 82s. Dammer: 107 cases Singapore sold, good pale, rather small, at 80s. 6d. to 81s. 6d., middling 77s. to 80s., ordinary 74s. to 75s. 6d.

GALLS.—The market is extremely quiet, the only business since our last being a sale of 94 cases sea damaged China at 45s. to 46s. per cwt.

HIDES AND SKINS.—Messrs. Dyster, Nalder, and Co.'s report contains the following:—The import of East India hides during the past year has been 3,228,738 hides, against 3,245,911 hides in 1867, and 2,656,524 hides in 1866. The sales during the same period have been 2,476,392 hides, against 2,744,097 hides in 1867, and 2,324,010 hides in 1866. 456,904 hides have been forwarded on owners' account, against 573,000 hides in 1867, and 150,417 hides in 1866, leaving the present stock 344,932 hides, against 172,490 hides in 1867, and 420,823 hides in 1866; showing as compared with 1867 a diminution of import of 17,173 hides, a diminution of sales 267,705 hides and an increase of stock of 172,442 hides. The trade of th, past year for East India hides has, on the whole, been satisfactory, with but slight fluctuations in values, and generally a good demand both from the trade and exporters. Batavia, Singapore, &c.: The import has been 56,400 buffalo hides, against 30,936 hides in 1867, and 45,726 hides in 1866. From Manila we have only received 602 hides, against nil in 1867, and 8,998 hides in 1866. Buffalo hides of good quality have generally sold readily throughout the year; prices have but slightly varied, and the present quotations are about the same as in December, 1867. The sales of the month comprise 6,480 dry Rangoon ox and cow hides, and 2,124 Singapore and Rangoon Buffalo hides. Ox and cow light 8½d. to 10d. per lb.; heavy 7½d. to 8d. per lb.; small, 7½d. to 10½d. per lb.; thirds, 6½d. per lb.; fourths, 4¾d. to 5d. per lb. Singapore buffalo best, 6⅞d. to 6½d. per lb.; light, 6½d. per lb; seconds, 5¾d. per lb. Rangoon buffalo best, 4½d. per lb.; light, 4⅝d. per lb.; seconds, 3¾d. per lb.; thirds, 3⅜d. per lb. Buffalo Horns, &c.: Buffalo horns have met a more ready sale than in 1867, and lately have commanded improved quotations, the present rates being about 5s. per cwt. higher on horns, and about 2s. per cwt. higher on tips than in December, 1867. Deer horns have maintained high prices throughout the year, but are now about 2s. to 3s. per cwt. lower than at the close of 1867.

JAPAN WAX.—There has been a considerable reduction from the advanced rates recently current, and at the last sales 1,871 cases saucers of good quality sold at 80s. to 82s. 6d.

MANILA HEMP.—The market has been steady but quiet since our last report, the only sale having been of 8,000 bales for arrival at Liverpool at £45 per ton without guarantee.

PLUMBAGO.—We have to report a decline in prices. The offers of Ceylon at public auction have been 729 barrels, of which about 370 barrels were disposed of, middling lump at 24s. to 27s.; good bright, 30s. to 30s. 6d.; low and chips, 16s. to 18s.; low dust, 10s.; ordinary 12s. 6d.; middling to good dust, 14s. to 15s. 6d.

RICE.—The demand is still restricted, and slightly easier rates are current. At the public sales 5,429 bags Rangoon were bought in at 10s. 3d. to 10s. 9d., except 200 bags broken sold at 9s. to 9s. 6d.; 798 bags Necransie bought in at 9s. 6d. About 250 tons Moulmein, part of a cargo arrived off the coast, have been sold at 11s. landed, without guarantee of quality.

SAPANWOOD. — At auction 47 tons fresh Ceylon sold readily at £10 15s. to £11 2s. 6d., including dirty; also 2½ tons Cochin at £9. 33 tons Manila sold, sound at £10 12s. 6d., damaged at £9 10s. to £9 15s., and 19 tons damaged Siam bought in at £12 10s.

SUGAR.—The market has improved since our last report, the demand having been fairly active at a slight advance in prices. The following have been the transactions at the public sales:—2,950 bags Penang sold on advanced terms, middling brown to low yellow bright (duty 9s. 7d.) at 31s. 6d. to 34s. 6d., middling yellow to fine pale (10s. 6d.) 34s. 6d. to 38s.; 250 tons clayed Manila sold at 30s. 6d. (duty 8s.); 6,800 unclayed Manila, Ilo Ilo, sold at 27s. 2d.; 996 bags low brown China were bought in at 27s. 6d., about one-third since sold at 27s., including washed.

TIN.—On the 18th inst. the English smelters declared a further advance of £4 per ton in their prices. Immediately after the announcement of this advance 25 tons Straits were sold at £116, with two months' prompt, and later 10 tons at the same price for cash. About 30 tons Straits have since been sold at £115 cash, at which price holders remain firm.

## ARTICLES OF EXPORT.

—o—

### METALS.

The following is Messrs. French & Smith's review of the past year:—

At the commencement of the new year we think we may indulge the hope that at length the metal trade is recovering from the depression from which it has suffered since 1866. Trade has already revived to some extent, and in consequence the value of money is rising.

IRON.—The price of Scotch Pig Iron has remained almost stationary during the past twelve months. The demand for Rails was quiet the first half of the year, but large inquiries from Russia later stimulated the price, and they are now quoted about 7s. 6d. per ton higher. Staffordshire Iron has participated in this advance, and the makers now obtain about 5s. per ton higher rates. The total shipments during the year 1868 we estimate 1,960,000 tons, against 1,882,650 tons in 1867.

COPPER.—This metal at the commencement of the last year was very quiet, and so continued until about the end of February, when a demand took place, and the price advanced during the next few months; but as the advance was not sufficiently supported by consumers, it again receded in June, and continued very quiet until nearly the end of the year.

TIN PLATES.—The demand has been fairly good, but the prices have been, on the whole, unremunerative. The makers are now quoting advanced rates, but barely sufficient to cover the increased cost of Tin. Exports during the year:—1868, 89,000 tons; 1867, 7,890 tons; 1866, 70,970 tons.

LEAD—Is very firm at quotations. We quote:—W.B, £21; LB, £19 5s.; other good brands, £19 to £19 2s. 6d.; Spanish soft, £18 10s. Imports: 1868, 42 000 tons; 1867, 45,158 tons; 1866, 36,946 tons. Exports: 1868, 44,900 tons; 1867, 29,119 tons; 1866, 30,422 tons.

SPELTER varied but slightly in price during the past year. Zinc and Spelter imports, 27,400 tons in 1868, against 33,818 tons in 1867. The stock of Spelter here on the 1st of January was 1,659 tons, against 2,920 tons 1st January, 1868.

## MANCHESTER GOODS.

The following is from Mr. Sam Mendel's Circular:—

The past twelve months, of which the following is a brief review, have been characterised by but few salient points; but the general condition of trade may be described as cautiously inanimate and the reverse of satisfactory to the producer. It is evident that a longer period than at first calculated on is required for the commercial interests of the country to emerge from the depression that followed the collapse of so many joint-stock companies, and to recover from the effects of the American civil war; and the sole redeeming feature is the comparative absence of failures of magnitude over the year just lapsed. Locally speaking, our millowners have cause for grave dissatisfaction, and it will require a very different state of affairs during the next few months to enable them to tide over what has been so long a ruinously unproductive trade. At no time have spinners and manufacturers been able to follow the upward movements of the Liverpool Cotton Market. The year opened with greater animation in the Manchester Market, and in view of the better accounts from the East, and generally more healthy feeling, the opinion gained force that prices had seen their lowest for some time ahead. Producers finding themselves well placed under contract, purchased freely at Liverpool, and the price of cotton took an upward turn. The Bank rate was two per cent., at which low point it continued till the month of November. Considerable activity was visible in our market during the month of February, and large transactions in the raw material increased its value. Subsequently, many resales of cotton took place—the immediate profit being preferred to the risks of manufacture in the unsettled state of the trade. During March, owing to the prominent question of cotton supplies, excitement was caused by the rumours of restricted deliveries at the American ports, and our market found strength in the opinion that the consumption of the raw material was in excess of the quantities likely to reach us. Liverpool was well supported, during the month, by purchases from this market, and closed with higher prices and greater activity. During April there was no diminution of anxiety as to the future of cotton, and the increasing disproportion between its value and that of the manufactured article enhanced the disadvantage of producers, who had long had to contend against unremunerative prices. A fair inquiry for goods suited to the East showed itself, but the absence of a home-trade demand led to the continuance of excessive exports to India. The month of May witnessed a slight development of the short-time movement, as producers began to find their position no longer tenable, and simultaneously there was evident a general disposition to refrain from more than hand-to-mouth purchases. News from India continued to advise imports in excess of requirements, and great depression in the up-country centres of consumption—a state of affairs much intensified by fear of what has since proved to be a wide-spread famine. During June the position of spinners and manufacturers became less satisfactory. The tendency of prices against millowners increased with rapidity, but their continued absence from the Liverpool market slightly brought down the value of the raw material, but not sufficiently, however, to do much good to their own position; a more cheerful feeling was, nevertheless, visible. August was characterised by more animation, though the demand was of an irregular character. The Liverpool Cotton Market closed with more firmness. Anxiety was caused by the continuance of an unparalleled drought, and many local industries suffered accordingly. A feeling of depression was visible throughout September, though transactions, in themselves unimportant, were, in the aggregate, sufficient to prevent an accumulation of stocks. Reports from Bombay of the destruction of one-third of the cotton crop in the Broach and Dhollera districts, were received with the doubts warranted by later intelligence, and had but a passing influence. During October there was little variation in price, though a curtailed production gave a firmer tone to the demands of producers. In November depression was still the prevalent feature, and in view of a languid home trade and ruinous quotations from the East, producers were placed at increased disadvantage. The Bank rate, influenced by the requirements usual towards the close of the year, was raised on the 19th to 2½ per cent., having stood at 2 per cent. for about fifteen months. The principal feature during the month of December has been the more vigorous extension of the short-time working, which has assumed proportions that cannot but influence the extent of production. It is questionable, however, whether there will be sufficient unanimity or duration in the movement to seriously affect prices, and the daily sales of cotton at Liverpool certainly do not point to any material falling off in consumption.

## FREIGHTS AND CHARTERS.

We have no change to note in berth freights to the Eastern Ports; coal freights from the Northern outports still show a downward tendency.

Current rates of freight for vessels on the berth:—To Yokohama: 40*s.* weight, 45s. meast. To Nagasaki: 45s. weight, 50s. meast. To Shanghai: 40s. weight, 45s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or meast. To Penang: 30s. weight or meast. To Ceylon: 20s. to 25s. weight, 35s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £43. For Shanghai: £45. For Hong Kong: £33. For Singapore: £25. For Galle: £24. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2 3s. For Hong Kong: £1 15s. For Manila: £1 15s. For Singapore: £1 5s. For Galle: £1 4s.

## MISCELLANEOUS.

AT MAURITIUS.—Nov. 25, Emilie and Irma, Bertin, from Singapore, for Bordeaux; 27, Belliqueuse, Penhoat, from Singapore. Dec. 5, Nestor (str.), Drenning, from Shanghai, and left 7 for London; 12, Diomed (str.), Crompton, from Liverpool, and left 15 for China; 14, R. H. Jones, Darke, from Buenos Ayres, and sailed for Colombo.

The Colgrain, Hoad, from London to Galle, has been posted at Lloyd's as having been spoken with October 25, in lat. 2 N., lon. 27 W., since which time she has not been heard of.

Digitized by Google

At St. Helena, Dec. 13, Mountain Ash, Aitchison, from Foochow, and sailed, 14, for Falmouth; 17, Mercator, Brown, from Shanghai, and sailed, 18, for London; 18, Helena and Henriette, Derterding, from Batavia, and sailed for Amsterdam; 26, Chili, Macskinning, from Samarang, and sailed for Rotterdam; Zenobia, Hutchins, from Singapore, and sailed for London; 27, Thomas Bell, Wylie, from Ceylon, and sailed for London; 28, Eleanor, Fountain, from Padang.

Off St. Helena, Dec. 24, Boldon Lawn, from Ceylon, for London.

At Table Bay, Dec. 13, Janet Mitchell, Binney, from Batavia, and sailed, 17, for Rotterdam; 18, Isabella Ridley, Watson, from Shanghai; F. Reck, Denker, from Shanghai; Anna Maria, Ritchie, from Foochow.

The following extract from a letter, under date St. Vincent, 22nd December, has reference to the steamer Bismarck:—"You will have heard, probably, by the time this reaches you of the accident to the screw steamer Bismarck, so recently built by Messrs. Henderson, Coulborn, and Co., of Renfrew. She was at anchor here on Saturday evening, when the City of Buenos Ayres entered the bay, in a clear moonlight night, and ran into her nearly amidships, cutting her down to the keel. I have just been out to see her, and, certainly, after observing the injury done, I was astonished to find her afloat, the midship compartment being full of water, and the vessel lying as straight as if nothing was wrong with her, with a clean cut two feet broad from deck to keel. The iron deck is the only think that saved her from being cut in two. This reflects great credit on the builders. There is no tide here, and I advised the captain to patch her down to the water line, then to heave her down, to make good the bottom, and go on to Rio de Janeiro."

## CASUALTIES.

The Emilie and Irma, Bertin, from Singapore for Bordeaux, put into Mauritius, Nov. 25. She had lost mainmast, sprung mizenmast, and received other damage during a cyclone 9th Nov., in lat. 7 S., lon. 86 E., and was undergoing repairs afloat.

The Willy Rickmers, Stolt, from Cardiff to Shanghai, whilst anchoring at Falmouth, fouled the Prinz Adalbert, and carried away her own bulwarks and stanchions.

Advices from Mauritius, dated 18th Dec., state that the Diomed (str.), Crompton, from Liverpool to Singapore, China, &c., fouled a French barque when steaming out of the harbour, and received damage to stern.

Advices from Rotterdam, dated 18th Jan., state that the Bilderdyk (Dutch ship), Victor, from Batavia, was ashore between Helvoet and Brouwershaven.

Advices from Capetown, dated Dec. 19, state that the Sir Ralph Abercromby, of London, Anderson, from Cardiff, to Yokohama, with coals, struck upon a rock off Tristan d'Acunha, Dec. 2, became leaky, and was abandoned 5th, with fourteen feet water in her hold; she was supposed to have sunk, as shortly after she was left a squall of rain came on, and when it cleared she was no longer visible; the crew were safely landed on the island, and where subsequently taken on to Simon's Bay.

The Zenobia, Hutchins, from Singapore, which arrived at St. Helena, Dec. 26, experienced a cyclone Nov. 13, in 21 S., 67 E., and was detained 10 days off the Cape of Good Hope, by N.W. gales, during which she had her mizenmast, bowsprit, and jibboom sprung, and the three topmasts crippled.

## LAUNCHES.

Messrs. Glover and Co., at Birkenhead, launched on the 1st instant, a ship of 1,300 tons. She was named the John o'Gaunt, is owned by Messrs. James Beazley and Co., and will be commanded by Captain Fox, late of the Jumna. The John o'Gaunt is intended for the East India trade.

There has been launched from the yard of Messrs. Oswald and Co., at Pallion High-yard, Sunderland, an iron sailing-ship, of 1,300 tons register. Dimensions: Length between perpendiculars, 220 feet; breadth. 37 feet 9 inches; depth, 22 feet 6 inches; built for Messrs. L. H. M'Intyre and Co., of Liverpool, for the Indian trade. She is classed Aa 1 at Lloyd's, is fitted with iron lower masts, bowsprit, and topmasts, steel lower and lower topsailyard, and steel standing rigging, with all the latest improvements.

On the 18th inst. Messrs. Alexander Stephen and Sons launched from their dockyard at Kelvinhaugh an iron sailing barque of 700 tons, named the Caroline, Aa 1 at Lloyd's, and 20 years in the Liverpool Registry. She will be engaged in the Pacific trade, and was constructed for Messrs. Le Quellec and Bordes, of Bordeaux,

Messrs. Archd. M'Millan and Son, Dumbarton, have launched a fine iron barque of 545 tons, named Antilles, intended by her owners, Messrs. M'Arthur, M'Lean, and Co., Greenock, for the West India trade, and is classed A 1 at Lloyd's.

A new barque, Blenheim, built by Messrs. R. Williamson and Son, of Harrington, to the order of Samuel Martin, Esq., of Liverpool, and co-owners, was launched on the 14th inst., and now lies in Harrington Harbour, where she will be rigged preparatory to being sent to sea. The Blenheim is entirely of iron, and will be classed at Lloyd's Aa, and in the Liverpool Underwriters' Registry A 1 for 20 years.

## NAVAL AND COALING STATIONS.

(DAILY NEWS)

It seems to be a fixed opinion with naval men that it is of the highest importance for this country to be possessed of a great number of protected harbours in all seas, especially with a view to coaling. It is well known that the Peninsular and Oriental Steam Company, which, ranging as far as Japan, may well call itself simply Oriental, has a small fleet of colliers constantly employed in replenishing its stores at such places as Aden, Point de Galle, Singapore, and Hong Kong; and it seems at first sight that similar stores must be always maintained for the use of our cruisers who now keep the peace on the highways of commerce, and who will in time of war be employed to scour the sea not only of pirates, as at present, but of privateers and of belligerent vessels sailing under national flags. That such depots of coal are needed at present by the Queen's ships is manifest; but that they will be needed for the same purpose in time of war, and that, if needed, they can then be maintained regularly, is by no means so certain.

The late civil war in America gave birth to a very small number of armed ships preying upon commerce; in popular language, and perhaps in the historical belief of most people, there was but one such predatory wanderer, the *Alabama*. And this popular, perhaps the correct, belief is, that the *Alabama* compelled the American shipowners to turn over, by real or collusive sales, all their seagoing craft to foreigners.

Our own naval officers are not ready to admit that such a thing could befall the British shipping interest; for they hold that the *Alabama* ought to have been caught and destroyed much earlier, and that no such rover could escape the vigilance and swiftness of our squadrons. But it seems probable that no amount of skill or of zeal on the part of our seamen could prevent any belligerent from sending forth from time to time one or two *Alabamas;* and they would be enough to raise the rate of marine insurance so high as to induce our shipowners to transfer their property to neutrals, and our merchants to trust their goods to neutral bottoms. In treating this topic it should be borne in mind that the law of salvage, as it stands, tends very materially to diminish the zeal of our seamen, since it is infinitely more profitable to recapture English merchantmen than originally to destroy their captors. For many years after Trafalgar the Indian seas were ravaged, and company's ships plundered at will, by the few representatives of the French Navy, who made Bourbon and Mauritius their headquarters. Men like Hardinge and Cook, who closed the career of prosperous corsairs with the sacrifice of their own lives, were very scarce compared with the inglorious commanders who fattened on the game hunted for them by their enemies; and the conquest of the French settlements in the African waters, deferred as it was for five years after our navy was relieved from the necessity of fighting with hostile fleets, was probably forced upon the service by the cries of the East India Company rather than by the chivalrous ardour of Nelson's successors. To give effectual protection to our traders we should offer very high money rewards for the capture of armed vessels, so as to make it economically worth while to pursue the path of glory.

But the experience of the Russian war seems to show that commerce is best protected by a complete blockade. In any future war with any other Power at all equal to Russia we can hope only for an approximation to such a blockade, for there is no other country against which we should have so good an ally in frost. We could not, for instance, seal up the few ports of North Germany all through the winter and spring with anything like certainty; much less could we put a chain of war round the Spanish Peninsula without a considerable number of temporary breaks.

A blockade, even though not perfect, would be the most effective way of employing our navy. Although it would not secure our merchants from the occasional sallies of corsairs, it would at least be more satisfactory than hunting all over the Pacific and the Atlantic for a stray Surcouf or Semmes, whilst it would do something towards bringing an enemy to terms (though not nearly so much as was done by the United States against their rebels), in so far as it stopped all the trade that he would carry on in neutral bottoms. Our policy would be to maintain a blockade with the greatest possible strictness, and to combine with it enough free cruising to keep our seamen in good spirits, but not to make violent and extravagant efforts to keep all navigable waters open to our traders. Heligoland, therefore, would be of great value as a coal store for the squadron blockading the mouth of the Elbe. Gibraltar or Ceuta would be not less valuable in a conflict with Spain; Malta would be indispensable for keeping our footing in the Mediterranean against France, or Italy, or Austria. To these points, which are near our own shores, it would be possible, though costly, to take under convoy a sufficient fleet of colliers; but Aden, Singapore, Hong Kong, St. Helena, Mauritius, Capetown and Ascension could not be fed with coal in sufficient quantities except at an overwhelming expense. Three pounds a ton is said to be the average price paid at present by the Peninsular and Oriental Company. It is not easy to calculate how much this rate would be enhanced by war. Should our Government resolve on maintaining in war time as great a force of cruisers in distant seas in proportion to the home squadrons as did our Admiralty in the old French war, it would be necessary on the first alarm to fill up our coal depots to overflowing, and to stop the sale of coal at such places as Malta to the French Messageries, and at such places as Hong Kong to our own steamship companies.

In any case, it must be admitted that, if Gibraltar is to be retained as a magazine for the replenishing of armed vessels, and if it is recommended for this purpose because it is an impregnable fortress, then it would be good policy to make Heligoland and other places, which need not here be mentioned, strong enough to protect their warlike stores, that is to say, their coal, against the sudden attacks of expeditions evading our squadrons of blockade.

SHIPBUILDING ON THE CLYDE.—The annual returns of shipbuilding on the Clyde have just been published, and, as usual, compare favourably with those of the previous year. The number of vessels built has been 219, representing a total of 169,056 tons and 15,222 nominal horse power. In 1867, when the number of vessels constructed was 242,

Digitized by Google

they represented only 113,095 tons and 14,844 nominal horse power. Of all the builders, Messrs. Napier seem to have been most highly favoured with orders for ships of war. During the past year they have built and launched two monitors, *De Buffel* and *De Tyger*, for the Dutch Government, and have at present on the stocks two ironclads, the *Audacious* and *Invincible*, besides the *Hotspur*, an armour-plated ram, for our own Admiralty. The former vessels are nearly ready for launching. Messrs. Barclay and Curle have completed as many as sixteen vessels, representing in the aggregate 16,631 tons, and consisting chiefly of sailing ships for the private trade. Messrs. Randolph and Elder have built a considerable number of steamers for the principal steamship companies. Messrs. Connell and Co., of Overnewton, have constructed several composite vessels for the China and East India trade. Among the remaining builders we may mention the well-known firm of Messrs. Caird and Co., of Greenock, who have built and "engined" six steamers (giving a total of 20,685 tons) principally for Transatlantic service. Altogether, the returns seem to show that while the shipbuilding trade remains nearly at a standstill on the London river it is yearly making progress on the Clyde, no doubt in consequence of the lower rate of wages there, and of the greater facilities for obtaining coal and iron at a cheap rate. In fact, were it not for the Government contracts given to the metropolitan firms and for a few orders obtained from foreign Governments, it is hardly too much to say that the London shipbuilding trade would be all but extinct.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships, and repair and refit of STEAM MACHINERY AND BOILERS.

Their large Granite Dock is 307 feet in length, fitted with a caisson-gate, and with a centrifugal steam pump of great power, ensuring despatch in all states of the tides. At average spring tides this dock can receive vessels drawing 16 to 17 feet, and during the autumn and winter months 18 feet. Their two smaller docks, also built of granite, can receive vessels drawing 12 to 13 feet.

The premises comprise a large smithy and boiler shop, carpenters and boat-builders' shops, an

ENGINEERS' WORKSHOP,

fitted with lathes and tools driven by steam,

AN IRON FOUNDRY

for castings up to 5 tons weight, and a BRASS FOUNDRY.

The different departments are superintended by experienced Europeans, viz., engineer, blacksmith, and shipwrights.

The Company keep on hand copper and metal sheathing, spars, timber, paints for iron vessels, and all material for dockyard use.

A DRY GODOWN for reception of stores of vessels requiring to discharge them.

Good quarters for officers of ships under repair in t dock.

Amoy, 16th December, 1867.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## ORIENTAL BANK CORPORATION.

Incorporated by Royal Charter, 30th August, 1851.

PAID-UP CAPITAL, £1,500,000.

RESERVED FUND, £444,000.

The Corporation grant Drafts and negotiate or collect Bills payable at Bombay, Calcutta, Madras, Pondicherry, Ceylon, Hong Kong, Shanghai, Yokohama, Singapore, Mauritius, Melbourne, and Sydney, on terms which may be ascertained at their office. They also issue Circular Notes for the use of Travellers by the Overland Route.

They undertake the agency of parties connected with India, the purchase and sale of Indian Securities, the safe custody of Indian Government Paper, the Receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of remittances between the above-named dependencies.

They also receive deposits of £100 and upwards, repayable at 10 days' notice, and also for longer periods, the terms for which may be ascertained on application at their office. Office hours, Ten to Three; Saturdays, Ten to Two.

Threadneedle-street, London, 1868.

## HONG KONG AND SHANGHAI BANKING CORPORATION.

Capital, 5,000,000 dols Paid up, 3,000,000 dols.

LIEBIG COMPANY'S EXTRACT OF MEAT.—PARIS AND HAVRE EXHIBITION GOLD MEDALS.—CAUTION. None genuine without Baron Liebig, the inventor's, signature, being on every jar, accompanied by full printed directions. About seventy pints of excellent beef tea for 11s., the present reduced retail price per pound. Finest, most convenient, and by far the cheapest meat-flavouring ingredient for soups, made dishes, and sauces. Sold by all Italian warehousemen, chemists, grocers, ship chandlers, and provision dealers.

HOLLOWAY'S OINTMENT and PILLS.—Amongst the many bad effects resulting from climatic variations it is notable that the circulation of the blood becomes languid, and congestion of the capillaries much greater during winter. Hence the frequent appearance at this time of pimples, blotches, &c. Holloway's remedies cannot be too highly commended for the favourable influence they exert upon the skin. In all eruptions, cutaneous inflammations, and ulcerations the detergent qualities of this unguent render it so efficacious in first cleansing and purifying the diseased part, and afterwards inducing renewed and healthy action, that the skin not only grows sound, but soft and silky, and fully capable of efficiently performing its functions and releasing the circulation from oppression.

### THE MAILS, &c.

The French mail, which should have preceded this, but which (as explained in our last) was delayed, and did not leave Hong Kong until Jan. 3, arrived at Marseilles on Saturday night, and will be delivered this evening. As it brings but very few days' later news, and that of no great importance, we do not propose to publish again to-morrow. The succeeding English mail, with Hong Kong dates to Jan. 12, will be due on the 22nd instant; telegrams in advance of it were received on the 29th ult.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer *Tanjore*, arrived Feb. 6.—From Shanghai: Mr. Brand, Mr. Hogg. From Hong Kong: Mr. J. Morrison, R. J. Galton, Mr. W. P. Galton, Mr. Hewlett, Mr. J. Owen, Commander Donville From Singapore: Don Juan Pigott. From Galle: Mr. Clitz, Mrs. Russell, two children and servant, Mrs. Wright, three children and servant.

To Southampton, per P. and O. steamer *Pera*, expected to arrive Feb. 14.—From Yokohama: Mr. J. Barber. From Hong Kong: Mr. J. G. Ewart. From Singapore: Dr. George Monteath, Staff-surg. O. Donnovan, Mr. Duffy, Mr. Wright. From Penang: Mr. and Mrs. White, Mrs. Georges. From Galle: Mr. Palkington, two children and servant, and one second-class passenger.

To Gibraltar: From Hong Kong: Mr. and Mrs. Escurio and child.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Massilia*, from Southampton, Feb. 6.—To Yokohama: Col. Brasyer, C.B., Mr. J. N. Silver. To Shanghai: Mr. A. Sykes. To Batavia: Mr. C. and Mr. E. Ross. To Hong Kong: Mr. F. F. Freman, Mr. J. W. Williams. To Ceylon: Mrs. O'Grady, Miss Carey, Asst.-surg. and Mrs. Belcher.

Per P. and O. steamer *Pera*, from Marseilles, Feb. 14.—To Hong Kong: Mr. J. H. Roberts, Mr. C. F. Harton. To Batavia: Mr. T. F. C. Borger. To Ceylon: Miss E. Laidlaw, Capt. and Mrs. Storer, Ensign Perkins.

Per P. and O. steamer *Ripon*, from Southampton, Feb. 20.—To Shanghai: Mr. H. Watson, Rev. Hugh Waddell, Mr. J. M. Hunter, Mr. S. Platt, Mr. W. D. Morrison. To Hong Kong: Lieut. Macqueen, Mr. A. Miller. To Singapore: Mr. and Mrs. H. Wilton and two children, Mr. and Mrs. J. Cameron and child. To Ceylon: Mrs. R. S. Maclagan and child, Mr. H. Walker, Mr. and Mrs. Wigley, Mr. Deane.

Per P. and O. steamer *Delta*, from Marseilles, Feb. 28.—To Hong Kong: Mr. J. Dodd, Captain T. S. Roberts, Captain Boyes, Mr. Petiit. To Singapore: Mr. W. C. Hannay. To Ceylon: Mr. Grindrod.

Per P. and O. steamer from Suez, March 7.—To Shanghai: Mr. and Mrs. Reine. To Hong Mr. C. H. Schultze. To Ceylon: Mr. C. Sparkes.

Per P. and O. steamer from Southampton, March 6.—To Hong Kong: Mr. S. J. Crutch.

Per P. and O. steamer from Marseilles, March 14.—To Shanghai: Mr. and Mrs. W. G. Price. To Hong Kong: Mr. Marcus Daly, Mr. J. Anderson, Mr. F. M. Youd., To Ceylon: Mr. H. S. Saunders.

Per steamer *Agamemnon*, from Liverpool, Jan. 27.—For Mauritius: Mr. H. F. Luke Mrs. Luke and child, Mr. J. G. Bartlett, Miss A. Welsford. For Singapore: Mr. W Allen, Master M. Randell. For Hong Kong: Mrs. McDonald and two children.

## Summary of News from the Far East.

### JAPAN.

#### HIOGO.

The *Hiogo Herald* states that five Japanese steamers are on shore near Neigata, three belonging to Prince Satsuma and two to Chosiu. The *Albion* and another steamer, which were in the heavy blow that caused the above vessels to get on shore, weighed anchor and put to sea, thus saving themselves from the storm that raged near the land. We further regret to hear of the total loss, in the same neighbourhood, of the British steamer *Nangata*, Captain Cato, formerly the *Deroulede*, of H.I.M.'s Navy. All hands, including Captain Cato, were drowned, and the steamer smashed to atoms. The Bishop of Victoria has consecrated the cemetery. A mint house has been erected near Osaka Castle (—? for the Hong Kong mint machinery) and is working.

#### YOKOHAMA.

(FROM A CORRESPONDENT.)

YOKOHAMA, Dec. 16, 1868.

The London mail of the 9th Oct., and telegrams to 31st, arrived on the 1st, fifty-two days out. The French mail of the 18th Oct. has not yet arrived. The American steamer *Japan*, from San Francisco, arrived on the 1st, with dates from London (telegraphic) to the 2nd November.

There are no assassinations to complain of. Everything is quiet at present. The Southern power may be considered secure now, the entrance of the Mikado into Yedo having been a bold and successful step. Fighting, however, is by no means done, and the refractory Daimios of the North are still making raids where there is a chance; in proof of which news has just arrived from Hakodate that the place is likely to be attacked, and our Consul there asks for a man-of-war to be sent, for the protection of the English residents. H.M.S. *Argus* and *Satellite* have been sent down, and the French have sent the *Venus*. The Americans, as usual, trust to us.

Lady Parkes, it is understood, will proceed to England next month with her children (three), one of whom is in an unsatisfactory state of health.

A court-martial has been held on Capt. Stevenson for the loss of H.M.S. *Rattler*, at Yesso, and the conclusion of the court was, "Ordered to be admonished, and to be more careful in future." Opinion here is that this is a very just finding.

Her Majesty's naval and military forces in Japan consist of the following heavy list:—The *Ocean* (iron-clad), *Pearl*, *Cormorant*, *Argus*, *Manila*, *Satellite* (left for Pacific). Military: 1st battalion 10th Regiment (about 600), detachment Royal Artillery and of Engineers, Commissariat officers, storekeepers, &c. General Brunker, Commander of forces in China and Japan, is generally here in the summer. Admiral Keppel has gone down to Singapore to meet Lady Keppel on her arrival from England, and they are expected here in January. The gallant admiral maintains his prestige and wears very well. He seems bent on making Yokohama his head-quarters, and has built a house on the Bluff, in the vicinity of the troops and the English Legation. There is no Itziboo profit now to chain the Admiral, as in the case of Kuper, but somehow Japan is the favourite place. The trade of China is of far more importance.

The Legation at present consists of Sir Harry Parkes, Mr. Adams, secretary; Mr. Mitford, second secretary; Mr. Satow, Japanese interpreter; Mr. Dohmen, Dutch interpreter; Mr. Wilkinson, accountant, &c.; Dr. Siddall and family; Studert, interpreters; Messrs. Quin, Hodges, O'Driscoll, and Hall. Mr. Satow proceeds to England on leave on arrival of Mr. Liebald, a well-known Japanese scholar. Mr. Satow stands very high with the Japanese, and his name is a pass to almost anything in Jedo. To bring the English Legation clearly to the mind of a Japanese it is necessary to couple it with his name.

Digitized by Google

The Consulate consists of Mr. Fletcher, Consul; Mr. Walsh, first assistant; Mr. Schmid, Dutch interpreter; Mr. Troup, Japanese. The new consulate, with its grotesque *three* towers (and every one asking for the fourth), will be ready for occupation shortly.

The site appropriated for the Post-office is near it, but as the Hong Kong Government have the management, and to find the money, the building has not commenced, and the Postmaster, Mr. Simpson, is still cooped up in a miserably small place.

The municipal arrangements of the settlement are again giving great dissatisfaction, and a special meeting is to be held on the matter. The Japanese at present give up twenty per cent. of ground rents, the foreign community now ask for 75 per cen.. A report has been drawn up on the matter by a committee. The community is not taxed here as in Shanghai, for drainage, roading and lighting; lighting is badly wanted here—the streets at night being most unsafe and miserable. Mr. Benson, an American, is now acting as assistant to the Japanese in the management of the settlement. Mr. Dohmen, of the English Legation, was his predecessor, but was not allowed a fair chance; and there is already a cry against Mr. Benson.

Considerable discussion and dissatisfaction exists in mercantile quarters at the attempted introduction by the Japanese Government of notes, which are forced, and consequently fall to a discount. This has operated against the purchase of foreign goods, as foreigners cannot, or rather will not, receive them, unless the Japanese Government will actually show a metallic reserve of 75 per cent. It appears that they have got wind of how Russia and the United States have issued notes at pleasure, and have thought it a fine thing. At a meeting of the Chamber of Commerce the matter was discussed, but it is feared that foreigners have no right to complain.

The value of Japan produce exported for this year may be computed at twenty million dollars, against two million foreign goods as imports, thus showing a very heavy balance against us, which must be considered very unsatisfactory.

The opening of Osaka, with Yedo and Nee-e-gata to follow, in January, or early next year, it is to be hoped, will be the means of increasing the sale of foreign goods.

It is to be regretted that the resources of the Japanese have been drained by the purchase of steamers and fire-arms. Had this money been spent on the purchase of staple commodities the permanent benefit to British trade would have been secured. Nearly all the steamers are lying up in a useless condition.

Silk is coming down very slowly; none good in the market, and the price of finest Maibash has run up to nearly 1,100 dols., and may go even to 1,200 dols. This is all on French account. The supply for the season is not expected to reach 15,000; a large quantity offered is rejected in toto by foreign buyers. The large export of silkworms' eggs—nearly two million cards—has operated much against the production. The yield of these eggs would probably be about 15,000 bales. This exodus is therefore not satisfactory, and is not calculated to promote the substantial commerce of Japan.

The docks at Yokoska, building under French direction, are making daily progress, and are of a very extensive nature. In the present unsettled condition of the country the policy of inducing the Japanese to go into such expensive works has been very much questioned. The action of the foreign Ministers has in this respect been highly injurious, especially when it is pretty well known that they have participated in the profits of these affairs. The British Minister has kept clear of any such transaction.

The agent of the Messageries Imperiales has received instructions to despatch the steamers of this line direct to Hong Kong, instead of *via* Shanghai as at present. The latter place will be connected with Hong Kong by a separate steamer, and there will be no connection between Yokohama and Shanghai.

The celebrated *Stonewall* is still in custody of the Americans, but the final decision as to her disposal is expected by an early mail from the United States Government at Washington. The American Minister may, however, surrender at any moment should he feel satisfied that the present Government is securely in power.

The Japanese are getting into the way of running steamers. One leaves daily for Yokoska and one for Yedo. The latter is now under repair.

The club here is the emporium, and under the able management of Mr. W. H. Smith, generally named Public Spirited Smith, is of immense convenience to the community and the naval and military officers. Here one can be lodged and boarded for something under 3 dols. per day, and for board only 40 dols. per month. The reading-room is well supplied with papers, and the general discipline and comfort of the house speaks well for the manager. Mr. Smith's energies are considerable, and by no means exhausted in conducting the club. He is the leader of the fire brigade and other institutions of the place. A few days since he surprised everyone by starting for Yedo in a Rantoon velocipede, and certainly the sight was unique. Without guards and in his shirt-sleeves here was this Englishman on the dreaded Tokaido.

The Lock Hospital opened in the Owshawari, under the medical charge of Dr. Newton, detailed by the admiral's consent from the navy, is increasing in utility, and the extent much increased. The disease prevalent amongst Japanese women is of a virulent character, and causes much mischief to our men, both in the army and navy.

Dr. Willis, Vice-Consul, is attending on the wounded Southern soldiers in Yedo.

Signor Beato, the photographer, maintains his prestige in Japan, and his handywork is to be seen everywhere. Visitors to his studio can obtain a most interesting collection of photographs depicting the noted places, scenery and dress of Japan.

The P. and O. Company's steamers have made occasional trips to Hiogo, and it is intended at present to despatch one after the arrival of each mail. Hiogo is going ahead, and has already two papers, the *Hiogo News* and *Hiogo Herald*. The ground sold at Kobe and at Osaka is being built on fast. The American line to Shanghai calls in *en route*, and merchant steamers are constantly running. There have been good Japanese charters for the conveyance of troops and stores, and steamers have been in good demand. There are no sales of steamers going on, that is "played out." It is stated, however, that the American merchant steamer *Ashuelot* has been placed at 70,000 dols.

Mr. Grinwell, lately appointed as Inspector of the Japanese Navy, has been busy at Hiogo. This gentleman, an American, was educated in England by Lady Franklin, in recognition of the services of his father in the search for Sir John Franklin.

The English squadron for all China and Japan is Ocean (ironclad), Rodney, flag-ship, Admiral Keppel, Salamis (tender), Pearl, Perseus, Rifleman, Manilla, Zebra, Rinaldo, Argus, Algerine, Avon, Banterer, Bouncer, Bustard, Cockchafer, Cormorant, Dove, Drake, Firm, Forrester, Gnat, Havoc, Icarus, Slaney, Sylvia, Weasel, Insolent, Janus, Lever.

The French: Minerve, flag-ship, Commodore Huguetan de Chaillo, Venus, Dupleix, Flannore, Scorpion, Aspic, Lebrethen, Tardif. Expected, Junon and Morge.

The American squadron in China and Japan consists of the Piscatagua, flag-ship, Admiral Rawan, Oneida, Iroquois, Monocacy, Ashuelot, Manmee, Aroostooh, Unadilla and Idaho, nine in all.

## LATER ADVICES VIA SAN FRANCISCO.

The Pacific mail steamer *Japan* reached San Francisco on the 20th ult., with advices from Yokohama to Dec. 28—twelve days later than those by the mail delivered to-day. The New York papers publish the following budget of news, but we have once more to caution our readers against putting any faith in intelligence thus received, as it has in nearly every case proved entirely incorrect.

The city of Yedo has been tranquil since the arrival of the Mikado. The political condition of the Empire is still unsettled.

Prince Aidsiu has arrived at Yedo, and is treated with great honour by the Mikado and the Princes.

The civil war has not wholly ceased, but fresh disputes have broken out among the Princes of either party, and fights frequently take place in the interior. Prince Satsuma gained great advantages over Tosa and Hiogo, and had nearly reduced them to subjection.

The Council of Damios has voted unanimously to recall the ex-Shiogoon to Yedo, to assist them in restoring the administration of the Government.

Hakodadi was captured on the 6th December by the fleet of Tokugawa. An American-built war vessel, flying the Mikado's flag, and a Japanese boat under English colours, which was leaving the harbour with troops, were captured by the fleet.

The Japanese Government has sent official notification to the representatives of foreign Powers that Yedo and Nee-gata will be opened to foreign commerce Jan. 1, 1869.

The Mikado has issued an edict ordering the decapitation of all the inmates of a dwelling in which a conflagration originates, accidentally or otherwise. (!)

The ram *Stonewall* has not yet been delivered to the Japanese Government, and continues to hoist American colours.

The Mikado has issued a proclamation announcing that peace reigns throughout the land.

Aidsee justified his opposition to Satsuma and the Southern Princes. All seemed to be progressing favourably for the Southern cause.

The Northern Princes openly disavowed the conduct of Admiral Ennomatto in storming Hakodadi and the seizing of several of the Mikado's vessels of war. There is no Northern army now in the field, and the Southerners are disbanding. The troops participating in the attack and capture of Hakodadi were under the supervision of European officers. The Southerners offered but little opposition. Admiral Ennomatto has issued stringent orders to seize and confiscate foreign vessels conveying troops and stores, owing to the many breaches of neutrality by foreign ships.

The Shiogoon's brother, Mimboutayou, arrived from Paris on the 16th of December, and soon after had an interview with the Mikado. It is reported that he was intrusted with a mission of peace to his brother.

The financial troubles of the Japanese Government are great. Paper money is freely issued. The foreign merchants residing in Yokohama have requested their respective Ministers to protest against the issue of paper money, unless the Government keeps sufficient bullion on hand to redeem it at sight.

o Nagasaki for trial. The lighthouse which has been so long in course of erection at Iwosima is completed, and its lantern is now brilliantly illuminated each evening at sunset. The want of a light has long been felt and complained of, but the entrance to the harbour is now perfectly safe.

"It is reported, but I do not know on what authority, that the Russians have advertised the Japanese Government that their treaty was made with the Shiogoon; that they never heard of the Micado as the Sovereign of Japan; and that they will consider their treaty binding as with the Shiogoon and none other. A very pretty pretext, if the rumour be true; but Russia may rest assured that no ruse of this kind will place the sovereignty of Japan in her hands."

## CHINA.

—o—

### SHANGHAI.

Advices from this port are to the 23rd December. The French mail of Oct. 18 arrived out on the 9th Dec., with London telegrams to Nov. 2; but the latest telegraphic advices were to Nov. 24, received *via* Kiachta on the 16th Dec. The following items are from the *North China Herald*:—

We are glad to record the return of the party which left three months ago under the auspices of the Asiatic Society, to survey the Yellow River. They report the river navigable for vessels of light draught 250 miles from its new mouth in the Gulf of Pecheli.

A correspondent reports fearful excitement in the Customs' Department, and an anticipated rising of the Salt Guild. The *James Shepherd* has fifty tons of English salt on board, and Tingfutai anticipates grave disturbance among the Fengshuey on Hangchow Bay. Sir Rutherford Alcock is expected to issue a long notification, setting forth the iniquity of offering the Chinese good salt at half the cost of their own dirty product, and threatening to confiscate any ship which may venture to bring salt to China waters in future. In the meantime, the noble army of tidewaiters is to be largely increased, and strict watch is to be kept on the delinquent ship.

We hear of the arrival here of three officers who have been engaged, in England, under the auspices of the Customs' Department, to organise a river police on the Wongpoo.

British subjects of Chinese descent residing in Shanghai have addressed to Sir Rutherford Alcock a memorial proposing that their distinctive dress shall be that of the Ming (last native) dynasty; and begging that they may not be compelled to pay respect to Chinese officials in other modes than are compatible with their freedom and dignity as British subjects. Now the Ming dynasty costume does seem a rather absurd idea, inasmuch as it is only seen now on the stage, and is connected, therefore, in the Chinese mind with low associations. Besides, Sir R. Alcock's sanction to it would be a sort of countenance to a feeling of hostility against the present Government. A better suggestion is that Anglo-Chinese—if we may use the word in this sense—should discard the *queue*, or cease to shave their heads. This would be quite a sufficient distinction, and would be—since they desire that sort of thing—a return to the custom of the Mings, without expressing so pronounced an antagonism.

Growls both loud and deep are being uttered against the *Messageries Imperiales* for threatening to spoil the Christmas holidays. The mail for Europe is advertised to close "forty-eight hours after the arrival of the *Imperatrice*, which is expected on the 25th inst." Consequently people will be afraid to go away even from Thursday till Monday.

The *Recorder* gives the following items:—

A project for the establishment of a school for the education of Chinese girls has been set on foot, and subscriptions have been solicited from the ladies with a view to favouring the scheme. It has, however, become the subject of a somewhat original controversy. The *Daily News* backed it up, but the *Recorder*, replying to the remarks made in that paper, asked what class of girls it was supposed the Chinese would send to school to be instructed in English, and urged that respectable people would not avail of the proffered instruction, as this would be contrary to all the traditions and all the prejudices of the Chinese, and that the people who would do so were simply those too poor to bring their children up in the ordinary Chinese way; and concluded in the following words:—"To speak plainly, we are very much in doubt as to whether, in a great many instances, the schools will not be made use of for educating girls in English simply in order that they may become the more valuable as companions to the young men in the place. It would be mock modesty to ignore this possibility, and we do not, therefore, hesitate to assert our belief that it is very likely to occur; so that in fact the good-natured missionaries are calling upon the ladies of Shanghai to aid in what it is likely will be made into the means, not of improving native, but of further deteriorating foreign morality. We think it will be well that this view of the subject be not overlooked, as the missionary gentlemen who have identified themselves with this movement will scarcely wish to see their good work turned to such bad account."

This elicited a rejoinder from a correspondent, who argued that, supposing this idea was correct, perhaps it might be better, even if some of these girls should become the companions of the young men, that at least something be done to educate and elevate them, and that it was certain that educating Chinese girls would "not increase the extent of the immorality existing among foreigners, while it might, perchance, at least in some measure, diminish the degrading influence of constant association with ignorant, heathen women."

Another controversy of some interest has engaged the attention of our friends in the north, namely, the manner in which the allotment of the shares in the new North China Insurance Company has been effected; a shareholder in the former company complaining that, while a new applicant, who asked for ten shares (equivalent to two in the old company), had the full amount allotted, the former shareholder, notwithstanding that he was in precisely the same position as regarded business as he was before, had an application for five shares refused in toto. In support of the action of the company, it was contended that the new business was entirely distinct from the old one, and that they were not bound in any way by the fact of any person having been before accepted.

The increasing self-assertion of the Inspector of Maritime Customs, and his tendency to interfere in political matters, continue the subject of much comment, the last matter that has attracted attention being that the commander of a new Chinese gunboat, the *Titan*, has been styled a commander in the "Imperial Chinese Navy." The manner in which this new gunboat was obtained in itself is also worthy of attention. It was stated that a vessel of the kind was required to enable the Customs' department to commence erecting the lighthouses and beacons that have been so long promised, and as evidence that something was being done in this matter, a good deal was made of the fact that the steamer *Titan* had been purchased with that object. When completed, she proved to be a full fledged gunboat, and, by this clever stroke, a war vessel was got out of the tonnage dues. The *Titan* carries the green flag designed for Mr. Lay and Captain Sherard Osborn, as ensign for the fleet they were about to create, and is commanded by an Austrian, who, not being the subject of a treaty Power, cannot be restrained in the same way as others.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Dec. 22, 1868.

The past fortnight has been one of almost complete stagnation, so far as events of interest, either local or general, are concerned. You are already aware that the Shanghai Steam Navigation Company have lately had another line to contend with in the river traffic. The Union Company have placed the *Rona* and *Tunsin* on the Yangtze, and the profits of the new undertaking have fully justified the speculation. Thus the net profit for the half-year ended 30th Sept. was Tls. 37,563.55, including interest upon the unpaid portion of the *Rona's* purchase money, which has since been paid up in full, leaving the property of the company now quite unencumbered. Tls. 45,000 remain in the reserve fund, and even a sum of Tls. 15,000 has been returned during the half-year to shippers of heavy cargo. The full capital has been paid up, with the exception of Tls. 10,000, and the remaining shares will be assigned to those only who can give business to the company. Altogether the result of the half-year's operations reflect much credit on the energetic agents, Messrs. Glover and Co., to whose indefatigable exertions much of the company's success is due. The Yangtsze is now rapidly falling, a difference of 17 feet 5 inches being observable between the register at Hankow at present and that of the summer maximum. Some excitement has been caused by the disappearance of a native opium-dealer, who stood so high in public estimation that his cheques were taken for opium instead of the usual banker's orders. His liabilities are stated at Tls. 25,000, but this is below rather than above the mark. The sufferers are hardly pitied, for the practice of touting for trade in opium has run high to the detriment of the less rash speculators in the drug. Indeed, there was little excuse for the rapid alterations made in the facilities offered by certain houses to native opium-dealers, and it is gratifying to know that these houses are now the chief victims. Messrs. Elias and Hollingsworth, who have been absent from Shanghai about three months on an excursion up the Yellow River, have returned in safety, and report their success in sounding and mapping the stream from the point where it leaves its old course, near Kai-fung-fu, to its embouchure in the Gulf of Pecheli. They state that this year a portion of the river found a new bed, and leaving its bounds at a point a little to the westward of Kai-fung, at length emerged into the Yangtsze. The exploration was carried successfully as far as Tsi-nan-fu, the capital of Shantung, and it is said that up to this point the river is quite navigable for vessels of light draught. Very little could be learned about the trade, but the country in the neighbourhood of the river appeared to be barren and uninteresting.

The United States have a formidable fleet on this station. The vessels are as follows:—*Piscataqua*, *Iroquois*, *Unadilla*, and *Aroostook*, at Hong Kong; *Ashuelot*, at Foochow; *Monocacy* and *Maumee*, at Yokohama; *Oneida*, at Kobe; and *Idaho*, at Nagasaki. The Great Republic is evidently determined to be no longer beholden to European Powers for the protection of her commerce, but to take her fair share of the burden and heat of the day.

Your readers will regret to hear of the death of Monseigneur Monly, the Catholic Bishop of Peking. He was the head of the Order of Lazarists, and had been for thirty years a resident in China. His influence was, so far as we know, invariably exerted on the side of advance and liberality, and his advice was often

Digitized by Google

sought by the Chinese authorities on questions regarding their relations with hostile foreign Powers.

From Formosa you will probably have heard, *via* Hong Kong. I need therefore do no more than mention the action which took place on the 20th November between the gunboats *Bustard* and *Algerine*, and the forts of Anping. The city was closely invested, but a storm having driven the gunboats off shore an attempt was made to engage them on their return. They, however, silenced the forts and seized the water batteries, killing and wounding a large number of Chinese. The natives then made a gallant attempt to retake the fort, but were repulsed with much loss by Lieutenant Gordon. Mr. Gibson had again demanded the removal of the local officers, but up to our latest advices no reply had been received. Meanwhile Dr. Maxwell, the Catholic missionaries, and the injured camphor merchants have been indemnified for their losses.

## FOOCHOW.

A correspondent writes as follows :—

The agency of Messrs. D. Lapraik and Co.'s steamers has lately been transferred to Messrs. Jardine, Matheson, and Co. A rendezvous flag is hoisted under the French flag on their bund on the arrival of the steamers. It is said that Messrs. R. R. Westall and W. P. Galton are to commence a new firm next season, under the name of Westall and Galton. Messrs. Hedge and Co. are occupying their new store, which is a very handsome and commodious building. Work is being pushed rapidly on the buildings of Messrs. Gilman and Co., J. Silverlock and Co., E. H. How and Co., Siemssen and Co., Gibb, Livingston, and Co., and others, and soon the burnt district will appear tenfold better than ever before. Our American houses are making large purchases of Oolong, Messrs. Olyphant and Co. taking the lead.

### MEETING OF FOOCHOW MERCHANTS CONCERNING FRAUDS BY CHINESE IN THE TEA TRADE.

At a meeting convened by the British and American Consuls, and held at the British Consulate, present the representatives of the following firms :—Birley and Co., John Forster and Co., Gilman and Co., E. H. How and Co., Rusden, Phipps and Co., J. Silverlock and Co., Bull, Purdon and Co., Gibb, Livingstone and Co., A. Heard and Co., Jardine, Matheson, and Co., Russell and Co., D. Sassoon and Co., John Odell and Co., the British Consul was requested to take the chair, and having explained the object of the meeting, read the draft of protest, drawn up by a committee of merchants, as follows :—

*Memorandum on which is based the Chop proposed to be Issued to Teamen and Others.*

We, the undersigned merchants trading at Foochow, do solemnly protest against the general carelessness in preparing and packing the tea brought to this market, and particularly against certain fraudulent and pernicious practices whereby the trade is brought into disrepute, and threatened with permanent injury.

Our causes of complaint are as follows :—

1st.—*The mixing of Old leaf with New Season's Tea.* These mixed teas arrive in England without any of the characteristics of new tea, and are rejected by the buyers there.

2nd.—*The excessive quantity of dust in Teas, as well as the mixing therewith of dust not belonging to the Chop.* This practice is extremely objectionable, not only because the quality of the tea is lowered, but also because it often arrives at the foreign market out of condition, and the continuance of this practice will render teas so mixed subject to a very heavy cut.

3rd.—*The insufficient leads which are used in packing.* By neglecting to have leads of sufficient thickness the teas arrive at their destination without freshness, and frequently out of condition. The proper weight of the lead for a chest is 6½ catties, and for a half-chest 3¼ catties.

4th.—The practice, which will be condemned by all men as fraudulent and unworthy of merchants, is that of sending to the various hongs small musters from which the coarse leaves have been picked, and the dust partly removed, or to which other teas have been added.

In many instances this season the small muster has proved to be superior to the chest muster, and the chest muster to the chop. This is a shameful action, and to be condemned by all honest traders.

These malpractices (which are contrary to the honourable and just customs of trade, by which Canton gained its high character) have been more frequent this season than hitherto, and from them have arisen many disputes, causing much annoyance and loss of money, both to buyers and sellers.

We therefore give notice to all whom it may concern, that we consider such practices as constituting fraudulent misrepresentations on the seller, which we are determined to visit with the severest penalties in our power, and particularly to carry into effect the proclamations which were issued by the Chinese authorities, and published by H.B.M. Consul in 1866 ; and we earnestly appeal to all those who love justice and honourable dealing, and who wish to see the tea trade of Foochow prosper and increase, to assist us by every means in their power in correcting these abuses.

---

Copy of letter from A. R. Hewlett, Esq.,
Interpreter, H.B.M. Consulate.

Foochow, Nov 18th, 1868.

MY DEAR SIR,—With reference to my reply to your letter of the 10th inst., I now beg to hand you the translation of the notice you intend issuing to the teamen of the interior.

In preparing it, I have considered it best to put it into a shape in which I should be most likely to carry conviction on the points insisted upon, to the minds of those amongst whom it will be circulated. To do this it has been necessary to amplify it somewhat.

As it now stands, the protest begins by referring to the honourable practices of the tea trade since the opening of the port, shows how thereby both native and foreigner were benefited ; then points out the gradual growth of abuses, instancing a case of false packing in 1866, which led to interference of authorities. States how foreign merchants were unwilling to believe that these were other than single instances, when, to their astonishment and indignation, they find that the practice has become general. Denounces in strong terms the malpractices under the heads one and four. Shows how suicidal such practices are, and appeals to all honest traders to combine to put a stop to them.

In conclusion states that, should this appeal not have the desired effect, foreign merchants will have recourse to the authorities, in the hope of punishing severely all concerned in such illegal practices.

The above is a resume of the document. I have only to add that, if it will be of any assistance to you, I shall be happy to get the protest printed for you in the style usual amongst the Chinese. —I am, my dear Sir, your obedient servant,

A. R. HEWLETT.

The following resolutions were then proposed and carried unanimously :—

Moved by A. G. W. Rusden, Esq., seconded by R. J. Hamilton, Esq.,

Resolved, 1st.—That the protest, memorandum of contents of which has been circulated, be printed in China with the names and chops of foreign hongs attached.

Moved by D. King, jun., Esq., seconded by J. O. Lent, Esq.,

Resolved, 2nd.—That the committee take such steps as they may deem necessary to circulate the protest in accordance with resolution 1st.

Moved by H. S. Dalrymple, Esq., seconded by H. Sutherland, Esq.,

Resolved, 3rd.—That H.B.M. Consul and the Consul for the United States of America be requested to communicate with the authorities, and to endeavour to induce them to issue proclamations, to be posted in the various tea districts, in confirmation of the above protest.

H.B.M. Consul, on the part of himself and Col. Allen, Consul U.S.A., who was present at the meeting, expressed their desire to give all possible assistance to the endeavours of the merchants, and to obtain the co-operation of the Chinese authorities towards remedying the evils complained of.

After a vote of thanks to H.B.M. Consul for his conduct in the chair, the meeting separated.

The gentlemen who were not present at the meeting have requested that the names of their respective firms be also affixed to the protest, which will therefore be signed by all the foreign merchants of Foochow.

## HONG KONG.

Advices from this port are to the 29th of December. The outward mail of November 6 was received in Hong Kong on December 19. By this mail there is again a paucity of local news of interest. The *China Mail* gives the following few items :—

Her Majesty's transport *Himalaya* arrived at Hong Kong on the 21st Dec., bringing the 75th Regiment to relieve the 73rd, now stationed here. The *Himalaya* had an unusually favorable passage out, having averaged 230 miles a day from Portsmouth. She expects to leave this on the 31st Dec. or 1st January for Singapore and Galle, and may take a native regiment from Singapore to Madras. From Ceylon she is bound for Auckland, New Zealand, where she expects to arrive about the end of February, 1869. From Auckland she is to take the 18th Regiment to Brisbane, Sydney and Adelaide, and from those places she will collect the 50th Regiment, and, after calling at St. George's Sound, make the best of her way home.

The coolie trade is undergoing great tribulation. Driven from Macao, Hong Kong was tried, with what result the following paragraph from our contemporary will show :—

"If the number of Chinese emigrants who have already volunteered for the two ships, which have been sixty-five days on the berth, is to be taken as a criterion, emigration to the Dutch American Colonies is decidedly on the decline. The *Omba* and *Veritas*, two British vessels, the former almost one of the tea clipper class of ship, were placed on the berth for Surinam more than two months ago, and on Christmas Day, when the sixty lay-days for each ship had expired, there were 141 coolies on board the *Veritas*, out of about 300 she is to take, and 27 on board the *Omba*, out of the 395 which she is chartered to convey. At this rate, the latter vessel will probably get her complement of Chinamen about next July, a rather distant date."

The Hon. Julian Pauncefote and the Hon. Frederick H. A. Forth, having reported ther return to the Colony, the former has resumed his duties as Attorney-General, and the latter has resumed his duties as Colonial Treasurer.

Digitized by Google

The Union Dock Company held their annual meeting on the 18th of December. The report of the board of directors shows a loss for the year ending June, 1868, but the affairs of the company appear to be in the most satisfactory condition, and the future prospects are of a very encouraging nature, after the hard struggle the company has experienced in bringing their new docks at Kowloon to completion.

Two local insurance societies, the Union and the Hong Kong Fire, have changed their organisation from being yearly offices into a three years' office and a permanent office respectively.

The principal topic of interest in the Hong Kong papers is the present aspect of the Formosa difficulty. The republication of all the details with which the local journals are filled would occupy some dozen columns of our space, but the position of affairs according to the last advices is thus briefly summed up in the *Overland Trade Report*:—"On the 26th November, when Mr. Gibson's demands were acceded to, it was agreed that the British gunboat should hold military occupation of Anping, until the offending Governor and his associates were, as promised, removed from office; but on the 25th Nov. the Taiwanfoo authorities sent down 500 men to attempt to reoccupy the place. Lieutenant Gordon, of the *Algerine*, determined to retake it, and landing with twenty-five volunteers at night made his way to the Hap Tai's yamen. The Chinese refusing to lay down their arms and showing fight, Lieutenant Gordon opened fire, killing eleven men and wounding six. The remainder then took to flight. This speedily brought about a settlement of the affair on the terms before agreed, and a claim of 10,000 dols. has been enforced, 5,000 dols. to pay expenses, and 5,000 dols. as prize money for the officers and men of the *Algerine*."

## STRAITS SETTLEMENTS.

### SINGAPORE.

From this port our dates are to the 5th January. The outward mail of November 20 was received on the 24th December. The news, which is not of very great importance, is thus summarised by the *Straits Times*:—

For political news the fortnight has been almost a blank. In our last we alluded to the Governor's Speech closing last year's session of the Legislative Council in Penang, on the 19th ult. Twenty Ordinances have been passed during 1868, all of more or less importance, the last being the Penang Water-rate Bill, which seems to have met with general approval. His Excellency's admission that the estimated surplus of revenue will possibly be somewhat reduced on the settlement of outstanding accounts with the late Government has attracted notice, and certainly not increased confidence in the prudence of the Executive or the accuracy of its budgets. His Excellency continues still on Penang-hill. At the closing of the Council the principal of the ringleaders of the rioters in Penang in 1867 had their sentences mitigated or remitted altogether, according to the circumstances of each case. This exercise of clemency on his Excellency's part, especially in the case of the Head of the Toh Peh Kong Hoey, Khu Tian Tek, has been disapproved of by some, but was, we are inclined to think, on the whole judicious, and will probably have a beneficial effect on the Chinese emigration from Province Wellesley. In consequence of the Hon. W. W. Cairns, Lieut.-Governor of Malacca, having been appointed Governor of St. Kitts, some minor official changes have taken place, but Mr. Cairns' successor in Malacca has not yet been named.

H.M.'s surveying steamer the *Serpent*, Captain Bullock, arrived on the 19th ult. from surveying between the islands east of Java and the north coast of Australia, with a view to the laying down of a telegraphic cable between Java and Australia. She had cholera on board of her on her arrival, but it has now disappeared, and she proceeds to England shortly.

A new paper, entitled the *Straits Observer*, made its appearance on the 1st inst., and, judging from the quantity and ability of the editorial matter which it contains, should prove a success. It is understood to be the organ of the "Straits Association."

### NEW JOURNAL FOR THE STRAITS SETTLEMENTS.

The following is the prospectus of a new paper about to be started in place of the *Singapore Free Press;* it will be called the *Straits Observer*:—

It has been considered desirable to publish in the Straits Settlements a newspaper under a direction that may express, without either fear or favour, public opinion regarding the position and progress of the Colony. The projectors believe there is a fair opening for a journal combining publication of matters of general interest with energetic encouragement of all views tending to extend our commercial and general prosperity.

Since the transfer of these Settlements to the colonial rule the necessity for greater watchfulness and care of public interests has very gravely been impressed on the public mind; and it will be the aim of the new journal to observe and note the proceedings of the local Governmedt, and while giving credit for every honest and unselfish measure, to set a firm face against all that may be mischievous or extravagant.

The rule of the great Company under which the prosperity of these islands and territories was fostered and matured still bears excellent fruit, while much that has been done under the new regime is yet unproved. Care will be taken that while supporting all measures that local experience may call for, the wisdom inherited from the old rule will not be forgotten.

Above all, the projectors pledge themselves to maintain to the best of their power the principles of free trade and non interference with the commerce of these possessions so happily established by Sir Stamford Raffles, and followed as long as these settlements were under the Government of India.

Great encouragement has been offered by the leading classes and others of the Community to the enterprise now laid before the public, and the opinions of the journal will be expressed by gentlemen acquainted with the requirements of the settlement, and every effort will be made to secure for it a high and permanent position.

Every facility will be afforded to those who may wish to ventilate public or social questions by correspondence.

It is conceived that a newspaper on the plan referred to can be instituted without rivalry with any of the established papers in the Straits; taking, as it will, the place of the old *Free Press*, it will gain, it is hoped, from its contemporaries and from the public the good opinions that newspaper enjoyed in its best days.

The paper will be published by the title of the *Straits Observer*, and will be published on Tuesday and Friday, and circulated in Singapore, Penang and Malacca.

For the convenience and information of those resident at home and elsewhere, who are interested in the Straits Settlements, an overland edition will be published and forwarded by the contract steamers fortnightly, embodying the main intelligence for that period.

It is expected that the circulation of the paper through the three Settlements will make it an excellent medium for advertisements.

The first number will be published on Friday, the 1st January, 1869. All further particulars can be obtained on application to Mr. J. F. Hansen, Commercial Press.

Subscription 20 dols. per annum; Overland Edition, 7.20 dols.

The British steamer *Niger*, from London, is reported disabled, and is being towed into harbour by the *Batavia* steamer.

The summary would be incomplete without our noticing the appearance of a clever, witty, and wicked *jeu d'esprit*, entitled *Straits Produce*. It is a Christmas *brochure*, after the manner of *Punch*, not a regular periodical, and is illustrated with really superior artistic ability. Hardly a local subject, political or social, escapes its biting satirical notice, but H. E. the Governor and his officials have been especially favored with attention. It has been received with much favuor by the public, and has contributed not a little to the fun and enjoyment of the festive season which is just over.

# Commercial Report.

## CHINA AND JAPAN IMPORTS.

YOKOHAMA.—The market throughout the interval had continued in a most depressed state, and the trade generally was most disappointing to importers, who, with comparatively light stocks and by no means excessive supplies on the way, find a gradually declining market. The dread of an issue of paper-money, further Government squeezes, and a depressed currency fully accounted for this state of things. Grey Shirtings: There were no transactions reported in these goods, and prices were nominally $2.90 to 2.95 per piece for 8.4 lb. weight. Cotton Yarn: Some forced sales had established a lower range of prices, and Nos. 28 to 32 were quoted $49 to 50½. Black Velvets and Plain Black Lustres were saleable at low rates. The demand for Blankets had subsided, but there was some inquiry for Heavy Union Cloth at rather better prices.

TIENTSIN.—The import market was generally inactive, Piece Goods being dull of sale and in heavy stock. Grey Shirtings, 8¼ lbs., were quoted Tls. 2.1.7.

SHANGHAI.—Cottons: There had been but little doing in Plain Cottons or Fancy Goods. For the North scarcely any purchases were reported, and steamers had ceased running for the season. Grey Shirtings, owing to fresh arrivals, and very limited demand, had again declined in value; 8¼ lbs. had changed hands at Tls. 2.1.1 to 2.1.7; 7 lbs., Tls. 1.9 8 to 2.0.3, but latest quotations were rather lower. T-Cloths had been sold to a very moderate extent. White Shirtings, of medium quality, had met with buyers at about last mail's quotations. Drills had also been sparingly dealt in. Fancy Cottons were neglected. Woollens and Worsteds: Scarlet Long Ells—A few sales at Tls. 6.1.5. Crape Lustres were in fair inquiry, but prices offered were still very low. Figured Lustres in rather better demand. Camlets dull of sale. The current quotations were as follows:—G. E. Grey Shirtings, 38½ yards 39 inches, 7 lbs., per piece, Tls. 1.9.5 to 2.0.0; 8¼ lbs. to 8½ lbs., Tls. 2.1.1 to 2.1.5; G. E. White Shirtings, Tls. 1.8.5 to 2.6.0; T-Cloths, Tls. 1.4.0 to 2.1.5; Spanish Stripes, per yard, Tls. 0.5.5 to 0.6.0; Medium and Habit Cloths, Tls. 0.9.0 to 1.2.5; Camlets, English S, 56 yards 31 inches, per piece, Tls. 13.5.0 to 14; SS, 11.5.0 to 12 5.0; Iron, Flat and Round, per picul, Tls. 2.3.0 to 2.4.0; Nail Rod, Tls. 2.2.5 to 2.3.5; Hoop, Tls. 2.3.0 to 2.4.0, Pig, per ton, Tls. 18 to 19; Lead, per picul, Tls. 5.7.5 to 5.9.0; Coals, English, per ton, Tls. 10; Cardiff, Tls. 11.2.5; American Anthracite, Tls. 12.

HANKOW.—Sales of piece goods, chiefly cottons, had been on an improved scale, but prices were in many instances lower. Grey Shirtings, 8¼ lbs., a fair business had been done; 7 lbs. continued scarce. Closing quotations:—8¼ lbs., Tls. 2.1.4 to 2.1.9; 7 lbs., Tls. 2.0.4 to 2.0.7. White Shirtings had met with some inquiry for 56 and 66 reed, chiefly for the

Digitized by Google

latter. T-Cloths, 7 lbs., of good quality, had been largely dealt in, but holders, being willing sellers, prices were again lower; 8 lbs. were in little request. Drills had advanced five candareens to one mace, and kept in good demand. Fancy cotton goods met but with little inquiry. Woollens and Worsteds: Camlets had declined about a mace a piece, after fairly large sales at the commencement of the fortnight. Long Ells: Scarlet had slightly advanced, but assortments were still neglected. Spanish Stripes and Medium Cloths were dull. Lastings and Figured Lustres had found buyers to a moderate extent. Lead had been in good demand, and sales were reported at Tls. 6.5.0 on the spot, and Tls. 6.4.0 per picul for ten days' arrival.

FOOCHOW.—The following were the transactions effected during the interval:—600 pieces 8¼ lbs. Grey Shirtings at $2.95 per piece, 1,000 pieces 7 lbs. T-Cloths at $2.45 per piece; and 350 piculs Lead at $7.25 per picul.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated Dec. 28:—Cotton Yarn: Two trifling sales were made during the early part of the interval at about former values, but latterly nothing has been done, and sales could only be effected at a decline of $5 per bale, dealers being well aware that a large quantity of damaged goods must soon be disposed of by auction, and preferring to take their chances of securing such goods at relatively lower prices than those demanded for sound parcels at private. Piece Goods: A very limited business has been done, owing in part to the same causes that have affected the trade in Yarn—expected offerings at auction of large parcels of damaged goods—but a better feeling pervades the market for Manchester goods, and though some few small sales have been made on easier terms, holders generally are firm, and not at all anxious to realise at present quotations. About 500 pieces 40 yard American Drills—the only parcel on the market—have been quitted at $5.25, and quotations for American Cottons, of all descriptions, are now quite nominal. There are no Dutch imitations in the market, and no buyers of English, stocks of which have been increased by imports from Singapore. Woollens: The demand is very slack. Scarlet Long Ells are out of favour, and 10 cents lower, the native fancy now running on Green and Gentian. Assorted are saleable at former rates, though no transactions have been reported. Spanish Stripes are unchanged in values, but the only sale has been of a few pieces of best Scarlet. Lastings, Crapes, and Camlets are weaker. Some 400 pieces of a favourite make of the first-named have been quitted at $14.75, and as further parcels can be had upon similar terms, less known makes and marks attract no attention. Blankets are quiet, and easier. Metals: Nail Rod Iron is inquired for at higher rates, and Bar has an upward tendency; Hoop, on the other hand, is 5 cents lower. Wire and Steel are dearer. A large business has been done in Lead, at enhanced prices. Sales comprise common quality, and up to L.B. W.B. is still out of stock. Tin, too, is in good demand, at higher rates. Tin Plates are unchanged. Nothing doing in Quicksilver. Coal: Receipts amount to 405 tons English, and 2,796 tons Welsh (1,704 to consumers). There is no inquiry for either of these descriptions. Sales of 1,050 tons Australian have been made at $7. Ginseng: Sales have been 23 casks Crude at $130, and 30 do. at $100 to 128 per picul. No important change has taken place, but the inquiry now existing is expected to subside as the native New Year approaches.

## CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—The market had continued fairly active during the fortnight, and the total settlements amounted to about 2,500 piculs, consisting of all grades; some of these settlements had been made for the London market, but the larger portion for America. Prices had ruled as last quoted, but at the close were slightly firmer. Supplies having come in somewhat scantily, stocks had been reduced. The Brave, N.B., Palmer, and Pallas were loading for New York, and the Alexandra sailed on the 8th December for New York with 276,118 lbs., making the export to that date 4,995,253 lbs., against 4,130,677 lbs. at the same date of 1867. The current quotations were as follows:—Common, $18 to 21 per picul; good common, $22 to 23; medium, $24 to 26; good medium, $27 to 29; fine, $30 to 34; finest, $35 to 40; choice, nominal.

SHANGHAI.—Black: The business of the fortnight had been small, owing to the firmness of the teamen and the inferiority of the stock left to select from. Prices, however, had been well maintained, some settlements showing even a slight advance. Settlements for the fortnight, 3,555 chests; reshipments on owners' account, 750 chests; stock, 33 chops, or 10,035 chests. Quotations (duty paid, exchange for credits, at 5s. 10½d. per tael, and freight at £2 per ton) were as follow:—Hohow, common, 11¾d.; Ooonam, common, 11¾d.; Ningchow, common to fair, 1s. to 1s. 1¾d.; Oopack, fair, 1s. 1¼d. to 1s. 1¾d. Green: In Green Teas also we have to note a somewhat quieter market, but no great change in quotations. Finest still commanded extreme prices, and we cannot now look for any decline in them this season, as the supply was almost exhausted. In other kinds, again, there was an evident desire to sell, and as the stock was large and accumulating, we may confidently predict lower rates, though teamen held very firmly. Settlements and reshipments 21,762 half-chests Moyune and Tienkai, at Tls. 33.5.0 to 45.0.0; 1,455 half-chests Fychow, at Tls. 29.5.0 to 33.2.5; 2,100 half-chests Pingsuey, at Tls. 24.5.0 to 34; and 1,548 half-chests Shanghai-packed, at Tls. 24.5.0 to 28.0.0. Settlements for the fortnight, 24,495 half-chests; re-shipments on owners' account, 2,370 half-chests; stock, 136 chops, or 80,000 half-chests.

HANKOW.—One small parcel 150 half-chests had changed hands at Tls. 13.5.0. There was no stock, and the season at this port may be considered at an end.

FOOCHOW.—The following is from Messrs. Odell and Co.'s Circular:—Congous.—Immediately after the departure of the last mail several English buyers entered the market, and have continued to purchase freely; there has also been a fair business transacted on Australian account. Arrivals from the country have not been large, and with reduced stocks prices have gradually advanced, and the decline noticed in our last issue has been recovered. Further receipts from the country are variously estimated at from 10,000 to 20,000 chests. Souchong have been in limited demand at previous quotations. Oolongs.—The small stock remaining on offer at the date of our last has been taken on American account, and the quantity to arrive from the country does not exceed 1,000 half-chests. Scented Teas have found buyers to a small extent at previous quotations. Flowery Pekoes continue in but limited demand. Settlements for the fortnight have been:—Congou, 21,942 chests, at Tls. 8.3 to 18.8 per picul, ship off; Souchong, 206 chests, at Tls. 18.8 per picul, ship off; Oolong, 33,452 ½-chests, at Tls. 14.8 to 23.3 per picul, ship off; Scented Teas, 1607 boxes, at Tls. 8.3 to 22.3 per picul, ship off; Flowery Pekoe, 106 chests, at Tls. 20.8 per picul, ship off.

### SILK.

YOKOHAMA.—The paucity of supplies of good Hanks had become very marked; and, with a fair demand, prices had advanced on last quotations, especially for inferior qualities. For some superfine $1,070 had been paid. The stock was largely composed of Oshus and other book-silks; these had sold freely at quotations. Settlements amounted to 900 bales. Stocks were reduced to about 500 bales. The current quotations (laid down in London at exchange 4s. 5d.) were as follows:—Hanks—Mybash, Sinchu, &c., extra, 39s. 8d. to 42s. 1d.; best, 36s. 7d. to 38s. 5d.; medium, 33s. 11d. to 35s. 9d.; inferior, 30s. 11d. to 32s. 9d.; Oshu, extra, nominal, 36s. 7d. to 37s. 4d.; best, 33s. 7d. to 35s. 5d.; medium, 29s. 1d. to 31s. 8d.; inferior, 24s. 3d. to 28s. 0d.; Coshu, best, 32s. 1d. to 34s. 3d.; medium, 28s. 9d. to 30s. 11d.; inferior, 24s. 3d. to 28s. 0d.; Sodai, best, nominal, 29s. 10d.; medium, 26s. 1d. to 28s. 9d.; Etchesen, best, 27s. 8d. to 29s. 1d.; 2, 24s. 3d. to 26s. 6d.; inferior, 20s. 5d. to 23s. 5d.; Mashta, best, 24s. 3d. to 26s. 1d.; inferior, 20s. 5d. to 23s. 5d.; Hatchogee Tussah, 23s. 5d. to 25s. 0d.

SHANGHAI.—Messrs. Skegg's and Co.'s report, dated 22nd December, offers the following remarks:—Settlements for the fortnight amount to about 800 or 900 bales, most of which has been purchased within the last two or three days, and consists chiefly of medium to common Tsatlees and re-reeled silks. In chops, the "Dragon" has been placed at Tls. 582½, and Blue Peacocks at Tls. 540, showing little variation from last mail's prices, whilst the quotations for other grades must be left unchanged, although we may say that there are hardly any Tsatlees now offering under Tls. 455 to 460. No transactions are reported in Kahings, except for a few bales of very common stuff, at Tls. 400 to 410. Chincums get more and more scarce, being taken for native consumption, and an advance of fully Tls. 10 would now have to be paid on this class. Long Reels are also in short supply, and Tls. 410 proportion for Nos. 1 and 2 is wanted for the only lot on offer. In Hainins, the Gold Lion Chop has been taken at Tls. 520, and Tls. 545 has been paid for a small parcel of very fine Yuenfaas. The very finest Re-reeled Hainins are firmly held for previous rates, but good, medium, and common sorts are considerably lower.

### ARRIVALS.

At YOKOHAMA.—From Cardiff, Dec. 8, Agra; 9, Sarah Anderson; from New York, 11, Suliate.

At SHANGHAI.—From London, Dec. 14, Peterborough; 20, Merse; from Sunderland, 13, Alphonsine; from Philadelphia, 12, Amie.

At AMOY.—From Cardiff, Dec. 7, Herald of Light; from London, 20, Chanticleer.

At HONG KONG and CANTON.—From London, Dec. 16, United Service; 26, Cessy; Sir Lancelot (reported by telegram); from Liverpool, 23, Odence, Lota; 24, Ercilla; from Glasgow, 26, Alida; from Newport, 19, Joachim Christian; from Cardiff, 20, Nelly; 22, Deutschland; from Portsmouth, 21, H.M.S. Himalaya.

At MANILA.—From Liverpool, Dec. 8, Loyola; 21, Feliz; Aurora (reported by telegram).

At SINGAPORE.—From London, Jan. 2, Bristow; from Cardiff, Dec. 29, Suwa; Jan. 3, Neptune; from Liverpool, 1, Diomed (str.).

### DEPARTURES.

From YOKOHAMA.—For New York, Dec. 7, Alexandra.

From SHANGHAI.—For New York, Dec. 12, Burnside,; 18, Sir W. Wallace; for Boston, via Foochow, 15, Velocity.

Digitized by Google

From FOOCHOW.—For New York, Dec. 14, E. Nicholson; for Boston, 19, Kjobenhavn.
From AMOY.—For New York, Dec. 10, Formosa.
From HONG KONG and CANTON.—For Hamburg, Dec. 18, Glenisla.
From MANILA.—For New York, Dec. 12, Anna; 16, Galatea.
From SINGAPORE.—For New York, Dec. 23, Bertha; for Bordeaux, Deaux Freres.

## VESSELS LOADING.

At YOKOHAMA.—For London, Johanne Maria; for New York, Alcyone, Pallas, Brave, N. B. Palmer.
At SHANGHAI.—For London, Harlaw, Elmston, J. M. Joshua; for New York, Dartmouth (full), Etha Rickmers.
At FOOCHOW.—For New York, Cleta, Glenaros, Surprise, Lauderdale, Velocity, Lamel.
At HONG KONG and CANTON.—For London, Kelso, Roslin Castle.
At MANILA.—For London, Ardanza; for Liverpool, Amigos.
At SINGAPORE.—For London, Bristow, Coleroon, Napier; for Boston, Margaret, Rocket.
At PENANG.—For London, Alice; for New York, Pauline.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: £4 per ton of 50 cubic feet. To New York, £3 per ton of 40 feet, per steamer, $45.
At SHANGHAI.—In coast charters there is no improvement. To London the rate has declined to £2 per ton.
At FOOCHOW.—There is no vessel on the berth for London. To New York the rate is £3 5s.
At HONG KONG and CANTON.—The freight market is quiet. The only home charters are as follows:—Dunkeld, 699, Saigon to United Kingdom or Continent, £3 5s. per ton; Najaden 237, ditto, £3 10s. per ton; Stanley, 384, ditto, £3 7s. 6d.; or Continent, £3 12s. 6d. per ton; Glendoveer, 489, Whampoa to New York, £2 15s. per ton.
At MANILA.—Freights: The following settlements are reported:—Ardanza, 283 tons, hence to London direct, £3 for dry sugar; £3 5s. for wet sugar, and £3 10s. for hemp, per 20 cwt., filling up with light freight at £3 15s. per 50 cubic feet. Amigos, Spanish Bark, 350 tons, for Liverpool, with dry sugar at £3, and hemp at £4 per 20 cwt.
At SINGAPORE.—To London, dead weight and light freight £3.

## SHIPPING POSTSCRIPT.

ARRIVALS NOT IN THE TABLES.—Feb. 4, at Queenstown, from Bassein, Chrysolite; 6, at Liverpool, from Rangoon, Denmark; 4, at Brouwershaven, from Batavia, Helena Anna; Jan. 24, at New York, from Foochow, Camilla; 25, from Yokohama, Yokohama; at Boston, from Batavia, Naples; Feb. 6, at Deal, from Foochow, Windermere; at Liverpool, from Rangoon, Victoria (str.); 5, at Clyde, from Rangoon, Maythorn; at Queenstown, from Maulmain, Emily McNear; at Deal, from Singapore, Zenobia; Jan. 18, at New York, from Shanghai, Asphodel; 18, at Boston, from Foochow, Tientsin; Feb. 7, at London, from Hong Kong, John Banfield; in the Downs, from Shanghai, Rimac, at Falmouth, from Bassein, Nestor.

DEPARTURES.—Feb. 6, from London, for Cardiff and Hong Kong, Dr. Petermann; 5, from Cardiff, for Singapore, Cornelis Smit; —, from Amsterdam, for Batavia, Jupiter; 3, from Newport, for Hong Kong, Herzogin v. Brabant.

CASUALTIES.—The Jupiter, Kiewit, from Amsterdam, for Batavia, arrived at Falmouth, Feb. 5, with sails split. The Josephine Amedee, Lagarde, which arrived at Havre from Hong Kong, reported having experienced severe weather, and in consequence of the pumps being out of order, had in her hold two feet of water, which was afterwards pumped out.

## THE LOSS OF H.M.S. "RATTLER" IN JAPAN.

The following letter appeared last week in the columns of a morning contemporary:—

SIR,—Apropos of the very interesting letters daily addressed to your valuable journal on the subject of saving lives at sea, can you inform your readers what action has been taken by our Government in the recent wreck of the *Rattler* on the coast of Japan, when 140 British sailors had been saved by the French man-of-war *Dupleix*, commanded by Captain Du Petit Thouars.

More than a month since I read in the French papers a highly interesting narrative of the return to Yokohama of the officers and crew of the unfortunate *Rattler*, and the humane and considerate treatment they experienced whilst on board the *Dupleix*.

Independently of the great number of lives thus providentially rescued, a valuable amount of stores had also been saved.

The French Government has not been slow in appreciating, the very efficient service rendered to a friendly nation, as I have heard of its having substantially recognised and rewarded their officers for their energetic conduct on so trying an occasion.

Permit me to renew the question. What, beyond poor official thanks, has our ministry done in recognition of the valuable aid thus rendered by the Marine of our humane and chivalrous neighbour.—Yours, &c.,
Feb. 2. A SUBSCRIBER.

THE GUNBOAT "GNAT."—The following notification has been issued from the Admiralty, Whitehall, for public information:—"Her Majesty's gunboat *Gnat*, lost on the 15th November on a coral reef, about four miles off the south-west coast of Balabac. Officers and crew expected at Manila about the 15th December in the Spanish steamer *Sudoesta*. The *Leven* left Hong Kong on the 10th December for Manila to bring them on to Hong Kong. The British Consul at Manila reports it doubtful whether the *Gnat* can be got off the reef."

## REUTER'S TELEGRAMS.

RECEIVED VIA GALLE, JANUARY 29.

### JAPAN.

YOKOHAMA, DEC. 30.—The Japanese Government has officially notified to the representatives of foreign Powers the opening of the port of Neegata to foreign trade.

### CHINA.

HONG KONG, JAN. 11.—Gray shirtings: Limited business. Water twist, 16-24, unchanged. Cotton, Bengal, fair medium, $16¼. Tea: Inanimate. Total exports (China and Japan), 127,000,000 lbs. Exchange on London: Bank bills, six months, 4s. 5d.

SHANGHAI, JAN. 5.—Gray shirtings, 6½ catties, 8¼ lbs., 205 taels; Cotton, Shanghai, 15½ taels; Tea, quiet, and little inquiry; Silk, quiet, and unchanged. Settlements since departure of last mail, 1,200 bales. Export to date (China and Japan) from commencement of season, 56,750 bales. Exchange on London: Bank bills, six months, 5s. 10½d.

## THE ADULTERATION OF TEA

The following letter relating to the adulteration of tea practised in China appears in the *Daily News* of this morning:—

SIR,—If my memory correctly serves me, it was your valuable paper which, some time in the autumn of 1867, denounced and warned against the practice then for the first time introduced by the Chinese of mixing the young and fragrant pickings of tea with old and inferior leaves. In your yesterday's telegraphic summary I note the following, under date Hong Kong, Dec. 29:—"A meeting of the leading merchants has been held at Foochow in reference to the fraudulent practices of the Chinese in mixing and packing teas. Every assistance has been promised by the consuls at Shanghai to prevent the frauds." This meeting has doubtless originated from the almost incredible losses resulting from the present season's supply from Foochow, a loss principally falling upon firms here who have bought teas through commission merchants in China. I have for some years been in almost daily contact with the principal tea importers, but I have never yet seen or heard amongst the many excuses urged by their China agents for improper action, the imputation that the Chinese delivered otherwise than as sample bought by; indeed the natives sell by sample chests to practised tea tasters, who examine and approve of the bulk on delivery. The application to the consuls would therefore appear to be childish. It is simply a question of trade, and will right itself. The Chinese have a perfect right to mix their common teas with fine, and will continue to do so as long as Europeans are found to purchase mixed at the prices formerly paid for fine. The word fraud, too, would appear to have been freely used at the meeting alluded to; it seems a doubtful question whether the Chinese in mixing their produce, which they sell fairly by sample, are guilty of fraud, or whether these European merchants have not found the right term for the proceedings of some of their body, who, with the full knowledge that the tea is so mixed, for the sake of their commissions execute their orders from home and buy these teas at the limits given for pure and fine teas. Latest advices are to the effect that the Chinese admit that some 15 or 20 million lbs. of old leaf has again been stored in the interior for mixing with next season's crop; it is, therefore, important that China firms should know that the public at home form pretty correct judgment on such matters.—I am, &c.,
9, Mincing-lane, Feb. 6. LEX.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

BOURNE—On the 12th Dec, at Yokohama, the wife of Mr. William Bourne, of a daughter.
COWIE—On the 10th Dec., at Shanghai, Mrs. G. J. W. Cowie, of a son.
GODDARD—On the 2nd Dec., at Tientsin, the wife of J. B. Goddard, Esq., H.B.M. Vice-Consul at Taku, of a son.
HELMS—On the 24th Dec., at Sarawak, the wife of L. V. Helms, Esq., of a daughter.
HOLTZ—On the 25th Jan, at Twyford Abbey, Acton, Middlesex, the wife of Andreas Holtz, Esq., of a son.
JOHNSTON—On the 3th Jan., at Fairfield, Harrow Weald, the wife of A. R. Johnston, Esq., of a son.
TOMLIN—On the 26th Dec., at Hong Kong, the wife of G. L. Tomlin, Esq., of a daughter.
WISE—On the 1st Feb., at the Redlands, Reading, the wife of John Wise, Esq., of a daughter.

### MARRIAGES.

BING—HUXTABLE—On the 2nd Jan., at St. Andrew's Church, Singapore, by the Rev. J. A. Beckles, Colonial Chaplain, A. C. Bing, Esq., to Mrs. Huxtable, of Beach House.
BURR—WINSOR.—On the 9th Dec., by the Rev. Robert Nelson, in the presence of George F. Seward, Esq., Consul General for the U.S. of America, Mr. Thomas Francis Burr, of New York, to Jane Pearn, eldest daughter of Mr. Henry Ford Winsor, of Exmouth, Devonshire.
HALTON—HOLLIDAY.—On the 6th Feb., at St. George's, Hanover-square, by the Rev. Gerard Bancks, vicar of Cobham, Eldred Halton, Esq., 4, Leinster-gardens, to Eliza Jane Hamilton, eldest daughter of John Holliday, Esq., Alderley Edge, Cheshire.
HART—GRAY.—On the 24th Dec., at the Cathedral, Hong Kong, by the Rev. W. R. Beach, M.A., Thomas Hart to Mary Ann Matilda Gray.
HART—PATRIDGE.—On the 8th Dec., at Ningpo, by the Rev. George Ensar, George Mercer Hart to Ada, youngest daughter of the late Andrew Symes Patridge, formerly of Madras.
NEWMAN—PEEKE.—On the 19th Jan., at South Molton, by the Rev. J. H. Maitland, John Campin Newman, Esq., of Finchley, in the county of Middlesex, to Fanny, only daughter of the late Roger Peeke, Esq, of St. Margaret's, Kilburn, and Park House, South Molton, North Devon. No cards.
ROWSELL—HYSLOP.—On the 26th Jan., at Holy Trinity Church, Paddington, by the Rev. T. J. Rowsell, rector of St. Margaret's, Lothbury, assisted by the Rev. T. Homan Rowsell (the father and brother of the bridegroom), the Rev. Herbert Rowsell, late curate of Holy Trinity, to Fanny, second surviving daughter of Walter Hyslop, Esq., Addison-crescent, Kensington. No cards.
SERGEL—SCOTT.—On the 12th Jan., at Christ Church, Forest Hill, by the Rev. J. M. Clarke, M.A., Charles J. S. Sergel, Esq., son of the late Rev. Charles H. Sergel, of Hanover, to Clementina Augusta, only child of the late Clement A. Scott, Esq., C.E., and late of 21, Victoria-grove, West Brompton. No cards.

### DEATHS.

GALE—On the 28th Dec., at Hong Kong, Alfred Gale, master of the British barqu *Three Brothers*, aged 36 years.
GUNDRY—On the 19th Jan., at the residence of his brother, in Toronto, on his way to England, Alfred Andrew Gundry, of Shanghai, aged 31, fourth son of the la e William Gundry, of 1, Soho-square. (By Atlantic Cable.)
HEWLETT—On the 9th Dec., at Foochow, the wife of A. R. Hewlett, Esq., H.M Consular Service.

## THE CHINESE EMBASSY IN PARIS.

MR. ANSON BURLINGHAME and his associate Ministers have been received by the French EMPEROR at the Tuileries with a degree of state and ceremony that, so far as the French Court is concerned, places China on a diplomatic level with the Great Powers of Europe. A preliminary reception had previously been accorded by the MINISTER OF FOREIGN AFFAIRS, at which the date of the audience was fixed; and M. FEUILLET DE CONCHES, Master of the Ceremonies, called at the Embassy, received from Mr. BURLINGHAME a copy of the address to be spoken by him, and handed him a copy of the EMPEROR'S intended reply. On Sunday, the 24th inst., about 2 P.M., M. FEUILLET DE CONCHES, accompanied by M. BERTORA, went to fetch the Ambassadors in two Court carriages, preceded by outriders and followed by grooms on horseback. Mr. BURLINGHAME took his seat in the first carriage, with M. FEUILLET DE CONCHES, the first Chinese Minister, and the COMTE DE KLECSKOWSKI, Interpreter and Translator of Eastern languages to the EMPEROR; the other Chinese Minister and the secretaries took their places in the second carriage. At the Tuileries their arrival was announced by the drums beating to arms, and troops in line. At the entrance of the Palace they were received by the DUC DE CAMBACERES, Grand Master of the Ceremonies, and mounted the grand staircase between double rows of the *cent gardes* and Imperial footmen in full dress to the reception-room. Here the Grand Chamberlain, the DUC DE BASSANO, met the Ambassadors and announced "The EMPEROR," who made a few steps in advance and shook hands with the Ambassadors. There were present at the interview the EMPRESS and the PRINCE IMPERIAL, the MINISTER of FOREIGN AFFAIRS, and the ladies and gentlemen of the Imperial household, and several generals. Mr. BURLINGHAME wore an ordinary Court dress, black, with steel buttons, and thus presented a striking contrast with the Chinese, who, of course, were resplendent in satin, embroidery, fur, and ornaments.

Our Paris Correspondent gives the following as the text of Mr. BURLINGHAME'S address to the EMPEROR:—"The "mission with which we are charged is new. It is the first "time that China has sent an embassy to the Western na- "tions. This mission is the expression of the sincere desire "which China entertains of entering into the family of "nations, to submit her affairs to the enlightened judgment "of humanity as you submit yours, and, finally, of parti- "cipating in the advantages and benefits which international "law affords, and of which she desires to accept also the "obligations. This desire arose naturally when China was "able better to appreciate Western civilisation, in conse- "quence of the equitable policy inaugurated and maintained "by the representatives of the high contracting Powers "when they came into relationship with the eminent men of "the Empire." To this his MAJESTY replied by an expression of satisfaction at seeing China take such an important step, and at having to co-operate with such enlightened representatives, concluding with a few polite expressions towards each of the Ambassadors.

Mr. BROWN, the secretary, then advanced, and drew the letter of the Emperor of CHINA, containing the credentials, from a yellow satin case, embroidered with the Imperial dragons, and presented the document to the MINISTER of FOREIGN AFFAIRS. The letter was five or six feet in length, written on thick yellow paper, within a dragon border. The contents are written both in Chinese and in Manchou. After the official presentation the Ambassadors were carried back to their residence in the Champs Elysées in the carriages which had taken them to the Tuileries. All this may seem very trivial, but we think it worth while to recount it on account of the marked contrast it exhibits to the reception of the Mission in London—a difference which the French will not be slow in endeavouring to turn to their own advantage.

## THE TELEGRAPH TO INDIA AND CHINA.

HOWEVER distant the day when we may hope for a direct and efficient line of telegraph to the Straits and China, every improvement effected in the communication with India must be hailed with satisfaction as a step towards that much-desired end. We are glad therefore to see that the completion of the first portion of a new line—so successfully achieved last year by the Anglo-Mediterranean Company—is to be followed, without loss of time, by a renewed effort to lay a cable in the Red Sea, connecting Suez with Aden, and thence on to Bombay. As our readers are aware, the scheme has been some time in preparation, under the auspices of the promoters of the first section; but the capital will be furnished by a separate company, whose prospectus has been for some days before the public—long enough, indeed, for all the available shares to be taken up. The need of an independent line of telegraphic communication between this country and India, which shall be entirely under British control throughout, has now become imperative; and since the first Red Sea cable was submerged, and proved a failure, such vast strides have been made in the science of submarine, and in fact sub-oceanic telegraphy, that the project really presents no difficulties of importance. Should the enterprise be carried through successfully—of which there can hardly be a doubt—it will of course form a basis for further operations, with a view to the necessary extensions to China and Australia. It seems, however, that the British Indian Submarine Telegraph Company is not to remain the sole candidate for support in undertaking to provide direct communication with India, for another company is preparing its prospectus, and will be in the field in a few days, under the title of The Indian and Australian Submarine Telegraph Company. This company proposes to lay submarine telegraphic cables direct from England to India and Australia, via the Mediterranean and Red Seas, but it is intended, in the first instance, to construct the section between Suez and Bombay. In this instance, also, it is stated that large subscriptions of capital have already been promised, and the composition of the board is highly respectable. The cable is to be provided by the India-rubber, Gutta-percha, and Telegraph Works Company.

An ably-written pamphlet by Major LEVESON — better known to the reading world by his famous *nom de plume* of "The Old Shekarry"—advocates the adoption of an entire system of submarine cables, from Falmouth *via* Gibraltar and Malta, as the only plan which will secure entire freedom from all foreign political complications, inasmuch as the wire would then touch foreign territory at no point save where it crosses the Isthmus of Suez. The plan has decidedly great merit, and will most likely be some day carried into execution. A considerable portion of the pamphlet is devoted to an exposition of the inefficiency, insecurity, and excessive cost of the existing land lines; but these facts are now generally admitted, and the new Red Sea cable will render us independent of at any rate all land lines except those through Western Europe. The causes why the first Red Sea cable broke down are summed up as follows:—Firstly, no accurate preliminary survey was made, and the cable was laid without due regard to the inequalities and nature of the bed of the sea; secondly, it was laid in shallow water, over rocks and reefs, instead of in mid sea, where the bottom is mud and sand; thirdly, it was from the first injured by over-tension and jerks caused by the rude and imperfect paying-out machinery; and, lastly, its very construction was far inferior to those constructed of late years. These considerations are doubtless conclusive in favour of success in a new endeavour. As regards finance, our relations with Egypt, India, Australia, China, and Japan are much more extensive than with America, yet the submarine cable under the Atlantic Ocean is now gaining £250,000 a-year, and the traffic is so increasing, that another cable is now being constructed, at a cost of £1,100,000, to meet the required demand. There is little doubt that by the time two direct lines of telegraph to India can be completed there will be ample work for both.

## FRANCE AND JAPAN.

THE Ministry of Commerce in France is laudably occupied with the subject of the extension of trade with all parts of the East, and is taking very sensible measures to that end. M. JAQUES SIEGFRIED was sent out by the Minister some time since to report on the state of foreign trade with British India, Cochin China, China, and Japan, and has remitted to his Government four reports, the last of which—that relating to Japan—is now before us. This is in two parts, one relating to the commerce with Japan generally, the other relating to the means of developing French commerce with that country. M. SIEGFRIED prefaces the former of these with the cautious remark that we have as yet so much to learn respecting the economic, social, and political conditions of Japan, that all observations must be regarded rather as expressing probabilities than positive affirmations, and especially as wanting in anything like official information. He states that he has visited all the open ports with the exception of Ne-e-gata and Hakodadi, the former being one of the seats of war, while the latter, situated in the Island of Yesso, he considers as possessing little interest, and carrying on scarcely any trade but that in edible seaweed with China.

Nagasaki, M. SIEGFRIED believes, cannot be regarded as of much future importance, and recommends his countrymen to seek the other ports; he adds, however, that this port will always export three to four million pounds of tea, and a certain quantity of camphor and vegetable wax, and will supply the island of Kiu-siu with European manufactures, while its fine port must always attract a portion of the vessels navigating the Japanese seas.

Yokohama and Yedo.—The French commerce is stated as follows:—Principal imports, raw silk, to the extent of £1,400,000 to £1,600,000; silkworms' eggs, £600,000 to £1,000,000; tea, £400,000. Exports: Cotton yarn and prints, £800,000; woollen and mixed fabrics, £600,000; arms and steam vessels, £480,000; sugar from China, about £120,000; wine and liqueurs, £40,000; rice at times, from Hong Kong and Saigon, and some cotton from China. As regards the export trade, he says, the French do not yet sufficiently understand the tastes and fashions of Japan, and with the exception of cotton yarn and English shirtings, which are already looked upon as of first importance, the demand for goods is most uncertain. The new European concession at Yedo he considers well situated, and calculated to increase relations with this country, but he does not think that either this or the ports of Hiogo and Osaka will materially affect Yokohama, although the two latter ports may take away the tea trade and some of the exports of silk.

Osaka and Hiogo.—M. SIEGFRIED thinks that the European diplomatists made a mistake in asking for the opening of these two ports in the same district as entailing on the mercantile community double establishments; but, he adds, they will probably become the grand *entrepots* for the import of manufactured goods into Japan.

Speaking of the commercial relations between Europe and Japan, M. SIEGFRIED says: There are two kinds of undertakings which the Japanese must one day or other confide to Europeans—namely, the working of their mines and the construction of railways. If we believe rumour—which may exaggerate, no doubt, but which is doubtless based on truth—Japan possesses superb mines of gold, silver, copper, and coal, very badly worked at present, but which would give very excellent results under skilful treatment. Lastly, railways will captivate, and that before long, the imagination of the Japanese, and there will be several productive lines to establish—as, for example, from Hiogo to Osaka and Kioto, or from Yokohama to Yedo; and also, perhaps, from Kioto to Yedo. M. SIEGFRIED says that the commerce of India, China, and Japan with Europe amounted in 1867 to a total of one hundred and forty millions sterling, or more than double what it was ten years before; and when we consider that we are dealing with six hundred millions of inhabitants, the increase in this commerce ought to be still great and rapid. He thinks it therefore the duty of every Government to give its attention to the subject, and completes his report with a review of the part played by the principal nations of Europe at present, and a consideration of the position which France might and should take in the Far East.

At a first view, he says, the advantages are exclusively in favour of the English; they furnish nearly all the manufactured articles taken by the Orientals, who receive in exchange the major part of the productions of their soil. The French and Germans only import directly a portion of the raw materials they require, and have to go to London or Liverpool for the remainder, singular as may appear such an anomaly in the present day. As to the report of manufactured articles from Europe, France can scarcely be said to contribute, and though Germany and Switzerland have made notable progress during the last few years they cannot yet enter into comparison with England. The English then hold the first rank both as regards imports and exports, and their proportion of the trade is overwhelming.

It is not quite the same as regards the nationality of the merchants who preside over this commerce; the English still hold the first rank, but their preponderance is no longer exclusive. Formerly there were colossal firms in the East who, supported by immense capital and old and steady connections, carried on their operations with a very high hand and on a grand scale on their own account, and seemed to despise those more modest, but more sure and regular, advantages to be obtained by means of commission. The English then had a kind of monopoly, for large, daring and exciting business suits their enterprising character; they liked to act independently, to give their attention to large combinations and ventures, rather than to follow the detailed instructions of correspondents whose goodwill they must cultivate. These conditions have undergone a change; numerous banks have been established with enormous capital, facilitating business for all the world, and enabling men of small fortunes to compete with rich and generally less active firms. Old connections are undermined by the facilities afforded by railways, steamboats and telegraphs, and they, moreover, lose their preponderance in the general growth of commerce. It is no longer a question of monopoly of the aristocracy of capital; the trade with the East is now open to all the world, and everyone may take his small share.

Germans and Swiss have profited largely by this change; more active, harder workers, following their business closer than the English, they are no longer content to confine themselves to the growing yet still small business of their own country, but mix themselves up more and more with the commerce of England every day. The French, I regret to say, adds M. SIEGFRIED, are far from having done as much; not only have they taken no part in English trade, properly so called, but they have not assumed that position which the wants and situation of France and her company of steamers, making Marseilles its headquarters, should have secured. The French only carry on a portion of their own trade with India, China, and Japan. The exports of France consist of little more than some wine and liqueurs, a few woollens and haberdashery; and they can scarcely be increased until the progress brought about by the treaty with England shall have been felt in all branches of our industry, when our manufacturers, better informed respecting the tastes and habits of far-off countries, shall decide to produce articles adapted to the demand, and, by sacrificing a little quality, arrive at cheapness, and conform to certain indispensable changes in lengths and breadths of fabrics. As regards imports, France should not be content with the amount of her present considerable commerce with the extreme East. She has the right to assume a very good position, and I shall now examine into the means by which she may best achieve that object.

We, the French, says M. SIEGFRIED, are as intelligent as any nation; we are harder workers, more careful and more prudent than the English, and the few French houses that exist in India and Japan need not fear comparisons; what we want is, in the first place, that our young men should know what is passing abroad, and, secondly, that their education should render them more fit to quit their own country. As to the notion that the French are indifferent to foreign countries because they have more love for their own than the people of other nations, M. SIEGFRIED, like a sensible man, puts it aside at once, and says:—It would be difficult to persuade me that many young Frenchmen would not enter into foreign trade if their education had prepared them for it. The instruction given in France is not in unison with modern wants; we neglect modern languages too much, and hence we labour under a deficiency of practical men; it is necessary, above all, to teach English, the language of commerce, &c. This want in French education I regard as the gravest cause of the inferiority of our foreign commerce. We have our superior schools for the army and navy, for mining, civil

Digitized by Google

engineering, and even for industry. Why have we not the same for commerce?

Now, every English reader will be struck with the fact that the world gives France credit for the very thing which M. SIEGFRIED points out as her greatest deficiency. The organisation of schools has never been carried to such a pitch as of late years in France, who is held up daily as a model to England in this respect, often most ignorantly; there are two colleges in Paris alone principally devoted to commercial education. Mulhouse has done much in the same tract, the Chamber of Commerce of Paris has an admirable school of commerce, now five years old; in short, if education could supply the want there would be no cause to complain. M. SIEGFRIED misses the real causes, or rather, in drawing up a report for the Government, was compelled to avoid touching upon them. These are—the absence of individual action, which excessive organisation tends to lessen, and the conversion of all the able-bodied young men of France into soldiers. When agriculture complains of want of hands, it is not likely that foreign commerce will be well supplied. While Algeria languishes for active self-dependent men France is not likely to assume a place worthy of her in the Far East. M. SIEGFRIED could not lay his finger on the wound, which is open enough to economists in France, but he touches it when he says in his closing paragraph, in which he speaks of what has been done for commerce and communication—"I applaud with all my heart what has been done, for it has been well done; there remains only to fill up the plan that has been sketched, and this cannot be done without extending commercial education, and thus giving the taste for and possibility of the expansion of the individual action."

We have given the chief points of M. SIEGFRIED'S highly interesting reports, but we recommend our readers to read for themselves the documents *in extenso*. As already stated, this is the last of a series of reports on the Far East by the same gentleman. If these notes interest our readers, we propose to follow them by notices of the reports on China and Cochin-China.

---

THE Brindisi Route for the India mails has found a new advocate in the Duke of SUTHERLAND, who, while on his way to Egypt with other members of the Prince of WALES'S suite, has been visiting Brindisi, and seems to have examined with some attention the extensive works which are in progress at that port. After completing his inspection he was entertained at a dinner given in his honour by the authorities of the town. In proposing prosperity to Italy, his Grace said that Brindisi must undoubtedly become, *bon gré mal gré*, the port for the arrival and departure of the India mail. In a letter to the *Nazione*, he praises very highly the management of the Southern Railway Company, and says that he and his friends were surprised at the rapidity with which the journey to Brindisi was accomplished. The Duke appears to think that special arrangements were made for him, or at all events that the servants of the company had been instructed to treat him with special attention; but the *Nazione* says that such was not the case. He travelled by an ordinary train, as an ordinary passenger, and it was an ordinary saloon carriage that was placed at the disposal of himself and his friends.

---

IN our next issue will appear a highly interesting journal of a voyage from England to Japan by the Pacific mail route. We call particular attention to this, as the information it conveys will be found useful by passengers intending to proceed either to China or Japan by this new route.

## Monetary and Commercial.

At the meeting of the London Joint-Stock Bank, Mr. Donald Larnach in the chair, the report showed a net available profit of £58,592, which, together with £16,408 taken from the guarantee fund, was appropriated to the declaration of a dividend at the rate of 12½ per cent. per annum, being the same as at the corresponding date of last year. The liabilities of the bank on deposits and acceptances, which are lumped together, are £14,779,010, being an increase of £2,801,679, the paid-up capital is £1,200,000, the guarantee fund is £408,285, the Government securities held are £1,080,000, and the cash in hand is £2,023,462.

In th report of the National Bank, presented on the 26th inst., the directors have declared the usual dividend of 8 per cent. per annum, but they regret that they cannot on this occasion declare any extra dividend. The proposed distribution will absorb £60,000, leaving at credit of profit and loss £18,161. Since the last official reports the assets of the Bank have undergone a thorough investigation, and the directors have adopted the conclusions regarding the several items arrived at by the auditors. This will render it necessary to write off from the Rest the sum of £107,065 for losses on depreciated securities, and makes it expedient for the present to deal with the balance of that account (£323,400) by placing it as a guarantee account pending the realisation of collateral securities held for special advances.

The second ordinary general meeting of the Indo-European Telegraph Company (Limited) is convened for the 25th of February.

Circulars have been received from the legal advisers of Mr. A. Winterbottom, of Manchester, and Messrs. J. Oldfield and Co., of Bradford, announcing the necessity of each firm to suspend payment, in consequence of the long depression of trade. The liabilities of Mr. Winterbottom, a name greatly respected in mercantile circles, are estimated at £50,000, and the liabilities of Messrs. Oldfield and Co. are estimated at £22,000. The liabilities of both fall largely on Bradford. Another small firm at Bradford has also been obliged to succumb to the pressure.

A circular just issued by Mr. Herbert Townend, from 16, Mincing-lane, says:—"I beg to inform you that my business connections with the firm of Messrs. Townend Brothers (now Townend Brothers and Bovet) ceased on the 31st December last, and that I purpose continuing the business of a tea broker in my own name at the above address."

It is announced that the allotment of shares in the British-Indian Submarine Telegraph Company (Limited) has been made, and that Mr. George Gordon Nicol, chairman of the Chartered Mercantile Bank of India, London, and China, has joined the board.

For some time past there has been a considerable demand for bar silver for India, and the price has gradually advanced within the last fortnight from 60⅝d. to 61d. per oz. As the arrivals from the usual sources have not been extensive the greater part of the demand has been supplied by importations from the Continent. The price of Mexican dollars has naturally been influenced by the rise in other descriptions of silver, and they are firm at 59⅜d. to 59½d. per oz.

The dissolution is announced of the partnership heretofore existing under the style of Alt and Co. in Japan, and Alt, Hooper, and Co. in London. The business will be continued in Japan by Mr. W. J. Alt and Mr. R. Lindau, under the firm of Alt and Co., as formerly, while Mr. Hooper establishes a separate firm here as John R. Hooper and Co., who will act as agents for Alt and Co.

The call of £5 on the shares of Overend, Gurney, and Co. (Limited), recently stated to be necessary to meet the promissory notes due the 15th of March, has been sanctioned by Vice-Chancellor Malins. It is to be paid on the 1st of March.

Mr. H. G. Gordon has resigned the position of Chairman of the Oriental Bank, of which important establishment he had been a director for nearly a quarter of a century. Mr. Gordon is understood to have intimated that while conscious of his entire innocence of wrong in the affair of Overend, Gurney, and Co., he could not permit the possibility of the Oriental Bank being, under existing circumstances, prejudiced by his connection with it, and the board, in reply, are stated to have conveyed to him their unaltered sense of his honour and integrity.

The amount of bullion by the P. and O. Company's steamer Massilia, from Southampton on the 6th inst., was, in gold, to Galle, £2,934; to Bombay, £13,900; to Madras, £1,195; in silver, to Bombay, £82,000; to Madras, £2,000; to Hong Kong, £25,688; total in gold, £18,029; in silver, £109,688.

At the meeting of the London and County Bank, Mr. William, Nicol in the chair, the report showed an available total of £88,742 including a previous balance of £4,092, and a dividend was declared of 6 per cent. for the half-year, with a bonus of 2½ per cent., making with the previous distribution 16½ per cent. for the year, and leaving £5,817 to be carried forward. For the year 1867 the distribution was 20 per cent. The deposits held are £12,462,789, being an increase of £267,640 on the corresponding period of last year, and the acceptances covered by securities are £3,242,930, an increase of £1,452,770. The paid-up capital is £985,356, and the reserved fund £500,000.

A circular issued in New York, under date Jan. 1, announces that the late business of Messrs. Westray, Gibbes and Hardcastle will be continued henceforth by Mr. Fletcher Westray and Mr. Alfred H. Gibbes, under the firm of Westray and Gibbes.

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern Ports have somewhat improved since our last issue, and are firmer at the undermentioned quotations. Coal freights from the Northern outports are without material alteration.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 45s. meast. To Nagasaki: 45s. weight, 50s. meast. To Shanghai: 40s. weight, 45s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or meast. To Penang: 30s. weight or meast. To Ceylon: 20s. to 25s. weight, 35s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £43. For Shanghai: £43. For Hong Kong: £33. For Singapore: £27. For Galle: £23. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2 3s. For Shanghai: £2 5s. For Hong Kong: £1 15s. For Manila: £1 15s. For Singapore: £1 7s. 6d. For Galle: £1 4s.

The Admiralty have invited tenders for the conveyance of the following stores:—4 tons (light) fire-engine, 2 tons baths, 1 ton rope, oil, paint, &c., from the Thames for Colombo; and 37 tons navy provisions, &c., 1 ton navy medical stores (for receiving ship), 1 ton naval masts, 20 to 36 ft. by 3 to 7 inches, 3 tons (heavy) and 6 tons (light) naval common stores, 5 tons naval cordage, 3 tons naval sails, at Deptford; 1 ton (hy.) shells (including 4 ft. light combustibles), at Woolwich; to be shipped from the Thames, for Trincomalee direct.

## CASUALTIES.

The Wild Hunter, Bossance, from Batavia, for Bremen, which arrived at Falmouth Jan. 29, had slipped from an anchor and chain, and lost sails.

The Alfred, Gronow, from Liverpool, to Singapore, which sailed from Milford Jan. 24, after repairing, put into Falmouth on the 31st leaky, and with loss of bulwarks, main rail, and trusses of the fore and main yards.

The Cataluna (Spanish steamer), Escajadello, from Havana, for Macao, arrived at Rio de Janeiro, Jan. 2, leaky; another account, dated Jan. 7, states that she had put in in distress, and would proceed after coaling.

The Cinco Hermanos, Ormachea, which sailed from Liverpool Jan. 11,

Digitized by Google

for Manila, was wrecked off Cape de Mar, Vigo Bay, during a hurricane, about Feb. 1; crew saved.

Advices from Lisbon, dated Jan. 29, state that the Australian, Sprague, from Newport to Singapore, which put in there, Nov. 23, leaky, had been condemned, and was to be put up to auction Jan. 29; her cargo was sold on the 28th.

The Shannon, Spurwell, from Cardiff to Galle, put into Falmouth, Feb. 4, leaky.

The Washington Irving, from Cardiff to Galle, put into Falmouth, Feb. 4, with steering gear damaged and galley washed away.

Advices from Rotterdam, dated Feb. 4, state that the Vier Gezusters (Dut. ship), from Java, had got aground at Brouwershaven, and was assisted off by tugs and lighters.

The John Milton, of Jersey, Le Boutillier, which sailed from London, Jan. 25, for Cardiff and Shanghai, arrived in the Downs Feb. 2; she had slipped from an anchor and sixty fathoms of chain off Hythe.

The Carthage (?), Dutch barq., from Batavia to Rotterdam, was spoken with Jan. 31, in lat. 48 N., lon. 10 W., with 5 ft. water in her hold; the master, however, stated that he could keep the vessel free.

## MISCELLANEOUS.

At MADEIRA.—Jan. 16, Nahotka (str.), Brolin, from Southampton, and left 18 for Eastern Siberia.

At PORTO PRAIRA, C. V.—Dec. 18, Kin Lin, Whetton, from Cronstadt, and sailed 20th for the Amoor River.

At ST. VINCENT, C. V.—Jan. 13, Ocean Queen (s.s.), Temperley, from Glasgow, left for China and Japan; Indian Queen (s.s.), bound to Yokohama.

At PERNAMBUCO.—Jan. 8, Oryx, Gill, from Yokohama, and proceeded 13 for London.

At RIO DE JANEIRO.—Jan. 2, Cataluna (str.), Escajadello, from Havana, for Macao (see "Casualties").

At VALPARAISO.—Previous to Dec. 11, Amiral de Mackau, Letellier, from Rio de Janeiro, for Shanghai.

The crew of the Mystic Bell, from Manila to New York, which put into St. Thomas, Jan. 11, were mutinous; the vessel, however, proceeded on the 14th.

The British ship Sree Singapura, owned by Messrs. Mactaggart, Tidman and Co., arrived in the West India Docks from Singapore on the morning of the 6th inst. Captain Mackenzie, who commands her, must be congratulated on the most rapid voyage of the kind on record, having accomplished the passage out and home in seven months and five days, including a stay in port of twenty-one days. This is another illustration of the importance of employing a high class of ships in this trade, and of advantages derived from the new wharves and dock at Tanjong, Pagar, and Singapore.

## LAUNCHES.

On the 30th ult. there was launched from the building-yard of Messrs. R. and J. Evans and Co., Brunswick Dock, Liverpool, a new ship, named the Montgomery Castle, for the San Francisco trade. She is owned by Messrs. Richards, Mills, and Co., and will be commanded by Capt. Hughes, late of the Harlech Castle. Her dimensions are:—Length between perpendiculars, 185 feet; extreme breadth, 33 feet; depth of hold, 20 feet 3 inches; tonnage register, 850 tons; and takes the highest class in Lloyd's registry.

Messrs. Barclay, Curle, and Co., launched on the 28th ult., on the Clyde, a very fine iron sailing ship for George Marshall, Esq., London. The vessel is of the same type as those they have formerly built for this gentleman, registering about 1,460 tons. She was named the Wiltshire.

On the 30th ult. there was launched from the building-yard of Messrs. R. and J. Evans and Co., Brunswick Dock, Liverpool, a fine iron ship of 850 tons register, of the highest class. Messrs. Richards, Mills, and Co. are her managing owners. She will in a few days take the berth for San Francisco. Messrs. Evans and Co. have now on the stocks another iron ship of 1,100 tons for the same owners.

A large iron screw steamer, named the Viking, was launched from the yard of Messrs. Gourlay Brothers, Marine Parade, Dundee, on the 29th ult. Her gross tonnage is 860 tons; length, 205 feet; breadth (moulded), 29 feet; and depth (moulded), 17½ feet. Her engines are 100-horse power, and are furnished with a four-bladed screw propeller. She is owned by a number of Dundee merchants, Mr. R. A. Mudie being the managing owner, and is to be commanded by Capt. Morgan, formerly of the barque Nereid.

On the 29th ult. Messrs. William Denny and Brothers, Dumbarton, launched an iron screw steamer, the property of the Austrian Lloyds' Steam Navigation Company. The dimensions are:—Length of keel and forerake, 270 feet; breadth, 32 feet; depth, 26 feet; tonnage, 1,700 builders' measurement. Machinery of 300-horse power, on direct action surface condensation principle, by Messrs. Denny and Co., will be immediately fitted up on board. The vessel was named the Urano.

From the building-yard of Messrs. Whiddon and Harnden, Salcombe, on the 28th ult., a very fine-modelled brig:—Length, 104 feet; beam, 24 feet 6 inches; named Okenberg; to be commanded by Captain William Steer.

On the 3rd inst. from the yard of Messrs. Henderson, Coulborn, and Co., Renfrew, a paddle steamer, named the Kjobenhavn, for the passenger traffic between Aarhuus and Copenhagen. Her principal dimensions are as follows:—Length, 220 feet; breadth, 25 feet 6 inches; depth, 13 feet six inches. She is to be fitted with a pair of the builders' high and low pressure surface condensing engines of 200-horse power nominal, with feathering paddle wheels, and will, from her fine accommodation for passengers and speed, supply an important link, connecting Jutland and the port of Aarhuus with the capital of Denmark. The steamer will be commanded by Captain Brock.

## FOULING OF SHIPS' BOTTOMS.

A Mr. G. C. Wallich has brought forward an ingenious plan for remedying this evil, which he communicates to the *Athenæum* in the following note:—

"So many and multifarious plans have of late years been experimented on in the navy for preventing the fouling of ships' bottoms by incrustations produced principally through marine animals adhering to them, that I should scarcely venture to suggest another were it not, at the same time, so simple, so free from cost, and, as I believe, so likely to prove serviceable, that no harm can accrue even should it altogether fail.

"It is a fact well known to naturalists that nearly all marine animals die almost instantly if placed in fresh water. Indeed, fresh water appears to act upon them like a specific poison. What I propose is, that every ship, after coming into port, should be berthed for a brief period in a freshwater dock. Even if muscles, barnacles, and the like do not become disengaged by the change, they would in all probability die, and their increase either by growth or reproduction, both of which processes go on with extraordinary rapidity, would at all events be completely checked."

GELLÉ FRÈRES' PERFUMERY.

CHIEF ESTABLISHMENT, 35, RUE D'ARGOUT, à PARIS.

THE house of GELLÉ FRERES, celebrated for the superiority of its Perfumery, addresses itself to the fashionable world as much for its essentially hygienic, refreshing, and tonic preparations as for its delicate and distingué perfumes.

# CHINA TRADERS' INSURANCE COMPANY.

The THIRD ORDINARY MEETING of SHAREHOLDERS in the above Company was held at the Offices of the General Agents, Messrs. AUGUSTINE HEARD and Co., on the 7th October, at Three o'clock; G. J. HELLAND, Esq., in the Chair.

The CHAIRMAN read the following Report:—

The Committee have now the pleasure of waiting upon the Shareholders with a Report of the working of the company during the past twelve months.

The amount of Premia collected in Hong Kong and China between the 1st of November, 1867, and the 31st October, 1868, and the amount collected at the foreign Agencies within that period, of which the General Agents have received advice, after deducting all sums paid as bonus and commissions, and adding interest, amounts to Dols. 320,010.22. The outstanding averages and claims not yet settled, amount to Dols. 39,689.53 (it is expected that this item may be somewhat reduced). The annexed accounts have been audited by Mr. J. B. Taylor and Mr. E. Delbanco, the last-named gentleman having been appointed to take the vacancy caused by Mr. William Kaye having joined the committee. In accordance with the Articles of Association, the meeting will have to elect auditors for the coming year; Mr. Taylor has resigned, and Mr. M. P. Jukes has offered himself for election.

It will be seen from these accounts that after carrying forward to the next year's accounts Dols. 20,000 for premia received in respect of risks taken before October 31st, but not yet terminated, and after carrying forward Dols. 39,689.53 to Suspense Account to meet unsettled claims put forward, and writing off Dols. 1,856.04 from preliminary expenses, there remains a balance to the credit of Profit and Loss Account in respect of transactions already closed of Dols. of 140,000, and the committee recommend that this sum be declared available for distribution as profits of the company for the year.

The apportionment of this sum, if appropriated as being so distributable, will, under the 132nd Clause of the Articles of Association, be as follows:—The sum of Dols. 35,000 to be carried to the reserve fund, and invested by the committee; the sum of Dols. 35,000 to be divided *pro rata* among contributing shareholders, and the sum of Dols. 70,000, or Dols. 350 per share, to be paid to shareholders as general dividend.

In accordance with the 86th Clause of the Articles of Association, two members of the present committee (Mr. Helland and Mr. Kaye) retire from office at this meeting, but being eligible, offer themselves for re-election.

GEORGE J. HELLAND, Chairman.

## ASSETS.

| | Dols. 57,000.00 | | |

Audited and found correct by (Signed) J. B. TAYLOR, E. DELBANCO, } Auditors.

Hong Kong, 31st October, 1868.

AUGUSTINE HEARD and CO., General Agents.

He then said if there was no shareholder who wished to comment on it, he would recommend its adoption.

Mr. MELLISH seconded the adoption of the report, which was carried unanimously.

The CHAIRMAN then mentioned that according to custom the auditors retired, but were eligible for re-election. In this instance, however, Mr. Taylor retired, and Mr. Jukes had expressed his willingness to serve.

Mr. KAYE accordingly proposed that Messrs. Delbanco and Jukes be re-elected Auditors of the Company for the ensuing year, and that the remuneration of each be as formerly, Dols. 250 per annum.

The Hon. J. B. TAYLOR seconded the motion, which, on being put to the meeting, was carried unanimously.

The CHAIRMAN then reminded the meeting that two members of the committee, Messrs. Helland and Kaye, retired according to the 86th Clause of the Articles of Association, but were eligible for re-election.

Viscount Do CERCAL proposed that the same two gentlemen be again elected.

This was seconded by Mr. G. HEARD, and unanimously carried.

The CHAIRMAN then observed that there was no more business before the meeting, and he was pleased to be able to congratulate the shareholders on the success of the company's operations during the year, hoping that with the usual care of the general agents, the next and many succeeding years would be as brilliant.

A vote of thanks was then given to the chairman, and the meeting separated.

**RAWLING, MEDLEN, & CO.,**

ARCHITECTS AND CIVIL ENGINEERS,

HONG KONG,

BEG to inform their CLIENTS and Others interested in Landed or Household ESTATES in CHINA, that Mr. J. STUDD, of their Firm, who has had seven years' professional experience in HONG KONG and the COAST PORTS, will be returning to the East in April, 1869, and will be open (meantime) to meet by appointment parties desirous of consulting him respecting improvements or other matters connected with their property.

ADDRESS,

20, WESTBOURNE PARK CRESCENT, HARROW ROAD, PADDINGTON, LONDON.

**TO PARENTS IN INDIA AND CHINA.**

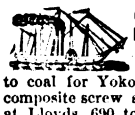
| Shanghai ... | W. Melhuish | 707 | A1 14 yrs. | Feb. 15 |
| Yokohama and Hiogo | C. J. Textor (s.s.) ..... | 690 | A1 16 yrs. | Feb. 15 |

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., No. 8, York-street, Manchester; or 27, Leadenhall-street, E.C.

CALCUTTA DIRECT.—MONTHLY LINE.—To leave the docks on the 20th February, the magnificent clipper ship STONEHOUSE, A1 13 years, 1,153 tons register, O. BLEY, Commander; loading in the East India Docks. This splendid vessel, built in 1866, is strongly recommended to shippers of fine goods.

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., 8, York-street, Manchester; or 27, Leadenhall-street, E.C.



STEAM TO JAPAN.—To leave the East India Docks on the 15th February, with leave to call at St. Vincent, the Cape, and Singapore, to coal for Yokohama and Hiogo, the splendid new composite screw steamer C. J. TEXTOR, A1 16 years at Lloyds, 690 tons register. This fine high-classed vessel has beautiful accommodation for cabin passengers, and presents an unusually good opportunity to shippers, as she will steam the whole way out.

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., 8, York-street, Manchester; or 27, Leadenhall-street, London, E.C.

BOMBAY DIRECT (under engagement to the Council of India), the magnificent iron clipper ship COLDINGHAME, AA1 (owned by Messrs. John Willis and Son, 1,072 tons register, J. M. WHYTE, Commander; loading in the East India Docks. This beautiful vessel, built in 1866, offers a most desirable opportunity to shippers requiring despatch.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 8, York-street, Manchester; or 27, Leadenhall-street, E.C.

Regular line of Packet Ship. With despatch.

FOR HONG KONG, the splendid clipper, RIVER CLYDE, A1, 499 tons register; W. TREVENA, Commander; London Docks.

For Freight or Passage apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

To follow the "Sarah Watson." Will meet with the usual quick despatch.

DIRECT for COLOMBO, the beautiful clipper ship WAR CLOUD, A1 10 years, 406 tons register: JOSEPH IRVINE, Commander; West India Docks. This magnificent vessel is considered one of the fastest afloat, her last passage from Colombo being eighty-eight days, and offers a most desirable opportunity to shippers of fine goods, as she will not carry creosoted sleepers, or manure of any description.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St Helen's, Bishopsgate-street, E.C.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships, and repair and refit of STEAM MACHINERY AND BOILERS.

Their large Granite Dock is 307 feet in length, fitted with a caisson-gate, and with a centrifugal steam pump of great power, ensuring despatch in all states of the tides. At average spring tides this dock can receive vessels drawing 16 to 17 feet, and during the autumn and winter months 18 feet. Their two smaller docks, also built of granite, can receive vessels drawing 12 to 13 feet.

The premises comprise a large smithy and boiler shop, carpenters and boat-builders' shops, an ENGINEERS' WORKSHOP, fitted with lathes and tools driven by steam, AN IRON FOUNDRY for castings up to 5 tons weight, and a BRASS FOUNDRY.

The different departments are superintended by experienced Europeans, viz., engineer, blacksmith, an shipwrights.

The Company keep on hand copper and metal sheathing, spars, timber, paints for iron vessels, and all material for dockyard use.

A DRY GODOWN for reception of stores of vessels requiring to discharge them.

Good quarters for officers of ships under repair in t dock.

Amoy, 16th December, 1867.

## NOTICE.

THE PARTNERSHIP hitherto existing under the style of ALT and Co. in Japan, and ALT, HOOPER, and Co., in London, was dissolved on the 31st Dec. last, by mutual consent.

Mr. W. J. ALT and Mr. RICHARD LINDAU will continue the house in Japan under the style of ALT and Co.

Mr. JOHN R. HOOPER has established himself under the style of JOHN R. HOOPER and Co., at 32, Great St. Helen's, London, and will act as special Agent for ALT and Co., of Japan.

Just published, price 6d.,

## THE STRAITS SETTLEMENT; or, HOW TO GOVERN A COLONY.

BY A SINGAPORE MERCHANT.

A. H. BAILY and Co., 3, Royal Exchange-buildings, Cornhill, E.C.

LIEBIG COMPANY'S EXTRACT OF MEAT.—PARIS AND HAVRE EXHIBITION GOLD MEDALS.—CAUTION. None genuine without Baron Liebig, the inventor's, signature, being on every jar, accompanied by full printed directions. About seventy pints of excellent beef tea for 11s., the present reduced retail price per pound. Finest, most convenient, and by far the cheapest meat-flavouring ingredient for soups, made dishes, and sauces. Sold by all Italian warehousemen, chemists, grocers, ship chandlers, and provision dealers.

HOLLOWAY'S OINTMENT and PILLS.—RHEUMATISM AND GOUT.—These purifying and soothing remedies demand the earnest attention of all persons liable to rheumatism, gout, sciatica, or other painful affections of the muscles, nerves, or joints. The Ointment should be applied after the affected parts have been patiently fomented with warm water, when the unguent should be diligently rubbed upon the adjacent skin, unless the friction should cause pain. Holloway's Pills should be taken simultaneously, to reduce the inflammation and to purify the blood. This treatment abates the violence, and lessens the frequency of gout, rheumatism, and all spasmodic diseases which spring from hereditary predisposition, or from any accidental weakness of constitution. The Ointment checks the local malady, the Pills restore the vital powers.

# TANJONG PAGAR DOCK COMPANY

(LIMITED).

## VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th inst. In the high tides of the North-East Monsoon there will be a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is now in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

### THE MAILS, &c.

The delayed French Mail, with Hong Kong advices to Jan. 3, was delivered just as we had gone to press with our last issue, and the budget of news being meagre and unimportant, we did not deem it expedient to publish again immediately. The present issue is consequently largely increased in size, and contains the matter of two ordinary numbers.

The next inward mail will most probably be that leaving Hong Kong Jan 26, and due here on the 8th proximo. The French mail left Hong Kong on the preceding day, but was two days late at Galle; it will probably arrive just after the English if not simultaneously with it.

Telegrams in advance of these two mails were received via Galle on the 15th and 16th inst. respectively. Grant's Kiachta line is again open for telegrams to China and Japan; full particulars will be found in our advertising columns.

## List of Passengers.

### PASSENGERS INWARD.

Per French mail steamer, arrived at Marseilles Feb. 6.—From Yokohama: Gen. Martin de Palliére, Capt. Vigne. From Shanghai: M. Vignier. From Hong Kong: Messrs. Hitchcock, Batise, Frere Dubas, Sieur Nubais, Sieur Cavagniac. From Saigon: Captain Martin, Lieut. De Verneuil. From Singapore: Signor Don Arvilit, Messrs. Van Leuven, Plasberg, Lucardi, Mr. and Mrs. Bayor, Mr. and Mrs. Brevet. From Batavia: Messrs. Clifford, Voller, Mdme. Flugi.

By this mail to Marseilles, per P. and O. steamer *Delta*, arrived February 19.—From Yokohama: Mr. C. Barrow. From Shanghai: Mr. A. Provand, Mr. and Mrs. Dickinson, three children, and two servants. From Hong Kong: Mrs. Pirkis, Mr. J. F. Ballance, Mr. and Mrs. Maltby, and one second-class passenger. From Singapore: Mr., Mrs. and Miss Huismans and servant.

To Southampton, per P. and O. steamer *Bangalore*, expected to arrive Feb. 27.—From Shanghai: Mrs. Coghill, child and servant, and one second-class passenger. From Hong Kong: Commander Stephenson and servant, Captain Heaslop and servant, Mr. J. To Suez.—From Singapore: Mr. C. H. Crawse.

## Summary of News from the Far East.

### JAPAN.

#### HIOGO AND OSAKA.

From Hiogo and Osaka we have dates to the 19th Dec. The Hiogo Municipal Council is setting us an excellent example, but it is composed of young active men, and has plenty of money. One of their votes we notice of 30,000 boos for improving and lighting their streets, draining them, and planting them with trees! Their Chamber of Commerce is also active, and has just adopted a very sensible report on the management of the bonded warehouses, recommending, among other important reforms, a reduction of the scale of charges, which is likely to bring increased business and a larger income to the native Government. Colonel Scott Stewart, the American Consul, has been issuing a notification forbidding captains of American ships to give shore leave to their men, and holding them responsible for any assaults committed by the sailors either on board ship or ashore. This has naturally created a considerable excitement amongst the "free and enlightened," and it appears, indeed, legally impossible to punish one man for another man's crime.

#### YEDO.

(FROM A CORRESPONDENT.)

Yedo, now the city of the Mikado, is consequently for the time being the capital of the Empire. The policy which has brought about the downfall of the Shiogoon, or Tycoon, has been advocated all along by Sir Harry Parkes, in opposition rather to the views of his ministerial colleagues, who are for the present nonplused. There are many here, however, who believe that the allegiance given in by the Daimios is by no means to be depended upon, and that raids similar to that at Hakodadi will be repeated, and thus keep the unhappy country in civil war for a prolonged period. The leading Southern Daimios are Satsuma, Choshiu, Tosa, Bosen, and Hizen; on the north, Aidzu, Shonai, Sendai, Akita, Nambu; and the continuance of the present order of things is doubtful. Most of the foreign Ministers favour the old regime of the Shiogoon, and have no confidence in the present state of things. The Mikado has no real power; it is all derived from the Daimios, who are perpetually quarrelling with each other.

The city of Yedo in the official quarter has still a very deserted appearance, but the business part has decidedly improved of late. The streets are well kept, and are wider than those of China; indeed they are much superior, and there is an absence of the wretched smells so frequent in Chinese cities. The shops, however, are by no means equal to those of China. The Japanese are infants at trade compared to the Chinese, and most of the foreign bankers, merchants, &c., in Yokohama are compelled to have Chinese to conduct their business. This is to be regretted, as it prevents, to some extent, free intercourse between the foreigners and the Japanese, and the profits to some extent we know will be secured by the wily Chinese.

The hotel at Yedo is one of the greatest marvels of the age. The traveller from Europe will find a building that would be a credit to any first-class city in Europe. The building stands on a site on the margin of the bay, surrounded by grounds very tastefully laid out, and grass covered mounds. The length is about two hundred feet; breadth, —; height of tower, which commands a fine view of the city, bay, and the ever-adored mountain of Fuziama, eighty feet. The accommodation is equal to about one hundred visitors, according to the size of apartments in this country; in Europe it would be made to suit three hundred. In addition to the dining-hall, there is a billiard-room and drawing-room, with large corridors and verandahs. The living and general supplies are very satisfactory, and the terms, 3 dols. per day, very reasonable. The building was erected by some Japanese merchants, and is worked by them; but no doubt it is part of the policy of the Government to quarter us in one corner, and keep

Digitized by Google

us isolated. Our representatives do not combat, but rather favour these proceedings. The management of the hotel is in charge of Mr. Thomas G. Browne, an Englishman, who has succeeded very creditably in organising the various departments.

## YOKOHAMA.

The present mail brings advices from this port to the 30th December. The latest dates received from England were to the 23rd October, the outward mail of that date, which reached Yokohama on the 16th December, being followed the same day by the overdue French mail of October 18. The latest London telegrams were to November 23. The Pacific mail steamer *China*, from San Francisco (December 2), was a day overdue when the present mail left. The *Japan* left Yokohama for San Francisco on the 28th December, with 1,400 tons cargo, 16 European, and nearly 500 Chinese passengers, of whom 260 were females. [Her advices were received in London, *via* New York, last week.]

The *Japan Times* sums up the news of the fortnight as follows:—

The only political news we had to give in our last was of the important move made by Enomoto, late admiral of the Tokugawa fleet, in descending on the Island of Yezo and threatening Hakodadi. We have now to confirm this intelligence, and to add that the pirates are in temporary possession of Hakodadi, its small garrison having had to retire before the superior force. Mr. Adams, Secretary to the British Legation, went up in the *Satellite*, which vessel, with the *Argus*, and H.I.M. *Venus* left Yokohama for the north on receipt of the first news, for the protection of foreign interests.

The idea of a settlement of the Tokugawa clan in Yezo is no new thing; it was mooted months ago, when—it being absolutely necessary that Yedo should be abandoned by them, as a clear visible sign to the people of the overthrow of the family and the hated Shiogoonate vested in it—the question arose, "What's to be done with them?" The main difficulty in the way of their disposal in Yezo was that a large number of the clan persistently refused to become Mikado's men and to submit themselves to the jurisdiction of his officers. This was never got over, and hence the split in the clan, the chiefs—the ex-Shiogoon, Kamenoski, and Stotsbashi, with what we may call the respectable part of the family, submitting and being comfortably settled, as we have seen, in Suruga, while the rowdy element, with all the *lonins* and other kindred spirits they could pick up, ran away with most of the ships and treasures of the clan, of which they are now making good use. A clearer case of robbery and piracy has seldom been seen; but whether it will be punished as it deserves is doubtful. Of course it is out of the question that the port of Hakodadi can be anything but a Government port, and this, at all events, will be retaken, for which purpose troops are now on the move. But Yezo is an extensive, wild country; and entrenched there, aided by the advice of the French adventurers they have with them, and morally supported by some of the Foreign Ministers here, who presume on the long distance they are from their chiefs for immunity in an obstructive policy, it will be a hard matter to root them out.

Both Yedo and Nee-e-gata will be open to British Trade on the 1st of January next according to a Notification by H. E. Sir Harry Parkes just issued. Arts. VIII. and IX. of the general arrangements for the settlement of foreigners at Yedo published on the 26th November last year are slightly modified. Any foreigner visiting Yedo must be furnished with a passport from his Consul, *visé* by the native officials, and this he will have to show at the ferry at Kawasaki, if journeying to the capital by land, or at one of the two landing places appointed for foreigners, if proceeding thither by sea. Certain parts of the city are also indicated as unsafe for us at present. Dr. Willis, Vice-Consul for the district of Yedo and Yokohama, will be stationed at Yedo, and Mr. F. Lowder goes from Hiogo and Nee-e-gata as Acting Consul.

The Princes of Aidzu, father and son, are both in Yedo, awaiting the Mikado's decree on their case. Each is in charge of another Daimio, which is equivalent to imprisonment among the nobility of Japan. We need hardly state that the absurd nonsense current during the fortnight, representing Aidzu as restored to favour and high office, entering Yedo in state with a score of Daimios, &c., some of which will be doubtless sent home by this mail, is all utterly false.

[FROM A CORRESPONDENT.]

YOKOHAMA, Oct. 18.

H.M.S. *Pearl*, Captain Ross, left this morning for Formosa, in compliance with orders from Admiral Keppel; three other vessels are ordered to join Captain Ross, and the Admiral will also proceed there on his return from Singapore. This little squadron is intended to bring to a point the many grievances we have against the Formosans.

H.M.S. *Argus* has followed the *Satellite* for Hakodadi, for the protection of British property and subjects. A native steamer came in yesterday with the news that the fleet of Innamato (of which intelligence went home on 16th) had actually landed forces and taken Hakodadi, driving the Southern (Mikado's) troops out of the place. The landing party was headed by Captain Brunet, a French officer in the service of the late Shiogoon, or Tycoon as it is still called here by foreigners. The rebel force consisted of Captain Brunet and seven other French officers, naval and military, some deserters from their own service. The force was, a Japanese corvette, the *Kayomar*, twenty-five rifled guns; *Eagle*, eight guns; and four transports, with 4,000 troops of the late Government. These troops landed in Volcano Bay, and after several skirmishes fought their way through thick snow to a strong battery called Kamittor, built by Japanese under Russian superintendence. This battery was taken by storm, and an entrance into Hakodadi followed—the Mikado's troops taking shelter in a steamer, and proceeding to Tsugono, on the other side of the Island of Yesso. One of Satsuma's steamers, the *Kiangsoo*, was also taken by the rebels. It is believed that the Russians were at the bottom of this, and eventually will secure Saghalien.

The brother of Stotsbashi arrived per French mail, and should events bring up the Shiogoon again, he will be put forward, although Stotsbashi and his Daimio friends would in reality be the rulers. At present the Mikado is entirely under the thumb of the Daimios, and there is no Government in the proper sense of the term.

This affair at Hakodadi has destroyed the expectations, which looked promising, for peace, order, and consolidation of the Southern power under the Mikado and the final overthrow of the Shiogoon.

Sir Harry Parkes has, somewhat in opposition to the other Ministers, taken the side of the Southerners. There are many sympathisers with the North, and as much aid and comfort afforded them as they can pay for. A settlement of all differences would stop the sale of arms and the chartering of steamers, and many other sources of profit.*

A meeting of landowners, to consider the municipal government of the place, and the duty of the Japanese Government, is to be held on Monday next, the 21st. The American and Prussian Consuls still retain the ground rents against claims put up by their subjects against Japanese.

M. Poelsbroek, the Dutch Consul-General, expects to leave shortly for Europe, leaving M. Van der Tak, the Consul, in charge.

The troop ship *Adventure* arrived from Shanghai, *via* Hiogo, towing the old *Acorn*, sold by Government to Messrs. Wilkin and Robison, as a coal hulk for this harbour, for 7,000 dols. The *Adventure* leaves again for Hong Kong with the officers and men of the lost *Rattler*, to be transferred there to the fleet and some to England.

DECEMBER 30, 1868.

The opening of Yedo and Neegata, which I informed you would take place early in the year, has now been confirmed by an official notification from Sir Harry Parkes. In regard to Yedo the opening is completed, with a restriction that all British subjects (except officers in uniform) passing up to Yedo must obtain a passport from the Consul. This is certainly a very extraordinary manner of opening a port to trade, and the paternal care of Sir Harry will not be appreciated. The distinction drawn between officers and merchants is another step to degrade the latter in the eyes of the Japanese. While rollicking midshipmen and overbearing officers clothed in a uniform may go to Yedo without a pass, the merchant who has a real stake in preserving order must be treated as unfit to be trusted. Have not officers of all nationalities committed more atrocities and been instrumental in producing more rows than merchants? The scope given to English trade has always been narrow and timid, and so long as it is persevered in we must submit to the paraphernalia of Yaconin guards (who are no use in cases of attack, for they keep behind you), and otherwise be treated like children. Now that Sir Harry has been so successful in advocating the winning cause, the notification of the opening of Yedo must be looked upon as extremely unsatisfactory. British merchants, however, do not find advantages conferred upon them in consequence of his success. Does Sir Harry really keep them in his eye, or is he entirely absorbed with the political game, and loses sight of the main point, viz., the promotion of our trade for the benefit of the national exchequer, through the medium of our merchants? What is our trade in Japan compared with the cost of the Embassy and Consulates, our ships of war and the military station here?

Nothing is said about the site for our merchants to build on at either Yedo or Neegata, and until this was arranged with the Japanese the blank notification that they are opened practically means nothing. No advantages are offered over the present system of visiting Yedo accompanied with a pass and Yaconins, and putting up at the hotel. To call this opening a port is a misnomer, a burlesque, and the notification certainly premature. It should have been withheld until some real advantage was bestowed for conducting trade at Yedo.

Mr. F. O. Adams, the Chief Secretary of Legation, has gone to Hakodadi to give Mr. Consul Eusden the benefit of his advice, and the views of Sir Harry Parkes on the hostilities lately enacted there, the particulars of which went home by last mail. Up to the present advices no inconvenience has resulted to foreigners. The leader of this attack is commonly styled Admiral Enamoto; he was educated for five years in Holland.

As it appears that the location of troops is to be a permanent institution, although a decided mistake, the attention of the War Office should be directed to the erection of substantial barracks and officers' quarters, the buildings (or huts, rather) now used having been run up for temporary occupation, and being most

* The P. and O. steamer *Azoff*, announced for Hiogo, has been withdrawn and chartered for Hakodadi by the Japanese Government. This is the first P. and O. steamer so chartered. The American steamers have had the most of it.

Digitized by Google

unfit for the heat and cold of this climate. Both men and officers are subjected to the greatest possible discomfort, which is disgraceful to our service. Being condemned to a life of inactivity, it is the more necessary that the accommodation should be comfortable. The usual policy of waiting for a wholesale loss of life is the one that will obtain here. Another grievance is that the allowances for officers do not equal those at Hong Kong, and we all know they are small enough.

The frightful fire of 1866 completely scared the insurance offices, and the rates charged have been excessive. It is estimated that insurance premiums amount to £50,000 per annum. They have less cause now to charge such rates, seeing that the residents here have organised a fire brigade, which, judging from a drill lately gone through, would be quite able to cope with the next fire. This brigade is under European direction, and the leading spirits in it are Mr. Smith, of the club, and Mr. Heght, who has already received a testimonial for his services in the shape of a splendid tankard. These two gentlemen give their services gratuitously. The number of fire-engines in the Settlement is about a dozen, of which five belong to the brigade, and there are about one hundred Japanese paid, and say one hundred more, belonging to the mercantile houses, who join on the alarm of fire. The expense of this brigade is met by the contributions of the community, the amount subscribed being about 2,500 dols., the largest portion by firms who act as agents for insurance offices. The offices at home would do well to send out a few good engines and a large supply of leather hose, and one steam engine. These appliances, organised by foreigners, are quite independent of the Japanese, who have several brigades, and a good number of small wooden engines.

Mr. Hogg, who has charge of the Japanese bonded warehouses, will be enabled soon to publish a revision of the tariff for storage, and also a simplification of the forms for conducting business. A scheme is also in progress for insuring goods in their godowns, which are first rate stone buildings, detached, and surrounded by a stone wall, and in every way to be considered a first class risk. The Japanese Government will issue policies at a much lower rate than that charged by the English offices generally, which at present are ½ per cent. for one or two months, 1 per cent. for three months, and 1½ for six months. The Japanese propose to charge ¼ per cent. for one or two months, and ⅛ per cent. for succeeding months. The Japanese will thus be in advance of us in our ideas on insurance.

The Japanese show every disposition to make a liberal expenditure in the way of improvements for foreign trade. The yearly receipts from import and export duties cannot be less than a million of dollars.

The erection of bonded warehouses has been a loss to them, the goods brought here for export being inconsiderable, but with Hiogo and other ports opening its utility will increase. It is unfortunate that the Japanese were recommended to build them instead of establishing a system of drawbacks.

The registration of foreigners and the charge of 5 dols. still continues notwithstanding a good deal of opposition. The Chinese pay a sum of 3 dols. up to 15 dols., according to their positions. The sum thus raised from Chinese goes to the municipal expenditure, of which Mr. Benson is now the administrator. In its relations to foreigners public street lights are most urgently required, and it is to be hoped that he will be able to secure this shortly. Meantime, however, it is inexcusable that the residents do not have a lamp at their gateways, which would relieve the present uncomfortable state of things, to say nothing of the danger of assault by Japanese or drunken sailors; especially are lights required at the landing-places, and a better class of boat for the harbour.

The business in chartering and selling steamers continues, but the latter has become very difficult; the Japanese now see that they have paid dearly for their amusement. Most of the steamers bought are ruined by Japanese engineers in twelve months and less. One firm here, Messrs. Walsh, Hall, and Co., have in their charge, for employment or sale, nearly a dozen steamers, besides which there is quite another dozen, and the spare steamers of the P. and O. Company and Pacific (American) Company.

The settlement is just now very lively. On the 17th Mr. and Mrs. Stone and others, from Australia, constituting a theatrical company, were aided by the amateurs, including Mr. Seare, well known to old China residents for his theatrical talent. The piece was "The Hunchback," and our friend Mr. Seare took the leading part of *Master Walter* with admirable skill. On the 21st the combined amateur force came out in "Kenilworth" with great success. The officers and some of the crew of the American gunboat *Maumee* gave a minstrel performance.

The weather has not been equal, on the whole, to the autumn in Japan, but still we have had some very bright days—the thermometer ranging about 60 degs. in the day down to freezing point at night. The quantity of rain throughout the year has been double the average.

The Japanese Dictionary, brought out here by Dr. Hepburn,* is in extensive use here amongst foreigners and Japanese, and liberal offers have been made to the worthy doctor to bring out a new edition, but his health at present does not permit his undertaking the matter.

* London: Trubner and Co.

The old China sport of paper hunts, both on horse and foot, is much in vogue here, the cold weather suiting this exercise well, as also the nature of the country round the Settlement, composed of hills, bridges, marsh, and beach. At a foot race run this week the hares were followed by about forty or fifty of the mercantile community, officers of the army and navy, &c. The distance run over was about six miles.

Messrs. Aspinall, Carnes, and Co. have been appointed agents for Lloyds at Yokohama.

The English Church at Yokohama is a very poor building, and the site chosen by no means creditable to the taste of those who selected it, cramped up near the dirty creek which runs along the Settlement. The building itself has no spire or tower of the finish usually bestowed on a colonial place of worship. It has not reached the dignity of an organ. Such as it is, Mr. Bailey, the chaplain, does the best possible to make it comfortable, but the sooner a new one is built on a clear and more pretentious site the better for English credit. The cemetery is also in a wretched condition. Here is the resting place of the victims Richardson, Baldwin, Bird, and others. By the way, the friends of Richardson who got his money might have sent out a decent stone for the grave.

The following Consular changes will shortly be effected. Mr. Lowder, at present acting Consul at Osaka and Hiogo, is to be transferred to Neegata. Dr. Willes, of this place, to be Vice-Consul at Yedo. Mr. Walsh, who has borne all the heat and burden of the day from the earliest days of Sir Rutherford Alcock, proceeds to England next month on leave, and it is to be hoped will receive his promotion.

At present we have only in harbour H.M.'s ship *Ocean* (iron-clad) and *Cormorant*. The *Argus* is expected back from Hakodadi. The Italian frigate, *Princess Clothilde*, arrived on the 24th, which will add to the importance of the Comte de la Tour, Italian Minister, in the eyes of the Japanese, and no doubt his own.

Unlike China, where all foreigners learn "pidgin English," the foreigners here learn Japanese, which is certainly a more sensible process. It is easily acquired—that is, the language necessary for all ordinary intercourse. The study of the Japanese to acquire it properly is, of course, a more laborious process, and involves a course which people engaged in business cannot give the time to. But to be able to make yourself understood in any part of the country is a great advantage.

The disposition to adopt European toggery is truly amusing, and the proportion large. The Inverness cape is a special favourite, and is made out of blankets and all descriptions of cloth. Felt hats and leather boots, and even spurs, are very common, and the appearance of the Yokomins, and others who use them, is truly grotesque.

The Hon. W. Coke, brother to the Earl of Leicester, with his travelling companion, Colonel Smith, of the Guards, leave here in a few days for Hiogo and Osaka, *en route* for China.

Messrs. Brunton and McVean, the civil engineers who lately arrived from England under engagement with the Japanese, are now fairly at work. The coast and harbour lighthouses are receiving their first attention. Mr. Brunton is now out on a survey of the coast to fix on the most suitable spots, and on receipt of some plant and material, with English mechanics, now on the way out, we shall soon see lighthouses springing up. A light ship is building here, to be moored at the entrance of this anchorage, and buoys for the different spits which run out in the entrance, the principal one being the Souratogit. Workshops and dwelling houses are in course of erection for the engineers and workmen. The lighthouse at the entrance of Nagasaki is now completed and lighted. The question of drainage has also their attention, and plans, specifications, and estimates for an effective system of covered drainage will soon be ready. It is to be hoped that Mr. Brunton will succeed in inducing the Japanese Government at the same time to lay down gas and water pipes, the expense of which would be reimbursed in time by the community. To lay down drains now, and a year hence dig up again for laying pipes would be indeed a mistake, and great inconvenience to the community. We trust the Japanese Government will be disposed to take this matter in hand, as it is very much needed, and cannot be dealt with by any private individual. One or two failures have already occurred.

The fashion of having residences on the hills adjacent is on the increase, and a few years may see the Settlement used chiefly for offices and godowns. There can be no question about the superior advantages for married people with families. The walks and rides for children in the Settlement are not of a healthy or exhilarating description, whilst on the hills good gardens may be secured in addition to healthy walks.* The British Legation and all the troops are located on the hill or bluff washed by the sea.

The sites in the Settlement were not put up at stated prices, but the purchasers paid the native occupant sums varying up to 265 dols., and a ground rent of 28 dols. per 100 tsuboes annually to Government. A few lots in the Settlement were put up last month at 4 dols. per tsuboe, and were run up to 14 dols., subject to the annual ground rent of 28 dols. per 100 tsuboes. There are 1,236 tsuboes to the English acre. There is an opinion in some quarters that the opening of Osaka and Yedo will somewhat lower the value of property here, but I do not concur in this, and am of

* The land in this locality is of course much cheaper than in the Settlement.

Digitized by Google

opinion that the anchorage and general business facilities here will be unequalled, and Yokohama must remain the great centre.

H.M.S. *Adventure* leaves on the 24th for Hong Kong, with the officers and crew of the lost *Rattler*, for transfer to England, and about 110 time-expired men, with women and children, from the 10th Regiment, now stationed here.

The engineering yard of Messrs. Lucy and Co. on the Creek is now equal to almost anything in the shape of engineering, and Japanese workmen for moulding, casting, &c., are found to be very skilful. The Japanese foundry, established under French auspices has been engaged chiefly in constructing small marine engines, the vessels being built at the larger works at Yokoska, noticed in my last.

Yokohama, like other places of English formation, has its amusements and healthy recreations. Christmas-day was one of the most charming days ever experienced. The decorations with evergreens and red-berries extended to almost every house. The church was certainly the prettiest, thanks to the chaplain's wife, Mrs. Bailey, and assistance from Mrs. Simpson, Miss Brooke, and others. A very good Christmas custom also prevails here of presenting the chaplain with a purse, contributed by the community, valued generally at about £50. Mrs. Hepburn raised a very handsome Christmas-tree, and a large assemblage of ladies and children attended at the distribution of the gifts. The sun shone bright, and warm enough to be enjoyable, with just a light northerly wind. The race-course was the great centre of meeting. About thirty ponies started on a paper hunt, including hurdles and ditches, and after a well contested struggle Lieut. Lee was the victor and winner of a silver cup presented by Mr. Lindau. Mr. Cope came in second. Owing to the year's trade being an unprofitable one there is not much joviality, but the day concluded with dinners of beef, turkeys and plum-puddings, nearly equal to the old country.

According to the directory, published at the *Japan Gazette* office last September, there are of all nationalities in Yokohama some 550, divided as follows:—English, 240; American, 80; Germans, 70; French, 60; Dutch, 50; Italian, Portuguese, and Swiss, 50; total, 550. A large number of these are not registered at their respective Consulates. The English regulations require registration and a fee *annually*. This is objected to, and a large number consequently are not registered. It is certainly useful and reasonable that every one should register on his arrival, but not annually.

The Pacific Mail Company's steamer *Japan*, Capt. Lane, arrived from Hong Kong on the 25th, *en route* for San Francisco. She brings a large cargo, about 500 Chinese passengers (200 women), and about twenty-five European passengers. She leaves on the 28th, and the inward steamer is expected on that day. This is an inconvenient arrangement; the departures from this port should be fixed two days later.

H.M.S. *Argus* returned yesterday from Hakodadi, bringing back Mr. Adams, the Secretary of Legation. H.M.S. *Satellite* was left there, and the French frigate *Vennes*. The fleet of Ermamoto was still in the harbour. The town was quiet, and foreigners had not been put to any inconvenience, nor did they anticipate any. Business was of course at a stand, but several parcels of native produce had been bought up cheap. The natives were selling out, and leaving the place to a great extent. According to present appearances, the troops of the Mikado, or rather of the Daimios on his side, will rally and make an effort to retake the place. Foreign vessels are being employed in the transport of troops, including the P. and O. steamer *Azoff*, the neutrality proclamation being disregarded by the consent of Sir Harry Parkes, but not—as it should be—withdrawn.

---

The following notification has been issued by Her Majesty's Minister respecting the opening of Yedo and Ne-e-gata:—

NOTIFICATION.

With reference to the notifications issued by the undersigned on the 28th of March and the 12th September last, informing British subjects that the opening of Yedo and Ne-e-gata had been temporarily deferred in consequence of the disturbed state of affairs which then existed, he has now to make known that that city and port will be opened to British trade on the 1st of January next, and that he has agreed on the part of H.B.M.'s Government to the following modifications in Articles VIII. and IX. of the arrangements for the settlement of foreigners at Yedo, which were published in his notification of November 26th, 1867.

Articles VIII. and IX. as now modified:—

Article VIII.—In order to give due effect to the provisions of the treaties which relate to the residence of foreigners at Yedo, every foreigner coming to Yedo, unless he be an officer of a foreign Government and in uniform, must be furnished with a passport from the consular authority of his nation at Yokohama, which must be viséd by the Hanji of Kanagawa. Foreigners coming from Yokohama by land will be required to show their passports at the ferry at Kawasaki, while those coming by sea must not land elsewhere than at either of the two landing places at Tamachi and Tsukiji, and must produce their passports on landing whenever required to do so by a Japanese officer. Any foreigner, other than an officer as above-named, arriving at Yedo without a passport, may be arrested and conveyed before his Consul.

Article IX.—Foreign lighters, tow-boats and passage-boats, and all other foreign boats, with the exception of those belonging to vessels of war, will be required, on arriving off Yedo, to enter by the channel between the two forts marked with white beacons.

It being considered undesirable that foreigners visiting or residing at Yedo should under present circumstances frequent the quarter comprised within the inner moat of the city, or should proceed into the country around Yedo to the extent of the limits described in Article XI. of the arrangements aforesaid, British subjects are hereby warned that they should avoid entering the quarter named until further notice, and that they should not proceed into the country beyond the limits shown on a map which will be exhibited at H.B.M.'s Vice-Consulate at Yedo.

John Frederic Lowder, Esq., at present H.B.M.'s acting Consul for the consular districts of Osaka and Hiogo, is appointed to act as H.B.M.'s Consul at Ne-e-gata, and William Willis, Esq., M.D., H.B.M.'s Vice Consul for the consular district of Kanagawa and Yedo, will for the present be stationed at Yedo.

(Signed) HARRY S. PARKES.

---

NAGASAKI.

A fire occurred on the 19th Dec., at the hong of Messrs. Walsh and Co., and the official residence of H.I. Russian Majesty's Consul, which destroyed the premises. They are stated to be uninsured. The cause of the fire appears to have been a defective chimney, a beam running through which must have caught alight from the previous night's fire in the grate beneath it.

The steamer *Nangato* received a full cargo of copper ore in the bay north of Akita, and on proceeding to sea was caught at the mouth of the bay by a very heavy sea, and immediately filled and sank. All hands were saved. Captain Catto and crew proceeded to Hakodadi.

The remains of H.M.S. *Rattler* have been given to the Japanese as a reward for the kindness shown to the crew of that ship. It is said that Captain du Petit Thouars, of H.I.M.S. *Dupleix*, will be offered a C.B.-ship for his energy and kindness in relieving the crew of the same ill-fated ship.

The *Nagasaki Times* gives the following return of foreign residents at that port:—British, 88; American, 42; Dutch, 32; Prussian, 18; French, 11; Portuguese, 10; Swiss, 6; total, 207. Chinese in foreign settlement, 332; Chinese in Yashiki, 237; Chinese in Sinchee, 60; total, 629.

A notification has been issued by H.B.M.'s Consul, informing his nationals that the native authorities have granted permission to foreigners to visit the Hot Springs of Tsupagaki, in Hizen. Seven days' notice must be given. With regard to this, the above paper says:—"We cannot hear that this boon has been granted to foreigners at the particular instance of any person, but understand that it is a spontaneous offer on the part of the Japanese Government. As a further instance of the rapid advance the Japanese are making in European ideas, this circumstance is worthy of notice. How long will it be before the whole country is thrown open to Europeans?"

---

## CHINA.

—o—

SHANGHAI.

From Shanghai we have advices to Jan. 6. The English mail of Nov. 6 was received on the 24th December; the French mail of Nov. 18 was overdue. We take the following items from the local papers, but our correspondents' letters embrace nearly every topic of interest.

The city of Chao-chow-fu has been opened to foreign residents and trade, chiefly, we believe, through the efforts of H.B.M.'s Acting Consul at Swatow. It will be remembered that the Chao-chow-fu people are among the most turbulent of the turbulent province they inhabit. So serious disturbances broke out there a short time ago that our old acquaintance Ting was deputed specially to allay the excitement; but his success was only nominal, and it has not been safe for foreigners to go to Chao-chow. Mr. Alabaster has lately visited the city on several occasions, and has succeeded in at least partially conciliating the inhabitants, who have consented to admit foreigners within their walls. A notification has been issued by H.B.M.'s Consul, officially intimating that Chao-chow-fu is open. A similar notice has been issued with regard to French subjects by the Consul-General for France.

Mr. T. T. Cooper, whose plucky attempts to cross the North-Western frontier of China into India we have so frequently had occasion to speak of, left us this morning in the *Erl-King*, on his way to Calcutta, to prosecute his attempt from the other side of the difficult line. We trust he will receive from the Indian Government the support and encouragement he deserves. We are glad to hear that a liberal testimonial fund has been raised for him in acknowledgment of his late exertions. A few of his friends too presented him with a watch yesterday, before leaving, as a token of their regard and esteem, to replace the one which shortness of funds compelled him to part with in Szechuen.

The visit to the North of the Lord Bishop of Victoria, who left Shanghai for Hong Kong per steamer *Yesso* on the 20th inst., and the arrival by the last mail of the Rev. Mr. Russell, as agent for the Church Missionary Society, has again brought forward the question of the establishment of a second bishopric in China. The press have been nearly unanimous in condemning the scheme, as quite uncalled for. We refer to the matter at length in our leading columns.

Digitized by Google

Mr. Consul-General Seward, accompanied by Colonel Polson and Baron Richthofen, has paid a visit during the week to the coal mines near Nanking. We understand that he had an interview with the Viceroy, but on what business is not known.

A meeting of subscribers to the British Church Establishment has been held at H. M.'s Consulate. The attendance was very limited. The accounts of the treasurer were received and passed, and the report of the trustees adopted. Mr. Kidner stated that the church might be opened on Easter Sunday, if, in the interim, the weather proved favourable. Messrs. Michie and Bell were re-elected trustees and Mr. Krauss, treasurer, in place of Mr. Dickinson.

One of the evening papers mentions the rumour that it is the intention of the Oriental Bank Corporation to pull down their present house at Shanghai and rebuild it on a magnificent scale. The Custom House it is said is also doomed, and the present picturesque, but for European business, inconveniently planned block of buildings will give place to something that it is intended will prove a credit to the aristocratic position in which it is placed.

The following notices of changes in firms have appeared :—

The partnership hitherto existing between James Dow, James H. Wright, and William S. Maclean, under the firm of Dow and Co., ceases this day by efflux of time; the affairs of the firm will be liquidated by Mr. James Dow, who will sign the firm "in liquidation."—DOW AND CO.

Shanghai, 31st Dec., 1868.

The partnership heretofore existing between William Dickinson, William Dickinson the younger, and Henry Dickinson, trading in China, under the style and title of Alfred Wilkinson and Co., has this day been dissolved by mutual consent. The liquidation of the affairs of the said firm will be conducted by Mr. Thomas Barton Higson, managing partner in China of Messrs. Dickinson and Co. ALFRED WILKINSON AND CO.

Shanghai, Dec. 31, 1868.

The partnership hitherto existing between Thomas Blake Glover, Francis A. Groom, Edward Harrison, and Ryle Holme, under the firm of Glover and Co., of Japan and Shanghai, ceases this day by efflux of time. The business in Shanghai will be conducted on and after the 1st January, 1869, under the style of Glover, Dow and Co., in which firm Francis A. Groom and James Dow will be partners. GLOVER AND CO.

Shanghai, Dec. 31, 1868.

The business hitherto carried on by me as public silk inspector is this day transferred to Messrs. Milsom and Tod. ED. HOLDSWORTH.

Shanghai, 1st January, 1869.

Mr. Edward Holdsworth is this day admitted a partner in our firm.

Shanghai, 1st January, 1869. MILSOM AND TOD.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, December 24, 1868.

The English mail has left this port so recently that there has been but little time for events to occur worth noting. A gloom unsuited to this festive season has temporarily fallen upon the Settlement, caused by the sudden death of Mr. Joseph Sassoon, a young gentleman of much promise and popularity. It appears that he went to bed on the night of the 21st in perfect health, but his servant found him motionless and cold when he went into his room on the following morning. A surgeon was immediately summoned, who declared that life was extinct; but the heads of the firm, not satisfied with his opinion, called in two physicians, who unfortunately were obliged to confirm the surgeon's verdict. An examination was held next day, when the only morbid appearance discovered was a highly congested state of the lungs. But as idiopathic congestion of the lungs could hardly set in and run a fatal course so rapidly, there seems reason to believe that the appearance I have mentioned was only a symptom of poisoning by carbonic acid gas. Before full particulars were known it was rumoured that a charcoal stove had been alight in the room all night, and this is now rendered more probable by the discovery made *post mortem*.

In a late letter I told you that we had here every reason to believe that the Yangchow affair was merely the local breaking out of a feeling which is very widely disseminated through the Empire. We have just had another proof of the truth of our hypothesis in a disturbance which has taken place between the missionaries and people in the city of King-wha, in Chekiang. The Chekiang mission has hitherto been fortunate in its field of operations, the official and literary classes appearing to favour the advance of Christian truth, and many even professing themselves adherents of the new faith. But influences of some kind have been at work, and the result is an outbreak of violence wherein the foreign teachers are the victims. Attempts also are being made to reduce the number of foreigners in the employ of the provincial Government. Thus it is now proposed to amalgamate the Nanking arsenal, which has hitherto flourished under the direction of Dr. Macartney, with an arsenal under native superintendence working on the bank of this river above Shanghai. As may readily be imagined, the local arsenal is of use to the native officials connected with it chiefly as a means of drawing enormous sums from the provincial treasury for work which is not done. On the other hand, Macartney has sedulously kept the financial department of his arsenal out of the clutches of subordinate officials, who are for this reason arrayed against him. Bitter complaints are being made against M. Giquel, late Commissioner of Customs here, but now directeur en chef of the Foochow arsenal. It appears that certain foreigners, who had served under him in the Hankow Franco-Chinese Contingent, have recently been thrown out of employment by the disbandment of that force. Repairing to Foochow they were at once taken into employment, an equal number of the mechanics hitherto employed there being dismissed to make room for them. Some of these have arrived in Shanghai seeking employment, and as the rowdy element is excellently represented in one of the evening papers, their vociferations against M. Giquel have been freely brought to the ear of the public. There is little doubt, however, that good reasons existed for all the dismissals. Indeed, the Foochow arsenal appears to stand on so shaky a foundation that no element of success could safely be dispensed with. This disbandment of provincial contingents is now the order of the day. The immediate fear of danger from rebels having passed by the authorities are rapidly placing the Empire in as weak a position as possible. Success once achieved, the agents through whom it was obtained are either summarily dismissed, as at Hankow, or placed on half-pay as a prelude to dismissal, as in the case of the drill sergeants of Li Hung Chang's Shantung army. It is only too probable that the opening of spring will witness the country again torn by rebellion, the districts just now recovering prosperity ravaged again by marauding hordes, peace succeeded by all the brutalities of Chinese warfare, and the extension of civilisation again definitely checked.

SHANGHAI, January 5, 1869.

A notification has just been published here announcing that the Chinese authorities have it in contemplation to open to foreign boats and vessels not propelled by steam all inland waters leading to and from any place within the limits of any customs' districts where British merchants may trade. This, Sir Rutherford Alcock states, would confer upon merchants residing at any of the treaty ports the right to trade directly with all places along the coast or up the rivers in the vicinity of their own ports, in boats of their own. But we are left in the dark as to the meaning of the new term "customs district," and no attempt is made to explain how opening the inland waters will affect the trade "with all places along the coast," or what advantage is to be gained by permitting foreign owned boats of native construction to ply between places where the same boats whether owned by natives or foreigners may now ply. Then, again, the definite exclusion of vessels propelled by steam vitiates any benefit which the English Minister may believe he has gained, for the great object of steam communication between an open port and the producing districts is the avoidance of the transit squeezes, which in defiance of the treaty are levied upon every package brought down in the slowly moving and diminutive produce boats. Altogether, the proposed concession amounts to nothing, and I can hardly conceive how Sir Rutherford Alcock can have been led to believe that in announcing it, he was announcing anything but his own short-sightedness.

On the 28th ult. a general meeting of the shareholders in the North China Insurance Company (1869-71) was held, 476 votes being represented. Little was done beyond passing the draft deed of settlement. A proposition that, in order to attract Chinese, the profits should be divided amongst the contributors every year instead of every three years, was negatived on the suggestion of the committee. Messrs. F. H. Bell, F. B. Johnson, E. H. Lavers, A. Michie, F. Porter, and E. C. Smith were elected directors, and the meeting was finally adjourned until April.

The Supreme Court has not been busy during the Christmas season, the only case of importance being that of the claims against the *Trebolgan*, tried at two sittings in Admiralty, held on the 29th ult. and the 5th inst. At the former the following claims were marshalled to be paid in full :—

| | |
|---|---|
| Court fees ... ... ... ... | 1,421.11 Tls. |
| Olyphant and Co. — Crew's wages in Shanghai ... ... ... ... | 2,324.49 dols. |
| Captain's salary ... ... ... | 3,521.37 |
| „ costs ... ... ... ... | 225.00 |
| Fees paid to Court by Captain's Counsel | 107.81 |

All their claims were to submit to a *pro rata* deduction. At the latter sitting the following creditors obtained an order to have their demands settled out of the funds recovered by the sale of the ship :—

| | |
|---|---|
| Glover and Co. judgment summons for ... ... ... | Tls. 231.26 and 395.51 dols. |
| Bower, Hanbury and Co., judgment summons for ... ... | 474.33 |
| Frazar and Co. „ „ ... ... | 687.10 |
| C. Ryley „ „ ... ... | 159.60 |

The annual meeting of Church subscribers, held at the English Consulate on the 2nd inst., was very poorly attended, and nothing but purely formal business was transacted. A vote of thanks was passed to Mr. Dickinson (who returns to England by this mail) for his energy in the discharge of the duties of treasurer for three years. The architect of the new church stated that if the weather were favourable during the coming months the building might be opened for service on Easter Sunday; but to an unprofessional eye the present condition of the edifice would seem to render any such hope groundless.

Intense cold has prevailed here and in the surrounding districts since Christmas. On the night of the 31st Dec. the mercury stood at 17 deg., or only 2 deg. above the minimum of the noted winter of 1861-62. The results of this low temperature have been of various kinds. Foreigners have luxuriated in capital skating, but the native poor have suffered severely. I am glad to be able to tell you, however, that a home has been opened for these latter where

Digitized by Google

they can obtain food, shelter, and (what they would gladly dispense with) work. The jovial season has had its usual effect on the purse-strings of the wealthier members of the community, no less a sum than 600 dollars having been collected at Trinity Church on Christmas-day in aid of the Distressed Foreigners' Fund. There is however a less pleasing side to the story, for several boating parties have come to grief in the creeks. In more than one instance the boats have had to be deserted, the occupants striking across country to the nearest populous town, and thence obtaining native land conveyances to carry them to Chinkiang. These have reported most favourably on the hospitality of the natives they encountered. There is still a party or two out, about whom great anxiety is felt. It appears that they started on the 29th ult. for the western shore of the Tai Hu, and having arrived there, left their boat to shoot along the route to Hoochow. The lowda states that he waited three days for their return, but as they did not appear, he left. On his way back he was met by another party, who, hearing his story, sent him back, and then returned to report the matter in Shanghai. Mr. Medhurst immediately communicated with the Taoutai, and himself despatched native messengers into the country to search for the missing sportsmen. At the same time, two foreigners left Shanghai for the spot where they were last seen, carrying, of course, all sorts of medical and other comforts. The scence of their shooting operations is very wild and desolate, and the danger is that if they lost their way they would find no one to set them right or afford them shelter and assistance.

On the 26th ult. the British steamer *United Service*, for the safety of which grave fears were entertained, arrived in Shanghai. She had had fine weather from London to St. Helena, and thence to the Cape. On the 28th Sept., in lat. 39 S., she lost her propeller during a gale, and was obliged to run for Mauritius, where she arrived on the 31st Oct. Having shipped a new propeller, she left on the 11th November.

When I sent you the particulars of the Yangchow affair I told you that the indemnity to be paid to the missionaries had been fixed at 500 taels, subject to modification by the English Minister. It is now stated that Sir Rutherford Alcock has raised the amount to 2,000 taels, the difference being taken from the guarantee fund of 6,000 taels held by Mr. Medhurst as security for the capture of the ringleader Ko. But as Ko has vanished, the sum in Mr. Medhurst's hands is confiscated upon other grounds, and hence we shall probably have to make an additional demand of 1,500 taels. I may mention in this connection that recent excurlionists in the country between Nanking and Yangchow report that the people know absolutely nothing of Tseng's humiliation. So much for the permanent results of the recent demonstration!

There is little or nothing to report from the river. The Kiukiang community have held their annual winter race meeting, comprising ten events, spread over two days. Although, in consequence of the very late fall in the river and protracted rains, the course was boggy beyond imagination, the races were very fair. Of course both ponies and riders had very hard work, and many certain "pots" were overthrown in consequence. It is said that the rapid decrease in the number of the Kiukiang community has decided the sporting portion of it to discontinue racing. This is for some reasons to be regretted, for Kiukiang has never been stained by the transactions which have blackened the Shanghai Turf. On the contrary, the annual meeting was invariably made an excuse for the display of the most open-handed hospitality and unaffected good fellowship.

The Peiho has been closed, or rather has been impassable, since the 16th December; the steamer *Coila*, which left Taku on that day, reporting the river full of masses of ice. I am therefore without news of importance from the North; indeed, the only circumstance of interest reported in the local papers is the interment of Mgr. Mouly, whose death I announced in my last. The burial was conducted with much pomp and ceremony, the entire diplomatic body paying a deserved tribute to the deceased by following the coffin on foot through the greater part of the city of Peking. The late bishop's successor, in his pontifical robes, headed the procession, and was followed by the clergy and an immense number of Chinese converts bearing tapers. The utmost order prevailed among the thousands of native spectators who lined the streets through which the funeral passed, and nothing occurred to mar the solemn effect of the ceremony.

In your leading columns you have frequently deplored the apparent incapacity of foreigners in China to unite for mutual protection against native chicanery. At length an attempt in this direction has been made at Foochow, but the objects for which the merchants have combined are ludicrously puerile. Alarmed at the serious losses they have sustained in the tea trade, they are anxious to prove that they have not been themselves to blame. They accordingly claim official protection against the native tea-dealers on the following grounds:—That old leaf and an excessive quantity of dust are mixed with the teas, that the leads are not thick enough to preserve the aroma of the tea, and that the bulk of the tea is not equal to sample. But your home readers will probably allow that if buyers at Foochow were not in such an outrageous hurry to purchase they might ascertain the quality of the leaf and its correspondence with the muster *before* they buy and ship, and might also refuse to buy any tea insufficiently leaded. No doubt when, *as occurredd uring the present season*, 169,000 packages of Congou alone were selected, examined, packed, and shipped at Foochow, within fourteen days, by nine tea-tasters, the taster's work is a mere farce. It is quite impossible for any one man to submit to the requisite scrutiny an average of 1,341 packages of tea during the five working hours of the day. It will, therefore, no doubt, suggest itself to you that for the abuses against which protest is made the Foochow merchants have in the main to thank themselves.

You have of course already heard full particulars of the Takow difficulty, the assault on the Consul, and the bombarding of Anping. They arrived here via Hong Kong, ane no doubt were reported home by last mail.

From Japan there is no news of importance. The *Japan Herald* states that for the future distinct Messageries steamers will run between Yokohama and Kong Kong, and Shanghai and Hong Kong, so that direct communication between Yokohama and Shanghai by French steamers will cease. The P. and O. steamers *Sultan* and *Azoff* are now placed on the new Hiogo, Nagasaki line.

## SWATOW.

We hear from Swatow that missionary difficulty has occurred in the neighbourhood of that port also, but has been most successfully settled by H.B.M.'s acting Consul. The facts are shortly these. Some missionaries leased a house at Chao-yung. A powerful clan, headed by a literary graduate, objected, expelled them *vi et armis*, and locked up the chapel. The matter was reported to Mr. Alabaster, who at once visited the local magistrate, and induced him to go and look at the house, and find out what was the objection to foreigners having it. A mob of many thousands collected, and manifested a strong desire to tear H.M.'s Consul to pieces. Fortunately, however, he and the mandarin did get away unmolested, and by judiciously playing off one clan against another contrived so to enlist the sympathies of their former opponents, that on the following day the missionaries were reinstated, and the whole clan was anxiously guarding them from possible disturbance. Their persecutors had, in fact, become soldiers of the Cross.

## HONG KONG.

From this port we have advices to the 12th January. The outward (English) mail of Nov. 20 was received on the 2nd Jan. The latest London telegrams extended to the 18th Dec. There is (as usual of late) a great dearth of local news.

The *Daily Press* announces, upon good authority, that instructions have been transmitted from the Foreign-office to Sir Rutherford Alcock to settle the difficulty with respect to the transit duties, by agreeing with the native authorities to rearrange the import tariff on a basis of seven and a-half per cent., in place of five per cent., as at present, on condition that the Chinese give up the levy of all duties whatever upon British goods going into the interior of the country. It is not known whether any security for the fulfilment of this promise will be demanded from the Chinese, and unless this be rigidly exacted the new arrangement will be no amelioration upon the one previously existing, in so far as the transit dues are concerned, while an extra two and a-half per cent. will be paid as import duties. The object of the Treaty was to settle, not a part of the duties, but the whole of them, maritime and transit, or, in other words, the total taxes raised upon foreign goods between the ship, and the producers or consumers; and foreign governments might with propriety refuse to pay the Customs duties at all, until it be guaranteed that nothing further shall be exacted. The proper guarantee for this should consist in the good faith of the Chinese Government, and in the efficiency of their internal administration, but so long as these two elements be wanting, our commercial relations with this country must continue of an uncertain and unsatisfactory nature, as experience has proved that no promise as to the non-levy of internal dues, for the fulfilment of which we have not security, will be equal in value to the paper it is written upon.

The coolie trade is undergoing great tribulation. Driven from Macao, Hong Kong was tried, with what result the following paragraph from the *China Mail* will show:—"If the number of Chinese emigrants, who have already volunteered for the two ships, which have been 65 days on the berth, is to be taken as a criterion, emigration to the Dutch American Colonies is decidedly on the decline. The *Omba* and *Veritas*, two British vessels, the former almost one of the tea clipper class of ship, were placed on the berth for Surinam more than two months ago, and on Christmas-day, when the sixty lay-days for each ship had expired, there were 141 coolies on board the *Veritas*, out of about 300 she is to take, and 27 on board the *Omba* out of the 395 which she is chartered to convey. At this rate, the latter vessel will probably get her complement of Chinamen about next July, a rather distant date."

Most of our readers (says the *Mail*) will share the regret with which we notify the death of Mr. William Gaskell, one of the oldest inhabitants in this colony. He was educated in England, and at an early age proceeded to Sydney, in Australia, which he left for Hong Kong in 1846—just twenty-two years ago. He practised with much success, and was the leading man here in his profession till the death of his wife in 1854, when, for change of scene, he returned to Australia, whence he returned, having married again in 1856. In 1859 he retired from business, having achieved a competency. But the increasing expenses of his

Digitized by Google

family necessitated his again resuming practice, which he did in 1865, reviving much of his old business connection with those who had known him formerly. He died on the morning of the 29th, between eight and nine o'clock, and was buried at 5 P.M. in the cemetery at Happy Valley. With his exact age we are not acquainted.

Considerable anxiety is felt respecting the fate of the French corvette *Le Monge*. She left Saigon for Yokohama via Hong Kong on the 1st November last, and has not since been heard of. We sincerely trust that no accident has befallen her, though we can scarcely hope that she will turn up safe and sound after so prolonged a disappearance.

The *Overland China Mail* gives us a terribly startling piece of news from the Nanking arsenal. Dr. Macartney, we are told, has *hanged* his staff of artisans, to make way for others more skilful, who are to be sent out from Woolwich! Perhaps, the deed is not such a murderous one as the *China Mail* makes it appear. The letter C may have accidentally dropped out, and so converted *changed* into *hanged*.

The following notices of firms, &c., are issued :—

Mr. D. O. Clark retires from our firm, and Mr. J. Murray Forbes and Mr. E. D. Barbour are admitted partners from this date.

China, January 1, 1869. RUSSELL and Co.

The interest and responsibility of Mr. Georg Wilhelm Schwemann and of Mr. Rudolph Heinsen in our firm ceased on the 31st December, 1867, and 31st December, 1868, respectively. Mr. Ferdinand Nissen and Mr. Heinrich Hoppius have this day been admitted partners in our firm at Hong Kong and in China, which now consists of Mr. Georg Theodor Siemssen, Mr. Woldemar Nissen, Mr. Adolph Joost, Mr. Ferdinand Nissen, and Mr. Heinrich Hoppius. SIEMSSEN and Co.

Hong Kong, January 1, 1869.

The interest and responsibility of Mr. William Neilson in our firm ceased on the 30th June last. Mr. Tobias Pim, Mr. William Nisbet Olmsted, and Mr. H. Seymour Geary are authorised to sign our firm in China and Hong Kong from this date. OLYPHANT and Co.

Hong Kong, Oct. 6, 1868.

I have this day established myself as a public accountant, average adjuster, and general commission agent. C. LANGDON DAVIES.

Hong Kong, July 1, 1868.

Mr. Theophilus Gee Linstead is this day admitted a partner in our firm. Our offices have been removed to the premises in Aberdeen-street, at the corner of Messrs. Gibb, Livingston, and Co.'s compound.

Hong Kong, January 1, 1869. A. G. HOGG and Co.

The interest and responsibility of Mr. Abraham David Ezekiel, in our firm in China, cased on the 31st December last, and Mr. Charles Elias Sassoon has been admitted a partner therein from this date.

Hong Kong, January 1, 1869. E. D. SASSOON and Co.

Mr. William Judson Blydenburgh and Mr. George Hurlbut are admitted partners in our firm. Mr. Henry Cutler Low will sign our firm per procuration. SMITH, ARCHER, and Co.

Hong Kong, Jan. 1, 1869.

The interest and responsibility of Mr. Frederick Pedder in our firm ceases from Dec. 31, 1868. Mr. Francis Chomley is a partner in our firm, which from this date will be conducted under the name of Brown and Co.

Amoy, Jan. 1, 1869. H. D. BROWN and Co.

## PHILIPPINES.

—o—

### MANILA.

From the *Diario de Manila* of the 25th November it appears that full particulars of the recent events in Spain had reached the Philippines, and been made public *in extenso*. The Government relies with confidence on the good sense and patriotism of the inhabitants inducing them to continue the pursuit of their lawful callings and occupations in peace and quietness until full and distinct instructions from the Supreme Government in Europe arrive out, giving directions as to future arrangements.

From the Manila Government despatches to the Minister of the Colonies, and which have now been made public for general information, an extract of the following supplementary remarks appended thereto may prove interesting. They are addressed more particularly to the various inhabitants of Manila and its dependencies, under date 23rd November, 1868 :—

"The post, which arrived last night, has brought letters, periodicals, and all kinds of publications, giving complete confirmation to the announcements of events by previous mails. There is now only wanting the confirmation, official, direct, and legitimate, of those events. At the time of the departure of the mail from Europe, the Government at Madrid had not been established. The organisation has since been made known to us by telegraph.

"In these circumstances the Governor, taking into account the patriotism, the prudence, and the good sense of all the inhabitants of the Archipelago, and taking also into consideration the inquietude, which news of events so important must produce in their minds, desires to give a great proof of confidence to the public, in manifesting to them, without reserve, his opinion and his policy, in order that it may serve as a rule of conduct to all in the performance of their reciprocal duties; affording to their minds the tranquillity and heartsease necessary for their applying to and giving themselves up to the exercise of their respective pursuits and occupations in security and confidence. This is the object, frank and clear, of this manifestation.

"The Governor hopes, from the patriotism and good sense of all the inhabitants of the Archipelago, that they know how to respond nobly to his frank conduct."

The *Diario de Manila*, in a spirited leading article, re-echoes the tone of the principal European papers in lauding the peaceful course of so mighty a revolution, and hopes for the best influences from its effects both for Spain and her colonies.

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

From this port our advices reach to the 19th January. On the 9th January the outward mail of Dec. 4 was received, with London telegrams to Dec. 28. The *Straits Times* gives the following summary of news :—

His Excellency the Governor, with Lady Ord and suite, returned from Penang and Malacca (after a stay in the latter of about a week) in the *Peiho*, on the 16th Jan.

The *Government Gazette* of the 15th Jan. contains a notification of the provisional appointment of Mr. W. E. Maxwell, Senior Sworn Clerk, Supreme Court, Penang, to the same office in Singapore, and of Mr. A. W. S. Stewart as successor to Mr. Maxwell in Penang.

Non-official items are also of little interest or importance outside the Settlement. There is a strong, and, we may also say, a growing, feeling of opposition to and disapproval of official sayings and doings in the mercantile community. In official quarters the latter are probably regarded with similar feelings, and the result is an unpleasant state of dislike and distrust, the existence of which is to be regretted. The current feeling has found vent during the fortnight in several squibs and hoaxes by the partisans of both sides, but being merely of local interest and application they do not merit any particular notice.

A public meeting was held in the Exchange, on the 7th Jan., to consider the best mode of celebrating the fiftieth anniversary of the Settlement, on the 6th Feb. That day falling on a Saturday, it was resolved to have a ball and supper on the preceding Friday, sports for the natives on the Esplanade on the Saturday, and a dinner on Saturday evening. The dinner, however, will probably fall through for lack of sufficient support. A committee was appointed to make all arrangements.

Last mail brought advice that a British Consul had at last been appointed for Saigon, and that a resident merchant, Mr. George Caswell, of Messrs. G. Hale and Co., had been named for the office.

## WIT AND HUMOUR IN THE EASTERN SETTLEMENTS.

The Punch and Judy family has increased and multiplied exceedingly of late years. *Punch*—the great original—who not long ago reigned sole and supreme, has now numerous imitators to compete with in *Fun*, *Judy*, *Tomahawk*, *Will-'o-the-Wisp*, and half-a-dozen others. Melbourne has long had its *Punch*, and an excellent one, too; but now every English community in the East seems smitten with the rage for comic periodicals. The *Shanghai Punch* was a feeble infant, that did not long survive its birth. The *China Punch*, published at Hong Kong, had more stamina, and flourished for a year; it was in many respects a capital publication, and its demise caused general regret. The *Yokohama Punch* has achieved no little success; it has never aimed at being ranked as a periodical, but comes out at irregular intervals, as opportunity offers for a budget of satire on the follies of the day. A *Japan Judy* has been started as a rival to this, but as far as we can judge from the only number received it is rather a weak production, and not likely to eclipse *Punch*, which is generally understood to be sustained by a very talented gentleman who originally went out as special correspondent for the *Illustrated London News*, but liked Japan so well that he settled there permanently.

*Straits Produce*, of which we have just received a copy from Singapore, is better than any of these. In the first place there is some sense, as well as nonsense in it. The title is a very happy one—Punches and Judy's have been multiplied *usque ad nauseam*, and a title with some originality is quite refreshing after so much servile copying. *Straits Produce* is a handsomely got up publication of twenty pages; has a tinted title-page, with a grotesque and characteristic design beautifully executed; it is well printed on good stout paper; has three full-page, and seven half-page illustrations, mostly well drawn and full of happy satire; is well written, and though its contributors sometimes hit very hard, they are evidently gentlemen, and know how to "behave as sich." In a community like that of Singapore it would be unreasonable to expect that a publication like this—dependent entirely on amateurs—could be brought out regularly at short intervals; one issue a month proved more than could be sustained with the *China Punch*, and we are not therefore surprised to find that *Straits Produce* assumes the form of a Christmas annual. The originators were doubtless wise in not binding themselves to appear before the public again at a very early date, but a whole year is a long while to wait for number two. We would suggest that the publication would be more interesting to the community and more satisfactory to its promoters, if issued at more frequent intervals, which need not be particularly regular, but just as often as a sufficient amount of food for mirth and satire presented itself. The trenchant but withal genial sarcasm of *Punch* has done as much—in some cases probably more—to reform abuses than the thunders of *The Times;* and we are sure that a little wholesome ridicule, judiciously applied, will not be without a similar good effect in the Straits Settlements.

Digitized by Google

# Commercial Report.

## STRAITS, CHINA, AND JAPAN IMPORTS.

YOKOHAMA.—With the single exception of Cotton Yarn no business had been done during the interval. Quotations for Cotton Yarn were 16–24, $46.50 to 47.50; 28–32, $49.50 to 51.0; 38–42, $49.50 to 51.0. For other goods quotations were nominal. The occurrence of the native holidays, together with fears of a recommencement of the civil war, were considered to be the principal causes of the prevailing dulness.

SHANGHAI.—For the season a more than usually limited business has to be reported in all classes of manufactures. This is, of course, partly owing to the Christmas and New Year holidays, but also to the reluctance of the Chinese dealers to operate. Stocks of all kinds had been increased by several arrivals from England; but holders generally seemed indisposed to force sales. Grey Shirtings: The stock was roughly estimated at 470,000 pieces, with about 700,000 pieces to arrive before the end of February. Sales of Shirtings during the fortnight had not exceeded 15,000 to 20,000 pieces; and the market closed very dull at a decline of 2 to 3 cand. per piece on last mail's prices. Quotations were—for 7 lbs., Tls. 1.9.1 to 1.9.5 per piece; 8 lbs., Tls. 2.0.5 to 2.1.2; and 9 to 12 lbs., Tls. 2.50 to 2.90. T-Cloths: Rates show little alteration, but sales had been very small. Many holders preferred to wait for sales till business was more active. At the close there was rather more disposition to invest in 6 and 7 lbs. The best kind of 8 lbs. 36 inches showed a fall of 5 candareens per piece. White Shirtings: A few retail transactions were reported, but prices exhibited no change, and it was difficult to place these goods in any quantity. Best 66 reed were worth Tls. 2.34 per piece. Drills: Both English and American were slightly lower in value, the best chop of the latter not being saleable at over Tls. 44.5 per piece. Jeans and Sheetings: There was nothing fresh to report as to these goods. Fancy Goods: Only retail sales were reported, and all kinds were far from easy to place. Spanish Stripes.—Gentian, Purple, and Black showed a slight fall, but sales had been very small indeed. Long Ells.—The advance in C. P. H. Scarlet, noted in last report, had been barely maintained, while the scarcity of H. H. Scarlet, and an inquiry for Hankow, had raised the value of that chop to Tls. 6.2.5 per piece. Dark Blue, Orange, and Purple, were quoted at a decline. Camlets.—All the chief colours, except Black, were lower in price, and assortments were very difficult to place. Figured Orleans.—Scarlet showed a slight rise in value, while Dark Blue had fallen 1 to 2 mace per piece—demand fair but not active. Lastings.—A small inquiry existed at a slight advance. Crape Lastings were a little easier, while Crape Lustres had been quiet at last rates. Coals.—The market was dull and prices were nominal. Total arrivals 2,230 tons.

HANKOW.—The market had been quiet during the fortnight. Plain Cottons: Grey Shirtings, 8¼ lbs., in small demand at rather lower rates; 7 lbs. still continued in inquiry. Closing quotations were:—Tls. 2.1.3 to 2.1.7 for 8¼ lbs.; and Tls. 2 to 2.0.5 for 7 lbs. Drills were in request, and prices were rather firmer. T-Cloths, of light makes, had found buyers to some extent at easier prices; 8 lbs. were neglected. White Shirtings and most descriptions of Fancy Cottons were very dull of sale. In Woollens and Worsteds there had been but little business doing, with the exception of a limited demand for Long Ells and Figured Lustres. Lead was still inquired for, and prices had improved; best brand was quoted Tls. 6.7.0 per picul.

FOOCHOW.—The following comprised the business of the interval:—2,300 pieces 9¼ lbs. Grey Shirtings at $2.85 per piece, 1,000 pieces 8¼ lbs. do. at $2.85; and 96 pieces scarlet Spanish Stripes, at 97½ cents. per yard.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated January 11:—Trade generally has been very dull, as is usual at this season of the year, when native merchants are engaged in closing their accounts, and indisposed to enter into any considerable operations, and this dulness, as regards sales at private of Yarn, Grey Shirtings, and T-Cloths, has been increased by the offering at auction of considerable parcels of these goods, ex late arrivals, and from which dealers have elected to supply the bulk of their limited wants. Dealers' stocks of most descriptions of merchandise are light, and a general improvement is looked for after the new year holidays. Cotton Yarn: Sales at private have only been 38 bales Singapore, Nos. 16 to 24, at $102.50 to 105. At auction 151 bales Nos. 16 to 24, 212 bales Nos. 28 to 32, and 18 bales Nos. 38 to 42, all damaged, have been placed at prices about equal, relatively, to our quotations for sound goods. Piece Goods: There were no transactions reported during the early part of the interval, dealers awaiting the offerings of damaged goods, which, however, were not so large as had been anticipated, amounting to but 1,900 pieces 7 lb., and 3,850 pieces 8¼ lb. Grey Shirtings, and 600 pieces 6 lb., 2,350 pieces 7 lb., and 1,350 pieces 8 lb. T-Cloths. A moderate inquiry has since existed for 7 lb. and 8¼ lb. Grey Shirtings, and 6 and 7 lb. T-Cloths, but at slightly lower rates for all but the 8¼ lb. Grey Shirtings, and holders have met the market. 8¼ lb. Grey Shirtings are a shade dearer, and close very firm, with an upward tendency. Common White Shirtings are wanted. American Cottons are out of stock, but are nominally a trifle dearer, being now inquired for for shipment to Tientsin by the vessels expected to reach that port just as navigation re-opens. A sale of 40 yard Dutch Drills—1,000 pieces—has been made at a reduction of 5 per cent. per piece, but English are without change. Woollens: The market has been characterised by an entire absence of business, dealers apparently being determined to work off their present stocks before entering into any new transactions. Quotations are quite nominal, and lower for most descriptions. Those for Scarlet Long Ells and Lastings, however, show no change, stocks being comparatively light. Metals: Nail Rod Iron continues in demand on former terms. Bar is also active, but best qualities sell only at lower rates. Hoop Iron, Wire, and Steel are firm. Lead has been inquired for, and the market has been almost cleared by native buyers at enhanced prices. Tin is again dearer. Tin Plates unchanged. Quicksilver without movement. Coal: Receipts amount to 1,947 tons Australian (to consumers) and 3,000 do. Anthracite (2,000 to consumers). The only sale has been 900 tons Australian at $7.00. Stocks of all kinds amount to about 70,000 tons, 50,000 to 55,000 of which are in the hands of consumers. Ginseng: The market has been very quiet, sales only amounting to 6 casks Crude, at $120 per picul, and a few small packages of very fine root at fancy prices. No transactions of any extent are looked for until after China New Year, but holders remain very firm. The current quotations were:—Cotton Yarn, per bale, Nos. 16-24, $118; Nos. 28-32, $135 to 142½; Nos. 38-42, $140 to 145. Grey Shirtings, 7 lbs., per piece, $2.30; 8.4 lbs., $2.65 to 2.75; 9.10 to 9.12 lbs., $3.50 to 3.80. White Shirtings, $2. T. Cloths, 6 lbs., 32 in., $1.77½. American Drills, 14 lbs., per piece, $4:90; 15 lbs., per piece, $5.40. Camlets, S, $18 to 19; SS, $15.75 to 16. Metals, Iron Nail Rod, $2.80 to 2.90; Round, Square, and Flat Bar, per picul, $2.80 to 2.90; Hoop, $2.85 to 2.90; Wire, $7.70 to 7.75. Lead, per picul, $6.50 to 6.75. Tin, per picul, $26 to 27. Steel, per tub, $4.50 to 5.50. Quicksilver, $64.25 to 64.50. Coals, English, $10; Welsh, $11.

SINGAPORE.—Considerable supplies had been landed during the fortnight, which had caused some animation in the market, and a moderate amount of business had transpired. Grey Shirtings, 8¼ lbs., had been placed at last quotations, and a moderate amount of business had transpired; 7 lbs. had met with a limited inquiry; 6 lbs. were scarce, and quotations were rather firmer; 45 in. Shirtings were quiet, the stock of the lighter weights being low. Maddapollams were in some inquiry at an advance. T-Cloths had remained unaltered; there had been a fair inquiry for all descriptions. Dutch Drills had been quiet. Medium qualities of White Shirtings had met with an active inquiry, and prices were firmer; the stock was light, fine qualities had been in steady demand, and prices were well maintained. Imitation Irish Linens had been in good inquiry at an advance; several sales had transpired. Cambrics of the finer makes had been placed to some extent; No. 24's were dull of sale. Figured Shirtings had been quiet, the market was nearly cleared of Brocades. There had been more business doing in Woollens; Spanish Stripes were in moderate demand. Long Ells had been placed at a decline. Bombazettes had been inquired for. There was a limited demand for Medium Cloth. In Metals, Iron had been sold to some extent, but lower rates were taken; the stock was heavy, and there was little demand. Lead was in better inquiry, and several sales were noticed at rather firmer rates. Yellow metal was without improvement. Cardiff Coals were in some demand, but there were heavy supplies afloat; West Hartley rather weaker.

## STRAITS, CHINA, AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—The business of the fortnight had been moderate, settlements not being more than 2,000 piculs; the firmness in prices noted in our last report had continued, and dealers were holding for higher rates. Fine grades were very scarce; stocks were low, of a very inferior quality and much mixed. The Caractacus, Alcyone, and Pallas were loading for New York. The current quotations were:—Common, $18 to 21 per picul; good common, $22 to 23; medium, $24 to 26; good medium, $27 to 29; fine, $30 to 34; finest, $35 to 40; choice, nominal.

SHANGHAI.—Black: The business for the fortnight had been almost nil, settlements being only 271 chests of Congou, at fully former rates, and 889 chests of Dust at Tls. 8. Teamen were still difficult to deal with, except at extreme prices. Settlements for the fortnight, 1,160 chests; reshipments on owners' account, 1,856 chests; stock, 28 chops, or 8,648 chests. Quotations (duty paid, exchange for credits, at 5s. 11½d. per tael, and freight at £2 per ton) were:—Common Ningchow, 1s. 1d.; common dust, 6d. per lb. Green: A smaller business in this description is reported than at any time since the opening of the season. Teamen, however, continued firm, and prices did not show much change. Fine and finest Moyunes, and common Shanghai-packed and Fychow kinds commanded previous quotations, but a few settlements of medium Moyunes and Fychows had been made at about 1 tael decline. Settlements and reshipments were—781 half-chests Moyune (with the lower lines taken out), at Tls. 52 to 55; 6,781 half-chests Moyune and Teenkai, at Tls. 34 to 44; 2,618 half-chests Fychow, at Tls. 28 to 34; 877 half-chests Pingsuey, at Tls. 33½; and 1,342 half-chests Shanghai-packed, at Tls. 25 to 29. Settlements for the fortnight, 12,399 half-chests; re-shipments on owners' account, 3,269 half-chests; stock, 130 chops, or 79,538 half-chests.

HANKOW.—Neither arrivals nor settlements are reported from this port.

KIUKIANG.—Black Teas: No settlements had been made during the fortnight, but 1,179 chests had arrived. Further arrivals were expected to be about 2,000 chests. Quotations were nominal. Export from 1st Jan. to 31st Dec., 1868, 155,582 chests; do. from 1st Jan. to 31st Dec., 1867, 114,321 chests; stock, 679 chests. Green Teas: In these also no settlements are reported. Arrivals had been heavy, and the total estimate for the season was increased to 160,000 half-chests. Export from 1st Jan. to 31st Dec., 1868, 162,112 half-chests; do. from 1st Jan. to 31st Dec., 1867, 161,078 half-chests; stock, 3,305 half-chests.

FOOCHOW.—The following is from Messrs. Odell and Co.'s Report, dated 1st January:—Our last report was dated 18th ult., since when, although the usual holidays have intervened, a fair amount of business has been transacted. Congous have continued in demand both on English and Australian account, settlements amounting to about 10,600 chests; rates paid show a further slight advance, and many holders now refuse to sell unless at still higher rates. Souchongs.—A few parcels have been taken for shipment to America. Oolongs.—Further small purchases have been made, and the unsold stock does not exceed 600 half-chests. Scented Teas continue in but limited demand. Flowery Pekoes.—A small settlement is reported, but the supply of desirable kinds is exhausted. Settlements for the fortnight have been:—Congou, 10,669 chests, at Tls. 9.05 to 19.3 per picul, ship off; Souchong, 777 chests, at Tls. 17.2 to 17·8 per picul, ship off; Oolong, 1,600 ½-chests, at Tls. 13.8 18.8 per picul, ship off; Scented Teas, 1,000 boxes, at Tls. 21.05 per picul, ship off; Flowery Pekoe, 100 chests, at Tls. 21.3 per picul, ship off.

CANTON.—During the early part of the fortnight there was no inquiry for Scented Teas whatever, but teamen had since given way in prices with the hope of clearing their stocks before the close of the Chinese year, and settlements of a few common to medium Scented kinds had taken place. The three chops Country Congou, which had remained so long unsold, were settled just prior to the departure of the last English mail at the

Digitized by Google

average price of Tls. 20—a full value for them. In Canton-made Greens there were no purchases to report. The following were the settlements for the interval:—Canton Congou, 3 chops, 2,300 chests at Tls. 20, proportion; Scented Orange Pekoe, 2,500 boxes at Tls. 14.0 to 24.0; Scented Caper, 4,500 boxes at Tls. 10.25 to 27.0.

## SILK.

YOKOHAMA.—Less business had been doing in Silk during the fortnight; this was due chiefly to the paucity of supplies, and in particular the extreme scarcity of fine and even fair parcels of Hanks. Prices generally had been fully maintained, and it is only on some very common and coarse sorts that natives had submitted to concessions. Fresh settlements amounted to 900 bales, including 80 bales from Hiogo. The current quotations (at exchange 4s. 4½d., all charges paid to London) were as follows:—Hanks—Mybash, Sinchu, &c., extra, 38s. 11d. to 41s. 8d.; best, 36s. 8d. to 38s. 1d.; medium, 33s. 7d. to 35s. 6d.; inferior, 30s. 8d. to 32s. 6d.; Oshu, extra, nominal, 36s. 3d. to 37s. 0d.; best, 33s. 3d. to 35s. 1d.; medium, 28s. 10d. to 31s. 5d.; inferior, 24s. 0d. to 27s. 0d.; Coshu, best, 31s. 9d. to 34s. 0d.; medium, 28s. 6d. to 30s. 8d.; inferior, 24s. 0d. to 27s. 9d.; Sodai, best, nominal, 29s. 7d.; medium, 25s. 10d. to 28s. 6d.; Etchesen, best, nominal, 27s. 0d. to 28s. 10d.; 2, 24s. 0d. to 26s. 2d.; inferior, 22s. 2d. to 28s. 3d.; Masbia, best, 24s. 0d. to 25s. 10d.; inferior, 20s. 3d. to 23s. 3d.; Hatchogee Tussah, 23s. 3d. to 25s. 10d.

SHANGHAI.—Messrs. C. J. Skeggs' and Co. report as follows:—Business has been so interrupted by the Christmas and New Year holidays that there is but little to report. Actual settlements for the fortnight only reach about 300 bales, so that the total given as 600 bales includes about 300 bales settled at the close of the French mail, and for sailing vessels despatched about the same time. Prices are unchanged, as transactions have been so limited that no reliable alteration can be quoted, except for very common descriptions of re-reels, which are being pressed for sale at lower rates. The stock remains at about 3,000 bales, and the total export for the season, as still estimated, will not exceed 47,000 to 48,000 bales.

CANTON.—The receipt of further unsatisfactory advices from the London and European markets had the effect of making operators less inclined to accede to the prices asked by dealers, and we again have no settlements to report. The Silkmen were very firm, and showed no desire to sell under quotations. Buyers for India had been about the only foreigners in the market. In Re-reels only one small parcel of 50 boxes had found a purchaser. Prices for this Silk continued to advance, notwithstanding the reports of dull and declining markets in America, and although little business had taken place we from time to time hear of extreme offers being made. It is difficult to give a correct quotation for No. 1 Re-reel Cumchook, but we consider that the price had advanced from $25 to 30 since last mail. We give the following as settlements and quotations:—Tsatlee, sales, 60 bales, at $525 to 530 per picul; Loong Kong, No. 1, sales, 5 piculs, at $535 per picul; Kow Kong, No. 3, sales, 70 piculs, at $520 to 525 per picul; Re-reeled Cumchook, No. 1, sales 30 boxes, at $595 per picul; do. best, no sales, $610 to 620 per picul.

## STRAITS PRODUCE.

SINGAPORE.—During the interval there had been a steady demand for produce, and a fair amount of business had transpired; there had been some fluctuation in quotations of the principal staples caused by recent telegrams of the home markets. Gambier had a weaker tendency, but there had been a good demand, and about 1,550 tons were contracted for at $2.79 to $2.77½ per picul. Black Pepper advanced in value on the receipt of home telegrams; further engagements had been made, but the terms were kept secret; dealers had been offering to sell at $6.45 per picul, but no transactions were reported at that rate. White Pepper was coming forward slowly, and small parcels had been bought at an advance. Coffee had been in some inquiry; supplies of Bontyne were falling off; no transactions reported in the lower qualities. Tin had risen rapidly in value, owing to telegrams of the advance at home and the high rates ruling in China; the market was nearly cleared. Pearl Sago had fluctuated considerably, and prices had a weaker tendency, but a fair amount of business had transpired. Sago flour lower in value and demand quiet. Hides had been taken up at easier rates. Horns in good demand and prices well maintained. Gutta Percha maintained full prices. Nutmegs and Mace were rather firmer.

## STATISTICS OF THE TEA TRADE.

The annexed letter relates to the want of sufficient statistics respecting the Tea trade:

Sir,—I beg to direct public attention to the want of reliable statistical information in this great and important trade. It is not generally known that the figures given in all the brokers' circulars are only estimates, and very incorrect estimates they are. As a rule, the warehouse-keepers are able to give better information regarding imports, deliveries, stocks, &c., than the brokers. The assortment of the different packages under the heads of chests, half-chests, and boxes rests entirely with them, the only duty of the brokers being the calculation of the number of chests, half-chests, and boxes as returned monthly from the different warehouses, at say 102lbs. per chest, 52lbs. per half-chest, and 19lbs. per box, on whatever estimates they may agree upon. Now it frequently happens that there are in the warehouses great numbers of packages being neither half-chests, boxes, nor chests, but these must be entered under one of the above heads, as the brokers in their estimates acknowledge no other; hence, as you may readily imagine, errors to a considerable amount have crept in. The last time I visited the warehouses large quantities of three-quarter chests had been entered as half chests, both of black and green teas, and the errors in the brokers estimates amounted to six or seven millions of pounds. The stock of Congou was under-estimated by upwards of four millions of pounds and of green teas by nearly a million. I am in hopes that ere long steps may be taken to petition the President of the Board of Trade for a monthly return from the Custom-house of the actual weights of each description of tea entered, delivered, and remaining in stock. This is given at the ports in China with shipments by every vessel to this country, and there appears no insuperable difficulty that I can see, why it should not be given in London. Here, as in China, the duty upon all kinds is the same. There is, therefore, no temptation to merchants to falsify their returns, and it would be quite as easy to pass an entry for so many pounds of "Young Hyson," "Scented Teas," or "Congou," as of "Tea" simply, as is the custom at present.—In the meantime, trusting that you will be kind enough to allow attention to be called to the matter in your columns, I am, &c.,

84, Great Tower-street, E.C., Feb. 20. J. C. SILLAR.

THE steamer *Japan* sailed from San Francisco for Hong Kong on the 4th February via Yokohama, carrying 150 passengers, 480,000 dols. in treasure; 350,000 dols. of which is for China and 124,000, dols. for Japan.

## ARRIVALS.

At YOKOHAMA.—From London, Dec. 28, Solent; from Havre, 16, Yokohama.

At SHANGHAI.—From London, Dec. 26, Carnarvonshire, Sarah Nicholson; Jan. 3, Sophie; from Hamburg, 25, Johanna Anton; Dec. 31, Anita; from Rotterdam, Dec. 25, J. H. Schwensen; from London (reported by telegram), Taeping, Lahloo, Kate Carnie, Spindrift, Ariel, Serica (98); from Liverpool, Northfleet.

At AMOY.—From Cardiff, Herald of Light (reported by telegram).

At HONG KONG and CANTON.—From London, Jan. 10, Sir Lancelot; from Liverpool, 2, Banda; from Newcastle, 5, Wilhelm; from Rotterdam, Dec. 29, Ferdinand; from New York, Dec. 31, Shirley; from London (reported by telegram), Jan. 18, Shakespeare.

At MANILA.—From Liverpool, Jan. 4, Aurora.

At SINGAPORE.—From London, Jan. 5, Niger (steamer); from Liverpool, 15, Naworth, 9, Peter; from Sunderland, 5, Opus; from Cardiff, 10, Helensbank; from Amsterdam, 16, Ortelius; from Clyde, reported by telegram, Loundon Castle; from Hamburg, Lizzie.

At PENANG.—From Glasgow, Jan. 7, James Paton.

## DEPARTURES.

From YOKOHAMA.—For London, Dec. 26, Johanna Maria; for New York, 22, Brave.

From SHANGHAI.—For London, Dec. 26, Elmstone, J. M. Joshua; For New York, Dec. 28, Dartmouth; Jan. 1, Etha Rickmers.

From FOOCHOW.—For New York, 24, Lauderdale.

From HONG KONG and CANTON.—For Havre, Dec. 29, Taffarette; for New York, 30, Louisa, Jan. 1, Stirling; for London, 6, Kelso, Roslin Castle; for Hamburg, Dec. 26, Glenisla; for Havana, 25, Onrust, Jan. 5, Vistula.

From MANILA.—For London, Dec. 25, Ardanza.

From SINGAPORE.—For Boston, Jan. 16, Margaret.

From PENANG.—For London, Jan. 16, Alice; for New York, 7, Bertha, Pauline.

## VESSELS LOADING.

At YOKOHAMA.—For New York, Alcyone, Pallas, Caractacus, John Norman, N. B. Palmer.

At SHANGHAI.—For New York, American Lloyds, Cingla.

At FOOCHOW.—For London, Bemah (full), Coryphus, James Shephard, for Peterborough, Sovereign of India; for New York, Cleta, Glenaros, Surprise.

At MANILA.—For Liverpool, Amigos, Feliz.

At SINGAPORE.—For London, Bristow, Coleroon, Napier; for Boston, Rocket.

At PENANG.—For New York, Pauline.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To New York, £3 per ton of 40 cubic feet; per steamer, $45.

At SHANGHAI.—There is no vessel on the berth for London; for New York there are two vessels loading at previous rates.

At FOOCHOW.—To London, £2 7s. 6d. per ton.

At HONG KONG and CANTON.—A better demand exists for tonnage. The following will show the principal charters for the fortnight:—Caroline, 266, Canton to New York, £3 per ton; Red Deer, 694, Bangkok to London, £3 1s. 6d.; if Channel, for orders, to United Kingdom, £3 4s.; if to Continent, £3 9s. per ton; Lota, 472, Bangkok to United Kingdom, £3 10s.; or Continent, £3 15s. per ton; Banda, 481, ditto, £3 10s.; or Continent, £3 15s. per ton.; Celestial Queen, 843, Saigon to United Kingdom, £3; or Continent, £3 5s. per ton; Ocean Empress, 1,052, ditto, or Continent, £3 7s. 6d. per ton; Gezine Brons, 400, hence to Callao, £3 10s. per ton.

At MANILA.—To London, dead weight, £4 per ton.

At SINGAPORE.—The Argo has engaged a full cargo for London at £3 per ton, the Naworth takes the Liverpool berth at £3 per ton for dead weight and light freight. Helensbank 315 tons, to load at Penang for London with tin at £3 10s., sugar at £3 15s., pepper &c., at £4, Rum at 4¼d. per gallon (all less 5 per cent.) 25 lay days.

At PENANG.—The James Paton has been laid on the berth for London at £3 10s. for dead weight—£3 15s. for light freight—and £4 for measurement goods.

## COMMERCIAL POSTSCRIPT.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton, on the 20th instant, was—in gold, to Bombay, £18,350; to Madras, £9,151; to Calcutta, £4,986; in silver, to Bombay, £15,930; to Singapore, £24,400; to Hong Kong, £24,740; to Shangai, £17,440; total in gold, £32,486; in silver, £82,510.

### SHIPPING.

ARRIVALS NOT IN THE TABLES.—Feb. 16, at Liverpool, from Akyab, Queen of Australia; 14, at Texel, from Macassar, Mary Goddard; 17, at Falmouth, from Zebu, Tamana; 13, at Cadiz, from Maulmain, City of Ottawa; 17, in the Downs, from Foochow, Sooloo; at Falmouth, from Bangkok, Lodore; at London, from Bangkok, Ferozepore; Feb. 18, off Prawle Point, from Penang, Alvington; at Falmouth, from Foochow, for Hamburg, Anna Maria; from Rangoon, Dreadnought; at Liverpool, from Maulmain, Magnet; 15, at Zierikzee, from Padang, for Rotterdam, Stad Middelburg; 19, at Deal, from Singapore, Ensign; at Falmouth, from Swatow, Samuel; from Saigon, Eugenio; —, at Waterford, from Manila, Rt. Pulsford; 16, at Bremen, from Bangkok, Europa; 20, at London, from Shanghai, &c., Ajax (st.); 19, at Liverpool, from Singapore, Madge Wildfire; from Bassein, Royal Edward; 18, at Brouvershaven, from Batavia, Catharina Maria; 6, at New York, from Shanghai, Resolute; Jan. 7, at Callao, from Macao, Uncowah; Feb. 8, at Boston, from Foochow, Hoogly; from Singapore, Kate Cleather; 18, off Dover, from Samarang, for Rotterdam, Chili; 20, at London, from Shanghai, Isabella Ridley; from Foochow, Zuyra; 21, at Falmouth, from Foochow, Albis; at London, from China, Smyrna; from Penang, Alvington.

DEPARTURES.—Feb. 17, from London, for Yokohama, Phæton; 5, from Penarth, for Singapore, Schoonderloo; Feb. 18, from London, for Shanghai, Juanpore; 16, from Shields, for Singapore, Wallace; 18, from Liverpool, for Shanghai, Melbrek; 17, from S'land, for Shanghai Asterion, Waterlily; from Hamburg, for Hong Kong, Falke.

LAID ON.—At London, for Shanghai, Tamerlane; at Liverpool, for Singapore, Duncairn, Mikado; at London, for Yokohama, Mount Stuart Elphinstone; for Singapore, Christian Rankin, Red Riding Hood; for Padang, Eleanor; at Liverpool, for Hiogo and Nagasaki, Frederica.

SPOKEN.—Anne, Sourabaya to Rotterdam, Dec. 16, 35 S., 19 E.; J. W. Lorenzen, Bangkok to Falmouth, Dec. 31, 35 S., 18 E.; Bothwell Castle, Batavia to the Clyde, 2 N., 23 W.; J. H. Jessen, Hamburg to Singapore, Jan. 15, 1 N., 26 W.; Chili, Samarang to Rotterdam, Jan. 18, 11 N., 33 W.; Utrecht, of Rotterdam (clipper), for Batavia, with passengers; Albuera, Penang to London, Dec. 12, 20 N., 73 E.; Pactole, China to Havana, Jan. 7, 27 S., 56 E.; Whiteadder, London to Shanghai, Jan. 12, 4 N., 18 W.; Thomas Bell, Colombo to London, Jan. 20; N. G. Merada, Canton to New York, Dec. 10, 32 S., 31 E.

CASUALTIES.—The Clara Babuyan, which sailed from Sunderland, Feb. 4, for Shanghai, arrived at Deal Feb. 14, with loss of longboat, casks, and bulwarks, cargo shifted, and other damage.

A telegram from Vigo, dated Feb. 16, states that 600 packages had been saved, ex Cinco Hermanos, wrecked off Cape de Mar, Vigo Bay, and that the salvage was progressing favourably.

A telegram from Singapore, dated Feb. 9, announces that the Leopold (brig), of Altona, from Hamburg, to Shanghai, has been lost in Gaspar Straits, crew saved.

The Dunmail, from London to Hong Kong, which was off the North Foreland, Feb. 12, with crew refusing to proceed, has put back to the Victoria Docks, with loss of bowsprit, foreyard and foreroyalmast, having been in collision.

The Whirlwind (ship), bound to Glasgow, and the Herald of the Morning, bound to Singapore, both from Singapore, were in collision, Feb. 13, at the tail of the Bank, Greenock, the mizentopmasthead of the former vessel was carried away, and the latter was slightly injured, and had to be taken into the Victoria harbour for repairs.

The Glenclune, Harvey, from Cardiff, to Japan, which vessel arrived at Waterford, Feb. 17, had lost anchor and part of chain off Creden Head.

The Resolute, Holt, from Shanghai, which arrived at New York, Feb. 6, had lost sails during a heavy W.S.W. gale, Dec. 9, in 37 S., 24 E., and was detained seventeen days off Cape of Good Hope with heavy W. gales.

MISCELLANEOUS.—At Baltimore: Feb. 6, Argonaut, Gardner, from Boston, for Hong Kong. At Mauritius: Dec. 19, Sivia, Renwall, Batavia, and sailed 22 for the Cape of Good Hope; 29, Agra, Tozer (mate in charge, the master, McDougall, having died), sailed for Colombo.

---

THE CHINESE ENVOYS AT THE JARDIN DES PLANTES.—The sprightly but not always reliable correspondent of the *Daily Telegraph* tells the following story:—Eight of the principal personages of the Chinese Embassy paid a visit the other day to the Jardin des Plantes. After having paced through the museums and hot-houses, the honours of which were done by the professors, the mandarins and their suite visited the menagerie, where they received a familiar nod from the Japanese salamander, and were much amused with the monkeys. In the house set apart for the quadrumana a droll incident occurred, which occasioned the greatest fun among the bystanders. One of the suite was standing with his back to a cage wherein was confined a chimpanzee; the Chinaman's pigtail hung temptingly down his back; the malicious animal saw his advantage, seized the tail, and pulled it towards him, dragging the head of the unfortunate man against the bars of the cage. The crowd shrieked with laughter; the captivated owner of the pigtail screamed with pain; threats and menaces were used to no purpose—the animal would not let go his hold on his prey until a keeper came to the rescue with his cane. Once released, the Chinaman repaired the disorder of his toilet, and then joined the suite, cheered by an hilarious if not a sympathetic crowd.

## LATEST TELEGRAMS.

RECEIVED VIA GALLE, FEBRUARY 15.

CHINA.

HONG KONG, JAN. 25.—A collision has occurred near Swatow, between the inhabitants of some villages and the crew of Her Majesty's gunboat *Grasshopper*. The British were compelled to retreat, having had eleven of their number wounded. A naval force of four hundred men is proceeding to Swatow.

COMMERCIAL.

HONG KONG, JAN. 25.—Gray shirtings: 6½ catties, 8¼ lb., $2 65c.; more inquiry. Water twist, 16-24, $1 20c.; nothing doing. Cotton, Bengal, fair medium, $16. Tea, Foochowfoo, firm and advancing. Total exports (China and Japan), 21,000,000 lbs. Exchange on London: Bank bills, six months, 4s. 5d.

SHANGHAI, JAN. 20.—Gray shirtings, 6½ catties, 8¼ lbs., 2 taels; large speculative business. Cotton, Shanghai, 16 taels. Tea—black, quiet, but unchanged; ditto, green, active and advancing. Silk, quiet, but prices maintained; No. 3 Tsatlee, 600r. Settlements since departure of last mail, 825 bales. Export to date (China and Japan) from commencement of season, 58,125 bales. Exchange on London: Bank bills, six months, 5s. 11½d.; Freight, tea, £2. 10s.

JAPAN.

YOKOHAMA, JAN. 13.—The Mikado has received the foreign representatives at Yedo in public audience.

RECEIVED FEBRUARY 16.

CHINA.

HONG KONG, JAN. 26.—Further particulars respecting the affair at Swatow have been received. It appears that the crew of Her Majesty's gunboat *Cockchafer*, under Lieutenant Kerr, were exercising on shore, when they were fired upon by the natives. The officers escaped unhurt.—Her Majesty's ship *Serpent* has commenced taking deep sea soundings between Singapore and Galle, with a view to the future laying of a telegraph cable.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

ANGLIN—On the 15th Dec., at Yokohama, the wife of Mr. J. R. Anglin, of a daughter.
BOURNE—On the 12th Dec., at Yokohama, the wife of Mr. William Bourne, of a daughter.
CARTER—On the 28th Dec., at Shanghai, the wife of Charles E. Carter, Esq., of a son.
HAUSCHILD—On the 11th Dec., at Saigon, the wife of Louis Hauschild, Esq., of a daughter.
HELMS—On the 24th Dec., at Sarawak, the wife of L. V. Helms, Esq., of a daughter.
JOHNSON—On the 1st Jan., at Shanghai, the wife of Francis Bulkeley Johnson, of a daughter.
MARSHALL—On the 28th Dec., at Shanghai, the wife of J. Marshall, Esq., of a son.
WADMAN—On the 19th Dec., at Ningpo, Mrs. Edwin Wadman, of a son.

### MARRIAGES.

BARNICOTT—SHOLL.—On the 1st Jan., at St. John's Cathedral, Hong Kong, by the Right Rev. the Lord Bishop of Victoria, William Barnicott, Esq., of London, to Ellen, fifth daughter of James Sholl, Esq., of Truro, in the county of Cornwall.
BING—HUXTABLE.—On the 2nd Jan., at St. Andrew's Church, Singapore, by the Rev. J. A. Beckles, Colonial Chaplain, A. C. Bing, Esq., to Mrs. Huxtable, of Beach House.

### DEATHS.

FORLOBOO—On the 3rd Jan., at Singapore, Mr. G. M. Forloboo, clerk in the Colonial Secretary's office, aged twenty years.
GASKELL—On the 29th Dec., at Hong Kong, William Gaskell, Esq., solicitor.
GRENNAN—On the 30th Dec., at Shanghai, of paralysis, Frank Grennan, late Chief Engineer of the S. S. N. Co.'s steamer *Shanse*.
HOGAN—On the 1st Jan., at Penang, Mr. Charles T. Hogan, chief engineer of the colonial steamer *Perlio*.
KEELEY—On the 3rd Feb., at 10, Pelham-crescent, Robert Keeley, Esq., in the 75th year of his age.
SASSOON—On the 22nd Dec., at Shanghai, Mr. Joseph Sassoon, aged 18 years.
WOOLLETT—On the 16th Feb., at Wimbledon, John Frederick Sanford Woollett.

## MISCELLANEOUS.

### MADAME RACHEL AND THE CHINA MERCHANTS.

It seems we have been too hard on Madame Rachel after all. This much-maligned lady is deserving of far more tender treatment than she has experienced; for she is, and has long been, a powerful supporter of the China trade. According to her own account—the correctness of which, for obvious reasons, it would be improper to doubt—Madame has had most extensive dealings with some of the leading China firms, and has paid them enormous sums for those invaluable preparations whereby she was enabled to make the Girl of the Period "beautiful for ever," and to rejuvenate the Old Woman of the Period, into the bargain.

But we had better put Madame into the witness-box, and let her tell her own tale. She says a solicitor who formerly managed her "affairs"—a Mr. Haynes—has cheated her, and she has applied to have him struck off the rolls. An investigation of the case is now going on before Mr. Smith (a Master in Chancery) in Queen's Bench Chambers. Yesterday, in the course of the proceedings, Mr. Lewis (who appeared for Mr. Haynes) cross-examined Madame Rachel as to the nature of her business, and, among other questions, asked, What was the value of her stock?

Madame Rachel said: Over £10,000. It came from all parts of the world. She had a great many things from China, from merchants. She did not know their names.

In answer to further questions,

Madame Rachel said she paid money to Dents and Jordents (Jardines?) in China. She relied upon her belief and memory for dates. Could not state where the agent or representative of the China merchants lived, but she positively bought the China powder of him, and leaves for adding bloom to the face and lips. She laid out with the person referred to €700 or £800 for scarce, valuable, and beautifying goods. She did not know where he lived. He was a traveller.

Mr. Lewis said this was another of the fables heard of.

Madame Rachel said her lady customers were the first ladies in the world. To mention their names would ruin her and her family. She refrained from motives of delicacy from giving the name of any one lady who, in 1862, paid her £1,000.

Mr. Lewis said it was gross perjury.

### STATUE OF MR. DAVID SASSOON.

In the North Court at the South Kensington Museum has been placed a statue in marble, rather larger than life, of the late David Sassoon, the munificent Persian merchant, of Bombay. This figure, which is the work of Mr. Woolner, is finally to be set up in a great hall which has been erected to the honour of the subject in Bombay, where, as at Poonah, he built schools and hospitals with a portion of his enormous wealth,—doing such good works during his life, as well as by testament after death. In the *Athenæum* we find the statue thus described:—"The attitude in which the statue is placed is that of Oriental thanksgiving, as if for wealth of Divine benefits. The arms are placed close to the sides, and bent at the elbows, the palms of the hands are turned upwards and the fingers free. The face is slightly raised, the eyes looking forwards. This attitude is eminently sculpturesque and simple, and in thorough accord with the costume in which the statue appears; this comprises the turban, cloak, voluminous girdle, and soft-textured inner robe. The whole is so simple, graceful, and thoroughly reverential in its expression that it at once arrests the attention of the passer-by with the charm of complete elegance and thoroughness of elaboration, which last is dignified in perfect breadth of treatment; so that with all the sculptor's obvious avoiding of effort to produce what is called effectiveness, the statue is more effective than a commonplace 'sensational' figure. Differing in this manner from the mass of modern English sculptures, this figure of Mr. Sassoon has the extraordinary merit of looking well all round; being thoroughly wrought out for all points of view, composing well, and being expressive in all aspects. The ease of the attitude and simplicity of the design are as well marked in the draperies which fall from the shoulders backwards in the long, full, and rich folds of woollen cloth, as in the front of the effigy. These seem to have a human form instinct with life within them, and not, as is common, a wooden frame. The hands are wrought with rare care and learning; the face is thoroughly modelled, and apt in its expression. The beard—that seldom happily treated feature in a statue—is beyond challenge here, and the manner in which it is brought in contact with the dress on which it lies is worthy of study. Skilfully wrought and gracefully disposed as are the folds of the cloak, its texture and its contours are hardly more expressive and faithful than those of the thinner body-vestment and the ample sash. We commend to the student the management of the turban, in its apparently infinite involutions, compactness, and oval outline."

### PROPOSED SILK SUPPLY ASSOCIATION.

It is proposed in a circular from Messrs. D. Chadwick, M.P., and Thomas Dickins to hold a meeting on the 18th inst. for the formation of a Silk Supply Association, on a basis analogous to that of the Cotton Supply Association, the objects being as follows:—

"1. To stimulate the production of silk by cottage cultivation and otherwise in every country where the mulberry tree is capable of giving food to silkworms.

"2. To encourage the introduction and exchange of the eggs of the best kind of silkworms in silk-producing districts.

"3. To offer practical suggestions and encouragement to the producers of silk for improving the quality, and securing a better classification, and for insuring greater care in the reeling of the silk.

"4. To promote the cultivation of silk in the various silk producing districts in India where the production of silk has not recently increased, and in other districts of India where the cultivation of the silkworm has almost ceased, but which are known to possess special advantages, by the growth of the mulberry tree and the habits of the people, for its propagation.

"5. To promote the exportation of cocoons from countries not well able to reel them.

"6. To communicate with the Foreign, Colonial, and Indian departments of Her Majesty's Government, and to obtain the aid of the English representatives in the British colonies, and consular agents in all Foreign countries to promote and extend the cultivation of silk."

We have been favoured with the following copy of a letter addressed to Mr. Chadwick, the promoter of the scheme:—

India Museum, India Office, London, S.W.,
February 8th, 1869.

DEAR SIR,—With reference to your letter lately addressed to me on the subject of the establishment of a Silk Supply Association, based on the same principles as the one in Manchester, which had such an important influence on the culture of cotton, I have no hesitation in saying that I consider very beneficial results would be likely to follow such a step. There are, it appears to me, excellent reasons why the Silk trade of this country should occupy a more important position than it has hitherto done. The field is wide, and one most worthy of cultivation. We have capital, and can command the best appliances; and there is no reason to suppose that the requisite artistic skill, upon which so much depends, will be wanting; our manufacturers are beginning to see the importance of that. The main difficulty affecting the Silk trade of Europe is, as you are so well aware, the uncertainty connected with the supply of the raw material. This difficulty has of late years been enhanced by the failure of its cultivation in France, the effect of which, of course, is to render her more dependent upon foreign sources of supply, and so help in some measure to equalise—so to speak—the elements of competition between her manufacturers and ours. A judiciously worked Silk Supply Association like that suggested by you is, I think, very worthy of support. I believe it might be instrumental in improving and extending the cultivation of silk in India and elsewhere, and, if established, I shall be happy to be of any service to it in my power.—I am, dear Sir, yours very faithfully,

J. FORBES WATSON.

To David Chadwick, Esq., M.P.

## THE AMERICAN ROUTE TO CHINA AND JAPAN.

The establishment of a direct route to Japan and China *via* San Francisco was from the first hailed as a great boon by American travellers to and from those countries, and latterly it has grown more in favour with the English, since many of the asperities that at first rendered it distasteful to them have been smoothed away. From the subjoined description of a recently-performed journey by this route, it will be seen that in some portions of it the ease and luxury to which passengers by the P. and O. steamers have become habituated are still wanting; but against this drawback must be set the novelty of the route and its many other recommendations. In justice to the company it should be mentioned that the extreme overcrowding of the steamers between New York and San Francisco, that caused so much discomfort on the passage here described, is now at an end. The opposition line that was then in existence has since been withdrawn, and this cessation of competition has been followed by a rise in the fares, and consequently a vast increase of comfort and accommodation. The necessity for passengers to travel over this portion of the route will soon be obviated by the completion of the railways across the Continent. It will be seen that the following account is written by one who has recently been over the line—not exactly in the form of a sustained narrative, but rather as a series of notes, hastily jotted down as time and opportunity offered, of such facts and experiences as are most likely to be of value to intending travellers by this route, or of interest to those readers who may be curious to know what it is like without wishing to make the experiment in person.

### LIVERPOOL TO NEW YORK.

In these days of rapid locomotion, there is little novelty in crossing the Atlantic in eight days fifteen hours. However, to be in order and circumstantial, we left Queenstown in the far-famed Cunard steamer *China*, Captain Hockley (a brother of the harbour-master at Shanghai), on Sunday afternoon, the 13th Sept., and arrived at New York early on the morning of the 22nd. The sense of security which is enjoyed in the Cunard steamers, combined with the comfort, good accommodation, and attendance, is certainly worth an extra few pounds in the passage money, to say nothing of the freedom from any annoyance by steerage passengers. It is to be hoped that our Government will see fit to renew the subsidy to this company, which has so well earned it by the splendid manner in which their service is performed.

On landing, our baggage was examined as usual on the Jersey City side, whence we had to cross over by the ferry to the New York side. The baggage warehouse is a commodious sort of a shed, well enough in warm weather, but perfectly miserable with the thermometer at freezing point. This inconvenience is, however, a trifle compared with the *modus operandi* adopted in passing the baggage. In the first place, no attempt is made by the authorities to place the baggage of each person together, and the peculiar manners and customs of the porters renders this an operation of no little difficulty. It is next to impossible to attract the attention of any one of these individuals without letting him see very plainly the coin, or rather the "greenbacks,"—for coin there is none—of the State, and these are at a discount of 25 per cent. This obstacle being overcome, the next proceeding is to secure an examining officer, who at once begins to ask all sorts of questions as to the contents of your trunks, and notwithstanding your assurance that there is nothing in them liable to duty, he "guesses" they must all be examined. The weary stranger by this time, however, begins to suspect that the same process that succeeded with the porter might be tried here also; whereupon the officer guesses you have nothing for duty, and you can move on. Having emerged from this ordeal, minus five or ten dollars, the next operation is to secure what we call a cab, only that there are no cabs in New York; they are all heavy, two-horsed coaches, and the lowest fare for under a mile is two dollars, but as a passenger by a steamer you must pay at least five dollars to go to your hotel. The coaches of the hotels are in attendance at two dollars, but they tire one out with "Going directly." Americans, as a rule, readily admit the want of system and the countenance given to bribery at this baggage warehouse; and there is a good opportunity here for the new Administration to effect a sweeping change for the benefit of the public and the credit of the Government.

New York is fast becoming to America what London is to Great Britain, and the citizens will soon be compelled to devise underground railways, and other appliances, to relieve the traffic in the streets. Besides the hotels already familiar to one's ears on Broadway (the Astor House, St. Nicholas, Metropolitan, New York, &c.), we have now a list of new ones, prominent among which is the hotel on Fifth Avenue, and styled the Fifth Avenue Hotel. This establishment is of enormous size, built of marble, and running over some two hundred feet frontage. It is six storeys high, and accommodates fully seven hundred visitors. The bedchambers are light, airy and clean, well provided with water, gas, &c. The dining saloon, and ladies and gentlemen's drawing rooms, are in good taste, and well designed for comfort, to say nothing of luxury. The discipline of the servants and the general conduct of the house is admirable. With a full house no one has to complain of having to wait, or of being badly served. Considering the nationality of the servants—Irish—the success is very creditable to the managers, Messrs. Darling and Griswold, who know how to "keep an hotel," and are always to be found in the discharge of their duties. The table is magnificently supplied with the best provisions, fruits, &c., and one can truly live like a prince in the mansion for five dollars, equal at the now current value of greenbacks to about fourteen shillings per day. This includes servants, gas, &c.; in fact, there are *no extras*, the five dollars clears all, and this is one of the points aimed at by the managers. Three days devoted to the city of New York will give one a very good idea of the place and its busy life. A run up to Boston by rail, returning by the steamers via Bristol, will give one an experience of the finest steamers in the world—of about 3,000 tons, almost entirely devoted to the accommodation of passengers; they can carry 1,500 or 2,000 with comfort. The saloons are fitted like drawing rooms, lighted with gas, and the vibration is so slight that it is hard to realise being afloat at all. The distance from New York to Bristol is one hundred and seventy-five miles, and is usually done in ten to eleven hours. A visit to the Falls of Niagara (by steamboat to Albany, or by direct rail), should also be accomplished.

### NEW YORK TO ASPINWALL.

On the 1st Oct., punctually at noon, the Pacific Mail Company's steamer *Rising Star*, Captain Maury, started for Aspinwall. Owing to the competition of an opposition line the number of passengers was more than usual, being 866, of whom about 400 were in the cabin, that is first and second class, for the regulations of the company sanction the mixture of the two classes in the use of the saloon for meals and the deck. The meals of the second class are served after the first, and they are not entitled to use the saloon at other times; but practically it is impossible to avoid it. The system is a discomfort if not an injustice to both, and the sooner it is altered the better. The steerage passengers are well separated, and are in no respect an annoyance to the first class. The sanitary arrangements are admirable, and the general discipline of the ship in all departments may be pronounced as excellent. An inspection by the captain or surgeon takes place twice a day, each cabin, the saloon, pantries, galleys, second class and steerage accommodation. The order and cleanliness maintained amid such a herd of passengers was highly creditable to Captain Maury and his officers. The *Rising Star* is 2,700 tons and 1,000-horse power, in all respects a fine vessel, but being deeply laden with railroad iron, her speed was not what it should have been. The distance is 1,980 miles, and our arrival at Aspinwall was on the morning of the 10th, or nearly nine days from New York. One of the Cunard steamers would have done it in from six to seven days, the weather being fine and sea smooth. It is certainly against our preconceived notions to find anything American slow.

### THE ISTHMUS OF PANAMA.

At Aspinwall we steamed alongside the wharf, and landed with ease and comfort, and in about two hours our train started for Panama. Aspinwall town simply consists of the offices and warehouses of the various steam companies, and such shops and hotels as are usually improvised where the Anglo-Saxon puts his foot, supported entirely by the passenger traffic. They are all of the most simple mat and wood construction, the main street is right alongside the railway track, and a railway station is deemed superfluous. The "natives" are blacks from Jamaica and other places. The vegetation is of wild tropical luxuriance. The population are all subject to the prevailing fever, styled "Panama fever," more especially those who are exposed to the rain and sun. Rain prevails more or less every day in the year on the Isthmus, and it is prudent to avoid getting wet. At 9.10 we started in the railway cars, managed on the American plan, *i.e.*, an indiscriminate mixture of gentlemen and "rowdies." When will public opinion in America compel the railway companies to provide on all their lines compartments which a lady or gentleman can use, and avoi the herd of dirty, swearing, expectorating roughs? And when will they have a compartment devoted to water-closets, instead of the disgusting custom of one in each car? Cars, as they now exist, are utterly unfit for ladies.

The run across to Panama occupies three-and-a-half hours, distance forty-seven miles. It is generally done in three hours, but the rails were under repair in some places, which checked our speed. The line is a single one, and runs through a wild hilly jungle; to avoid tunnelling there are many sharp curves, the gradients in some places being considerable, and with a heavy load the engines are deficient in power. There are four stoppages or stations, and the natives have clustered a few huts at each place for the sale of fruit, eggs, bread, wine, spirits, and Bass' bitter ale. It was a curious scene to see our 900 passengers jumping out of the cars and bargaining in this wild fever-stricken jungle; especially when one considers what an enormous cost of money and life the cutting of the line involved. Nothing but the indomitable energy of the Americans could have overcome such difficulties, and even at this moment the line is worked entirely by their strong will, for the Government on the Isthmus is powerless, owing to continual struggles for power among themselves. This is the normal condition of things, and the fighting so often reported from Panama in New York and English papers, causing so much alarm in the homes of travellers by this route,

Digitized by Google

means no detention or danger to them, for the traffic proceeds without interruption. To avoid danger from any of these disturbances passengers are carried by the cars alongside the wharf, and transferred at once into the steam tender for the steamer lying in the harbour for San Francisco. So well is this managed that the whole of our 900 passengers were transferred in ten minutes, most effectually stopping any propensity for wandering about the town or city of Panama, which is, however, a miserable place.

The fare charged for each person across is 25 dollars, and freight at the rate of 20 dollars per ton for sundry merchandise; this is for *slow* freight; for *express*—*i.e.*, to go through at once to connect with the steamer—72 dollars per ton! These rates for forty-seven miles produce an enormous profit to the shareholders, and their dividends range from twenty to thirty per cent. per annum. The policy which directs so high a tariff is, however, very questionable, and sooner or later must produce competition. Such a system is an anomaly in the present day—entirely opposed to the spirit of progress and the American character, and the sooner the directors awake from their old-fashioned lethargy the better for their own credit and the country they represent. (The transit across the Isthmus of Suez (250 miles) is £4 5*s.* for first-class passengers, and £2 5*s.* for second.) The telegraph wires here run across by the line of rail, supported on posts constructed of cement; wood was found to rot in a few months.

At Aspinwall (or Colon, as it is called by the Government of the country and by the British Government) the Royal Mail Steam Packet Company's steamers, which have carried the mails for a quarter of a century under contract with the British Government, arrive twice a month from Southampton and the West Indies, and they also leave Aspinwall twice a month for England. These steamers form a through route for mails, passengers, specie, and cargo, both out and home, with the United States Pacific Mail Steam Ship Company between Panama, Mexican Ports, San Francisco, Japan, and China; with the Pacific Steam Navigation Company (British) between Panama and a multitude of ports on the Pacific coast as far as Port Moutt in Chili; and with the Panama Railroad Company's steamers between Panama and ports on the Central American (Pacific) coast. Several months ago the Transatlantic steamers of this company began to run through between Southampton and Aspinwall, by which arrangement the Isthmus traffic is no longer subjected to any transfer at an intermediate port in the West Indies. These steamers are magnificent vessels of from 3,000 to 3,400 tons, and 800-horse power, and the mail contract service is performed with the greatest regularity. Besides the above-mentioned lines from Panama to the North and South Pacific and Central America, there is an English line to Liverpool, and a French line to the West Indies and St. Nazaire. The French are also about to put a line on the coast to Valparaiso, in opposition to the English Company.

### PANAMA TO SAN FRANCISCO.

We now retrace our steps to the steam tender at the Panama wharf. She is a paddle-wheel with two passenger decks, and a thousand have plenty of elbow-room. In less than half-an-hour she puts us alongside the steamer *Golden Age*, Captain Cavarly, for San Francisco, and numerous are the conjectures as to the amount of comfort in her, as she is the smallest and oldest steamer in the service, only used in cases of accident, &c., to the regular boats. In this case she took the place of the *Montana*, which had broken her shaft. However, the *Golden Age* has been a fine boat in her day, and was destined to carry us in good time safely to San Francisco. She is constructed on the usual American plan, with guards' cabins on a deck above the main deck, and a hurricane deck over all; her size is 1,800 tons. The railroad iron again comes in, however, to retard our progress, and the speed is at first only eight knots, but subsequently improved to ten. The scenery in the bay of Panama, some ninety miles in length, is quite equal to the many praises bestowed on it. To say that our steamer was crowded conveys but a faint idea of the reality. Sofas, tables, and all other articles capable of bearing a person stretched for sleep were put in requisition. The saloon on the lower or main deck was dark and dismal, and as the whole crowd of us had to be fed here, the meals for first and second class followed each other in one perpetual succession from 6 A.M. to 7 P.M. The number of passengers had been increased at Panama, and came up to 928; the hold was full, and the baggage room appropriated for cargo, while the whole of the baggage was left on the upper deck, depriving us of its use for promenade. Notwithstanding all this, Captain Cavarly and his officers preserved a degree of discipline which saved us from being utterly demoralised; and to the judgment and ability of Captain Cavarly, aided by Mr. Coy, the chief officer, Mr. Bevell, the purser, Mr. Bennelman, the baggage master, and Dr. Boone (son of the late Bishop Boone), we owe it that the voyage was in any degree tolerable. It must, however, be remembered that the whole condition of things, from our leaving New York up to San Francisco was entirely exceptional, and with the stoppage of the opposition and the exclusion of second class passengers from the saloon there are no steamers afloat that can excel these in appliances for the general comfort of first class passengers.

We reached Acapulco on the morning of the 17th, six days from Panama, took in 325 tons of coals, &c., and proceeded again in the evening about seven P.M. The harbour is landlocked and extremely pretty; the town is inhabited by a few Americans, Mexicans, and blacks. There is a very good hotel under a mat roof, and most of the tenements are simply of wood and mat. The houses of the U.S. Consul and agent to this company (there is no English Consul), are the principal ones. There is overland communication by mules—no carriage road—with the city of Mexico in four days, distance 380 miles.

Arrived at Manzanilla, also on the Mexican coast, early on the morning of the 19th, and started again at 8 A.M. This place is even less than Acapulco, but it is the seaport of the city of Colina, containing about 30,000 inhabitants, and the trade is of some importance.

We are now steering direct for San Francisco, and strike out for the Gulf of California. The land view along the coast between Panama and Manzanilla is at times extremely pretty, and always pleasant to gaze on. The weather has been warm, the thermometer standing at 80 deg. to 85 deg. and 110 deg. in the sun, but with the sea-breeze it is by no means distressing, and with iced bitter ale quite enjoyable to those accustomed to a greater heat. The whole length of coast, with its smooth sea, is exactly suited for steam navigation, but in a sailing vessel would be intolerably tedious. It is seldom a passage is concluded without the cry of "Man overboard," and ours proved no exception; the unfortunate man fell in front of the paddle-wheel, and was never seen. Mr. Coy, being the officer of the watch, stopped the ship, and passed the order for lowering a boat, and in four minutes it was down. This is a good proof of the discipline maintained by Captain Cavarly, but it is not to be expected that it would have stood the strain of such a contingency as a break down of the engines, or a fire, that most to be dreaded of all calamities at sea. The appliances on board all the Pacific mail steamers are, however, first rate, and the crew are exercised by false alarms of "Fire!" during each passage.

As great complaints have been made by passengers from China in reference to the charge for baths, it is well to observe that the pursers now have orders to allow baths to China passengers free. As to the incivility of the servants, the attention of the agents has been specially directed to it, but San Francisco is a hard place to get good men at. Passengers must not be afraid to complain to the purser, instead of submitting to the annoyance, and grumbling. The only way for the officers to effect an improvement is to have the opportunity given them of punishing a delinquent.

The weather became sensibly cooler for three days before our arrival, and a warm coat was necessary. On Sunday, the 25th, we made out the entrance to the "Golden Gate;" the fog was very troublesome all day, but at four it cleared off, and we could see the residents on the beach driving and walking, and the balcony of the Cliff House was filled with people expecting friends. A boat from the Merchants' Exchange boarded here, and gave us the startling intelligence of an earthquake having occurred on the 21st, which had caused considerable damage to buildings, &c., but only the loss of four lives. The excitement caused by this announcement on our 1,000 and odd passengers and crew can be easily imagined. Admiring the charming scenery, we passed through the "Gate" into the magnificent bay of San Francisco, and hauled alongside the wharf at five, having steamed 3,220 miles from Panama in fourteen days, fourteen hours—the total distance from New York to San Francisco being 5,247 miles, accomplished in twenty-four days.

### SAN FRANCISCO.

As soon as the steamer touched the wharf she was boarded by about twenty touters for hotels, express companies, and carriage drivers, all shouting at the top of their voices the names they represented. These men appeared like magic—rough, and resolute, and utterly bewildering to a novice. Following them came the friends of passengers by shoals, and in less than five minutes it seemed as if the ship were in the hands of an enemy, the surging to and fro along the passages reminding one of a theatre on fire. This is the last experience of a Californian steamer, one not to be missed, nor to be equalled in any other part of the world. Having given up your luggage to the charge of the representative of the hotel, who puts his chalk mark on it—which, by the way, could be easily effaced by a rival touter—you step on to the wharf, casting a sort of affectionate look at the ship that has afforded you such ample amusement and annoyance, with material for many an anecdote when once again by the fireside in Old England. The hotel coach here is the same heavy, lumbering, old-fashioned box as in New York—a standing anomaly in the general reputation of Americans for improvements—the same style of conveyance that we abandoned long ago for the lighter and smaller vehicle called a cab. However, in due time, after considerable bumping (for the roads are as bad as in New York), we arrived at the principal street, styled Montgomery, and were duly deposited at the "Lick House," by which designation the chief hotel in the city is known.

The Lick House Hotel suffered less from the earthquake than any other, being more substantially built, and only three storeys, while the Cosmopolitan and Occidental are four. The dining saloon is the finest in the whole country, and compares with the Grand Hotel in Paris; for space, elegance in design, ventilation, light, and general comfort, it is not to be surpassed. The gas chandeliers, panels, paintings, inlaid mosaic flooring, &c., are extremely handsome, and in good taste. The bedrooms are all fitted with gas, water laid on, spring mattresses, and every comfort. The corridors, staircases, &c., are spacious, there is a private entrance for ladies, bath-rooms, and in all respects, including living,

Digitized by Google

it is not a whit inferior to the best hotel in London or Paris—indeed in respect to vegetables and fruits superior, as they are so plentiful that the proprietor can afford to supply them *ad libitum*. The whole of this, including servants, gas, &c., costs three dollars per day. To order a dinner alone in London or Paris equal to that given here would more than absorb the whole three dollars; say, at 4s. the dollar, 12s. Indeed, considering the accommotion—the breakfast, lunch, dinner, tea, and supper, it is wonderfully cheap. It appears a singular contradiction to our notions that Americans rarely drink anything but water to their dinner. Out of three or four hundred persons not twenty will order wine—so that the hotels have not even the pull from the sale of drinkables that our landlords rely on. European wares, clothing, and similar items are very dear indeed in California, dollars go like water with the most of English people travelling through the country, either on business or sight-seeing. A pint bottle of English ale at an hotel is 50 cents, or 2s.; sherry and port, 2 to 3 dollars per bottle; Rhine wine, 2 to 4 dollars; Bordeaux and Burgundy, ordinary, 1.50 to 3 dollars; brandy, 3 dollars.

The streets and buildings of San Francisco would do credit to a city of a century old. About a dozen of the principal streets running at right angles are easily traced, well marked and numbered, and of excellent width. Some of the shops are pretentious, such as the glassware-rooms of Swain and Co., and the book-store of Bancroft and Co., which are quite equal to the best London establishments. The system of cars on rails is adopted in all thoroughfares, but the same horrid custom prevails here as in New York of crowding them beyond the number they will seat. The thing is a custom, and it is no use railing against it, though very repugnant and uncomfortable to a Britisher, like many other things in this land of freedom, where the respectable part of the community have to submit to the rowdy element. The low Irish and others calling themselves "Democrats" rule the roast by weight of numbers, and are undermining the best and most vital principles of good government. How long will the educated, intelligent, and respectable Americans submit to the corruption that now underlies all their institutions? This is the fruit of universal suffrage. There is not a Government appointment in the whole country but what is gained by party corruption—not a contract given out but what is filtered through the hands of a set of idle scamps of the most worthless class. The City of New York is taxed for its government twenty-three million dollars per annum, and where does it go? Not one-half is honestly expended. To be in any way connected with the Municipal or Central Government is to be supposed to have "touched the pitch" which defiles a good name, and hence men of integrity stand aloof.

Reverting to the streets of San Francisco, the "Vigilance Committee" have effected marvels, but the habit which so many Americans have of carrying either a revolver or a knife causes deadly affrays to be of nightly occurrence, arising out of quarrels between men who have been drinking. The general order of the streets is excellent and perfectly safe; the saloon rows can easily be avoided.

The city of San Francisco, its banks and commerce, is, for twenty years' growth, without parallel. The leading bank, styled the Bank of California, has a working capital of 5,000,000 dols., and in connection with the Oriental Bank works the exchanges with London, India, China, and Japan. The capital is soon to be doubled. The manager, Mr. Ralston, is one of the most enterprising and liberal men in the State. The erection of a mint in so young a place was an extraordinary but very wise step. This institution coins about twenty millions of gold and silver currency per annum, and the average wastage on this is but 1,500 dols. The presses strike off eighty to the minute. The currency is gold and silver, and the notes or greenbacks of the Central Government at Washington are repudiated, and taken only at the current discount of about twenty-five per cent. This is an anomaly, as they are a legal tender for every State in the Union.

The productions of California are equally wonderful—tobacco, wool, silk, wheat, wine, &c. In 1867 no less than 223 ships were loaded with wheat for England and other ports. Fruits and vegetables are now put up in tins and largely exported. Wines and brandy are also increasing in export, the grape growing without any care. Apples, pears, and peaches are insignificant. A visit to California to a man burnt up for years in India and China is indeed a luxury. The trips into the interior to the gold and quicksilver mines, &c., are very interesting, and all visitors describe the Yosemite Valley, where the trees are some thirty feet in diameter, as a sight worth coming from Europe to see. The population of San Francisco is computed at nearly 150,000. The wharves and other conveniences for the discharge of vessels are all first-rate; the steam companies have all special ones. That of the Pacific Mail Company includes bonded warehouses, &c. Iron foundries and engineering works of all descriptions can be executed here at much lower rates than in China. A capacious dry dock has just been completed, capable of taking in any vessel but the *Great Eastern*, and she is not likely to trouble or amaze San Francisco with her huge presence. Ferry steamers run across the bay to Oakland and other places, and several steamers run on the Sacramento river. Railways are also being pushed in all parts, and there are several completed lines for distances of twenty-five to fifty miles. These lines are opening up new towns, &c.* The State has lately settled a number of disputed claims to land within a radius of twenty miles from San Francisco, and the impetus thus given to improve these lots is very considerable. The weather in the autumn is very fine—clear sunny days with the thermometer about 70, and down to 45 at night. The rainy season commences in November, and continues more or less until April. From May to November there is no rain, but heavy fogs and dews, which come on every afternoon, and render the summer months very unpleasant. Full accounts of the earthquake on 21st Oct. have already appeared, so it would be useless to add even accounts from "eye-witnesses." No doubt it has shaken the faith of investors in property, and consequently the value, although holders put a bold front on it and assert that the value of real estate had not fallen at all, although the buildings had!

Americans are certainly showing signs of becoming an older nation; they do not eat so fast. Ten years ago an observer of hotel life in New York would see the operation of dining performed in ten to twenty minutes; now there is a distinct change observable, and with some exceptions they eat leisurely, and can occupy actually forty to sixty minutes—in short they now *dine* in place of bolting a dinner. That particular genus known as Yankees, or "Down-Easters," are not so prevalent as Englishmen suppose, and the "Wall, Stranger," salute is now rarely met with. The sort of Yankee whom the hero of "Foul Play" dealt with in selling his discovery of an island in the Pacific, who could only talk on business while "whittling," appears to have died out to a great extent. Americans have also a peculiar way of treating questions which are current enough amongst ourselves as travellers, but which they seem to treat as a species of impertinence, and either answer very curtly or not at all. They appear to be excessively sensitive of their independence—it cannot be called dignity—and their manner of showing it is frequently offensive. The habits of swearing, chewing, spitting, making use of other people's chairs for balancing their feet, and such like, are to be found among persons whose position and occupation should ensure a little more refinement. Only time can work down these oddities.

* The rail to Sacramento will soon be completed, and it is from here that the overland journey for New York commences.

### THE CHINA LINE.

The China line of the Pacific Mail Company is subsidised by the United States Government at 500,000 dols. per annum for a monthly service to Yokohama, Shanghai, and Hong Kong. For this service they have now four ships—the *Great Republic*, *China*, *Japan*, and *America*; the latter now fitting out at New York. These ships are all of 4,000 to 4,500 tons. The main line is to Yokohama and Hong Kong; while Shanghai is connected by a branch steamer, the *Costa Rica*, of about 2,000 tons, which also calls at the new ports of Osaka and Hiogo. The four larger steamers are magnificently fitted, and have a carrying capacity of about 2,000 tons for cargo, and 1,600 tons for coal and stores. The length in all is 380 feet, 50 feet beam, and 31 feet depth of hold. The *Japan* has five decks, with a height of is eight feet on the main deck. She is constructed of the best materials. The frame is strapped diagonally with iron, and the ceiling is bolted; the planking is double, of six inches and four inches thickness; the inside of pine, and outside of oak; barque-rigged, register tonnage 4,352, builders' 5,550; built in New York in 1868 by Steers, and engined by the "Novelty Iron Works;" cost about 1,200,000 dols. The lower hold is divided into five water-tight compartments. The engine is single, on the beam principle, the nominal power being 1,500-horse, working up to 3,000; the cylinder of 105 inch; stroke, 12 feet; diameter of wheel 40 feet; length shaft, 79; diameter, 2 feet; weight, 66 tons; crank, 8 tons. Consumption of fuel, 40 to 43 tons per day; average total consumption from San Francisco to Yokohama, 1,070 tons, the usual time being 26 days. The saloon is handsomely fitted, and measures 112 feet in length by 40; the cabins, or state rooms, as they are called by Americans, are arranged on two sides of the saloon for two persons in each, but could be made to hold three or four. On the lower deck there is another saloon surrounded by cabins, making fifty in all. The lower saloon is nicely fitted with couches, easy chairs, &c., and is devoted to ladies and married people, Besides this there is a saloon on the upper or hurricane deck, supplied with a piano and easy chairs. This is a favourite place in fine and warm weather, and is fitted up with great taste. The steerage accommodates in all 900 persons, divided into three grades. There is a general appearance of space prevailing everywhere, which is extremely grateful to all persons who have resided in the East. The vast capacity of the ship enables her to put out of sight all that is not agreeable, and to provide special accommodation for every department. There is a place for everything, and Captain Lane keeps everything in its place, and in a very quiet way. The general accommodation of the ship includes separate galleys, &c., pantry for steerage and cabin passengers, ice-house, butcher's shop, wine room and small stores, barber's shop, which includes the sale of a variety of articles; bath-rooms, water-closets, &c. The consumption of rice and sundry provisions is equal to about one ton per diem. A distilling apparatus gives an abundant supply of fresh water.

Such is an outline of the *Japan*, Captain George E. Lane, which left San Francisco on the 4th Nov., having been detained two days, waiting for the *Constitution*, from Panama. On the second day out she had the misfortune to break a shaft of the air pump. The chief engineer, Mr. Bulger, as promptly as possible supplied another, turning the shaft with the lathe. The delay involved nearly twenty-four hours. The progress of the *Japan* was very

Digitized by Google

majestic, but not calculated to satisfy passengers, the day's run being 150 to 230 miles. However, the ship in every other respect was so highly satisfactory that any real grumbling was scarce. No question but that good feeding is a panacea for many evils, and the present case was no exception to the rule. The steward performed his part most satisfactorily. The Chinese make excellent waiters, and their civility was a charming contrast to our experience on the Panama side.

The passengers included Colonel Hon. W. Coke, a brother of Lord Leicester, travelling for pleasure in company with Colonel Phillip Smith; Lieutenant Taylor, proceeding to join the 10th Regiment at Yokohama; Mr. Angier, of the *London and China Express*, on a visit to all the ports in Japan, China, and the Eastern Seas; Rev. Messrs. Partridge, Van Dyke, and Carrington and wives, proceeding as missionaries (American) to Siam; a large number of other Americans; eight Japanese (two women, and seven children), from the troupe performing in the United States; and 693 Chinese, including seven women.

The *Japan* is so constructed and divided off that the steerage passengers are scarcely seen, and it is difficult to realise that there are on board nearly seven hundred. They are not only not seen, but, what is equally important, they are not smelt; but the pigs and other live stock are, and are a standing nuisance on all the company's ships, being carried on the guards instead of the upper or hurricane deck, where there is more air. The *Japan* is a very fine sea boat, and rises to the sea so well that there is the minimum amount of motion. Indeed, with a tolerably heavy sea she pursues her way without taking over any water. Her great height out of water, some thirty feet, gives her this advantage to some extent. The absence of the heavy bowsprit and spars customary in the old style of steamers must also very much contribute to the vessel's power of rising to the sea. The appearance of an American steamer, with her small spars, guards, stanchions supporting the hurricane deck, and the bare look forward, although it contrasts unfavourably with our English steamers in appearance, affords great comfort to all on board.

For a thorough appreciation of the *Japan* the mysteries of the engine-room must be explored. A general description of the engine is given above, but the appliances over and above this are very interesting. There are no less than thirteen small engines for working the supply of water and other necessaries; condensing apparatus, by Normandy, capable of producing 1,500 gallons of fresh water daily, with several distributing tanks for galleys, pantries, &c.; hydraulic pumps, capable of lifting up to thirty tons; an engine shop and store, with tools capable of meeting almost all kinds of accidents, as, for instance, the shaft for the air-pump referred to above. The stokehole is supplied with buckets for coal and clinkers fitted on rails, and lifted by a small engine, thus avoiding any lifting or carrying. There is an indicator, showing the total number of revolutions to be 301,592 from San Francisco to Yokohama, the average being about 12,000 per day.

The precautions against for fire are very complete, the company being their own underwriters. There is an engine forward, of 50-horse power, capable of throwing fifteen streams; steam is turned on from the main boilers, and it is at work in a few minutes; eight other pumps, supplied with hose, are stationed at various parts of the ship. The crew are put through a course of drill and stations by a false alarm of fire.

The voyage of the *Japan*—twenty-six days—has been long, owing to the accident to machinery involving a care in pushing on. Last passage she accomplished it in twenty-two days, and the other ships for this year have accomplished it in the same time. The distance in the summer season is 4,764 miles, and in winter 5,250, as the course lays along the 30th parallel of latitude, involving a detour. In the winter season, from October to March, twenty-six days are allowed as the contract time to Yokohama. One of these days is lost to the ship, as in crossing the 180th meridian of longitude, from west to east, a day has to be dropped to equalise the time. In returning one day is doubled (that is, in going from east to west longitude), for the same reason. During the whole passage the weather was agreeable, and the utmost good feeling prevailed, so that we left the *Japan* with the impression that she was one of the most comfortable ships afloat.

The day before arrival the following complimentary letter was presented to Captain Lane:—

"DEAR SIR,—We, the undersigned passengers, per *Japan*, are desirous of expressing our appreciation of your kindness and attention during the present passage from San Francisco to Yokohama and Hong Kong. The general discipline maintained on board under your vigilant superintendence has rendered the passage the most comfortable in our experience. We part with the greatest confidence in your professional ability, and the highest regard for your personal worth.—We are, &c."

(Signed by all the passengers.)

---

The Pacific Mail Company is a joint-stock institution, established in New York now twenty years, with a capital of 20,000,000 dols. The President, Allan McLane, formerly a captain in the service, is a man of great energy, ability and integrity, and well competent for the post. The commanders and officers in the service are all men of high class, and well paid. The morale of the whole service is superior to any service in the United States, and quite equal to our own far-famed companies. The company's fleet now includes the following list, and large additions must be made to this if they undertake to continue the line through to England; a step which, if they study dividends, they had better leave alone, considering the enormous competition on the Atlantic.

China Service: *China, Japan, America, Great Republic, Costa Rica, New York, Herman.*

Panama: *Constitution, Sacramento, Montana, Colorado, Golden Age.*

Aspinwall: *Alaska, Rising Star, Henry Chauncey, Arizona, Ocean Queen.*

The treasure from San Francisco for China conveyed by these ships in 1868, including 784,225 dols. on board the *Japan*, for November amounts to 6,130,759 dols., at a freight of half and five-eights per cent. The cargo, consisting of flour, quicksilver, arms, and sundries, about 5,000 tons, at a freight of 10 dols. to 15 dols. From China and Japan the freight conveyed has been, including the *China* for November, 8,528 tons, chiefly tea for New York, at 35 dols. to 45 dols.

All goods for New York, England, &c., should, according to the United States Customs' regulations, pay a duty at San Francisco, as the first port of entry, and in order to get over this difficulty the Pacific Mail Company have to grant a passage to a Custom-house officer, who proceeds to Aspinwall and sees the goods actually put on board the steamer for New York. This is an awkward rule, and one that must be got rid of before goods are conveyed by rail, as the Customs cannot extend the privilege to the rail, and to insist on duties at San Francisco would be fatal to the carriage of any goods by the company's steamers for New York, England, &c.

The railway between New York and San Francisco will, it is believed, be completed next July. Meantime, the service is already performed in about twelve days, and the staging included is about four days; when completed the journey will be performed in seven or eight days, and the line through will stand thus:—From England to New York, ten days; stoppage and rail to San Francisco, nine days; steamer to Yokohama, four days more in winter, twenty-three days; Yokohama to Hong Kong and stoppage, eight days; total, fifty days. To compare with our P. and O. line in point of time faster steamers must be put on the line, but the travelling public will gladly avail of the change, and it will bring a large number of pleasure seekers, who will arrive out via San Francisco, and home by the P. and O., or reverse it and a finer trip cannot be conceived.

## NAVAL AND MILITARY.

—o—

### ANOTHER GUNBOAT FOR CHINA.

The double screw composite gun-vessel Midge, 2, at Devonport, is ordered to be put in commission by Commander Charles C. Rising. She is intended for service in China, and will have a complement of 71 officers and men. The Midge measures 464 tons, and has already been placed in dock.

---

### THE LOSS OF H.M.S. "RATTLER" IN JAPAN.

The following letter appeared lately in the columns of a morning contemporary:—

SIR,—Apropos of the very interesting letters daily addressed to your valuable journal on the subject of saving lives at sea, can you inform your readers what action has been taken by our Government in the recent wreck of the *Rattler* on the coast of Japan, when 140 British sailors had been saved by the French man-of-war *Dupleix*, commanded by Captain Du Petit Thouars.

More than a month since I read in the French papers a highly interesting narrative of the return to Yokohama of the officers and crew of the unfortunate *Rattler*, and the humane and considerate treatment they experienced whilst on board the *Dupleix*.

Independently of the great number of lives thus providentially rescued, a valuable amount of stores had also been saved.

The French Government has not been slow in appreciating, the very efficient service rendered to a friendly nation, as I have heard of its having substantially recognised and rewarded their officers for their energetic conduct on so trying an occasion.

Permit me to renew the question. What, beyond poor official thanks, has our ministry done in recognition of the valuable aid thus rendered by the Marine of our humane and chivalrous neighbour.—Yours, &c.,

Feb. 2. A SUBSCRIBER.

---

The following letter has appeared in one of the "service" papers on the subject of the Taiping campaign and Chinese decorations:—"Sir, —If the proposal for a general service medal comes to anything, may we who served in the rebel war in China in 1861-63 ask your advocacy for its being extended to us? A considerable number of troops (land and sea) were engaged in these operations; the work was hard, and entered upon with the depressing consciousness that, owing to a popular cry at home in favour of the rebels, we should not get even thanked for it. We had quite a fair proportion of killed and wounded, not to mention deaths from climate, &c.; but not only have we never received any recognition of our services in a war of which it is impossible to overrate the importance, but many of us, decorated for good service by the Emperor of China, have been refused permission to wear our hard-earned medals. Perhaps, if you took up our cause, we might obtain the general service medal, which would atone in some degree for what many of us, with all respect, consider an injustice.—Yours truly, ANTI-TAIPING."

*LONDON, MONDAY, FEB.* 22, 1869.

## "IN TRANSITU."

THE Judicial Committee of Privy Council has been occupied for two days with an appeal against the decision of the Supreme Court of Hong Kong in the now celebrated *Min* case. It will be remembered that this arose out of a consignment of Manchester goods, obtained on credit from Messrs. MENDEL, LIEBERT, and other Manchester firms, by Messrs. LYALL and STILL, and shipped by them to the Hong Kong firm of LYALL, STILL, and Co. A clause in the heading of the invoices stipulated that the proceeds of these goods were to be remitted specially to cover Messrs. LYALL and STILL'S acceptances against them; but the Hong Kong firm being in difficulties, its representative, Mr. MACLEAN, made an assignment of its property to the Chartered Bank of India, Australia, and China, and the Comptoir d'Escompte, which included this shipment, and handed over to these banks the documents appertaining thereto. On arrival of the vessel, however, the goods were stopped *in transitu* at the instance of the Manchester firms; an action was brought by the banks for their value, and a verdict given in their favour, with costs.

The object of the present appeal (a full account of which will be found in our "Legal" columns) is to set aside this verdict, on the ground that, under the peculiar terms of the transaction, LYALL, STILL, and Co. were not *bona fide* owners of the goods at the time they made the assignment; that such an assignment could only convey such interest as LYALL, STILL, and Co. really had in the property assigned (which in this case amounted to *nil*); and that the lien held by the banks on property so transferred must be subject to any prior claims there might be upon it, such as that of an unpaid vendor. Judgment was reserved; but Lord CHELMSFORD took occasion to express a grave doubt as to whether a bill of lading could in any case be lawfully assigned for an antecedent debt. In an article on this case in *The London and China Telegraph* of August 13, 1867, we noticed the intention of the Manchester firms to promote an appeal to the Privy Council, and at the same time expressed a belief that they would be successful—a belief which we still feel sure will be justified when the decision of the Judicial Committee shall be made public. Should it be otherwise, the sympathy of all right-minded persons must be with the vendors thus despoiled of their equitable rights. As for the banks, they were entirely deceived by the ingenious suppression of the original invoice, containing the special clause above quoted, and the substitution of a fictitious one in which that clause was expunged; and they can hardly be blamed for endeavouring to hold such security as seemed available to protect them from impending ruinous losses. And the authors of this clever operation? Well, there is nothing to be said against *them*. Did they not leave the Hong Kong Bankruptcy Court "without the slightest imputation?" and did not Judge SMALE pay them a high, and (doubtless) well-merited compliment on their conduct? Rather let us offer them our congratulations on the noble example of integrity and fair dealing they have shown their brother merchants; and on the halo of dignity in which the firm of LYALL, STILL and Co. sets below the commercial horizon.

WE hear from Paris that Viscount BRENIER DE MONTMORAND, Consul of France at Shanghai, is appointed Consul-General at New York, and is replaced in Shanghai by M. DE CAZOTTE, at present Consul at San Francisco.

## CHINA AFFAIRS.

THE correspondence between the FOREIGN MINISTER and Mr. BURLINGHAME, which has appeared in the daily papers (and which we reproduce elsewhere for purposes of reference), shows that the statement we gave a short time since regarding the agreement entered into was substantially correct. Whether this letter of Lord CLARENDON'S to the Chinese Envoy, and the reply of the latter is to be the sole end and result of the negotiations—or whether these despatches are merely intended to settle the basis of a treaty, to be concluded on the return of the Mission from Paris remains to be seen. We understand that China affairs will be brought to the notice of the House of Commons at an early period of the Session now commenced; and Lord CLARENDON will have an opportunity of more explicitly stating on what footing he has placed our relations with China, and of explaining (as the *Spectator* puts it) "how far he has fallen into Mr. BURLINGHAME'S trap, and how far Mr. BURLINGHAME into his." In the meanwhile, it is remarkable that we hear nothing of the Hong Kong Association—the London branch we mean, of course. Now is the time when its members should bestir themselves. Last Session China affairs were left to shift for themselves, and the subject was postponed until late in the year, when other questions of more Imperial urgency caused it to be shelved altogether. It seems to us most important that the Association should lose no time in deciding on its programme, so that no favourable opportunity may be lost in obtaining for our relations with China, and the condition of the colony of Hong Kong, that consideration in the House of Commons that is so necessary to the welfare of our interests in those quarters.

## THE TELEGRAPH TO INDIA AND CHINA.

ALLUSION was made in our last issue to two new companies formed to undertake the extension of telegraphic communication, firstly with India, and ultimately with China and Australia. The first of these will certainly effect its object without much delay, the whole of the required capital being subscribed, and arrangements for the manufacture of the cable in active progress at the works of the Telegraph Construction and Maintenance Company. Regarding the second company named, nothing further has transpired, and now that the "British Indian Submarine" has got first in the field, and its success seems assured, it is not unlikely that the other project will remain in abeyance, if it is not abandoned altogether. We are informed that an application made to the Admiralty by its promoters, for the use of two vessels of war to lay their cable, met with a prompt refusal, and this may have something to do with the delay. The directors of the "Anglo-Indian" have acted wisely in securing the services of the *Great Eastern*, almost the only ship afloat really qualified for an operation of such magnitude. Most of our readers will have seen an account of an accident to the *Calcutta*, a ship employed in conveying to its destination a portion of a new cable for the Persian Gulf. That line is double for about half the distance between Bushire and Kurrachee, that is to say, between Jashk and the latter port, there is a land line along the coast as well as a submerged cable; but from Bushire to Jashk it is at present single, and any accident to this portion interrupts the whole system. To double this section, therefore, a cable of some 500 miles in length has been manufactured by order of the Indian Government; 280 miles of it was on board the ill-fated *Calcutta*, and the rest was to follow almost immediately in the *Tweed*. The mishap to the former vessel will of course cause a long delay in the laying of the wire, and it may even yet be superseded by the new Red Sea cable before it is ready for use. We sincerely hope that those interested in the extension of the system to the Straits and China will lose no time in preparing for active operations, which need hardly be delayed for the completion of the section now about to be commenced. We are glad to hear that Her MAJESTY'S ship *Serpent* has commenced taking deep sea soundings between Singapore and Galle, with a view to the future laying of a telegraph cable. With a thoroughly efficient Mediterranean system already in working order, a cable from Suez to Bombay to be laid in a few months, and preparations in progress for an extension from Galle to the Straits, a direct line of telegraph from London to China is no longer a dream of the remote future. In the meanwhile, GRANT'S Trans-Mongolian line is again open for the season of 1869. Its efficiency was thoroughly proved by last year's operations, and there is every probability of its usefulness being largely increased.

## THE GAMBLING FARMS AT HONG KONG AND THE SOCIAL SCIENCE ASSOCIATION.

THE non-receipt by the Council of the Social Science Association of the reply vouchsafed by Sir RICHARD MAC-DONNELL to their Memorial of last year, is at length explained. Its suppression, after all, was not due (as we had thought possible) to some bungling on the part of subordinate officials at Hong Kong, but to a deliberate act of the late SECRETARY of STATE for the COLONIES, who received it from Hong Kong, but did not think proper to forward it to its destination, being of opinion that it was unnecessary for a Colonial Governor to justify his acts to a private society. In another column we print a letter addressed by order of Earl GRANVILLE, the present Colonial Secretary, to the Association, in which his Lordship conveys this explanation, and adds that he regrets the publication of the document, but as it *has* been made public in the columns of an English newspaper (*The London and China Telegraph*), he *now* sees no objection to hand over the original to the persons it is addressed to. This letter is dated the 4th inst., and on the 9th Earl GRANVILLE received a deputation, headed by Mr. CHISHOLM ANSTEY, to hear the views of the Association verbally explained. We give a detailed report of the proceedings elsewhere, so it will suffice to remark here that the Earl promptly owned his personal distaste for the system of adding to the colonial revenue by profits derived from gambling or opium-smoking, but showed at the same time a full appreciation of the difficulties in the way of reversing the acts of his predecessor on such short notice. We quite agree with his Lordship that it is not easy to see how these vices are to be suppressed altogether, or, if the licence system be applied to keep them under some degree of control, how the profits arising from it can be consistently devoted to measures for suppressing these same vices that the licence system itself renders legal. The question is an intricate one altogether, and, as the SECRETARY of STATE justly remarked, requires at least a few months' consideration from the new Administration before any decisive action can be taken with safety.

## CORRESPONDENCE BETWEEN LORD CLARENDON AND MR. BURLINGHAME.

The following correspondence between the Secretary of State for Foreign Affairs and Mr. Burlinghame, as Envey of the Chinese Government, was made public the day after the departure of last mail :—

THE EARL OF CLARENDON TO MR. BURLINGHAME.

Foreign-office, December 28, 1868.

SIR,—I gathered, from the conversation which I had the honour to have with you on the 26th instant, that the objects of the Chinese Government in sending a diplomatic mission to Europe were twofold : one, that by means of such a mission the European Powers might be disabused of an impression which it was supposed at Peking that they entertained, that the Chinese Government had entered upon a retrograde policy, and contemplated not only refusal to enlarge their relations with Christian nations, but even restriction within narrower limits of the intercourse which, under treaty, those nations were now entitled to hold with the Chinese dominions; the other, to deprecate any intention on the part of European Powers to bring to bear on China any amount of unfriendly pressure to induce her rulers to enter precipitately on a new system of policy which would seriously affect her independence.

I understood from you that the Chinese Government were fully alive to the expediency, or even necessity, for their own interests, of facilitating and encouraging intercourse with foreign nations; that they were sensible of the advantages that would result from a greater assimilation of their rules and practice to those of other nations, and from the adoption of the improvements by which the industry of Europe had been so much developed, and the happiness of its people so much increased; but that with all this they felt that any attempt abruptly to introduce new systems or new ideas among a people whose knowledge of foreign nations was of recent date, and who had been brought up under a traditional system. to which they had been accustomed and were attached, would not only produce confusion and even revolution in the country, but would tend to retard instead of promoting the progress, the necessity for which the Chinese Government fully admitted and were desirous to encourage, though they wished to be allowed to do so by degrees, and without any sudden and violent shock to the feelings, passions, and even prejudices of their people.

Her Majesty's Government, I informed you in reply, fully admitted that the Chinese Government were entitled to count upon the forbearance of foreign nations; and I assured you that, as far as their country was concerned, 'there was neither a desire nor an intention to apply unfriendly pressure to China to induce her Government to advance more rapidly in her intercourse with foreign nations than was consistent with safety, and with due and reasonable regard for the feelings of her subjects.

But Her Majesty's Government, I said, expected from China a faithful observance of the stipulations of existing treaties, and reserved to themselves the right of employing friendly representations to induce the Chinese Government to advance in the course opened up by those treaties, and to afford greater facilities and encouragement and protection to] the subjects of foreign Powers seeking to extend commercial intercourse with the Chinese people.

Her Majesty's Government feel that they may fairly appeal to the Chinese Government, though always in terms of friendship, to act in this spirit towards themselves and other foreign nations; and they would do so with the more confidence because they may be excused for believing that the interests of China will be advanced in a far greater degree than those of foreign nations, by steadily availing herself of the opportunities within her reach for applying to her Empire the skill and experience of the nations of Europe.

But Her Majesty's Government are, moreover, entitled to expect from China, as an indispensable condition of their goodwill, the fullest amount of protection to British subjects resorting to her dominions They are aware that the provincial governors are too often in the habit of disregarding the rights of foreigners, trusting to impunity as regards the Central Government of Peking, and to the unwillingness of foreign Powers to assert the rights of their subjects by local pressure.

Her Majesty's Government feel that they are acting in the interest of the Chinese Empire when they announce their preference for an appeal rather to the Central Government than to local authorities fo the redress of wrong done to British subjects. It is with the Central Government, and not with the provincial authorities, that foreign Powers have entered into treaties, and it is for the interest of the Central Government that foreign Powers should recognise its supreme authority over its provincial governors, and that the Central Government should assume, and on all occasions when appealed to for the redress of local wrongs, be prepared to exercise that authority.

These observations will, I trust, enable you to reassure the Government of Peking as to the friendly feelings entertained towards it by the British Government. It rests with the Central Government so to order its intercourse with Great Britain and the Queen's subjects as to avoid cause of difference, and to preserve unimpaired the friendship of this country.

I have only to add that all Her Majesty's agents in China have been instructed to act in the spirit and with the objects which I have thus explained to you, and generally to caution British subjects to pay due respect, not only to the laws of the Empire, but, as far as may be, to the usages and feelings of the Chinese people.—I am, &c.,

(Signed) CLARENDON.

MR. BURLINGHAME TO THE EARL OF CLARENDON.

(Received January 13.)

Chinese Legation, London, Jan. 1, 1869.

MY LORD,—I have the honour to acknowledge the receipt of your lordship's despatch of the 28th of December, and, in reply, to inform you that I agree to the general accuracy of your deductions from our conversation at that time.

1st. That it was the object of the mission to disabuse the foreign Powers of an impression they were supposed to entertain, that the Chinese Government had entered upon a retrograde policy ;and secondly, to deprecate a precipitate and unfriendly attempt on their part to enter upon a policy which might make all progress impossible from its menacing tone and "violent shock to the feelings, and even prejudices of the people."

I have also the honour to express my satisfaction with the reply of your lordship on the part of Her Majesty's Government; first, that an unfriendly pressure shall not be applied inconsistent with the independence and safety of China; and secondly, that Her Majesty's Government desires to deal directly with the Central Government rather than with the local authorities, and that Her Majesty's agents in China have been instructed "to act in the spirit of these views, and to caution British subjects to pay due respect not only to the laws of the Empire, but as far as may be, to the usages and feelings of the Chinese people."

I agree also with your lordship as to the importance of the strict observance of existing treaty stipulations. Agreeing then as we do to these principles of action, it is equally gratifying to know that we do not differ as to the manner of their application, particularly as to the exercise of force—that is, that it should be used to protect life and property immediately exposed. These safe, the question becomes diplomatic, to be referred first to Peking, and, before war ensues, to the Home Government.

The explicit manner in which your lordship expressed yourself upon this point, not only in the conversation of the 26th, but in that of today, will give great satisfaction to the Chinese Government. This policy, acted upon, will make wars with China impossible, or they will not occur without sufficient cause, and only after mature deliberation.

I do not recur in this despatch to other topics of our conversation, but limit myself to a statement of the points agreed upon.—I have, &c.,

(Signed) ANSON BURLINGHAME.

## THE SOCIAL SCIENCE ASSOCIATION AND THE GAMBLING QUESTION.

The Council of the Social Science Association, on finding that a despatch from the Governor of Hong Kong had been sent to them in reply to their Memorial, but had not reached them, again addressed the Colonial-office on the subject, to the following effect :—

THE SECOND MEMORIAL OF THE SOCIAL SCIENCE ASSOCIATION TO THE SECRETARY OF STATE.

SHOWETH,

1. That on the 1st of August last the memorial against the granting of farms, or gambling houses, by Government to certain parties at Heligoland and Hong Kong, of which a copy is now enclosed, was presented to your Lordship's predecessor, the Duke of Buckingham and Chandos, by your memorialists; and in the course of the same month they received from his Grace, under date the 18th of August, a simple acknowledgment that he had received it.

2. No further communication has been received from your Lordship's Department on the subject of that memorial, nor have your memorialists been as yet favoured with even an acknowledgment of either of their two subsequent communications to your predecessor—the one in the same month of August, transmitting a printed copy of their memorial, in which some omissions of marginal references were supplied, and the other in the ensuing month of September, transmitting copies of a then recent correspondence between a gentleman from Hong Kong, from whom they had obtained them, and Mr. White, the late Chief Magistrate of Police at Hong Kong; in confirmation of the former statements of your memorialists as to the true causes of the failure of criminal justice at Hong Kong, in the matter of the offences of gambling and keeping of gambling tables; and in illustration of the official documents so largely referred to by them in their former memorial upon that portion of the subject.

3. This prolonged silence on the part of the late Secretary of State with respect to their memorial and its prayer, is by no means their gravest subject of complaint to your Lordship. Within the last few days, your memorialists having learned, to their exceeding surprise, from an English newspaper, that an official letter to their secretary from the Government of Hong Kong was in circulation here, and having through personal application to a proprietor of an overland miscellany (the *London and China Telegraph*) obtained for the first time a perusal of the document in question, as published in his number of the 7th ultimo, have now to represent to your Lordship, on the authority of that gentleman (Mr. Wright, of No. 2, Cowper's-court, Cornhill) that he received it about the end of last November from the Hong Kong authorities, in a printed form, for publication here*; that it must have been privately printed: for in none of the Hong Kong or China newspapers hitherto received is there any allusion to the fact of such a document being in existence, or intended to be;—and, although it bears date "Oct. 20, 1868," and above all purporting, as it does, to bear the signature of the Colonial Secretary of Hong Kong (and to have been sent by command of the Governor), ought to have been sent to its destination along with the "Despatches" of the Governor to Europe,—nevertheless neither the original itself nor any copy of it has been as yet received by the gentleman to whom, if the accompanying copy from the *London and China Telegraph* be correct, the document, or as it is there called Despatch, in question purports to be addressed.

4. So far as your memorialists have been able to learn, the other officers and members generally of the Association have hitherto been kept in the same ignorance, on the subject of the so-called despatch or letter, with themselves, whose only means of knowledge consist as yet in the alleged copy of it, which accompanies the present memorial, and which was not procured by them until last week.

5. If it were necessary to enlarge upon the apparent impropriety of the above proceedings of the Hong Kong Government, your memorialists might justly advert to the fact that, as stated in the final paragraph of the Despatch or letter in question, the main, if not the only object of sending it at all, was to obtain the reparation, nay, the immediate reparation there demanded, for one misrepresentation of fact alleged to be contained in their former memorial, and insisted upon by the Hong Kong Government, not only in that paragraph, but also in the first eleven paragraphs of that so-called Despatch.

6. It is very obvious that a demand of that nature ought not for a moment to have been withdrawn, by the authorities making it, from the persons on whom they professed to make it, and that, by being kept so long in the dark as to the existence of such a demand, the latter are at this moment obnoxious to the very serious misconstructions of the public, in respect of their long and unexplained reticence in the presence of such a demand.

7. It is equally obvious that the non-publication at Hong Kong of a document meant for instantaneous publication here, and the entire ignorance of the community there of the very existence of such a document, must have again prevented the expression on its part of any dissent from the views signified by his Excellency in the Despatch or letter in question, and in more than one paragraph strangely represented to be in entire conformity—as those signified on a former occasion were also said to be—with the views of the community in general, and of every person who has ever resided in China.

8. Your memorialists do not doubt that this method, of suppressing in the colony and also from your memorialists, and at the same time publishing to the world, a paper, which contains at the same time with a demand of satisfaction of personal honour, the pretended reply to the main articles of accusation against the local government presented by the late memorial, will be regarded by your lordship neither as regular, in respect to the traditions of your department, nor as satisfactory in itself, nor yet as compensatory for the very extraordinary silence which, with regard to their well-founded and respectful complaints of colonial maladminstration, your predecessor appears to have considered it to have been his duty to pursue.

9. Into the possible reasons, which may hereafter be alleged in palliation, if not in defence, of the proceedings of which they complain, they do not pretend to enter. It is very possible that their endeavours to conjecture those reasons might be misguided, and therefore thrown away. They have also now the satisfaction to think that they can better attain the information which they seek upon that part of the case by asking your Lordship to afford it.

10. Before they conclude, your memorialists desire to add to their former—and as yet altogether unanswered—memorial, a few remarks upon the pretended reply to it, which is offered by the accompanying copy—if, indeed, it be genuine—of the so-called Despatch or letter of "October 20, 1868."

11. In the first place they draw the attention of your Lordship to the fact that the "Appendix," to which the paper in question professes to refer as evidence of the truth of its statements, has been excluded from the printed copy sent; an omission of some significance, because the Governor's accompanying financial statement for 1869, of which that supposed "Appendix" is there stated to contain extracts—and which had reached the hands of your memorialists through quite another channel—so far from supporting the statements in question, furnishes the strongest proofs of their inaccuracy and of the futility of the arguments founded upon them, by which the Hong Kong Government pretend to impeach the truth and justice of the original complaint of your memorialists (upon the point, viz., that the measures of that Government for the licensing of public gambling houses, amongst the Chinese of Hong Kong, through a Government farmer of licenses, for fees and rewards received by Government, is open not only to the more obvious reproach of being altogether at variance with morality and policy, but also to the particular reproach of being intended as a means of swelling the colonial revenue, and diminishing Imperial expenditure upon local establishments). For, in that State paper addressed to his Legislative Council, the Governor of Hong Kong no longer, as in 1867-8, affects to set apart the moneys received from such a source, as not properly belonging to local revenue, nor applicable to local purposes, but now at least claims to deal with them as part of that revenue, and to apply them to those purposes, and this, too, in aid of an ordinary revenue, which according to the same statement, is very largely in excess of the expenditure of 1867. They also observe with surprise and regret that the change of policy is justified in the same State paper on the ground that his Excellency had been recently empowered by your Lordship's predecessor to effect it.

12. Nevertheless, if the alleged "Despatch," or letter, be a genuine document, your memorialists are now challenged to retract their original statements on that head, and in the form at least in which they are worded; and, to give colour to the demand, an issue, altogether immaterial, is attempted to be raised upon the word "highest"—occurring in one solitary passage of their former memorial (viz., that the Gambling-houses' Farm "had been granted to the highest bidder"). It must seem to your Lordship, as it does to your memorialists, that the reproach to which this challenge refers consisted in the creation of such a farm, and in the putting it up for sale at all; whatsoever may have been the other conditions on which the acceptance of the bid at such sale was made to depend. If, therefore, their former memorial had incorrectly stated the effect of the proceedings of the Hong Kong Government, in a particular so irrelevant to the gist of their complaint, to take exception to it upon that ground would be altogether beside the question; and, if taken, equally idle, for your memorialists accept the discussion. But they do not admit that their former statements on this head, when read with the context, are open, even to that extent, to the charge of inaccuracy. The Government of Hong Kong do not venture to say that the "offer" of "upwards of 300,000 dollars" was made by a "bidder" (indeed the vagueness of an offer so worded precludes the supposition of that being the case); and the fact, if it be one, that the Government was contented to accept a lower bid, with good security, for punctual payment or permanent continuance, than they might otherwise have gotten, is perfectly consistent with the fact that the bidding accepted upon such conditions was, according to the ordinary acceptation, the "highest." Yet this is the issue, the establishment of which, as the "Despatch" or letter expressly states, in its last paragraph, is the one single object to which the whole of that pretended reply to the former memorial is devoted.

13. Your memorialists do not feel that they are called upon to restate the facts and proofs upon which that memorial was founded, and of which none are refuted, nor, except by an occasional denial, so much as noticed by the "Despatch" or letter in question; whilst the silence of the Governor as to many of them would seem to confess them to be true. They can afford to pass by the repeated, yet quite unfounded, assumption that this committee consists of persons not one of whom has ever resided in China or Hong Kong, or who have had any means of becoming practically acquainted with the doings of the Hong Kong Government. It is the stereotyped objection in such cases, although an often refuted one; and it will be difficult to persuade your Lordship that the great traditions upon which the colonial empire of England was planted, and to which, according to the as yet unfulfilled prognostic of the founders of Hong Kong, as quoted in the former memorial, the laws, government, and policy of that colony were to be especially adopted, as an example to the neighbouring empire, are out of place in the present discussion, or are not binding upon the present Government of that colony; or that any objections to its proceedings which may be based upon those traditions ought to be considered as open to disparagement on the part of that Government, as the "mere sentimental objections" of "well-meaning persons in England, ignorant of the circumstances which have produced and which justify a policy" (paragraph 24); yet so little to be defended upon principle (as it is at the same time confessed), that but

* This is not quite correct. The gentleman named stated that he had received it from Hong Kong, in a printed form, but not that the Hong Kong Government had sent it to him for publication.

Digitized by Google

for his local experience, the Governor himself would probably have subscribed a similar remonstrance, "and applauded himself for subscribing it" (paragraph 12).

14. Your memorialists see no reason to qualify in the least the adherence which they now express to the statements of their former memorial. They trust that by your lordship at least it will be now considered; and, in considering it, that due weight will be given to the important evidence to which its marginal references will direct your lordship. But to one of those proofs they may now not unprofitably make particular reference, seeing that the "Despatch" or letter before them contains a broad, although unsupported, assertion, that the increase of gambling at Hong Kong in time past was not due to any defect in the law, or any supineness on the part of the local authorities.

15. The despatch of Governor Sir Hercules Robinson, of the 16th December, 1861 (transmitting a copy of the minutes of that inquiry into the conduct of the Registrar-General of Hong Kong and "Protector-General of Chinese," Mr. Caldwell, J.P., which had then recently ended in the conviction and dismissal of that magistrate), is the document to which your memorialists refer. If, as has been stated, the grant of the Gambling Houses' Farm has been in any way negotiated or conducted with or through that person, the document acquires a new and painful interest in its bearings on this case. But it has, in any case, an importance of its own; for it clearly proves, not only the non-execution of the ordinances of Hong Kong and the other laws against gambling, but also the connivance of the one particular subordinate to whom the Government would naturally have looked for the practical fulfilment of their own duty in that respect. The paragraphs above cited in the margin show what, in Governor Sir Hercules Robinson's judgment, had been ascertained by the Commission of Inquiry on the following points.

16. Mr. Caldwell and a Chinaman, one Machow Wong, were, from a period very soon after the beginning of the colony, two of its inhabitants. They were partners in piratical ships and other disreputable adventures. Mr. Caldwell had placed his great influence and power, as a principal subordinate of Government, at his partner's disposal. This lasted until the latter was convicted of piracy, and transported, in September, 1857. Mr. Caldwell himself retained all his power, as sole magistrate or "Protector-General" of the Chinese, until Sept. 24, 1861, when he was dismissed from all his offices upon proof of his above-stated connection with Machow Wong. During the whole of the time of their partnership "pirates and other ruffians resorting to the island" were "provided with professional assistance when charged with offences against the law," "complainants or witnesses were intimidated," and "the great influence" which the Chinese confederate possessed through the English confederate was so exercised as "frequently to obstruct or prevent the course of justice." In addition to these instances of the guilty practices of Machow Wong, his Excellency particularly describes him as "an *extortioner, a recipient of bribes* FROM GAMBLING HOUSES, a confederate of pirates, and a receiver of stolen goods," and adds that "Chinese of standing and property would not appear against him, as they said they were in terror of their lives on account of him."

17. This striking illustration of the rest of the evidence on that part of the case will be better appreciated if your memorialists remind your Lordship that only four years had elapsed from Mr. Caldwell's fall when the first draft of the gambling-houses ordinance was laid before the Legislative Council, and that the only ordinance then in force for the professed prevention of the crime of gambling was the original ordinance of 1844, whose lamentable defects and errors had always been notorious.

18. Your memorialists most respectfully request your Lordship to take both their memorials into your consideration, and to allow them the honour of an interview with your Lordship, for the purpose of explaining and enforcing their statements and complaints.

And, &c. EDWIN PEARS, General Secretary.

---

Earl Granville replied to this by the following note, explaining the suppression of the former Memorial, and appointing a time to receive a deputation:—

"Downing-street, February 4, 1869.

"Sir,—I am directed by Earl Granville to acknowledge the receipt of your letter of the 14th January, and of the Memorial from the National Association for the Promotion of Social Science, on the subject of Licensed Gambling in Hong Kong, and of the answer by Sir R. MacDonnell to a former memorial on the same subject, which has obtained publicity in an English newspaper,* but which has not been communicated to you.

"I am to inform you that the Governor's answer to the Association was forwarded to the Duke of Buckingham, with the expression of a hope that his Grace would not object to its being sent to its destination.

"His Grace, however, did not think it proper that it should be forwarded, considering that, although the Governor might properly defend himself and his Government from accusations made officially or in Parliament, it was hardly necessary to do so in the case of addresses of a private society, and a communication was made to that effect to the Governor. Lord Granville regrets that the Governor's letter should have been published, and considers it by no means desirable that a Secretary of State should take part in the discussions to which it appears to be leading.

"While, however, Lord Granville is wholly averse from useless controversy, he is fully alive to the importance of the question with which Sir R. MacDonnell has had to deal and to which the committee refer. That subject has already received, and will continue to receive, his most anxious consideration.

"As Sir R. MacDonnell's reply has obtained publicity he feels no difficulty in now forwarding to you the copy originally intended for the National Association by him.

"I am to add that if a deputation from the Association should wish to see Lord Granville, he will be happy to receive the members on Saturday next, at one o'clock.

"And any person who may choose to call at this office on behalf of the Society will be allowed to copy the letters referred to in your communication of the 14th January.—I am, Sir, your obedient servant,

"The Secretary, Social Science Association." "T. R. SANDFORD.

---

On Tuesday, the 9th instant, to which day the reception of the deputation had been postponed by the Secretary of State, the following gentlemen, introduced by Mr. Chisholm Anstey, were received by Earl Granville, K.G., at the Colonial Office:—Dr. Aldis, Mr. Edgar, Mr. Frederic Hill, Mr. Crustnarao Pandoorung, and Mr. Pears Mr. Murrow, late of Hong Kong, was also present, and Colonel Sykes, M.P., and the Hon. Arthur Kinnaird, M.P., two vice-presidents of the Association, entered the room after the proceedings had commenced.

After thanking his Lordship for the above reply to their second Memorial, Mr. C. ANSTEY stated the case against the two Hong Kong Government farms, of opium smoking-houses, and gambling-houses, to which the two memorials of the Association (that of last year addressed to the Duke of Buckingham and Chandos, and that of last month, both printed in this journal) referred. He commented at large upon the few points raised by the now no longer apocryphal "despatch" of October 20th last, to the address of the secretary of this Association, and showed from documentary and even official proof the entire inaccuracy of every one of its material statements, and the entire unsoundness of every one of its relevant objections to their case. Upon the whole, he submitted that the following points were fully established:—That the project was originally one for raising local revenue in relief of the old Parliamentary grant; that it had been repeatedly scouted by former Secretaries of State; that the laws of China against gambling (which, under actual ordinances were quite capable of being applied in Hong Kong) had never been applied there, although they were quite sufficient for its repression, and had so been found in China (of which Mr. Anstey mentioned many instances); that the only way to enforce any laws against gambling-houses was by enforcing the Chinese laws of collective and mutual responsibility by means of the tithing (*Kea* or *Káp*), and the hundred (*Páou*) institutions which had been expressly recognised by the Hong Kong Legislature in Ordinances, passed in 1844–1857, but never put into execution; that the only local ordinance against gambling-houses had been found to be so ill-penned as to be inoperative; that the Hong Kong Government had never proposed to amend that ordinance; that it had never brought into play the criminal laws of England against gambling, although all those laws were in full validity within Hong Kong; that the only reason which could be suggested for those omissions on the part of that Government was the notorious fact that for many years certain persons were carrying on the endeavours already alluded to for obtaining Imperial sanction here to the legalisation of gambling, in order to convert it into a profitable Government farm (in which intrigues the go-between was always Mr. Caldwell); that it was untrue to state that the Hong Kong Government had exhausted penal means of repression, which was the main palliation now attempted for their having recently legalised under pretence of regulating it; and, lastly, that whilst some vicious practices might be said to be susceptible of regulation, gambling was the one vice of which that could not be said, nor was it even pretended, in the present instance, to regulate it at all, not even so far as to define the amount to be lost at one sitting. He referred also to the resolution of the Hong Kong Chamber of Commerce, of 1868, and the speeches of its chairman, Mr. Ryrie (member of the Legislative Council), and others of that Chamber, to the addresses of the local clergy and to other authorities, all condemnatory of the late Ordinance, and certifying the nearly unanimous opinions of all respectable Chinese to the same effect.

Earl GRANVILLE here interposing said: You are preaching, I may almost say, to a convert. I go quite with your able statement of the mischief, and I quite sympathise with everything that you have said against the fitness of raising a revenue in this way. I have not yet communicated my decision to Hong Kong. But I may say this much, that whatever that may hereafter be, I cannot approve of these proceeds of the gambling-house farm being treated as colonial revenue, or applicable to colonial purposes. Whether it may be employed specifically in defraying the charges of measures to suppress gambling, or in some analogous way to that, if we are to receive it at all, I shall have to consider if I determine to allow that experiment to continue. But what I should like to know from the deputation is, whether there is any practical way to the direct suppression in Hong Kong, by penal means, of the practice. Our authorities there say that they have exhausted all those means and failed. You have offered reasons for contradicting that statement, and even for asserting that down to the introduction of this gambling farm no real attempt to suppress gambling had been made. This creates a difficulty in the way of my reversing at once what has been done. It is true that there is now the advantage of a new Government being called upon to consider the matter, but then without a few months' consideration one ought not to reverse what may have been done already. I should like to look at the practical question of the way to put down gambling, if there be any way to do it.

Mr. ANSTEY briefly restated what he had said, and referred again to the authorities on that point. He also submitted that the very next preceding Ordinance of 1866 to the Gambling Farm Ordinance was one relating to Registration. By that Ordinance the long neglected Chinese Law of Responsibility was, at length, ordered to be carried into effect (although very imperfectly no doubt). One year's trial of that Ordinance had enabled the present Registrar-General to report that this portion of it had proved to be very popular and efficacious, and in particular, that it had been found of "material" efficacy in suppressing "Public Gambling Houses."

Colonel SYKES, M.P.: And now all these licensed ones will escape from that.

---

* *The London and China Telegraph.*

Digitized by Google

Mr. ANSTEY assented. He proceeded to read from the report, and also from the Governor's despatch of Oct. 29, 1867, approving of that portion of it.

Earl GRANVILLE having asked for some of those references, Mr. Anstey offered to place all his own notes in his lordship's hands, and it was accordingly done.

Colonel SYKES, after referring to his long personal experience of the coasts of China, a country with which he was even now in "fortnightly correspondence," bore testimony of the accuracy of one important statement made by Mr. C. Anstey, as the result of his official experience at Hong Kong, viz., that opium shopkeeping, gambling and piracy went hand-in-hand, and belonged everywhere to one establishment 'He was satisfied that to regulate Chinese gambling-houses is impossible. The only way is to be firm and put them down with the strong arm of the law.

Mr. MURROW confirmed another statement—viz., as to the persistence and success of the Chinese Government in putting Chinese laws against gambling-houses into effect. It was true that in the troubled times of 1865, at Canton, the Viceroy there for that one year only dispensed with those laws in favour of a particular locality; that is to say, the lanes in the immediate purlieus of the two worst gaols of that city; but there was a characteristic irony in the exemption; it had expired, and gambling at Canton was crushed.

The Hon. A. KINNAIRD, M.P.: We must not intrude any longer upon your lordship's valuable time, but I cannot help saying that the people here at home feel keenly upon this subject.

Earl GRANVILLE courteously thanked the deputation, and they took their leave.

# Foreign Intelligence.

## NORTH GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, Feb. 14.

From the returns of the navigation of Bremen that have just been published, it appears that the total number of vessels that arrived in the Weser last year was 3,182, with a tonnage of 468,900 lasts, of 2 tons to a last, against 3,108 vessels of 449,378 lasts in 1867. The departures were 3,277 vessels of 465,258 lasts in 1868, against 3,478 vessels of 471,394 lasts in 1867. The trade with the Far East has increased more than 50 per cent., for among the arrivals were 113 vessels with 46,544 lasts in 1868, against only 72 of 30,850 lasts in the previous year. Of the arrivals in 1868, 13 vessels of 5,457 lasts came from the British East Indies, 17 vessels of 6,595 lasts from the French East Indies, 53 vessels with 25,546 lasts from ports of Burmah, 16 vessels with 4,980 lasts from Siam, 5 vessels with 2,388 lasts from Netherlands India, 5 vessels with 898 lasts from China, and the remainder from the Sandwich Islands and other groups in the Pacific.

Messrs. Breitkopf and Haertel, of Leipzig, the oldest house in the German publishing trade, and well known as extensive musicsellers, celebrated last week the 150th anniversary of their establishment. They were the first publishers of the music of Mozart, Beethoven, Handel, Gluck, Haydn, and many other classical composers of the last century.

Herr Annecke, Consul in Japan for the North German Confederation, who has been for some months in Germany on leave of absence, left Berlin last week to return to his post in the Far East.

### COMMERCIAL.

Cassia Lignea continues in favour, and 6,000 chests were sold this week at 13½ sch. bco. per lb. There is also a good demand for Pepper, and higher prices are willingly given. Among the sales by importers were 1,800 bags of black Singapore, which realised 4⅛ sch. bco., and no more is to be had at that figure. In Teas there is no alteration to notice in prices. The sales of the week comprised 800 chests of common Congou, 130 do. of middling Pecco, and 400 do. of Canton-made Imperial and Gunpowder. There is a decided improvement both in the demand and the value of Spelter, the sales amounting to 18,000 centners, of which 5,000 for spring delivery at 13.10, 1,000 in loco at 13.11½, 1,000 for spring at 13.12, 5,000 for ditto at 13.14, and 6,000 at 14 marks bco., at which last figure there are buyers; but none is to be had now under 14.2, and the market closes firmly. Discount, 3½ to 4 per cent.

### SHIPPING.

The frost did not last long, and though there is still a deal of floating ice in the Elbe, navigation is again resumed. The Caroline, from Hong Kong, whose arrival at Cuxhaven was reported in my last letter, has come up in tow of a steam tug, and is now discharging her cargo. Sailed, Feb. 5, the Falcke, to Hong Kong.

## HOLLAND.

—o—

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Feb. 10.

In our political circles much indignation has been expressed at the Order of the "Netherlands Lion" being conferred on Mr. C. Castens, ex-Government Director in Netherlands India. Of course the disapprobation does not result from the fact that this gentleman belongs to the family of the Minister of the Colonial Department, but arises from a statement that Mr. Castens, when Resident, showed himself an ultra-maintainer of the so-called "heerendiensten" (certain services which the natives are obliged to render), and made enormous profits therefrom, which *may* have been in the interest of his administration, but certainly not in that of the natives.

Some days ago a meeting was held at the offices of the Dutch Trading Company, at Amsterdam, of those interested in the manufacture of sugar, in order to report upon the "concretor," an invention o Mr. Alfred Fryer. This machine is designed to produce sugar in a much shorter time than could formerly be done. A resolution was carried to the effect that it was highly desirable that in the forthcoming Bill, regulating the manufacture of sugar, it should be stipulated that manufacturers are to be free to choose any method of manufacturing they think best, in order that they may make use of this "concretor" if it proves to their advantage.

Mr. Koorders, M.P. for Haarlem, died about a fortnight ago at his seat at Bennebroek, at the age of thirty-six years. Notwithstanding that he was a most powerful opponent of Liberal principles, the Liberal papers do honour to his capacities. It is most probable that the vacancy thus created in Parliament will be filled by a Liberal. Mr. C. J. F. Mirandolle, so well known in India, is the Liberal candidate, and the general opinion is that he will beat the Conservative representative, Mr. W. Wintgens. It was at one time in contemplation to bring forward a third candidate, in the person of Mr. Van der Hoeven, ex-editor of the *Bat Handelsblad*. At Groningen Mr. S. van Houten will most probably be elected. The local papers of that town state that he is a most advanced Liberal, and a man of great talent.

The Catholic papers have again opened a subscription on behalf of the Papal army. The Spanish Ambassador, Signor Blas, has been received by the King, the new Government of Spain being thus acknowledged. I hear that Mr. Edward Jacobson, ex-Consul for Italy at Samarang, and now residing at Frankfort-on-the-Maine, has been created by King Victor Emmanuel a Knight of the Crown of Italy.

To-day the sitting of the Second Chamber of the States General was opened, and the members met for the despatch of business. According to the Amsterdam correspondent of the *North Rotterdam Courant*, Mr. F. A. Muller, formerly director of the General Company of Trade and Industry at Amsterdam, has been appointed director of the Rotterdam Bank.

### COMMERCIAL INTELLIGENCE.

MONEY AND SHARES.—The markets for public securities continue rather dull in tone, although the undercurrent of business is believed to be good. Nevertheless, at the close of the market the home funds are steadier, and in sympathy foreign stocks are weak, but no change of importance has ensued. The demand for money at the Bank has been, on the average, fairly supported. The rate of discount remains unaltered.

COFFEE.—There has been no material alteration in the market, and prices continue to be well maintained. The private transactions include 6,000 b. Java, floating per Krimpen a.d. Lek; 500 b. do., ex Sourabaya Packet and Martha Bowker; 540 b. Timor, ex County of Stirling; 1,138 b. Macassar, ex Ternate and Ida Elizabeth; 800 b. Java, ex Martha Bowker; 1,000 b. Java, ex Cornelia Hendrika and Vyf Vrienden. The prices did not transpire. The Trading Company's first sale is announced to-day; 95,200 b. will be offered on the 17th. The total stock was, on the 1st inst., 554,750 b., and the unsold stock of the Trading Company, 359,700 bales.

RAW SUGAR.—Is rather more saleable, but not at any improvement. The following parcels have changed hands:—1,316 mats Sourabaya, ex Ragna, No. 11¾, at 33f.; 547 mats do., ex Ilma, No. 14, at 35½f.; 832 do., floating. per Ragna, at 33f.; 481 mats Samarang, floating per Isaac da Costa, No. 14½, at 35½f.; 664 do. Cheribon, ex Martha Bowker, No. 11¾, at 32¾f.; 1,164 do., ex Parana, No. 11 4-5ths, at 32½f.; and 450 mats do., ex do., No. 13 4-10ths, at 34f. The quotation is now ¾f. to 1f. under November. The stock in bond was, on the 1st inst., 33,408,727 kilo., the unsold stock of the Trading Company being 70,244 mats, against 51,003 mats in 1868.

RICE.—The market is inactive, holders declining to operate without a further advance.

SPICES.—The market is dull. The stock on warrants was, on the 1st—Nutmegs, 4,190 casks; Mace, 443 casks; Cloves, 2,799 casks; Cinnamon, 171 mats; Pepper, 183 bales; and the unsold stock was—Nutmegs, 422 casks; Mace, 81 casks; Pepper, 625 bales.

TEA.—The cargo ex Stinchar was entirely sold at the valuation. The quotations are:—China Congou, 95c. to 100c.; ordinary, 85c. to 88c.; do. Java, 90c. to 95c.; and ord., 83c. to 85c. On the 10th inst. will be offered—210/4, 443/12, and 1313/16 ch. China tea, ex Jungfrau and Falcon. The fine new season's Kaisow Congou is valued at 115c. to 135c., and the finest new season's Congou at 110c. to 115c. Receipts, per Mountain Ash, arrived from Foochow are 4127/4 and 3577/12 chests.

TOBACCO.—Without business; the stock is 26,788 b. Java.

INDIGO.—Prices firm; business small.

TIN.—The market is very animated, and 67¼f. has been paid for Banca, but at the close of the market lower prices are accepted, so that some parcels have been sold at 67f. Billiton is quoted 66¾f. The unsold stock was on the 1st 52,660 slabs Banca and 288 slabs Billiton.

HIDES.—Are attracting much attention; 305 Padang Rinder, ex Julie were sold at 37 1-5th to ¾c.; 678 Padang Buffalo, at 20 to 41¾c. On the 25th inst. large quantities, ex Glencune, Finella and Neckar, will be offered by inscription. The first hands stock is 8,400 Java Rinder and 1,000 Java Buffalo.

ARRACK.—Meets with a good demand, 105 casks Sourabaya, 34 casks Batavia, 7 casks alcohol, ex Gerardus Hendrikus, having been sold.

MISCELLANEOUS.—Rattans, 3,886 b., ex Souarbaya Packet, have been sold. Java Curcuma may be bought at 10f. Preserved Ginger: 490 chests were sold in auction at 55 to 64c.

### SHIPPING INTELLIGENCE.

According to official returns 8,274 vessels, with a tonnage of 2,065,972 tons were entered inwards during the year 1868; whilst during the same period 8,435 vessels, with a tonnage of 2,100,123 tons, were cleared outwards. The fleet of merchantmen consisted on the 1st January of 2,117 vessels, measuring 267,576 lasts, against 2,159 vessels, measuring 270,082 lasts on the 1st January, 1867.

ARRIVALS.—Jan. 25, at Texel, from Batavia, Anna Digna, Passaroeang; 28, at Texel, from Batavia, Insulinde; from Tjilatjap, Jacoba Christina; from Batavia, Cornelia Geertruida; 29, at Texel, from Batavia, Parana; 31, at Brouwershaven, from Bassein, Montrose; at

Digitized by Google

Texel, from Batavia, Cornelia Adolfina, Cornelia; Feb. 1, at Brouwershaven, from Sourabaya, Johannes; at Texel, from Batavia, Minister Thorbecke, Maria Catharina; 2, at Hellevoet, from Foo-chow-Foo, Mountain Ash; 4, at Brouwershaven, from Batavia, Helena and Anna; at Texel, from Batavia, Vertrouwen; 5, at Brouwershaven, from Batavia, Hoek van Holland; 6, at Brouwershaven, from Batavia, Cortgene, Jacobus; 7, at Texel, from Batavia, Bathenas; 9, at Brouwershaven, from Batavia, Friesland.

PASSENGERS INWARD.—From Java: Per Erasmus, Mr. B. Feyver; per Passaroeang, Messrs. Goernat and family, Gerard; per Insulinde, Jhr. J. A. de Boreel de Maurignault, Messrs. A. G. Elles, G. L. Aalbertsberg, J. F. Grashuis and family, Miss M. Kregts; per Cornelia, Mrs. Beth Neerink; per Hoek van Holland, Mrs. Linck and family, Messrs. van der Slag and Steenhoven; per Cortgene, Mr. Bik and family.

ROTTERDAM, Feb. 15.

The prevailing topic of discussion in our papers at present is the Bill by which the Cabinet proposes to assist the Netherlands India Railway Company. The original contract between that company and the State stipulated that the Government should guarantee an interest of 4½ per cent. for a period of thirty-three years upon a capital of fourteen millions of guilders. This capital, however, proves to be insufficient, and the company desires to raise a further sum of three million guilders. Of course the Conservative journals oppose this Bill, which, however, is defended with great tact by the Liberal papers, and notwithstanding that the Conservatives will do all they can against it, it is most probable that the measure will be carried, perhaps with more or less important alterations.

In my last letter I stated that Mr. Muller had been appointed a director of the Rotterdam Bank. This news, which was set in circulation by the Amsterdam Correspondent of the *North Rotterdam Courant*, has created much sensation, and according to several letters published by our local papers the shareholders are of opinion that no director should be appointed until a total reorganisation of the statutes is effected. A general meeting will take place next month.

H. M. has conferred the knighthood of the Netherlands Lion on Mr. Van Hantrop, merchant of Maccassar, and on Mr. Lingard, merchant of Goenseng Tabor (Borneo); H.M. has also granted permission to M. H. Van der Tak, Dutch Consul at Kanagawa, to accept the Wurtemberg Friedrich Order, conferred on him by the King of Wurtemberg.

The Second Chamber has been opened, but nothing has occurred of interest to your readers. The ex-Minister, Mr. Heemskerk Az. has been elected President of his section, which proves that he henceforth will be the leader of the Conservative party, in the place of Mr. Koorders. The ex-Minister of Foreign Affairs, the Earl Van Zuylen is appointed Ambassador at the Court of St. Petersburg. I need not say that this is a concession to the Conservative party.

In my last letter I referred to the "Fryer's Concretor," a new invention for suguar refining and manufacturing. The *Nederlandsche Industrieel* has given some interesting details respecting this invention, stating that these useful machines may be obtained from Messrs. Manlove, Alliott, and Co., Nottingham, at a price of about £1,000. I told you also that the Dutch Trading Company had held a meeting of all those interested in sugar manufacturing. At this meeting the following resolution was proposed:—"That the thanks of this meeting be given to Mr. Alfred Fryer, of the firm of Fryer, Benson, and Forster, of Manchester, for the interesting and important information given by him this evening, with respect to the nature and working of the apparatus invented and patented by him, and called "Fryer's concretor." Further it was resolved:—"That, should it appear expedient and desirable that the said 'concretor' be introduced and applied to the manufacture of sugar in the Dutch East and West Indian Colonies, it is, in the opinion of this meeting, desirable that any impediments which may exist against such introduction and application be removed without delay." These resolutions were carried unanimously, and I am of opinion that the machine will very shortly be brought into practical use.

### PRODUCE MARKETS.

COFFEE.—The market is firm, and there is a good demand, but holders decline to operate. The transactions include 1,117 b. Java, ex Vyf Vrienden and Cornelia Hendrika, 285 b. Macassar paré paré, and 1,650 b. Padang, ex Maarten van Rossum and Julie, at 37c. to 42¾c. Of course, attention is fixed upon the forthcoming auction of the Dutch Trading Company, at which 100,200 b. will be offered.

SUGAR (Raw).—Owing to advices from Cuba there has been a lively demand, and important transactions have taken place at advancing prices. About 25,000 mats changed hands at f.¼ under to f.¼ to f.¾ above the November value. Generally importers decline to operate, in waiting for a further improvement of the market.

RICE.—Dull, demand being only for consumption.

SPICES.—There is some demand, but very firm prices must be paid. Cloves have advanced much in value. The quotations are, for Nutmegs. No. 1, 87c. to 89c.; No. 2, 79c. to 80c. Mace D, 135c. to 136c.; E, 130c. Amboina Cloves, N. 2, 28½c. to 29c. Pepper in good demand, and cannot be bought under 24c.

TOBACCO.—The market is very quiet, only 353 b. Java, trademark Temoeloes, ex Glenclune, having been sold. In Manila tobacco several transactions took place in secunda-quality, whilst the stock is nearly exhausted.

TEA.—210/4, 443/12, and 1,313/16 chests China have been offered in public sale for private account. These parcels, imported per Jungfrau and Falcon, were partly sold at 112c. to 128c. for fine new season's Kaisow Congou, and at 134c. for finest new season's Souchong. On the 3rd March the cargo, ex Mountain Ash, from Foochow, will be offered for sale, and on the 11th of that month 8,438/4, 563/8, 370/12, 19/16 chests Java.

DRUGS.—Camphor unaltered, but holders decline to operate at the current prices. Preserved Ginger: Without stock in the first hand; he nominal quotation is 78c. Pearl Sago: 12½f. Japan Wax: The Dutch Trading Company sold in auction 240 chests, quality C, at 47½f., and the other qualities at 42½f. The market closes dull. Mother-o'-pearl shells: 104 piculs floating per Mary Goddard were sold at secret prices. Gums: Unaltered and out of demand.

RATTANS.—847 pic., ex Lotus, and 110 pic., ex Zephyr, were sold at secret prices.

ARRACK.—75/1 and 50/2 casks Batavia, ex Willem Kroonprins der Nederlanden, were sold at prices that did not transpire.

JAVA INDIGO.—Without transactions, owing to want of stock; there is, however, a good demand for fine quality. Curcuma (Java): Several parcels were sold floating at 10f.

BANCA TIN.—Only a trifling business has been done, but holders decline to operate under 67½f.

### SHIPPING INTELLIGENCE.

ARRIVALS.—Feb. 10, at Texel, from Batavia, Helena and Henriette; 14, at Brouwershaven, from Batavia, Janet Mitchell; at Texel, from Macassar, Mary Goddard; at Texel, from Rangoon, Grecian Queen; 15, at Zierikzie, from Batavia, Friesland.

MISCELLANEOUS.—The Trading Company has chartered the following vessels to convey produce from Java:—To Amsterdam, Nieuwe Waterweg I., Capt. F. L. Zack, 744 lasts, at f.82.88; Koning Willem II., Capt. J. L. Besseling, 382 l., at f.87.87; Christina, Capt. M. H. Vissar, 250 l., at f.87.95; Catherina Elizabeth, Capt. J. M. Brakke, 232 l., at f.88.50; Helena, 395 l., at f.88.88. To Rotterdam, Kanagawa, Capt. W. Ouwehand, 642 l., at f.82.99. To Middelburg, Honigbij, Capt. J. van der Valk, Dz., 399 l., at f.82.88; Burgem. van Middelburg, Capt. P. Hoek, 395 l., at f.86.49. To Schiedam, Mary and Hillegonda, Capt. P. Walters, 398 l., at f.85.87.

## UNITED STATES.

### THE CHINESE MISSION.

The *New York Herald* has some more jubilant comments on Mr Burlinghame's grand "success" in Europe:—

"The Chinese Mission to America and Europe is one of the liveliest of the many lively questions of the hour. When it became known that an American was to be the chief of that Embassy, not only to his own country but to all the Courts of Europe, Europe and America were equally astonished. Why should it be so? No one could answer. The European journals were tickled and tried to laugh. Some miserable American journals poohpoohed the affair, and called it a party move. Not a little dudgeon was called forth on both continents. Mr. Burlinghame and his Chinese friends came here and conquered. Mr. Burlinghame and his friends went to London and conquered. The partisan journals on this side remained doubtful. The European journals were still stubborn and a little cold. The *Herald* alone, seeing the result at a far distance, never doubted. When all the American journals were cold and unkindly the *Herald* predicted European success. We did so because we knew that a new era had come—an era in love with truth and justice. The London success did not convince doubters. The *Herald* said that Mr. Burlinghame's success in London implied success all over Europe, and that the Courts of Paris, of Vienna, of Berlin, of St. Petersburg, would follow the example of the Court of St. James. The result has proved that we were right. Mr. Burlinghame and his friends have gone to Paris, and the kindness shown them by the Emperor and his Minister has been quite equal to the kindness shown them in America and in London. So will it be until the end. All over Europe the new diplomacy will be acknowledged and encouraged. The Emperor Napoleon, who knows the modern world better than most men now living—pity he cannot live always—could not deny himself the little joke that it was funny to find the youngest nation pleading for the oldest; but the allusion seems to have been so delicate that we can only say it was pregnant with compliment rather than with jealousy. It is pleasant to think that China is to be admitted to the family of civilised nations, but the pleasure is increased by a knowledge of the fact that the initiation of this great reform is due to the United States. The Burlinghame mission at Washington, in London, in Paris, only proves that the era is new and that a new policy is necessary."

### THE TREATY WITH CHINA.

A despatch, dated Washington, Jan. 12, says:—In compliance with the requirements of the Act of June 22, 1860, to carry into effect the provisions of the treaties with China and certain other Oriental nations, the President transmitted to Congress a copy of eight rules agreed upon between the Chinese Imperial Government and the Minister of the United States, and those of other foreign Powers accredited to that Government, for conducting the proceedings of the joint tribunal in cases of confiscation and fines for breaches of revenue laws of that Empire. The rules provide for an adjudication of such cases in first instance by a board consisting of the American Consul and the Chinese Commissioners of Customs and the Chinese Superintendent of Customs. An appeal in certain cases may be taken to the higher authorities of both nations at Peking, and the proceedings, character of proof, &c., are regulated with great minuteness of detail. An accompanying letter from the Secretary of State to J. Ross Browne, American Minister to China, communicates the President's assent to the rules, and commends the diligence and ability with which Mr. Williams, our Chargé de Affairs, *ad interim*, has practised in securing the adoption of a code which promises to be so highly beneficial to the commerce in the East. The Secretary of State urges Congress to approve of these rules.

### THE BURLINGHAME MISSION AND ITS RESULTS.

(NEW YORK HERALD.)

Perhaps the most significant sign of the times, marking the conclusion of one historic epoch and the beginning of another, is the late reception of the Chinese Embassy at the Court of France. Young America, all sinew and elasticity, takes the aged father of nations by the hand, and, leading him eastward, shows him first the United States

Digitized by Google

then England, then France. "These are the product of the world's movement westward," muses the old man. "I sent them on their journey to greatness thousands of years ago, while I, full upon the Eastern confine of the then known world, felt nothing from the constant impulse of Western civilisation except its drainage power. Now it has made the circuit of the earth, and spurs Eastern Asia to new and extraordinary action."

A dim perception of all this must have flashed upon the Emperor Napoleon as he received the Burlinghame mission the other day—a shadow that told him that Asia and the United States were on the point of banding interests, and that for the future we are entrusted with the commercial destinies of China and Japan. Heretofore France, England and the whole Atlantic seacoast of Europe have been the great centres of the India trade. They were made so by the voyages of Columbus, Vasco de Gama, and Magellan. Before the period of their commercial supremacy they received their Indian trade from the Eastern Mediterranean, across the immense deserts of Syria, Arabia, and the Persian Empire. Phœnicia grew dictatorial under the influence of this commerce. Carthage, Rome and Venice followed. But it was a commerce which clung to Asia through long lines of laden camels. The trade was in the rarest of Indian products; and in Europe it required the labour of many men to supply a single want of one fellow being. So the world slowly dragged along, and not until more than four thousand years after Syria launched her ships did Western Europe cut loose from its base and try to reach India by striking westward. A continent intervened three thousand five hundred miles in width; but Europe saw the Indian prize beyond, and set to the gigantic work of bridging it. Population poured in upon our soil, and the bone and sinew of the Old World made America a gigantic workshop, as if in preparation for the trade of a thousand millions of the human race which are now roused from their Asiatic lethargy by the echoes of our civilisation. Railroad, telegraph, steamboat, and every modern appliance have trained our energies to the task of preparing for this great India commerce. We press westward; but China, active under the coming storm of progress, moves eastward to meet us. Upon our soil, Ireland, the most western people of Europe, is advancing, spade in hand, towards the Pacific Ocean, while eastward, from San Francisco, twenty thousand Chinese labourers are creeping up the slope of the Rocky Mountains to connect the Old with the New, and complete for civilisation the orbit necessary to make the population of the world homogeneous.

Europe may well feel the pressure, but she must obey the impulse. England, great in the glory of her Indian conquests, enriched by a commerce which at home has made her a vast manufactory and abroad has given her the control of the ocean, must bow to a progress which she herself set on foot, and which she must recognise as holding a power great in proportion to our geographical position when compared to her own. France, whose sweeping intellect can almost compensate for lack of geographical advantage, must also bend to the fact that we are the centre of the world's trade. France was the master mason at the laying of the corner stone of our nationality. We have never forgotten it, and our highways to Eastern Asia are her transits also. "Come and share with us what we have" is the key-note of our greatness; and it is for this we applaud the liberal treaties which China is making with maritime Europe.

When we commenced the development of all our vast territory by our railway system the efforts made were local and imperfect. The lines were affected by petty interests, by rivalries and jealousies. They had very little bearing upon the question of great through routes and comprehensive principles. Up to 1861 we went on with our systems, discovering that the greatest embarrassment proceeded from State boundary lines. Slowly we are emerging from this narrowness of national development. Our railway kings now take the map of North America and draw bold lines across it. England does the same, and thereby compliments our future. We find that we cannot deal with this great palpitating progress without blotting out the narrow and the local to give place to plans proportioned to the demands of the age upon us. Short railroad lines are fast disappearing, and great through lines, under a single and cheaper management, take their places. To-day a great mania exists to reach the Pacific, and West and South-west our map is covered with projected routes to San Francisco, to Guaymas, to Mazatlan and San Blas. Irrespective of nationality we sweep across Mexico, and she, dead to modern progress, is of as little account as a feather in the track of a whirlwind.

All this impulse receives more or less force from the growing cordial relations which exist between us and Eastern Asia. When the last rail is laid upon the Pacific Railroad the world will no longer have a frontier. Besides all this, however, we must own Pacific telegraph lines; for we must talk daily with this great Chinese and Japanese people, with whom we are to be so intimately connected and upon whom depends so much of our future greatness. Asia in this century is to receive an impulse from the two youngest of the great nations, Russia and the United States—the former steadily marching southeast and the latter pressing already upon the shores of China and Japan. These are the signs of a new era in the world's history—an era which will be marked by an extraordinary progress, to which the past has been but the preface.

## NEW YORK TEA MARKET.

The following is from Messrs. Beebe's Circular, dated Jan. 15:—The new year opens with a decided increase in the demand for tea, and business during the past fortnight has been quite large. No great change has occurred in values, but the inquiry has been freely met by holders, and sales from first hands foot up 3,600 half-chests Green, 15,000 half-chests Japan, 25,000 half-chests Oolong, and 800 half-chests Souchong. Of these the Greens are nearly all from receipts *via* San Francisco, and realised very full prices as compared with previous shipments by the same route. The sales of Oolong include 5,200 half-chests new crop from Foochow, and 7,800 do. from Amoy, ex Samuel Russell, and 11,000 half-chests old Amoy, mainly of fair to good cargo grades. These last show an advance of 1c. to 2c. on prices obtainable for such goods last month. Of Japans, the sales noted are chiefly from the cargoes of new crop ex Parmenio and Italy. At the close the market rules firm, with a fair demand at our quotations for most descriptions. We note the arrival of the Samuel Russell, from Amoy and Foochow; Italy, Parmenio, and Benefactress from Yokohama.

The following report, issued by Messrs. Beebe, is dated 28th ult.:—"Since our report of the 15th inst. considerable business has been done in the various descriptions of Tea, and the market closes firm for Greens, at quotations of that date. For Japans there is rather less inquiry, and some concession in prices would be necessary to effect further large sales at the moment. In Oolongs the business has been confined almost wholly to old crop goods, at figures showing some decline upon prices realised early in the month. Sales reported from first hands during the fortnight are 12,200 half chests Green (including 3,800 to arrive), 11,500 half-chests Japan, 9,700 half-chests Oolong, 3,300 half-chests Souchong, and 500 half-chests Powchong. Of the Japans 4,500 packages were taken for export to Canada. We note the arrival of the Yokohama, from Yokohama, Asphodel, from Shanghai, Havelock and Camilla, from Foochow, at this port, and Tientsin, from Foochow, at Boston."

Current quotations:—Congou and Souchong: Dusty and common 45c. to 50; good cargo, 53c. to 55; superior, 58c. to 63; fine, 65c. to 70; extra fine and finest, 75c. to 90. Foochow Oolongs: Fair cargo, 50c. to 53; good, 54c. to 58; superior, 58c. to 65; fine, 65c. to 80; extra fine and finest, 85c. to 110. Amoy Oolongs: Fair cargo, 48c. to 50; good, 51c. to 55; superior, 56c. to 60; fine, 62c. to 65; extra fine and finest, 70c. to 85. Japans: Common, 55c. to 58; medium, 60c. to 63; good medium, 65c. to 67; fine, 69c. to 72; finest, 75c. to 80. Greens (Moyune, Twankee, and Fychow): Gunpowder, 85c. to 130; Imperial, 70c. to 110; Young Hyson, 56c. to 112; Hyson, 65c. to 100; Hyson Skin, 50c. to 65.

# LEGAL.

—o—

## JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.

FEBRUARY 4 AND 5.

Present—Lord Chelmsford, the Right. Hon. Joseph Napier, and Sir J. Colvill.

RODGER AND OTHERS V. COMPTOIR D'ESCOMPTE DE PARIS AND ANOTHER.

Counsel for the Appellants—Sir Roundell Palmer, Mr. Manisty, (Common Law), and Mr. Baylis.

For the Respondents—Mr. Mellish, Mr. E. E. Kay (Equity), and Mr. Holl.

This case, which arose out of the bankruptcy of Lyall, Still, and Co., was of considerable mercantile importance, and occupied the Judicial Committee for two entire days. Lord Chelmsford, in intimating that the Committee would reserve their judgment, took occasion to compliment in very high terms the legal gentlemen on both sides for the very able manner in which the case had been argued.

The appeal was against the judgment of the Supreme Court of Hong Kong, refusing a rule to set aside a verdict obtained by the respondents, and to enter a nonsuit, or for a new trial, on various grounds, but chiefly on the grounds that certain goods consigned to Lyall, Still, and Co., and shipped on board the *Min*, had been stopped *in transitu* by the unpaid Manchester vendors, and that the respondents were not holders of the bills of lading of such goods for valuable consideration, without notice so as to defeat the right to stop *in transitu*.

The facts as stated were these. The appellants are the owners of the ship *Min*, and the respondents are the Comptoir d'Escompte de Paris and the Chartered Bank of India, Australia, and China. In the latter end of the year 1866 the London house of Lyall, Still, and Co. purchased goods of Messrs. Liebert and Co., Mr. S. Mendel, and Messrs. Calvert and Co., all of Manchester, for the purpose of shipment to their house in China. Liebert's and Mendel's goods were subject to certain special arrangements which appeared at the headings of the invoices, but were not in any way adverted to on the bills of lading. The goods were sent from Manchester to London in Nov., 1866, received there by Messrs. Killick and Martin as agents for Lyall and Still, of London, who made out the bills of lading, put the goods on board the *Min*, and handed the bills of lading, which had never been seen by the Manchester vendors, to Lyall and Still. Lyall and Still re-invoiced the goods to their China house, adding their own charges, and sent a telegram to China advising the shipment of goods by the *Min*, but not saying what goods or from whom purchased; and in due course of mail sent forward the bills of lading, which were in the usual form deliverable to Lyall, Still, and Co., or their assigns.

In December, 1866, before any notice arrived in China of the shipment of the goods, the China house got large sums of money from the Hong Kong managers of the respondents, on the promise that they should be furnished with documentary bills in time to send by the next home-going mail; but Lyall, Still and Co. failed to furnish them, and after threats of criminal proceedings against the resident partner, the banks ultimately, in order to secure themselves (as Lyall and Still, having refused acceptances to the amount of $150,000, were evidently unsafe), took an assignment on the 22nd of December of various securities, and amongst others, "all goods or documents for goods alluded to in a telegram, dated 9th November, 1866, from London partners to Hong Kong firm," "and all goods or documents for goods purchased and shipped, and now on the way hither."

The goods referred to were those loaded on board the *Min*, and the bills of lading having arrived in due course, on the 27th of December were indorsed over to the respondents.

Digitized by Google

The *Min* arrived in Hong Kong in April, 1867, the goods were stopped *in transitu*, and the master refusing to deliver them to the respondents in exchange for the bill of lading, an action of trover was brought in the Supreme Court of Hong Kong against the owners of the *Min*, and a verdict for the value of the goods with costs was obtained by the respondents. The judge having refused to set aside the verdict the present appeal was brought.

The appellants contended that the transitus of the goods did not terminate until the *Min* arrived in Hong Kong, and that the respondents, knowing *absolutely* of the insolvency of Lyall, Still, and Co., and *inferentially* that the goods were unpaid for, were not *bona fide* holders of the bills of lading for a valuable consideration without notice, which they must have been to defeat the stoppage *in transitu*. The appellants also contended that the assignment to the respondents was of that sweeping character that, if it operated to pass any interest in the bills of lading at all, which was disputed, would only pass such interest as Lyall, Still, and Co. themselves had, and that the respondents took them subject to all the equities affecting them.

The respondents rested upon the verdict in the Court below, the jury having found, after an adverse summing up, that the respondents were *bona fide* holders without notice, and they contended that a general knowledge of insolvency to be inferred from dishonouring bills was not in itself sufficient to displace their title, but that knowledge of insolvency, of the goods being unpaid for, and of the vendors being in a condition to stop, must combine to make such a notice as would defeat the respondents' title. They had the legal right and an equity as good as that of the unpaid vendors.

A case of Virtue *v.* Jewell, 4 Camp. 31, deciding that knowledge of insolvency alone was sufficient, was adverted to and commented on by their lordships, and Lord Chelmsford suggested a doubt whether a bill of lading could be assigned for an antecedent debt.—Judgment reserved.

Agents for appellants: Messrs. Reed, Phelps, and Sedgwick. Agent for respondents: Mr. Ambrose Parsons.

---

### COURT OF ADMIRALTY.—FEB. 17.

THE PROCEEDS OF THE CARGO EX "ELLEN RODGER."

This was a cause of salvage instituted on behalf of the owners, master, and crew of the ship *Albuera* against the proceeds of the sale of a portion of the cargo, tackle, stores, &c., of the late ship *Ellen Rodger*, and against the owners of that ship and her cargo intervening. The money, amounting to £3,155, had been brought into Court.

Mr. E. C. Clarkson were for the salvors; Mr. Butt, Q.C., appeared for the owners of the *Ellen Rodger* and her cargo.

Two preliminary points of some importance arose. The salvors had filed their petition, setting out the facts which gave rise to their claim, to which the owners of the *Ellen Rodger* did not put in any answer, although they had appeared to the suit; the salvors, then, by leave of the Court, concluded the pleadings. Afterwards the owners of the cargo salved also appeared. Under these circumstances it was contended that all the allegations of the petition were admitted, and that it was unnecessary to call evidence on the part of the salvors, and cases were cited in support of this proposition.

The Court, however, held that as in all the cases cited the defendants had pleaded, and had either in their pleadings assumed the truth of the plaintiff's statements or denied some of them, from which it might be inferred that they admitted the rest, this case was distinguishable, and that the salvors must prove their case.

A witness was then called on their behalf and examined, but upon counsel for the ship and cargo proposing to cross-examine him, the objection was taken that as the owners of the *Ellen Rodger* and her cargo had not pleaded they could not take any part by counsel in the hearing of the suit.

The Court held the objection was good, and that a party who has not pleaded cannot be allowed to cross-examine witnesses or to be heard upon the merits.

There being, however, particular circumstances in this case, an arrangement was come to between the parties in order to save the expense of an adjournment, which was offered by the Court, and counsel for the ship and cargo addressed the Court by consent of the other side. The facts of the case were simple. The *Albuera*, a ship of 774 tons, bound from London for Shanghai, with a valuable cargo, on the 2nd of October, 1866, while sailing through Gaspar Straits, sighted the *Ellen Rodger*, a homeward bound tea ship, ashore on the Belvidere shoal and abandoned. Finding it impossible to save the *Ellen Rodger* herself, the master and the crew of the *Albuera* brought off from her 1,477 chests of tea, and a lot of sails and stores. The salvage services occupied five days, and were attended with considerable labour, as the *Albuera* dared not approach within a mile and a half or two miles of the wreck, and her boats had to carry everything saved from one ship to the other under a tropical sun. The tea and stores were taken to Shanghai and there sold, and the proceeds remitted to England.

The Court awarded £1,200 salvage, of which it allotted £400 to the owners of the *Albuera*, £200 to her master, and £600 to the crew according to their ratings.

---

THE CHINESE MISSION AT A FETE.—At the Grand Hotel, Paris, there was recently held the annual ball in aid of the Poor Children's Fund, which has been so cordially supported in all circles and in all countries. In a quadrille of honour, which opened the ball, the Duchesse Tascher de la Pagerie danced with Mr. Anson Burlinghame, the Chinese Ambassador, Madame Stanisforth with Lord Lyons, Mademoiselle Ananoff, a beautiful Circassian girl, with the second Chinese Ambassador, Tcheta-jen, Madame Daker with Djemil Pasha, the Comtesse Stéphanie de la Pagerie with the Empress's Chamberlain, the Marquis de la Ferrière, and Madame Kœnigswarter gave her hand to the Cavaliere Nigra.

## Monetary and Commercial.

With reference to the affairs of the Commercial Bank Corporation, it is stated that a considerable number of assents to the proposed compromise of 17s. in the pound have been received from both creditors and shareholders, and a circular has been sent out by Messrs. Clarke, Son, and Rawlins, of 29, Coleman-street, on behalf of a committee formed to carry out the arrangement, inviting subscriptions to a trust fund of £100,000, which it is proposed should be formed to purchase for that sum various valuable properties acquired by the bank in China, principally in Shanghai. The estimated value of the properties which it is proposed to purchase is stated at £147,930, and the net annual rental at £12,709 10s. Allowing a considerable sum for management and other expenses, a present return of fully 10 per cent. on the purchase money is put forward with the probability of increase as the China trade improves, and of an ultimate advantage by the gradual resale of the properties at a price exceeding the present cost. The Master of the Rolls has sanctioned the sale of the properties by the official liquidator of the Commercial Bank, but the subscriptions to the trust fund of £100,000 are meantime limited to the shareholders and creditors of the above bank. Creditors can authorise the liquidator to retain their subscriptions out of the next dividend declared, thus avoiding cash payment. The following gentlemen act as a committee for carrying out the arrangement, viz.:—Mr. Reuben Sassoon, Mr. John Pares Bickersteth, Mr. John Campbell, Mr. William Henry Vacher, Mr. Frederick Chapman, and Mr. John Andrew Baumbach; any three to form a quorum. This measure will greatly assist the liquidation of the Commercial Bank and the proposed compromise of 17s. in the pound.

Telegrams from Hong Kong announce that a half-year's dividend of the Hong Kong and Shanghai Banking Corporation for the six months ending 31st December is at the rate of 12 per cent., that 200,000 dollars are added to the reserve fund, and the balance of profits carried forward to the new year.

Since the issue of a notice in December last on the subject of mails for China and Japan *via* San Francisco, information has been received from the United States' Post-office that letters intended to be sent to Japan or China by the United States' monthly mail packet from San Francisco will probably be in time if they are posted in this country so as to arrive in New York not later than the 22nd of each month.

According to a circular of Mr. F. M. Page, the specie shipments to the East, *via* Alexandria, amounted last year to £10,189,904, against only £3,659,154 in 1867, which was the smallest shipment known for many years past. The highest total ever attained was in 1864, when in consequence of the cessation of the American cotton supply it reached £24,318,189. For 1868 the total shipments to China and Japan reached £826,431, and to the Straits £306,865, these two amounts showing an increase of about a quarter of a million against the preceding year.

The small amount of bar silver brought by the last West India steamer has been disposed of at 60⅞d. per oz., a decline of ⅛d. from the rate obtained for that by the previous packet. In the interval a very large business has been transacted at 60⅞d. to 61d.; but the demand for India has decidedly slackened within the last few days.

The amount of bullion by the P. and O. Company's steamer Massilia, from Southampton on the 6th inst., was, in gold, to Galle, £2,934; to Bombay, £13,900; to Madras, £1,195; in silver, to Bombay, £82,000; to Madras, £2,000; to Hong Kong, £25,688; total in gold, £18,029; in silver, £109,688.

It is notified that the firm of Malcolm, Hudson, and Stitt, of London and Yokohama, is dissolved by the retirement of Mr. J. S. Stitt, and that the business will be continued at both places by the remaining partners, under the style of Malcolm, Hudson, and Co.

The retirement of Mr. Edwin H. How from the firm of E. H. How and Co., of Foochow, is also announced; the business is now amalgamated with that of Mr. R. R. Westall, under the style or firm of Westall, Galton, and Co.

A circular issued in New York, under date Jan. 1, announces that the late business of Messrs. Westray, Gibbes and Hardcastle will be continued henceforth by Mr. Fletcher Westray and Mr. Alfred H. Gibbes, under the firm of Westray and Gibbes.

Mr. Thomas B. Green has issued a circular, dated from the Lombard Exchange and News-room, announcing that he has commenced business as a public tea-inspector, and is prepared to

Digitized by Google

examine and report on parcels of tea at a uniform charge per hundred packages. Mr. Green believes that the want of an independent inspector is frequently felt—for instance, when heavy simultaneous arrivals overtax the resources of brokers, and in cases where claims or disputes arise, to decide which a reference to a competent and impartial inspector must certainly be valuable.

Mr. James Innes has commenced business as a tea broker at 90, Great Tower-street.

## THE TEA DUTIES.

The following letter on the tea duties has appeared in the *Daily News*:—

SIR,—I am surprised that none of your statistical correspondents have drawn attention to the extraordinary development of trade, and to the great gain to the public that has followed the repeated reductions that have been made by the Legislature on the tea duties. Permit me to do it in a popular form, and your readers can judge how much they, or rather their poorer neighbours, the labouring classes, have gained by these beneficial changes. In 1852, the last year of the 2s. 2½d. per lb. duty, the consumption of the United Kingdom was 54,713,034lbs., yielding to the revenue £5,984,172. In 1868, with a duty of 6d. per lb., the consumption had increased to 106,250,000lbs., yielding £2,656,250; this shows an annual loss to the revenue of £3,327,922, but the gain to the public has been much greater. I dare not say that the consumption, with a 2s. 2½d. per lb. duty would now have been 106,000,000lbs., but taking the natural increase, which averaged 1,500,000lbs. a year during the twelve years that it remained at that duty, we should have had in 1868 a consumption of 78,000,000lbs., yielding, at 2s. 2½d. per lb., £8,531,250; deduct from this the actual amount paid, £2,656,250, the result will be £6,168,750. Add to this the profit taken by the retailer on his outlay for duty, which is certainly not less than 5 per cent., we have £6,527,032, or nearly double the loss to the revenue as the annual gain to the public. I rather think the reduction of the tea duties was first submitted to Parliament by Mr. Disraeli in 1852. It was left, however, to his successor to begin the good work and to propound a scheme, which he ultimately carried out, for their gradual reduction to 1s. per lb. At that figure the public and the trade seemed satisfied. To their surprise, in 1865 Mr. Gladstone, with great boldness and a true appreciation of the public good, reduced them to 6d. per lb. The annual gain to the public of £2,250,000 by that step is entirely due to him; and I dare say he will not grudge Mr. Disraeli his share of the credit for the earlier reductions. How does a large and important constituency in South-West Lancashire reward such services when the person who rendered them seeks another opportunity of still further benefiting his country? In your columns last week it was stated that the expenses of the defeated candidates for that constituency were £11,800; so that the man who has been instrumental in saving to the public about £6,000,000 annually is mulcted in the sum of £6,000 because he very naturally desired to represent his native county in Parliament. Can we wonder at the Chinese calling us barbarians when we so treat the public man of whom they hear most, and who, benefiting his own country in this matter of the tea duties, has equally benefited theirs?—I am, &c., A RETAIL TEA DEALER.

## BULLION AND SPECIE.

The following remarks are from Messrs. Mocatta and Goldsmid's report:—

Last week there was again a lively demand for Bar Silver, and the price advanced to 61d., at which some amount of business was transacted; during the last few days, however, the inquiry has slackened, and silver is now offering at 60½d. This depression is probably only temporary, as, although not far short of three millions sterling have been remitted to India within the last three months, there seems a fair prospect of the shipments being continued. Mexican Dollars have been also largely taken for China during the same period, chiefly for shipment by sailing vessels round the Cape. The supply is now very limited, and although the demand is not by any means general, a fraction higher than 59½d. has in some instances been obtained.

The foreign exchange having advanced there is no longer much advantage in sending gold to Paris; and although all that arrives here is still taken for exportation, the withdrawals from the Bank have in a great measure ceased.

## EXPORT OF COTTON GOODS TO THE FAR EAST.

The following is a summary of Mr. Sam Mendel's tables for the present month, which contain details of the quantities of cotton yarn and manufactures shipped from London, Liverpool, Southampton, and the Clyde, to Hong Kong, Shanghai, Japan, Singapore, Batavia, Manila, and Ceylon during the month ended 16th February, 1869.

To HONG KONG AND WHAMPOA.—Plain Cottons, 3,983,878 yards; Coloured Cottons, 283,478 yards; Printed Cottons, 275,086 yards; Cotton Yarn, 71,600 lbs. Total value of Cotton Goods, £101,334.

To SHANGHAI.—Plain Cottons, 16,742,199 yards; Coloured Cottons, 923,075 yards; Printed Cottons, 264,772 yards; Cotton Yarn, nil. Total value of Cotton Goods, £306,205.

To JAPAN.—Plain Cottons, 1,327,260 yards; Coloured Cottons, 24,548 yards; Printed Cottons, 423,552 yards; Cotton Yarn, 239,172 lbs. Total value of Cotton Goods, £40,192.

To SINGAPORE AND PENANG.—Plain Cottons, 4,653,815 yards; Coloured Cottons, 708,000 yards; Printed Cottons, 104,144 yards; Cotton Yarn, 166,915 lbs. Total value of Cotton Goods, £113,186.

To BATAVIA.—Plain Cottons, 631,763 yards; Coloured Cottons, 750,850 yards; Printed Cottons, 569,290 yards; Cotton Yarn, 53,780 lbs. Total value of Cotton Goods, £42,788.

To MANILA.—Plain Cottons, 569,114 yards; Coloured Cottons, 1,095,060 yards; Printed Cottons, 177,952 yards, Cotton Yarn, 2,100 lbs. Total value of Cotton Goods, £41,382.

To CEYLON.—Plain Cottons, 2,131,964 yards; Coloured Cottons, 131,059 yards; Printed Cottons, 249,389 yards; Cotton Yarn, 18,700 lbs. Total value of Cotton Goods, £43,980.

## ARTICLES OF IMPORT.

*(For Quotations see Table of Prices Current.)*

### TEA.

The public sales of China commenced on the 16th inst., the offers being 14,670 packages, of which 11,000 packages have been sold without reserve. There was considerable competition, especially for common Congous, Red-leaf realising 1s. 1d. to 1s. 4d., and Kaisow siftings 7¾d. to 8½d. per lb. By private contract there has been a more general demand for common Congous, and advanced prices are obtained, descriptions sold last week at 12¾d. to 13d. being now worth 13½d.

The following is from Messrs. W. J. and H. Thompson's Circular, dated 17th inst.:—During the last few days a speculative feeling has prevailed for common Congou, and the price has advanced ¼d. per lb.; other kinds remain much as before, but there is decidedly a healthier tone, and importers are firm. Foochow Congous: Dust, siftings, and broken leaf are rather dearer, and good common and inferior flavoury are saleable at 1s. 1½d., which shows an advance of ¼d. per lb. For superior and medium qualities occasionally better prices can be obtained than the depressed rates lately current; the same remark applies to fine. Black-leaf Congous: Good common has been taken both by the trade, exporters, and speculators at 1s. 1¾d. to 1s. 1½d. per lb., and little now is to be had at the latter figure. Fair and medium have also advanced ¼d. to ½d. per lb., and a good demand has existed at 1s. 2d. to 1s. 5d. per lb. Sales in good and fine have been small, but the prices obtained have been rather better than those lately ruling. Tayshan Congous: Fair to medium in boxes have been sold at 1s. 1½d. to 1s. 4d. per lb. Oolongs: Good common have again been sold at the auction at 1s. to 1s. 0½d. per lb. Scented Capers: Further sales have been made at the prices quoted in our last. Scented Orange Pekoes: A parcel of boxes of common, "with all faults," in the sale, realised 11¼d. per lb., and several lots of fair to good, received overland, sold at 1s. 2d. to 1s. 5d. per lb. Green Teas: There is no new feature to notice; common continues to sell freely, but the finer kinds do not meet with ready buyers. The China sale, which commenced on the 16th inst., concluded to-day. The prices of all common to fair Congous and medium black-leaf are ½d. per lb. dearer. The United Kingdom stock was, on the 31st ultimo, estimated at 100,000,000 lbs. in 1869, against 86,000,000 lbs. in 1868; cargoes of vessels arrived up to date, but not included in the above stock, with portion of other cargoes only partially included, 14,021,600 lbs. in 1869, against 6,016,700 lbs. in 1868; amount "on the water" advised by the last mail, 19,458,700 lbs. in 1869, against 27,528,500 lbs. in 1868.

### SILK.

With reference to the Lyons market we extract the following from the *Salut Public*:—Business continues to remain in that position which is neither activity nor stagnation. To judge from the published returns, it may be said to be in the normal condition for this period

Digitized by Google

of the year. What characterises this situation is the difficulty encountered in concluding any bargains. On the one hand the holders, who have already made some concessions, are astonished that no greater results are produced; on the other, buyers, who still believe in a fall, cannot make up their minds to do more than supply their most pressing wants as they arise. In manufacture, in spite of the presence of numerous purchasers, very few transactions take place. The buyer is frightened at the high prices, and wishes to wait for the direct requirements of consumption before laying in a stock; but as the quantities in hand are not important, and a slight movement would soon exhaust them, a general resistance is offered to the lowering of prices. This is not the first time, moreover, that this apparent contradiction between the weakness of the rates in raw material and firmness in those of tissues has been witnessed. This state of things is explained, as we have just said, by the smallness of the stocks held, not only by the weavers, but also by the brokers, and likewise because the trade shows much prudence in production. A conviction is entertained that a slight movement would promptly bring about a satisfactory situation.

The Silk Market remains tolerably active, and prices show a decided advance on those current at the date of our last. Red Peacocks have been sold at 24s. 6d., while the 3½ flag chop which was sold at 22s. 9d has since been placed at 24s. 6d. Classic No. 3 remains at 29s. to 30s, while other chops are at 26s. 6d. to 27s. 6d.; for instance, 3rd flags and common Tsatlees are dearer, nothing now being offered at under 21s. 6d.—indeed, a large quantity imported by ship, and just to hand, has sold at a trifle above that price. Hainings are in better inquiry, 26s. 6d. having been offered for No. 2 Fat Mow. Japans are fairly current at last quotations.

---

COTTON.—Since our last report the Liverpool market has exhibited great depression, the pressure to sell having become greater every day against an extremely slack inquiry, either from speculators or the trade. Prices are down ⅛d. to ¼d., the current rates being as follows:—Surat, 9⅜d. to 11¾d.; Madras, 9½d. to 10¾d.; Bengal, Scinde, &c., 8½d.; fair Dhollerah, 10⅜d.; fair Oomrawuttee, 10½d.; fair Broach, 10⅜d.; fair Bengal, 8⅞d.; fair Egyptian, 13⅜d. to 14d.; fair Pernam., 12⅛d.; middling Boweds, 12½d.; middling Orleans, 12⅜d. In "arrival" cotton but little has been done. The London market has also been extremely dull, only a small amount of business having transpired at irregular prices.

COFFEE.—Ceylon: Both Plantation and Native are still in good demand at the advanced rates current at the date of our last. The sales have been about 100 casks Plantation at 69s. to 73s., and 4,000 bags Native at 50s. 6d. to 52s. per cwt. For the week ended 13th inst. the deliveries are nearly 200 tons less than in the corresponding week last year; but as the landings are 500 tons less, the surplus in the stock is further diminished, and is now barely 600 tons, the altered relative position being mainly attributable to the early arrivals from Ceylon in 1868.

CUTCH.—At auction 454 boxes fine Pegu "Elephant" and "BB" marks were bought in at 35s., and private business has been effected at the same rate.

GAMBIER.—Sales of good cubes by private contract are reported at 23s. 6d., and in public sales 734 baskets fair cubes were bought in at 24s. per cwt.

GUM COPAL.—At auction 64 cases very low dark Singapore realised for one lot 15s. and for the remainder 7s. 6d. per cwt.

HEMP.—The only sale of Manila since our last has been 600 bales barely fair quality at £48 per ton.

PEPPER.—The market has been very quiet. The stock is 2,047 tons, against 2,551 tons at the corresponding date last year.

RICE.—There is a more active demand than when we last reported, and prices have acquired an upward tendency. The sales have been 6,500 bags fair Rangoon at 10s. to 10s. 3d., and 800 bags low Necransie at 9s. 3d.; 1,357 bags Siam being bought in at 9s. 6d. A floating cargo of 1,200 tons Rangoon, October sailing, has been sold at 10s. 4½d. for the United Kingdom.

SPICES.—No change has taken place in the tone of the market, but the business has been unimportant.

SAPANWOOD.—Four tons Ceylon have sold at £9 to £10.

SUGAR.—The tone of the market has been somewhat irregular, the inquiry running on good and medium qualities, which are 3d. per cwt. dearer, to the exclusion of the commoner descriptions. Penang: Of 941 bags offered at the public sales, only 100 bags good brown to low yellow (duty 9s. 7d.) sold at 32s. to 35s. 6d., the remainder being bought in, medium to fine yellow (duty 10s. 6d.) at 36s. to 39s., and superior (11s. 3d.) at 40s. Manila: The public sales have comprised 500 tons clayed (duty 8s.) at 32s. 6d. to 32s. 9d., 230 tons unclayed Zebu at 30s., 120 tons Taal price not reported, 25,000 bags Iloilo 30s. 6d to 30s. 9d. For arrival a cargo of unclayed Manila, per Cymbeline, 570 tons Iloilo at 31s. duty paid, landed in London, and 350 tons clayed at 33s. By private contract 17,000 bags clayed realised (duty 8s.) 33s., and 14,000 bags unclayed Iloilo 30s. 9d. China: Of 6,509 bags offered by auction 1,350 bags sold, soft at 28s., dark muscovado sort 29s. 6d.

TIN.—We have no change to report, the market for Straits remaining firm, with good business at £114 on the spot, and £114 10s. for arrival.

---

## ARTICLES OF EXPORT.

—o—

### LEEDS MARKET.

The following is from Messrs. Jorss and Co.'s Circular:—

In Wool the transactions have been very small, and only to supply the current wants of the spinners, who, as a rule, hold fair stocks. Prices in the country rule higher than amongst the wool-staplers, and there is no anxiety on their part to sell, while spinners find no inducement to increase their stocks, as their sales are only small.

In Yarns there is little change to notice; there is a fair inquiry from abroad, but the prices offered are considerably below those current here, in consequence of which but little business is done; the home demand also seems to be supplied at present.

In Pieces there is little fresh business, and manufacturers find their position getting worse daily. The rise in Cotton Warps is so serious that it materially affects the price of the manufactured article, which advance merchants are not prepared to pay. We hear of a number of looms standing, as the losses of manufacturers would be so serious that they prefer standing to accepting the rates obtainable. Prices remain as last quoted, owing to the absence of any demand, notwithstanding the greatly advanced cost of the material; a little demand would bring prices much higher.

---

### MANCHESTER MARKETS.

The following is from Messrs. Collie and Co.'s Monthly Report, dated 17th inst.:—

During the past four weeks there has been a very large business transacted in cotton at hardening rates, and this has had considerable influence upon quotations for goods and yarns in this market. A decided advance has taken place in all descriptions of fabrics, but still insufficient to protect the manufacturer from loss, and this is especially the case with the producers of shirtings for the India and China trade. These goods must involve a loss of 10 per cent. on the cost, and the depression on this branch of the trade has been so great, and continued for so long a period, that there is now no doubt that their production has been greatly curtailed by the partial or entire stoppage of the mills, or else by turning the looms upon other kinds of cloth. No perfectly reliable information can be got as to the extent of the actual reduction in the manufacture of shirtings. An estimate only can be given, but after pretty extensive inquiry we believe that it is at least one-third of the average production of the past twelve months. But the demand for them has been so considerable, that the price, as compared with other goods, is still unaffected by the diminished supply.

SHIRTINGS have not responded to the enhanced prices of cotton during the past month. In many instances the looms have been diverted to the manufacture of other fabrics, and there is now an important diminution in the production; it however remains sufficient for the present small demand, as 39 in. kinds have been almost unsought for. The wider kinds, 45 in. and upwards, have been frequently inquired for and occasionally purchased, but seldom at anything like top quotations, and this remark is applicable to the lighter descriptions also during the past few days, but now they exhibit a languid tendency.

T-CLOTHS, in the total absence of demand for the China trade, show a considerable falling off in the turn-over, and but for the home trade having been moderately active, and the peace settlements between Turkey and Greece having brought the Levant buyers more largely into the market, our report of them must have been even more gloomy than that of shirtings. The business transacted in them has been confined to the better kinds.

LONG CLOTHS AND DOMESTICS have continued to advance in price with the upward course of cotton. For the former there has been a fair demand at firm prices, chiefly for the Levant trade, but it has now subsided, owing to the present high cost being deemed unsafe. The latter have maintained their position, not so much from the extent of the current demand as from the fact of being sufficiently engaged in the early part of January to keep the market still clear of stock.

MADAPOLLAMS have scarcely been mentioned in the transactions of the past month, probably because the previous heavy contracts satisfied the requirements of consumers and the trade. Although no present demand exists for them, they, like other cotton goods, are now quotably dearer, and from the altered position of the cotton market they could not now be bought at old prices.

PRINTERS, for some days after our last publication, continued in good demand, and it was found easier to obtain full prices for them than for other staples. Gradually, however, over production has taken place, and this, with a falling off in the inquiry, has brought them more nearly to the general level. The better qualities have been those most freely sold, yet they, as well as the lower ones, can now be obtained on terms more favourable to the purchaser.

JACCONETS and MULLS, in consequence of the comparative activity in them last month, have been lately more largely produced; but, like other goods suited to India, they are now almost neglected. With each successive rise in cotton they have been nominally advanced, but, were offers obtainable, they could no doubt be had at 1½d. per piece under the current quotations.

YARNS have been pretty extensively sold in the aggregate, the higher prices asked have been more readily paid for them than for goods, and spinners generally continue still well engaged. No. 40's Mule and better spinnings for India have enjoyed rather more favour, but spinners would concede ¼d. off their quotations to induce a repetition of orders, which have nearly ceased for the present, through the unwillingness of Eastern buyers for extended operations. In the higher classes there has been continuous moderate buying; they are fully engaged and firm in price, although at the moment no new contracts of any importance are offering. No. 16's to 24's and 28's to 32's Water have been weaker than for months past, owing to the absence of the usual China demand, and the small trade transacted in them has been confined to a few sales for the Continent.

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports have been dull; coal freights from the Northern outports have slightly improved, and there is more inquiry for tonnage.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 45s. meast. To Nagasaki: 45s. weight, 50s. meast. To Tientsin: 50s. meast. To Newchwang: 55s. meast. To Shanghai: 40s. weight, 45s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or meast. To Penang: 30s. weight or meast. To Ceylon: 20s. to 25s. weight, 35s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £43. For Shanghai: £43. For Hong Kong: £33. For Singapore: £27. For Galle: £24. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2 3s. For Shanghai: £2 5s. For Hong Kong: £1 15s. For Manila: £1 15s. For Singapore: £1 7s. 6d. For Galle: £1 5s.

The Admiralty have invited tenders for the conveyance of 950 hogsheads malt liquor from England to Hong Kong.

## CASUALTIES.

The Jupiter, Kiewit, from Amsterdam for Batavia, arrived at Falmouth Feb. 5, with sails split.

The Josephine Amedeé, Lagard, which arrived at Havre Feb. 3, from Hong Kong, reported that she had experienced severe weather, and in consequence of the pumps being out of order, had in her hold two feet of water, which was afterwards pumped out.

The Tewkesbury, from Manila to Liverpool, which put into Milford, Feb. 2, leaky, arrived at her destination on the 8th.

A telegram received from Calcutta, dated Feb. 7, states that the Surprise (Amer.), Ranlett, from Foochow to New York, with tea, had been on shore three days, and that the ship and cargo were badly damaged.

The Helen Finlayson, which sailed from Glasgow, Dec. 21, for Ceylon, arrived at Queenstown Feb. 6, with chainplate loose, &c.

Advices from Lisbon, dated Feb. 8, state that the Baltic (N.G. barq.), Jessen, from Newcastle to Singapore, had put in there that day leaky, and that part of her cargo had been jettisoned.

The Kirkland, which sailed from Liverpool Feb. 6 for Yokohama, put back Feb. 10, and was reported to have sustained damage.

Digitized by Google

The 'St. Bede, from Cardiff to Singapore, arrived at Queenstown Feb. 10, with loss of galley, bulwarks, &c.

The Dunmail (ship), of Workington, Thompson, which sailed from London Jan. 29, for Hong Kong, put back to Gravesend Feb. 15, the crew refusing to proceed in her.

Lisbon advices of Feb. 11 state that the Baltic, Jessen, from Newcastle to Singapore, which put in there Feb. 8, leaky, &c., would discharge.]

At MAURITIUS.—Jan. 4, Ajax (str.), from Singapore, &c., and left 16 for London.

The Pacific Steam Navigation Company have received by the Atlantic Cable intelligence that their steamer Arica was totally lost near Pacasmayo, Peru, on the 13th ult. No lives were lost. The vessel is understood to be partially insured in Liverpool.

LAUNCHES.

There was launched on the 15th inst., from the building-yard of Messrs. Clibbett and Son, Appledore, a handsome brigantine. She is the property of Captain John W. Turner, of Northam, and was named by his daughter the Eudora. She is 171 56-100 tons N.N., and is intended for the general foreign trade, under the command of her owner.

Messrs. John Duthie, Sons, and Co. launched on the 11th instant a three-masted schooner, named the Resolute, of the following dimensions:—Length, 116.6; breadth, 24.65; depth, 13.2; and of 235 tons register, and 327 tons builders' measurement. The vessel has been built for Fraserburgh owners, and is intended for the Mediterranean and West India trade, and will be commanded by Capt. Alex. Stephen, late of the Alexander Harvey, of Fraserburgh.

On the 12th inst. there was launched from the building-yard of Messrs. Alexander Stephen and Sons, Kelvinhaugh, an iron barque named the Antonia. The Antonia, like the other ships of this line, takes her place in the Pacific trade, loading at once from Glasgow to Valparaiso.

Messrs. Archd. M'Millan and Son, Dumbarton, launched recently a very handsome iron clipper barque of about 600 tons burthen, named Chiselhurst, classed Aa at Lloyd's, and is intended to trade from London to the Cape Colony, and to go into such rivers as the Cowie. She is built to the order of G. H. Payne, Esq., London, for his line.

Messrs. Blackwood and Gordon, Port Glasgow, have launched from their building-yard a handsome sailing vessel of 750 tons register, named the Wood Hall, for Messrs. Whittle and Co., of Liverpool. The vessel is built for the San Francisco trade.

A sloop of 100 tons burthen has been launched from the shipbuilding yard of Mr. George Westcott, Saltash. She was named the Sophia; she is owned by Messrs. Kelly, Holden, and Hine, of Plymouth, and is intended for the coasting and fruit trade.

On the 13th inst. a fine clipper brig, named the Henrietta, was launched from the yard of Samuel Dewdney, Brixham. She is 192 tons burthen, 105 4-10ths feet in length, 23 7-10ths feet in breadth, and 13 feet in depth, and has been classed A 1 at Lloyd's for twelve years. The Henrietta is owned by Messrs. Beer and Browning, and is intended for the Mediterranean trade.

The Hirondelle, a fine clipper schooner, has been launched from the yard of Messrs. J. Upham and Sons, Brixham. She is 104 feet in length, 23 feet 8 inches in breadth, 12 feet in depth, 177 tonnage, and has been classed A 1 at Lloyd's for twelve years. She is owned by Mr. O. H. Bartlett, and will be employed in the fruit trade.

On the 11th instant a splendid iron screw steamer was launched from the shipbuilding yard of Messrs. T. and W. Smith, North Shields. The vessel is one of the largest ever built by the firm, her dimensions being —Length, 220 feet; beam, 30 feet; depth of hold, 18 feet 4 inches, and is 1,500 tons burthen. She is intended for the Mediterranean trade.

From the shipbuilding-yard of Mr. John Stephens, of Point (Truro), on the 17th inst., a screw steamtug, of the following dimensions:—Length, 70 feet; breadth, 14 feet; depth, 8 feet; with engines of about 40-horse power, and named the North Star by Miss Bessie Chellew, daughter of one of the owners.

On the 13th inst. there was launched from the shipbuilding-yard of Messrs Leslie. and Co., Hebburn Quay, on the Tyne, a splendid screw steamer of 1,700 tons burthen. She is intended for the Mediterranean trade, and is built with all the latest improvements in hull and rigging.

A very large iron screw steamer has been launched from the shipbuilding-yard of Messrs. Palmer and Co., Jarrow. The vessel is about 2,000 tons burthen.

On the 13th inst. Messrs. Caird and Co. launched, on the Clyde, a handsome steamer, named the Leipzig, for the North German Lloyd's of Bremen, measuring 290 feet in length, 39 feet in breadth, and 30 feet in depth; of 2,200 tons burthen, and 350-horse power. The Leipzig is intended for the Company's Bremen and Baltimore service, and will be commanded by Captain Sagar.

# THE CHINA AND JAPAN AGENCY.

For the Purchase and Shipment of Goods of all kinds to Ports in China and Japan. **C. MITCHELL GRANT, Proprietor.**

I have the pleasure to report to those interested in GRANT'S TRANS-MONGOLIAN TELEGRAMS SERVICE that the Line has realised during the past year the anticipations which I formed on issuing my last circular. The couriers have run with great regularity during the whole of the season, the average time between Tientsin and Kiachta being under twelve days. In many instances Telegrams from Shanghai have been delivered in London in seventeen days.

New contracts have been concluded for the Season of 1869.

The contract time from Kiachta to Tientsin is ELEVEN DAYS! a speed never yet attained by either the Chinese or Russian Governments between these two towns.

The Director General of the Telegraph Department, St. Petersburg, has given stringent instructions regarding all Telegrams addressed to my care. In future they will always be REPEATED as in "recommended" Telegrams without extra charge.

The community of Hong Kong can now take advantage of this line to reply to Telegrams or Letters received by the P. and O. Mail Service from Europe. A Telegram bag will be made up at Shanghai on the arrival of each P. and O. Mail Steamer from Hong Kong, and Telegrams from Europe will be forwarded by first steamer from Shanghai.

I have to thank my constituents for the increased support they have given to my line, and in order that it may be still further used, it is my intention to reduce the charges so soon as the capital due to subscribers has been paid up.

KIACHTA, December 31st, 1868. **C. MITCHELL GRANT.**

## ROBERT COCKS AND Co's NEW MUSIC.

THREE NEW BALLADS, by Mr. WRIGHTON,

No. 1. SHE SANG AMONG THE FLOWERS.
No. 2. GRIEVE NOT FOR ME.
No. 3. THEY ARE COME, THE PALE PRIMROSES.

3s. each; free by post for 19 stamps each.

"'She Sang among the Flowers' is one of the best of Mr. Wrighton's ballads; our musical readers will not regret adding this pretty ballad to their folios."—Vide Bath and Cheltenham Gazette.

"Full of rich varieties, beauties, and expression."—Vide Court Circular.

"We have not for a long time met with a more gay, sparkling, and joyous song."—Vide Bayswater Chronicle.

"'Grieve not for me'—A good song, with an expressive melody, and very appropriate accompaniment."—Vide Scotsman.

"M. Wrighton deserves much credit for having wedded the words of this pretty song to music so successfully."—Vide Berwick Warder.

"'They are Come, the Pale Primroses.'—This song only requires to be known to become popular; it is set to a very pretty little melody."—Vide the Press.

THE SNOW LIES WHITE (An Old Wife's Song), poetry by Jean Ingelow, music by Miss M. LINDSAY (Mrs J. W. Bliss). 3s.; free by post 19 stamps.

NEW VOCAL DUETS, by the Author and Composer of "What are the Wild Waves Saying?"—No. 1, "Let us Roam," and No. 2, "The Beautiful and True." 3s. each; free for 19 stamps each.

THE FLOWER GATHERERS. Vocal Duet. By the Author and Composer of "What are the Wild Waves Saying?" 4s.; free by post 25 stamps. "This cannot fail to be a favourite duet."—Vide Dublin Express.

HAMILTON'S MODERN INSTRUCTIONS for the PIANO. 659th Edition. 70 large folio pages. 4s.—Order of all musicsellers and booksellers.

MEDICINE JACK. Serio-Comic Song. Written and Composed by ALFRED SCOTT GATTY. Illustrated. 3s.; free by post, 19 stamps.

OH! YE TEARS, OH! YE TEARS, THAT HAVE LONG REFUSED TO FLOW. Song. Words by CHARLES MACKAY. Music by FRANZ ABT. No. 1 in C. No. 2 in D. The same for two voices. Ditto, Piano Solo, by GEO. F. WEST. Each 3s., free by post for 19 stamps each.

ONE HUNDRED NEW MUSICAL WORKS, consisting of Songs, Vocal Duets, Piano Solos, Duets and Dances. The list may be had gratis and post free of the Publishers.

CANADIAN NEWS, every Thursday, contains all the latest news from the New Dominion

Price 2d., post free, 3d.
Office: 11, Clement's-lane, Lombard-street, E.C.

## KEATING'S COUGH LOZENGES.

UPWARDS OF FIFTY YEARS' experience has fully confirmed the superior reputation of these Lozenges in the cure of ASTHMA, WINTER COUGH, HOARSENESS, SHORTNESS OF BREATH, and other PULMONARY MALADIES.

Sold in boxes, tins, and bottles of various sizes.

## KEATING'S CHILDREN'S WORM TABLET.

A PURELY VEGETABLE SWEETMEAT, both in appearance and taste, furnishing a most agreeable method of administering a well-known remedy for INTESTINAL or THREAD WORMS.

It is a perfectly safe and mild preparation, and is especially adapted for children.

Sold in tins and bottles of various sizes.

## KEATING'S PERSIAN INSECT DESTROYING POWDER.

This Powder is QUITE HARMLESS TO ANIMALS, but unrivalled in destroying Fleas, Bugs, Emmets, Flies, Cockroaches, Beetles, Gnats, Mosquitoes, Moths in Furs, and every other species of insect in all stages of metamorphosis.

Sold in packets, tins, and bottles of various sizes.

☞ The public are particularly requested to observe that all the above preparations bear the Trade Mark as herein shown.

Sold by all Chemists and Druggists.

HOLLOWAY'S PILLS.—SAVED FROM DESTRUCTION.—It should be deeply impressed on every one who has a proper regard for health that the most serious diseases which can affect mankind first manifest themselves by trifling signs, and that it is the highest wisdom to meet and subjugate the first disordered action, wherever and whenever it displays itself in the system. Holloway's Pilis will effect this without risk, pain, or other drawback. These well-known and universally appreciated Pills relieve the constitution from all difficulties, expel all impediments to the natural action of any organ, and prevent undue "wear and tear" to the system. By their purifying powe- over the blood the whole body is refreshed, and each ndividual function properly stimulated.

## THE SAIGON ADVERTISER & SHIPPING GAZETTE.

A SUMMARY of Commercial and Shipping Reports from SAIGON, and a Record Progress in COCHIN CHINA.

Subscription, £5 per annum, exclusive of postage.

London Agency: THE LONDON AND CHINA TELEGRAPH Office, 2, Cowper's-court, Cornhill, London, E.C.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships, and repair and refit of STEAM MACHINERY AND BOILERS.

Their large Granite Dock is 307 feet in length, fitted with a caisson-gate, and with a centrifugal steam pump of great power, ensuring despatch in all states of the tides. At average spring tides this dock can receive vessels drawing 16 to 17 feet, and during the autumn and winter months 18 feet. Their two smaller docks, also built of granite, can receivevessels drawing 12 to 13 feet.

The premises comprise a large smithy and boiler shop, carpenters and boat-builders' shops, an ENGINEERS' WORKSHOP, fitted with lathes and tools driven by steam, AN IRON FOUNDRY for castings up to 5 tons weight, and a BRASS FOUNDRY.

The different departments are superintended by experienced Europeans, viz., engineer, blacksmith, an shipwrights.

The Company keep on hand copper and metal sheathing, spars, timber, paints for iron vessels, and all material for dockyard use.

A DRY GODOWN for reception of stores of vessels requiring to discharge them.

Good quarters for officers of ships under repair in the dock.

Amoy, 16th December, 1867.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

LIEBIG COMPANY'S EXTRACT OF MEAT.—PARIS AND HAVRE EXHIBITION. GOLD MEDALS.—CAUTION. None genuine without Baron Liebig, the inventor's, signature, being on every jar, accompanied by full printed directions. About seventy pints of excellent beef tea for 11s., the present reduced retail price per pound. Finest, most convenient, and by far the cheapest meat-flavouring ingredient for soups, made dishes, and sauces. Sold by all Italian warehousemen, chemists, grocers, ship chandlers, and provision dealers.

STEAM TO JAPAN.—To leave the East India Docks on the 5th March, with leave to call at St. Vincent, the Cape, and Singapore, to coal for Yokohama and Hiogo, the splendid new composite screw steamer C. J. TEXTOR, A1 16 years at Lloyds, 690 tons register. This fine high-classed vessel has beautiful accommodation for cabin passengers, and presents an unusually good opportunity to shippers, as she will steam the whole way out.

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., 8, York-street, Manchester; or 27, Leadenhall-street, London, E.C.

BOMBAY DIRECT (under engagement to the Council of India), the magnificent iron clipper ship COLDINGHAME, AA1 (owned by Messrs John Willis and Son, 1,072 tons register, J. M. WHYTE, Commander; loading in the East India Docks. This beautiful vessel, built in 1866, offers a most desirable opportunity to shippers requiring despatch.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 8, York-street, Manchester; or 27, Leadenhall-street, E.C.

Regular line of Packet Ship. With despatch.

FOR HONG KONG, the splendid clipper, RIVER CLYDE, A1, 499 tons register; W. CRAWFORD, Commander; London Docks.

For Freight or Passage apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

With despatch.

FOR SHANGHAI, the splendid Clyde-built Clipper TAMERLANE, AA1, 764 tonsregister; G. P. WILSON, Commander; East India Docks. This well known ship is celebrated for her rapid passages.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, E.C.

To follow the "Sarah Watson." Will meet with the usual quick despatch.

DIRECT for COLOMBO, the beautiful clipper ship WAR CLOUD, A1 10 years, 406 tons register: JOSEPH IRVINE, Commander; West India Docks. This magnificent vessel is considered one of the fastest afloat, her last passage from Colombo being eighty-eight days, and offers a most desirable opportunity to shippers of fine goods, as she will not carry creosoted sleepers, or manure of any description.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St Helen's, Bishopsgate-street, E.C.

Will meet with Quick Despatch, having the greater part of her Cargo engaged.

FOR POINT DE GALLE, CEYLON (with leave to call at Trincomalee), the beautiful clipper ship DOROTHY, A1 9 years, 310 tons register; W. DAVIES, Commander; West India Docks. This magnificent vessel is considered one of the fastest afloat, and offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage, apply to JOHN C. CAMPBELL 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

FOR SHANGHAI DIRECT (having the greater portion of her cargo engaged, will be immediately despatched), the clipper ship STANLEY CASTLE, A1 10 years, 443 tons register, D. M'DOUGALL, Commander; loading in the East India Docks. This splendid vessel, built in 1868, especially for the China trade, has proved herself well adapted for it.

For Freight or Passage, apply to the owners, Messrs PORTER, RIXON, and Co., 63, Fenchurch-street, E. or to NORRIS and JOYNER, 60, Cornhill, E.C.

### THE MAILS, &c.

—o—

The French mail arrived yesterday, bringing a few days' later news from China than the P. and O. mail delivered this morning; the bulk of our correspondence, &c., reached us by the latter, whence we selected to-day for publishing.

The two homeward mails may clash again next month, those leaving Hong Kong on Feb. 23 (English) and Feb. 25 (French) being due here on the 5th and 7th April respectively. Thenceforward the new time-table of the Messageries will come into play on the homeward route.

The latest telegrams from China (which will be found in the usual place) are those in advance of the mail leaving Hong Kong Feb. 9, due here on the 22nd inst. Some of these telegrams were received in very good time, while others only came to hand yesterday—twelve days in transmission from Galle.

## List of Passengers.

—o—

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer *Massilia*, arrived March 7. From Hong Kong: Mr. and Mrs. Boyd, 2 children and servant, Dr. and Mrs. Carnegie, child and servant, Mr. E. J. Per steamer *Nestor*, from Liverpool, March 1.—To Mauritius: Miss Short, Mrs. J. Brodie, two children, and servant, Mrs. A. R. Barrant, three children, and servant, Mr. Charles Wilson, Dr. W. Macaulay. For Singapore: Mr. E. McAlister. For Hong Kong: Mr. Jules Giquel. For Shanghai: Mr. R. Lehmann.

Per P. and O. steamer *Bangalore*, from Southampton, March 6.—To Hong Kong: Mr. S. J. Crutch, Mr. A. Fulton Smith, Mr. J. S. McDonald. To Ceylon: Mr. and Mrs. Ralph and child, Mr. C. J. Pattenson, Mr. H. F. Wandby, Mr. W. H. Case.

Per P. and O. steamer *Massilia*, from Marseilles, March 14.—To Shanghai: Mr and Mrs. W. G. Price, Mr. C. A. Rees, Mr. R. R. Westall. To Hong Kong: Mr. J. Anderson, Mr. F. M. Youd, Mr. Otto Menger. To Ceylon: Mr. H S Saunders.

Per P. and O. steamer from Suez, March 21.—To Ceylon: Mrs. and Mrs. Officer and child.

Per P. and O. steamer *Tanjore*, from Southampton, March 20.—To Yokohama: Mr J. H. Longford. To Shanghai: Mr. H. R. Hearne, Mr. E. H. Parker, Mr. W. D. Spence, Mr. T. L. Bullock, Mr. W. S. Ayrton, Mr. R. Gardner. To Ceylon: Miss Hardy.

Per P. and O. steamer *Ripon*, from Marseilles, March 28.—To Shanghai: Mr. A. Thurburn, Mr J. T. Brand, Mr. J. J Kelly, Mr. J. G. Weston. To Hong Kong: Mr. W. M. Gilman, Mr. H. Lawrence, Mr. Marcus Daly, Mr. and Mrs. F. Luddeke, Mr. W. P. Galton. Mr. and Mrs. Larken, Mr. Kinnear. To Singapore: Mr. and Mrs. Oscar Mooyer, Mr. and Mrs. W. C. Hannay, Mr. H. Buchanan. To Ceylon: Mr. David Wilson, Mr. Thomas Clark.

## Summary of News from the Far East.

—o—

### JAPAN.

—o—

### HIOGO AND OSAKA.

(FROM A CORRESPONDENT.)

JANUARY 7, 1869.

Mr. Lowder, who has been in charge of the Consulate at Osaka, leaves here for Yokohama to-morrow, *en route* for the new port of Nee-e-gata, which is to be opened by him. Mr. Robertson, who has been in charge at Hiogo, remains here; and Mr. Gower, just arrived from England, takes charge at Osaka.

Hiogo is making rapid progress, and is a very convenient shipping port. The foreign concession of land has already a fine bund of 120 feet, and houses are springing up; the spot is not the best, the water running very shallow, and piers must be run out for landing purposes. The Europeans are now quartered in native houses, rented from Japanese, along a sandy beach; and the picture is a striking example of the pursuit of business under difficulties, and the energy and enterprise of Europeans and Americans. The number of foreigners now here is about two hundred. The Consuls are—British, Mr. Robertson; French, M. Viault; American, Colonel Stewart; Prussian, Mr. Evers (of Kniffler and Co.); Dutch, Mr. Bauduin (of the Dutch Trading Company); Danish, Mr. Polano (of Adrian and Co.).

The distance from the anchorage at Hiogo to the Bar at Osaka is twelve miles. On the Bar there is only three feet of water, up to seven in high spring tides, and with a strong wind is impassable. So long as this difficulty remains Osaka cannot advance. The Japanese Government intend to deepen the bar and construct a basin for shipping, but the process, even when commenced, will be long, and the expense very large. No reliance is felt in its early completion, and merchants are consequently building here with confidence. There are some, of course, who believe that the outlay made in Hiogo will be lost, and that Osaka must ultimately be the place. Many firms are building on the concession sold lately at Osaka, and some are building at both. The position is very perplexing, but until the bar difficulty can be got over, it is well that Hiogo was granted. The returns for the first year's trade must be considered satisfactory, being 4,600,000 dols. imports, and 1,500,000 dols. exports. At all other ports the exports by far exceed the imports.

Osaka is by no means equal to Yedo in extent or population, but still it is the centre of an immense trade, and must have a great future for foreigners. The best thing the Japanese can do at present is to assist the laying of a line of railway from Hiogo to Osaka, a distance of about twenty-two miles. They have already ordered from England telegraphic instruments, and the poles will be erected shortly. This is very necessary, for it now occurs that a steamer arrives at, and leaves Hiogo, before it is known in Osaka, as in the case of the *New York*, from Yokohama for Shanghai, a few days since.

The want of regular communication with England is much felt. The *Azof*, P. and O. Co.'s steamer, now here as a spare steamer, runs between this and Yokohama when nothing more profitable turns up. The P. and O. Co. should obtain a hold on the traffic between

Digitized by Google

Yokohama, Hiogo, Nagasaki, and inland sea places, before it is completely monopolised by others. By running regularly they would secure it, and a company like this can afford to inaugurate a service in connection with the mails from Europe. Experience, also, has demonstrated that Japan cannot have her mail service through Shanghai; it must be direct to and from Hong Kong. The French Company has adopted this plan, and the P. and O. Co. will do well not to be behind them.

The Custom houses here are in good working order, and the bonded warehouses of great service, as they are good detached buildings, while the most of the godowns occupied by foreigners are contiguous to Japanese houses, and are not insurable in English offices. When the buildings on the foreign concession are finished all this will be altered.

It is a matter of surprise that we have not yet a vessel loading in London direct for Hiogo; all the large amount of imports to the present are from Yokohama and Shanghai. Surely the next number of the *London and China Express* will show a vessel loading direct for Hiogo and Osaka. The venture will be a good one.

The steamers now employed between here, Inland Sea, Yedo, and places along the coast, up to Hakodadi, are P. and O. Azof, Mars, United Service, Naruto, Sunrise, Staunch, Fusiyama (Captain Dundas), Viborg, Osaka, Nymph, Yangtze, Courier, Vulcan, Albion, Argus, Adeline, Hermann, Taping-nyo, Mona, Bahama, Orissa, and Fee-loong. The Kebendalem, a small steamer, built in Java, is here for sale. Of course the whole of these steamers are for sale, but at present the Japanese are not buying, except on long credit, which owners are not disposed to submit to, experience having shown this to be very unsafe. The Helen Black, a barque of about 400 tons, is reported as sold lately. There is plenty of employment in carrying troops, and some steamers are doing remarkably well.

The foreign concession at Osaka is a very nice site, with the river on two sides. Several buildings are in progress, and in a few months will be occupied; meantime, foreigners are living in native houses, including the English and other Consuls. The land sale consisted of twenty-six lots, of which thirteen were purchased by English and thirteen by other nationalities. There is hesitation on the part of some of the buyers to build, as it is still a moot question how far the place will hold its own against the superior facilities of Hiogo.

At Hiogo or Kobe, as the Japanese call the site selected for foreigners, lots sold were 37, 11 by British, and 26 by other nationalities, the price realised being 165,057 bous., of which 52,991 was placed to create a municipal fund, and 112,065 went to the Japanese Government. This appropriation for municipal purposes is a wise step, and will probably avert the incessant quarrelling and grumbling found at Yokohama. A council has been formed of the foreign Consuls and merchants, and two or three Japanese officials. The members of this council give their attention to the laying-out of the streets, lighting, and draining, in conjunction with Mr. J. W. Hart, civil engineer, who has been appointed to that post by the council. The total number of lots set apart is about eighty, and another sale will shortly be held. Great complaints are made that the Ministers and Consuls did not take sufficient pains in seeing that foreigners were provided with native houses on arrival at reasonable rates, the prices paid being six and even ten times that current among Japanese. The site at the other end, which has deeper water, could have been secured with a little trouble on the part of the Ministers. They accepted too easily what the Japanese offered.

In addition to a Municipal Council Hiogo has also a Chamber of Commerce, which proposes a monthly price current. Two newspapers also flourish in this rising place; the *Hiogo Herald* started first, and was soon followed by a rival, the *Hiogo News*. A race committee has also been formed, and the first meet came off in Christmas week. A *corps dramatique* is also in progress. Whatever Osaka may be, the merchants of Hiogo are determined to have the start, and there is little doubt but that they are right. Hiogo has all the advantage of a good harbour, vessels anchoring close in to the beach, near Stretham, and close to the godowns and dwellings. Many residents are even building on the beach in the native quarter, now in their temporary occupation, which is contiguous to the foreign concession, divided only by a creek. Of course every one cannot have water frontage on the concession, and another advantage is that the water is deeper and the landing more protected. There is one important disadvantage on the native site that the houses must adjoin those occupied by the natives, and this will prevent insurance against that dreaded and destructive element fire.

The Japanese talk of building docks and a navy yard. Several of their purchases of steamers are here, including the *Scotland* and *Keangsoo*.

Communication with Osaka is kept up by a small paddle steamer which came from Shanghai, called the *Ohen Maru*, belonging to Case and Co., storekeepers, and a screw launch, the *Gazelle*, owned by Messrs. Glover and Co., which cross the Bar, except when blowing from the west, when a heavy sea runs. The distance to the Bar from Hiogo is about twelve miles; the Bar is only about 400 yards, and on the other side the river is quiet, and a landing may be effected at any point on the banks for about three miles into the city of Osaka.

The land journey is about twenty-two miles, and Japanese messengers run the distance in four hours. The road is also passable for ponies, including three ferries, and is often done by foreigners in three to four hours, through a pretty country and splendid mountain scenery, at this time of the year covered with snow.

The mint purchased from Hong Kong for 70,000 dols. is in course of erection under the superintendence of Mr. Waters, engineer, but it will not be completed for a year.

The Japanese Government promise to make a good sixty-feet road for carriages. Taking the general run of the Japanese and the country it is much safer for travel than China, and the feeling towards foreigners beyond comparison better. One can walk or ride without molestation—indeed, smiles and politeness are met through all the cities and villages, which is an immense comfort to one who knows China. The readiness to adopt European clothing—boots, hats, blankets, watches, and such like articles—is in striking contrast to the Chinese. There must have been a large number of watches sold in Japan, for most of the well-to-do men have them.

---

## YEDO.

### THE MINISTERS' VISIT TO THE MIKADO.

On the 5th January the whole of the foreign Ministers had an audience of his Majesty the Mikado in Yedo. They presented themselves in succession during the day. Sir Harry Parkes, to whom the choice had been specially offered, electing to take his audience last. It does not appear whether, in electing to be last—for all the other representatives of foreign Powers were admitted before him—Sir Harry wished to challenge comparison of pomp and circumstance, or whether, with diplomatic guile, he wished to effect a final vibration of the Imperial tympanum; but in both directions he was probably completely successful. The procession was formed at the British Legation about noon. Two companies of Marine Artillery and Marines from H.M.S. *Ocean* constituted the advance and rear guards, and the Legation Mounted Escort rode immediately in front of Sir Harry, whose suite comprised Captain Stanhope, Lieutenant-Colonel Norman, C.B., Messrs. Adams, Mitford, Satow, Consuls Fletcher, Gower, Willis, and about twelve officers of the navy and army, while in the extreme front and rear of the procession marched about 200 native troops. Considerable numbers of people were assembled to view the "turn-out," but the line of march was admirably preserved from all intrusion, and at the entrances of the bye-streets ropes were stretched and guards stationed. A correspondent thus describes the visit:—"The distance from the Legation to the palace (about 3½ miles) was traversed at a foot pace under a steady fall of sleet and snow, but parade being impervious to prudence, nobody made use of the cloak his *betto* carried beside him, so that we arrived at the palace in a state of utter congelation. There, passing within the massive walls, we found ourselves at last among those sacred precincts so long barred against all foreign contamination. From the outer gate to the inner keep, where the Mikado now resides, one traverses fully half a mile of devious road, threading its way through long lines of huge barracks and Yashikis. If these buildings were ever proportionate to the troops they contained, their extent and dimensions bear infallible evidence of the might of a Prince who could thus pour forth no mean army from the walls of his palace. Now, however, there is no appearance of life, and through ranges of sombre edifices a universal silence and desolation prevails.

"Arriving at the drawbridge and moat of the inner donjon some symptoms of ceremony presented themselves in the form of mauve coloured banners, bearing the Mikado's crest, and festooned over the gates and arches. Here all the Japanese officers were obliged to dismount and proceed on foot, but we riding about fifty yards further reached the steps of the Royal residence itself. Ascending these, we found ourselves in a handsome vestibule or waiting-room, whose walls were lined with beautifully-painted screens, and where—most welcome sight—was placed a long table with chairs and innumerable *habashis* to thaw our frozen limbs. Here we were supplied with tea, cakes, and tobacco. . . . . Passing by suites of apartments, looking beautifully fresh and clean, but so far as variety of furniture is concerned, differing nothing from the rooms of a good tea-house, we entered a spacious hall, in the centre of which on a raised platform stood the throne. Certainly if sombre stillness and ghastly rigour be the distinctive circumstances of dignity, then, indeed, dignity was here personified. On first entering, the throne became, of course, an object of universal scrutiny; but, in a moment, one was astonished to find that his mind, excluding all other ideas, had become imbued with this one morbid question, 'Is it a man or a mummy that sits under that canopy swathed in masses of crape and silk; whose stiff folds and angles refuse to acknowledge the most shadowy presence of animation?' . . . Certainly it was not without considerable scrutiny and no small disappointment that we at length disentangled from among dress and duskiness the features of a worn-out, languid-looking boy, to whom life had apparently already told its secrets and their sequels, and in whose face, whether from training or indifference, no symptom of interest or vitality presented itself from first to last. On either side of the throne stood a line of Princes and *Kuges*, who also carried out the principle of stolid immobility even as far as the long wings of their head-dresses.

"Sir Harry having presented himself, did the like for Captain Stanhope, R.N., and Colonel Norman, C.B., introducing all the remainder collectively. Then the chief interpreter, who stood

Digitized by Google

beside the Throne, read from a paper the Mikado's speech, a few words, inquiring for Queen Victoria's health, expressing satisfaction at the friendly intercourse existing, and hoping that it might always continue undisturbed. Sir Harry, in reply, spoke briefly and pertinently. He thanked the Mikado in the Queen's name for his gracious expressions, expressed Her Majesty's wishes for the maintenance of friendly relations with Japan, congratulated the Mikado on his arrival in the Eastern capital of his Empire, and hoped that the return of peace would tend to the development of commerce, to the mutual benefit of England and Japan.

"After this we bowed ourselves out, were again served with tea and cakes, and finally started for the palace of the Minister for Foreign Affairs, where a succession of dinners in Japanese and English style occupied our attention till five o'clock in the evening."

## YOKOHAMA.

The English mail of November 6 arrived out on the 30th Dec., simultaneously with the Pacific mail steamer, bringing telegraphic news from Europe (via New York and San Francisco) to December 3. The present homeward English and French mails left on the 13th Jan. The *Japan Times*' summary of news is as follows :—

The event of the fortnight has been, of course, the opening of Yedo and the reception by his Majesty the Mikado of the whole of the foreign Ministers and their suites. The immense political and social significance of this move cannot be underrated. Above all, should it be fairly recognised as a pledge given by the party of progress to foreigners, of the sincerity of their professions of friendship and anxiety to assimilate the system of Government of Japan to that prevailing in the best governed countries of the civilised world. It is impossible, after so complete a concession, to doubt their wish to adopt a constitutional basis for their future work, and that this appearance of the Mikado in public will shortly be followed by the assembly of Representative Chambers may be considered as almost certain. But we must be careful not to attempt interference; we must be patient, and allow the able statesmen who have done so much to take their own time for doing more; it is certain that they have had great difficulty in inaugurating these reforms, and have overcome the strongest possible opposition to their introduction. We cannot tell what pledges they may have given to the Conservative party, and any pressure from without to obtain still greater advantages may very likely cause a reaction. We have now sufficient ports open to carry on our trade—many think more than sufficient—the opening up of the interior we must wait for, until our ally becomes convinced that it would be an advantage for him as well as for ourselves. For the immediate present we cannot expect trade to be anything but dull; no country can immediately recover from the effects of civil war. We have every reason, on the other hand, to be satisfied that we have done so well as we have; we have had no reason to complain of the export trade.

Of course the opening of Yedo, occurring as it did on a general holiday, was signalised by a rush thither of a number of pleasure-seekers, and more than one disturbance, reflecting great discredit on the actors in them, disgraced the occasion.

We give elsewhere a description of the reception of the British Minister by the Mikado, written by an eye-witness of the scene, which is well worth reading. Yedo generally is reported quiet, the influx of the people and the departure of the soldiery still continuing, as described in our last. Nothing of importance has been heard from the North; operations against Enomoto can, indeed, hardly be commenced in this season, and meanwhile, negotiations, which are always preliminary in Japan to any fighting, are going on briskly. Nee-e-gata was proclaimed open on January 1st, and Mr. Lowder has arrived from Hiogo to take up the consulate duty there. But he is likely to have little to do for the next three or four months, except studying the people and their dialect. It is said that in February about six feet is the average depth of the snow there, and as ships cannot anchor with safety in the roadstead at this season, there is not much immediate prospect of trade.

## NAGASAKI.

In Nagasaki the Chinese question is again being discussed, the occurrence of a murder into which no one inquired furnishing the text. The right of Chinese to live in Japan is not recognised by the Government, who refuse to control or deal with them. Foreign Consuls of course ignore responsibility, and the consequence is that the Chinese live uncontrolled. It is suggested that the Foreign Consuls as a body should arrogate the right to deal with Chinese culprits. Complaints are made of a number of counterfeit dollars being in circulation in Nagasaki, probably a Chinese importation.

(FROM A CORRESPONDENT.)

NAGASAKI, Jan. 13.

The London mail of 20th Nov. and the French mail of the 18th arrived here together in Messrs. Adrian's steamer *Orissa* on the 11th, with telegrams to the 7th Dec. The American mail, which arrived here on the 5th inst., brought London telegrams to the 2nd Dec., and announced the resignation of the Tory Ministry. The return American steamer *en route* for Yokohama and San Francisco is expected here on the 21st.

Although there has been an exodus from this place to Osaka of both Foreign and Japanese merchants, I think Nagasaki will always be the centre of a fair trade. As a harbour it is not equalled in Japan, and the transactions in respect to the sale of steamers are still more active here. The *Naruto*, late *Coromandel*, has just come up from Osaka, and it is expected her sale and transfer will be accomplished in a few days, and in that case Captain Stevens proceeds to England to bring out another steamer. The *Columbine* and *Nymph* are in the market here, and are well fitted for the Japanese; negotiations are going on for their sale. Two gunboats from England for the Japanese are expected soon, also a screw corvette building at Aberdeen through Messrs. Glover and Co.

The Chinese population is increasing fast, and there are in the foreign settlement about 300, and outside over 300. These Chinese compete with the Europeans in everything as storekeepers, shipchandlers, and even in shipments to England. They purchase and ship to China most of the tea yield.

The general condition of the settlement is far superior to Yokohama. The streets are much wider, paved with stone footways, rendering them dry at all times, and, the greatest of all comforts, the streets are lighted, the lampposts being on the English model.

The keeping of the settlement is at the expense of the Japanese, in consideration of the ground rent paid by foreigners. The foreigners have a municipal council, but the office is performed, except for any extraordinary cases, by Mr. Van der Pole, appointed by the council, at a salary, to give his daily attention to the wants of the place, and stir up the Japanese as required.

At last Desima, that old prison of the Dutch, is to be admitted to the privileges of the settlement by being connected with bridges, to be completed in two months. Desima, on which most of the Dutch firms are located, will be then but a few minutes' walk; at present it can only be reached by boats, or by a very circuitous route.

Foreigners have not experienced any difference in the new Southern Government; the administration of the Custom-house, &c., proceeds quietly under the new Governor. The fortifications, &c., were all handed quietly over by the Shiogoon's Government to that of the Mikado. Prince Satsuma, who is now at the zenith of his power, has been chiefly at Yedo. His troops who took part in the late struggles are now returning home to Kagosima, the stronghold of Satsuma. Foreign steamers have been busily engaged in their conveyance at good paying rates. The stoppage of the P. and O. Company's service to this place threw out the regular communication with England; chance steamers now have to be used to meet the mail at Shanghai or Hong Kong. At present the steamers of Messrs. Adrian and Co. fill up the want, but of course they are liable, like all private lines, to be interrupted for more profitable charters, &c. Messrs. Adrian's line consists of five very nice steamers—the *Fee-loong*, *Bahama*, *Osaka*, *Orissa*, and *Mona*—running between Hiogo, Nagasaki, and Shanghai.

Fire insurance premiums are a great trouble here, as at Yokohama. First class stone godowns with iron cased doors and windows and detached are charged at two per cent., whilst in China the same rates are 1 or 1¼ per cent. Here in the foreign settlement, so completely detached from the native town, a better risk could not be. The result is that the merchants prefer being their own insurers. Perhaps, the Japanese Government here will, (as in Yokohama), insure policies on their own bonded warehouses at half the rates.

The appointment of Messrs. Walsh and Co. as agents for the Comptoir d'Escompte, and of Messrs. Adrian and Co. for the Hong Kong and Shanghai Bank, has relieved the mercantile community of the difficulty of remitting for goods sold, &c. The powers conferred, however, are still too small, and the banks should give greater facilities for buying and selling exchange. Old residents in Shanghai will remember when Mr. G. F. Hubertson represented the Oriental Bank, and did a fine stroke of business for them. The depreciation in the value of bous is going on here as in Yokohama, the current rate being 333; this is owing chiefly to the inferior quality of the coin issued of late not being worth intrinsically so much as the old ones; they can be no longer be treated as a silver remittance to China.

The insufficiency of the foundations for houses built in the early days is now being severely felt. Messrs. Alt and Co. have found it necessary to rebuild, and have now the finest house on the bund, and the Prussian flag is hoisted in the front; Mr. Lindau, one of the partners, being the Consul. Messrs. Maltby and Co. and others are also rebuilding. The bund and sea-wall are still in good order, as also the landing-places.

The pretty little English church, designed and completed under the management of Mr. H. M. Wright, one of the early settlers, is in want of a pastor; it appears that the community is too small to contribute a sum sufficient for a chaplain, even when supplemented by the usual Foreign-office allowance, and the result is that it is shut up. To prevent its entirely falling into disuse, and English people entirely forgetting their religion and service, the Consul officiates occasionally; but the want of regularity has had a sad effect on the English, for last Sunday the response to Mr. Flowers' service was four attendants out of the whole community! This is certainly a very discreditable state of things. English people, as a rule, generally have more respect for the Sabbath than this, and Nagasaki must enjoy the character of the most irreligious community in the Far East. It is said that arrangements are in progress for a missionary from

Digitized by Google

China to come and settle here, and take charge of the church, when it is to be hoped, for the credit of English institutions, that the community will mend their ways, and show a proper appreciation of things spiritual. Their own charming little cemetery must remind them that it is well not to fix all their thoughts on invoices, current sales, and dollar making. The cemetery is a credit to the place and Mr. Flowers, the Consul, who has charge of it, and is a pleasing contrast to the wild, uncared-for condition of the one in Yokohama. It is to be compared to our well kept places at home. Stone being cheap here, even the graves of sailors are well covered with a tombstone and inscription, and some graves eight years old are in excellent preservation, which must be a great satisfaction for the friends in England. One example is that of George Henry Woodfall, who died in 1861, and the stone looks almost new.

The large influx of Chinese is causing some annoyance in Nagasaki, as the Japanese here have no system of registration, and practically they are under no control, and many acts of violence pass unpunished. At present, by non-registration they also escape a proper share of the expenses of the settlement, which is certainly a mistake. The foreign Consuls should put this matter in a proper light to the Japanese Government.

The Nagasaki community is not behind in amusements. The club, with its reading-rooms, billiard-rooms, bowling alleys and racket court, is well maintained. Amateur theatricals and German concerts also form part of the engagements.

The best picnics in the Far East are also given at Nagasaki; the last one extending over a few days and winding up with a ball and supper, costing no less than 1,600 dols., or nearly £400! This must rather astonish quiet English people at home.

The Dutch sloop of war *Marnix*, Captain Tantenhooft, has just arrived from Holland via the Cape, &c., to relieve the *Curacoa*, which vessel leaves for Java and home in a few days.

The American store and hospital ship *Idaho*, Captain Hooker, 3,000 tons and 320 feet long, which has been anchored here for nine months, is not likely to be removed; she has magnificent accommodation for the purpose, but to keep up a vessel of 3,000 tons on almost sea-going expenses must be paying an enormous price for the small American fleet in these waters. The *Idaho* was originally built as a steam frigate, to attain an enormous speed, by Paul S. Forbes, Esq., well-known in the China trade, but her engines were a failure, and they were removed. As a sailing vessel she attains sixteen knots. A naval hospital at Yokohama is talked of now.

The Foreign Consuls here consist of Marcus Flowers, British; Mr. Mangum, American; M. Dury, French; M. Adrian, Danish and Belgian; Mr. Tombrink, Dutch and Swiss; Mr. Schottler (acting for Mr. Lindau), Prussian; Mr. Loureiro, Portuguese.

Another instance of the care taken of shipwrecked crews by the Japanese has just occurred with the North German barque *Cornelia*, Capt. Bundsguard, from Hong Kong to Yokohama, which struck on a rock near Yakuno. After a stay of fourteen days they were sent in a junk to Kagosima; there the officers of Prince Satsuma treated them hospitably, sent them over to Nagasaki in a steamer, and refused any recompense.

The Japanese steam factory at Akanora, across the harbour, erected by the Dutch for repairs, &c., to machinery, has lost its utility to a great extent since the discharge of the European engineers, &c. As in the case of steamers purchased by the Japanese the engines and boilers are soon ruined by the native engineers.

The weather just now is very charming; light occasional frosts, but in the day the temperature is sixty to seventy. The Bungalows on the hill have beautiful gardens, with a large variety of native and English flowers. They are laid out with as good taste as at home, and many in far better. The married residents mostly live at these bungalows, but the community has suffered a great loss in the departure of Mrs. Alt for Osaka, and Mrs. Alex. Glover for England.

Mr. Beveridge, the military instructor engaged by the Prince of Tsikuzen, has a large parade ground set apart for evolutions, and is making satisfactory progress. Mr. Grinnell, the American officer who was engaged to superintend the navy, has given up the appointment and gone home, after a very brief career. The Japanese are very volatile in these engagements, and spend money quite unprofitably. To a great extent it arises from too many foreign advisers.

Great inconvenience is experienced here by consignees of goods shipped *via* Yokohama; the want of proper facilities for discharging there generally entails a delay of five to six weeks, whilst the passage across is often twenty days. The *Contest*, just arrived from London and Yokohama, took this time. All shipments for Nagasaki should be to Shanghai for transshipment. The freight across is 4 to 5 dols.

The steam cotton-spinning mills erected for the Prince of Satsuma, at Kagosima, under the superintendence of Mr. Edward Holme, for some years engaged in mills near Manchester, are now running entirely under Japanese in a very satisfactory manner. There are 100 looms and 3,648 spindles. The texture of cloth made is simply to suit the native taste. There are about 220 hands employed; the men show great aptitude, especially in "piecing," at which they are remarkably expert.

The patent slip, which has been in construction here, is in a splendid natural position, well protected between two hills and stone facings. The engine, it is expected, will be ready for a trial next week. The rail is nearly complete, and one or two vessels are waiting to go on. The slip will be equal to raising a vessel of 1,500 tons, having about 500 feet of rails. The material was made and supplied by Messrs. Hall, Russell and Co., Aberdeen, and the works have here been erected under the superintendence of an engineer sent out by them. The slip was projected by Messrs. Glover and Co., of Nagasaki, and will be a great convenience as well as profit. At present vessels have to proceed to Shanghai to be docked.

Japanese coal is now brought here from the mines, and sold at 5 dols. to 6 dols. per ton; it is a first-rate cheerful house coal, but dirty. For steaming purposes it is quite equal to Newcastle coal, but not up to Welsh. European appliances are now being used in the coal mines at Takasima, as the mine has been leased to Messrs Glover and Co., and when the steam pumps are erected it is expected that the yield will be equal to from seventy to eighty tons per day.

The Governor and other officials are very obliging in their relations with foreigners. The ground rents paid here by foreigners, out of which the expense of keeping the settlement is defrayed, is as follows:—

| | Per Annum. |
|---|---|
| British ... ... ... ... ... | dols. 9,608 |
| American... ... ... ... ... | 2,506 |
| German ... ... ... ... ... | 2,175 |
| Dutch ... ... ... ... ... | 1,724 |
| French ... ... ... ... ... | 1,273 |
| Portuguese ... ... ... ... | 623 |
| Swiss ... ... ... ... ... | 424 |
| Total ... ... ... ... | dols. 18,333 |

The rate being for bund or front lots, per 100 tsuboes, 37 dols.; rear, 28 dols.; hill lots, 12 dols. The *Nagasaki Times*, which still flourishes, and is felt to be a very useful medium, publishes a statement of the population of Nagasaki as follows:—

### HAKODADI.

The Shanghai papers give the following items of news from Hakodadi:—

On the 6th a battle was fought at Ono, twelve miles distant, between 600 Southerners and 900 Northerners, resulting in the total route of the Southern forces, who fled to Hakodadi in great confusion.

On the evening of the 8th all Southern troops were embarked on board the *Kanga no Kami* and *Taipanyo*, and, together with all Government officials here, left for Awocori Bay, and landing there, reached twenty-five miles to the interior of Chugaro territory, where they still remain very much scared. On the morning of the 9th the Northern or Tokugawa troops, together with the fleet, took quiet possession of Hakodadi, and after organising a temporary Government, left in force for Matsmai, landed on Fuku Sima, and engaged the Matsmai troops. Yesterday a report reached us from there that Matsmai had been burnt (the city), the troops whipped, and in full flight for Akita on junks seized for the occasion. The *Eagle* ("Tokugawa") returned from Matsmai, and confirmed the report; so that now the Shiogoonates consider the island of Yedo as theirs by conquest, and evidently intend to hold it. The place is quiet, and no disturbances have occurred or are anticipated. The ground, though frozen, is quite free from snow.

## CHINA.

—o—

### PEKING.

By the latest news from the capital all was quiet. The new American Minister, Mr. Ross Browne, had been making strenuous efforts to induce the Government to construct a road from the coast to the Chia-tang coal mines, but without success. The journey between Peking and Shanghai during the winter months is performed more expeditiously overland *via* Ching-kiang than by way of Chefoo.

The *Peking Gazette* of Dec. 18 records the death of Prince Chung, brother of the late Emperor. His nephew, the present Emperor, had appointed the 26th Dec. to visit the family, and offer the accustomed condolence, &c.

### SHANGHAI.

The English mail left this port according to the Company's time table on the 20th January; the French mail, which should have left on the same day, was delayed until the 24th, and consequently brings the latest news, which will be found embodied in the following extract from local papers. Our correspondent's letter comes by the P. and O. mail, and brings intelligence to the 20th only, but is full of interesting matter.

Digitized by Google

The latest news from England was that by the mail of Dec. 4, which reached Shanghai on the 23rd Jan.

In the course of a review of the progress of the Settlement, and its position at the close of 1868, the *Herald* says:—"The position and prospects of the public companies of Shanghai, to which we devoted last year a special paragraph, have been lately so fully reviewed in our paper of the 22nd ultimo that it is unnecessary to enter at length on that topic. It is sufficient to say that the majority show a steady recovery from the collapse which succeeded the inflated prosperity of 1863-4. The "Hong Kong and Shanghai Bank," and the several steamer and insurance companies especially, are monuments of brilliant success. Land has much increased in value, and house rent has risen proportionately. Many new buildings have been erected or commenced; amongst others, one destined for the Comptoir d'Escompte deserves notice. But the most remarkable feature in this connection is the extension of the Settlement up the Bubbling Well-road, which is now lined with villa residences nearly to the two mile stone. We cannot but think the class of buildings rather too pretentious, but they are nearly all let, and this is the great criterion. We are confident, however, that cheap houses—such as would let at Tls. 25 per mensem, offer a profitable investment to a limited extent. There are many people with incomes averaging Tls. 100 a month, who would gladly rent them. We must not omit to mention that Trinity Church is rapidly approaching completion, and bids fair to be an edifice of which Shanghai may be proud. New premises are also spoken of for the Oriental Bank. A new gaol has been commenced by H.B.M. Government, and extensive alterations in the Consulate buildings are in progress."

The following extracts are from the *North China Herald*:—

When we read in the *Recorder* an announcement that Mr. Hart had ordered a medical inspection of all second and third-class clerks in the Customs' Service, we thought our contemporary must have been misinformed. But we are assured that such an order actually has been issued in regard to third and fourth-class clerks. This is one of the most singular freaks the Inspector-General has yet perpetrated. It is true members of the army, navy and civil service have, in England, to pass a medical examination before admission; but this is a very different matter to subsequent inspection. So they have to pass a competitive examination; but the system was not made retrospective when it was first introduced. Those already appointed were not disturbed, either mentally or surgically.

We notice that works at the Kiangnan Arsenal are advancing with considering rapidity. A new steamer is on the stocks, far advanced towards completion; and the *Bengal*, an American vessel, is discharging the component parts of a gunboat, which were fitted, we suppose, in New York.

The *Shanghai News Letter* has the following paragraph from Chinkiang:—"A large party of Chinese merchants, estimated at some 250 in number, have come down *via* the Grand Canal from Tientsin, where they were frozen in, and could not proceed seawards. They bring considerable treasure with them. A Chinaman has come in with the report that a certain hill, about seven li from Tang Yang, which last year at this time was supposed to contain coal, and for which some foreigners were then negotiating, has turned out to contain gold and silver. The country people are said to be in excitement about the discoveries, and the place has been walled in to prevent depredations."

We have dates from Newchwang, by overland courier, to the 18th December. The river closed on the 23rd December; the thermometer had fallen to seven degrees Farhenheit. A little business was doing in opium.

The departure of M. Brenier de Montmorand, the French Consul-General, who has attained a high degree of popularity, is regarded with general regret.

The tea-clippers that had arrived at Shanghai had all left again for Hong Kong and the rice ports, to employ the time until the next season's teas come forward. The *Serica* is the only exception.

It is reported that Sir Rutherford Alcock purposes to make a circuit of the open ports during the coming summer, in order, we presume, to gain vivid impression of their wants and capacities, for the enlightenment of the Foreign Office on his return to England.

We note the following announcements of alterations in firms, in addition to those inserted in our last:—

Mr. Jas. B. Robertson and Mr. Henry W. Davis are authorised to sign our firm in China and Hong Kong from this date.

BULL, PURDON, and Co.

My business of auctioneer and general broker will from this date be continued on the premises lately occupied by Nils Moller, Esq., Canton-road, and the firm will be MELLER and Co.

Shanghai, Dec. 1, 1868.

The interest and responsibility of Mr. W. R. Adamson in our firm ceased on 30th June last. The business will be carried on as heretofore (in connection with Adamson and Co., of London) under the firm of Adamson, Bell, and Co., the partners being Frederick Hayley Bell, Henry Guy Pemberton, and John Anderson.

W. R. ADAMSON AND Co.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Jan. 19.

Your readers will, I doubt not, be interested in learning that Mr. Angier, whose name is familiar as a household word to foreigners in China, and to the readers of the *London and China Telegraph* at home, has arrived here, and is busily engaged in collecting information of all kinds, which when put before the public in a condensed form will prove of inestimable service to the European and American Governments and to all those engaged in trade with China. Isolated facts are frequently lost in correspondent's letters, or even when they are made the subjects of leading articles the interest they excite is ephemeral. It is when they are massed together that their importance becomes clear, and that the influence of each upon the system whereof they form a part is manifested.

The stirring days in which it paid the London morning papers to retain special correspondents in China appear to have passed by for ever, and this is little to "chronicle" from mail to mail, except the "small beer" of Shanghai social life. Balls, concerts, and amateur theatricals are now our events; the volunteers have beaten their fire-locks into fire-engine pipes, and the police, once so absorbed in the suppression of rowdyism, find their occupation gone, and their importance hopelessly diminished. Even "Municipal extravagance" has gone by the board, and we have nothing left to think of but our own private affairs. In a word, excitement is unknown, and this will indicate sufficiently to old Shanghai residents the utter change that has come over the model settlement.

You are aware of the sensation that was caused here in the middle of 1866 by the murder of two French Bishops, nine missionaries, seven native priests, and a large number of Christians of both sexes in Corea. The French Admiral sent up an expedition to chastise the offenders, but—tell it not in Gath—the natives proved too many for the French, and a decided defeat was hardly glossed over under the name of an "unsuccessful reconnaissance in force." It was at the same time semi-officially intimated that in the ensuing season the attempt would be repeated, and the Corean sovereign severely punished. But nothing more was heard of it, and the whole affair had almost escaped our recollection when a volume of the United States diplomatic correspondence for 1866 turned up here mysteriously, and was found to contain the despatches which passed between Prince Kung and the French Minister on the subject. Knowing the result, the attitude adopted by M. de Bellonet now appears strange, not to say laughable. Thus in his first letter, dated July 13, 1866, he says:—

The Government of his Majesty cannot permit so bloody an outrage to be unpunished. The same day on which the King of Corea laid his hands upon my unhappy countrymen was the last of his reign; he himself proclaimed its end, which I in my turn solemnly declare to-day. In a few days our military forces are to march to the conquest of Corea, and the Emperor, my august sovereign, alone has now the right and power to dispose, according to his good pleasure, of the country and the vacant throne.

Prince Kung's reply bears, I think you will admit, indisputable marks of a foreign hand. He says:—

When two countries come to war it involves the lives of their people. It seems to me that it would be best to inquire into the proofs and merits of the affair.

M. de Bellonet made no reply, but on the 24th October enclosed to the Prince a copy of a notice of blockade issued by Admiral Rose, announcing his intention of "attacking and subduing the country." A few days after, the French Minister again wrote to Prince Kung charging the Chinese Government with complicity in the affair, and with a general desire to dupe foreigners whenever an attempt is made to obtain justice for outrages. He assured the Prince that "for us (the French) war is a pleasure—passionately sought," and that

Every attempt at conciliation will be now useless, unless the *ci-devant* King of Corea surrenders at discretion, and implores the mercy of the Emperor our august Sovereign, trusting to his generosity.

Meantime the Chinese Government had submitted the correspondence to the other foreign Ministers, a course which M. de Bellonet bitterly complained of. And there the matter ended, the only comment possible being *Vox et præterea nihil.*

A memorandum by Mr. Hart relating to the appropriation of the tonnage dues to the lighting of the port has just been published. He announces that a lighthouse is about to be built, either on Ariadne or the Saddles, a light to be placed on Gutzlaff, another on the Beacon, and a third at Wusung. "These lights once placed, the navigation will be as easy, so to speak, as would be a walk down Regent-street when the gas is lit." After announcing various contemplated improvements in the conservancy of the Yangtsze, and acknowledging that the amounts hitherto expended from the tonnage dues have been small (about Tls. 55,000 per annum for the last five years), Mr. Hart states that the Tsung-li-yamen have quite entered into his views, and that the Government will "now do its share of the work faithfully and well." He also implies, if he does not state directly, that the whole of the tonnage dues (£70,000 to £100,000 yearly) will be expended on the necessary improvements. It is the fashion to represent Mr. Hart as ambitious and self-seeking; but, judging of him by his public acts alone, I cannot conceive the possibility of his doing more for foreign trade than he is endeavouring to do. Everything points to the conclusion that the Chinese would gladly get rid of us if they had the chance, and therefore every concession is wrung from them—a very delicate operation to be performed by any one in their pay.

A set of regulations for the Mixed Courts has recently been promulgated. The rank of the presiding magistrate is defined to be *Tungchi*, but he is not to hold an independent seal. The latter condition, I may remark, makes his rank, whatever it may be

Digitized by Google

merely nominal. Hence the Court has no jurisdiction independent of the Shanghai Hien, and it was to obtain this separate jurisdiction that the Court was established. The existence of this muddle into which the native authorities astutely inveigled the Consuls renders the administration of justice in the Mixed Court theoretically a farce, and we are all here ready to admit that the theory is excellently carried out in practice. The regulations define the nominal powers of the Court, its jurisdiction, according to them, extending to "cases of debt, collision (whatever that may be), or robbery occurring on the ground rented by foreigners." The only noticeable points are that in the case of a non-represented foreigner convicted of any offence the magistrate shall report his finding to the Taotai, who, after consultation with a Treaty Consul, shall award the punishment; and, as it were to counterbalance this, 'on proof of perjury, subornation, or false accusation by either party, be he foreigner or Chinese, the Taotai's deputy shall visit heavy punishment on the offender." This latter is obviously either an oversight, a mistranslation, or a gratuitous addition on the part of the Chinese to the existing Mixed Court mess.

I told you in a recent letter that Sir Rutherford Alcock had requested the merchants at the various ports to give him information regarding the places which, under the approaching treaty revision, it might seem advisable to open. Accordingly, the Shanghai Chamber of Commerce held a meeting on the 14th inst., to consider a draft despatch on the subject. However, as no one came prepared with anything more definite than a list of ports which might, could, or should be opened, the meeting was adjourned for a fortnight, in order to enable the Committee to collect information regarding the places mentioned. The feeling evidently is that the Yangtsze should be opened as far as Chunking, in Szechuan, a distance of somewhat more than five hundred miles above Hankow. In addition to this, including of course the ports intermediate between Hankow and Chungking, one port or more should be opened in the North. But doubtless a vast mass of information relating to the proposed places will be collected before the 28th instant, when the Chamber will again meet. This, therefore, must form one of the subjects of my next letter. I should mention that one of the arguments adduced against the opening of new ports was that trade is passing rapidly from foreign hands into those of the natives. But the extract which I give you below ought to put down this cry—so far, at least, as the North of China is concerned, and it should be remembered that the complaint originated at Tientsin. I quote from Mr. Commissioner Dick's Trade Report for 1867 (just published):—

"Chinese merchants have preferred buying their supplies of foreign goods at Shanghai from the foreign merchants, who there receive them from abroad, to buying them through second foreign sellers at the outports. The mere operation of buying goods in their own country is one for which the Chinese have always been considered thoroughly qualified. It was a merely temporary condition of affairs under which, for a year or two, foreign imports were sold through secondary foreign agents at secondary ports. As soon as the Chinese merchants became accustomed to the manner of doing business with foreign vessels, they resumed their old practice of making their purchases at the headquarters of the import trade—Shanghai; but they made ready use of the new means of transport with which foreigners had furnished them; and the increase in the employment of foreign shipping has been much greater than the decrease in the employment of foreign mercantile agency. Even when intercourse with the interior is placed on a better footing, it is likely that the trade which will there pass through the hands of foreign mercantile agents will be limited to such amount as may be sufficient to keep the privileges gained in working order; for as soon as such new revenue regulations as may be enacted become uniform in application to both Chinese and foreigners, the former will draw their supplies through agency of their own from the principal market on the coast. But the advantages to trade will be none the less, although the number of foreign sellers employed may not be greatly increased; and in all operations beyond those of merely buying and selling, the Chinese in the interior will be as dependent (although it is not quite certain when the fact will come into full play) on foreign enterprise and skill as they now are, on the coast, in the matter of transport."

It is rumoured that Sir Rutherford Alcock purposes making a tour through the Ports during the ensuing summer, with a view to collecting information for the use of the treaty revisers. We have heard the mercantile view of the status of the ports; we know the view which the Chinese would fain push down our throats; it only remains for us to receive the Minister's light on the same question. Yet, if the light in him be darkness, how great is that darkness!

A meeting of shareholders in the French Gas Company was held on the 7th inst., ten persons being present, altogether representing forty-two votes, of which twenty-two were in the hands of the chairman and M. Leroy. The manager's report announced the laying of the mains, improvements in the works, and the reduction of the debt to Tls. 12,000. The gross receipts had been Tls. 7,794, and the expenditure had fallen short of this by only Tls. 9. The total income for 1868 was estimated at Tls. 8,000, not including Tls. 2,400 received as interest at 8 per cent., guaranteed by the French Municipality. A profit of Tls. 1,050 was estimated, but the grounds of the estimate did not clearly appear. The financial position of the company became the subject of a stormy discussion, in the course of which it was elicited that if the company were sold up on the spot there would remain only Tls. 3,000 to repay the subscribed capital of Tls. 30,000. After paying off the loss on working expenses during 1867, and debentures to the amount of Tls. 1,800, the shares were worth only Tls. 25 each. Again, while the plant had cost Tls. 46,000, its estimated value was only Tls. 15,000. It was suggested that under these circumstances it was hardly worth while to continue working, especially as without interfering with the contracts into which the French company had entered gas might be obtained from the English company at a dollar per thousand cubic feet cheaper than the French company could make it. After a prolonged struggle between the strength of numbers (eight representing twenty votes) and the strength of representation (two representing twenty-two votes), it was at length resolved:—"That a committee be appointed to confer with the Shanghai Gas Company to ascertain the price at which the latter will supply gas; and that a meeting be afterwards called to discuss the advisability of purchasing gas from them." And there the matter rests for the present.

The Municipal Council have been busy inspecting meat and seizing large quantities that seemed diseased. Through their exertions the recent cattle disease panic has almost disappeared. Heaps of garbage which had accumulated during some years past in various places on the English and American settlements have been removed during the frosty weather, when their emanations could do little harm, however much stirred up in the process of removal. Various plans for the extension of the existing roads have been adopted, and the improvement of those actually open is sedulously cared for. During the past week no less than 315 beggars were expelled from the English and American settlements, the number of miserable objects in the streets having suddenly increased upon the opening of a soup-kitchen for the local poor. From Soochow, Chinkiang, and even from Ningpo, hordes of beggars trooped into the settlements, but their eagerness has now met a serious check from the energetic "deportation" at once adopted by the Municipal Council.

The wisdom or the reverse of the speculations of past times was forcibly illustrated the other day, when the land formerly occupied by the Brick and Saw-mill Company was sold for Tls. 5½ per *mow*, and a large ice house, with three *mow* of ground attached, realised only Tls. 500.

The tea clippers have arrived, with the exception of the *Titania* and *Leander*. The *Spindrift* arrived at Wusung on the 7th inst., 107 days out from the docks. The *Taiping* made her appearance on the 14th, 104 days out; the *Lahloo* on the 16th, 100 days from London; and the *Serica* on the 17th, 99 days from port. The victory so far, therefore, lies with the *Serica*.

Some discussion has taken place with regard to the disgraceful condition in which the *Northfleet*, which arrived here on the 12th inst., is turning out her cargo. It appears that in the bottom there were stowed 500 tons solid weight of metal, besides a quantity of flints. In the lower hold were Manchester goods. The 'tween decks was occupied by bales, and the main hatch was built up with flints, China matting dividing these latter from the bale goods on either side. It requires only the most rudimentary knowledge of mechanics—indeed, it requires only common sense—to show that a ship stowed in this way must come to grief wherever there is any sea. And so, accordingly, the *Northfleet* did. First she lost her topgallant masts in a gale, during which she was uncontrollable, and in the calm which followed she lost her topmasts simply from the violence of her oscillation when there was no wind to steady her. Of course she wetted all her cargo, the flints and bales soon between them wore out the matting, and the upshot of the whole matter is that two-thirds of the cargo is damaged by sea water, and a great deal of it badly "chafed." Fortunately the *Northfleet* is a remarkably strong ship, to which is alone to be attributed the fact that she ever reached her port. It is hard to conceive how what actually occurred was not anticipated in Liverpool by either the owners, the charterers, the Government surveyors, or the captain. The latter must, of course, have known what he might reasonably expect, and I for one can find no excuse for carelessness of this kind, which throws the lives of an entire crew into the balance of chance.

On Christmas eve, two gentlemen, Messrs. Head and Haslam, left Shanghai for the Tai Hu on a shooting excursion. On arriving at a place called Eshan they landed, but on returning to the place where they had left their boat they found that it had disappeared. After wandering for some distance they finally obtained shelter in a village, and on the following day they sought the protection of the mandarin of Eshan, who, finding that they had no passports (which they had left in the boat) treated them with suspicion. They, however, were given food and shelter, and were finally forwarded to Shanghai, meeting with great kindness on the journey. Meanwhile, the boat which had deserted them was met by another party of foreigners, and sent back to the place it had left. The foreigners reported the story in Shanghai, and several expeditions started to discover the missing gentlemen. The fear was that either they had failed to find shelter and were frozen to death, or that having found shelter they were lying frost-bitten, or otherwise injured. Accordingly, on the 9th inst. a final expedition accompanied by a medical gentleman started, no accounts having been reeeived from the previous searches. But on the following day all anxiety was set at rest by the return to Shanghai of the sportsmen, who unfortunately had been brought down by a route different from that adopted by the last exploring

Digitized by Google

party. An offer made to reimburse the officials for the expense involved in sending the two men back was courteously declined by the Taotai, who stated that "the local authorities did no more than their simple duty in taking advantage of the opportunity of showing in action the friendly relations between China and foreign nations."

Mr. T. T. Cooper, who recently made an unsuccessful attempt to reach India from the province of Yunan, has left Shanghai for Calcutta, where he is about to offer his services as an explorer to the Indian Government. Previous to his departure he was presented with a cheque for one thousand taels, subscribed by the merchants, in recognition of his efforts. He was also presented with Tls. 125 to enable him to purchase a watch in place of his own, which he was obliged to barter for a mule in Szechuan. Although unsuccessful, Mr. Cooper has collected much valuable information relating to the route through Western China, and this information will prove of immense use, if what we have just learned from the Indian papers be true. It is said that the Commissioner of British Burmah and the Panthay King of Yunan have settled the preliminaries of a formal opening of the old caravan route by Bhamo to Talifu, the Panthay authorities engaging to protect travellers and preserve the roads.

H.M.S. *Rodney*, Captain Heneage, left Wusung on the 14th inst., for Hong Kong, to meet Admiral Keppel.

The M.I. steamer *Dupleix* arrived on the 7th, with the mail of the 17th Nov. and telegrams of the 7th Dec. On the following day the P. and O. steamer *Malacca* brought in the English mail of the 20th Nov., but no later telegrams. With the *Malacca* arrived the *Costa Rica*, bringing the San Francisco mail of the 3rd December. Our latest telegrams are now therefore December 7.

The *Ganges*, leaving to-morrow morning at daylight, carries 813 bales China silk and 442 bales Japan.

From Chefoo there is a report of newly discovered lead mines, but on the whole the richness of the district has been so much exaggerated, and the opposition of the officials has been so intense, that we may fairly declare the Chefoo mines to be a delusion and a snare. The authorities prevent the Chinese from buying ore, and hence the miners can find no purchasers for any specimens they are lucky enough to secure.

We have Tientsin advices to the 26th December, on which day the river was so completely frozen over that people walked across it. Although ice was present the river was quite passable from Taku to Tientsin until Christmas Day.

Newchwang is of course closed. But apropos of it, I cannot refrain from quoting the following short extract from the last Customs Trade Report. It contains a hint that ought not to be lost :—

> The hair of the Corean boys grows low on the forehead, is parted in the middle, and is plaited into a thick tail behind. On marriage the back part is cut off, and this superfluity has become an article of commerce. A mace would purchase sufficient to make up a fair tail for a Chinese.

## FOOCHOW.

The *Recorder* mentions that another disturbance has broken out at a missionary station near Foochow. It seems that some missionaries settled a short time ago on Walga Island, a small fishing village situated at the mouth of the river Min, much against the wish of the inhabitants, especially the mandarins, who are said to have placed every obstacle in their way, and urged the people on to annoy them in every possible manner. The annoyance at last becoming so great the missionaries applied to the authorities at Foochow requesting that something might be done to stop it. H.B.M.'s gunboat *Janus* was despatched to endeavour to quell it. The Chinese had also sent down a gunboat to look after their own interests, and they were both lying at anchor off the Island when the *Miaca* passed.

## HONG KONG.

The English mail left Hong Kong on the 26th, and the French on the 28th January. By these opportunities we have confirmation of the telegrams reporting the outrage at Swatow. The latest home advices received in Hong Kong were by the English mail of Dec. 4, received there January 17, with London telegrams to Dec. 28. The following items are chiefly from the *Overland China Mail* :—

It is with extreme regret that we have to record the perpetration of one of the most brutal murders which has disgraced the annals of this colony, the victim being Mr. W. W. Holworthy, Deputy Assistant Superintendent of the Military Store Department. The unfortunate gentleman went for a walk yesterday (24th January) in the direction of Pokfolum, and at one o'clock was spoken to by the engineer of the waterworks there. At half-past one his lifeless body was discovered about two hundred yards from the Gap Junction. The wounds inflicted were exceedingly severe, and so far as can be as yet judged a severe struggle must have taken place between him and his ruffianly assailants. What adds to the mystery of the occurrence—for scarcely half an hour elapsed between his being conversed with and discovered murdered—is, that he was accompanied by a pure bred bull dog, and that such an animal would scarcely have allowed the assaillant of his master to escape unpunished. Every effort has been made to detect the murderer or murderers. His Excellency the Governor has offered a reward of 500 dols. for his or their apprehension. We refrain, for obvious reasons, from detailing the measures as yet taken, but the police are taking most active and judicious steps. Up to the time of going to press no clue has been arrived at, but the inquest has been formally opened. Much sympathy is felt for Mrs. Holworthy, so suddenly and severely bereaved.

No further action has been taken by the prosecution in *Regina* v. *Saint*—none, that is, of a public nature, but there is reason to believe that the Attorney General will, either voluntarily or of necessity, proceed with the case before the departure of the next mail. These three informations have been filed against defendant for a period extending over eight months.

### ATTACK BY CHINESE ON THE CREW OF THE "COCKCHAFER."

By the *Kwang Tung* we have news of a serious disturbance at Swatow. It appears that the boats of H.M.'s gunboat *Cockchafer* were exercising in a creek about four miles beyond Swatow, when their crew were stoned by some natives, the missiles striking several of the men. The latter landed and caught one of the assailants, whom they detained with the intention of handing him over to the native authorities, and retreated their boats. A large mob of Chinese, however—some 400 or 500—suddenly made their appearance from the village in the neighbourhood, and being well armed with gingalls, opened a galling fire on the boats' crews. The latter returned the fire with their Snider rifles, but were obliged to retreat, twelve of their number being wounded, and two, the boatswain and gunner, not expected to live. The loss on the Chinese side is said to be fourteen killed and several wounded.

This accident is particularly unfortunate, in view of the recent opening of Chao-chow-fu. We anxiously await further details; bnt the story, so far as it reached us, throws the entire blame on the Chinese, and not even *The Times* or the *Telegraph* can impute fault to the missionaries. We have to repeat the expression of our thankfulness that Sir Harry Keppel is admiral of the China station. It seems as if matters are approaching a culminating point—the point of war, which, as usual, must be undertaken by the Power that practically opened up China to foreign trade. The Mission which Mr. Burlinghame heads is full of peaceful meaning, no doubt; but there is a much more eloquent expression in the Gingalls and Sniders that were used at Swatow.

From private information we learn that the mob who first began the attack was composed partly of men and partly of boys—as most hostile gatherings are, especially in China. Almost every man in the *Cockchafer's* boats was wounded more or less severely, and even the man who brought the despatches on board the *Kwang-tung*, although on duty, had his arm in a sling, The gunner and boatswain are rather dangerously hit, one having been shot through the upper party of the body (back and breast), and the other in the shoulder, the ball having lodged in the chest. In the latter case the bullet is unfortunately so far from the reach of the surgeon's probe that fears are entertained of the possibility of its being removed; and if, as is generally the case, the ball be an iron one, very serious consequences may result. All the wounded men are in hospital, and are being carefully attended to by Dr. Scott. The gunner, who is a good marksman, is said to have fired no less than four hundred rounds of Snider ammunition before he was hit, so that the estimate of the loss on the part of the rascally natives may probably be under the mark. The gallant commander, Lieutenant Kerr, was of course exposed to the fire as much as any of his men; but it is satisfactory to know that he is unhurt. He had at least two very narrow escapes for his life, one bullet passing over his head grazed or went through his cap, and another found a lodgment in the breast of his coat. No little excitement, as might be expected, was caused in Swatow when the boats returned.

The H. K., C., and M. Steamboat Company have declared a dividend of 12 per cent. per annum. The loan raised has been cleared off to 70,000 dols., 26,000 dols. placed to reserve fund, and 5,348 dols. 65c. carried forward to next account.

H.M.S. *Rodney* (flagship) has arrived at Hong Kong.

An attempt has been made to rob the powder magazine, but was frustrated by the vigilance of the guard. The colony is exposed to much danger from the needless storage of powder within the limits of the city.

# STRAITS SETTLEMENTS.

## SINGAPORE.

From this port we have advices to February 1st by the English and 3rd by the French mail. The *Straits Times* of the former date gives the following summary of news :—

The fortnight has been an exceptionally quiet one politically, socially, and from every point of view. There have been rumours rife of impending political measures, to which, however, little weight has been attached. Colonial rule is certainly most unpopular, but there is no reason why it should be so, or why the transfer should be repented of. The causes of the existing and increasing unpopularity of our present Government are not far to seek, and may be summarised briefly as owing to disregard of public opinion, rash extravagance, vain-glorious dictatorial airs,

Digitized by Google

and most ill-advised attacks on the most cherished political principles of the community.

The steamer *Clan Alpine* arrived here from Hong Kong on her way to Calcutta on the 27th Jan., and it appears that during the voyage a fire broke out on board which might have resulted in the most fatal consequences, but which was mastered in time by the presence of mind and energy of the captain, officers and European passengers on board. A panic seized a number of Chinese passengers on board, which led them to seize one of the boats, which was, however, swamped as soon as launched by being over-crowded, and two or three of their number were drowned. No serious damage was done to ship or cargo.

The report of the commission appointed to inquire into the origin and progress of the Penang riots has at last been published. This report is remarkable as the first official Blue book, so to speak, with which the present Government has favoured the colony. One of the main characteristics of Governor Ord's rule is close reticence and extreme unwillingness to take a recalcitrant community into his confidence on any subject whatever. The colony perhaps is considered to be too young yet to be treated like old stagers such as Hong Kong, Ceylon, or Mauritius.

In connection with Penang, we have to notice a petition presented to the Governor by certain Chinese owners of property in Penang, praying for relief from the high-handed proceedings of their Lieut.-Governor, Col. Anson, who has been attempting to deprive them of ground which they owned without question under the Indian Government, although not perhaps with a strictly legal title. The last consideration however does by no means justify Col. Anson or his superiors in their attempt at legal robbery.

# Commercial Report.

## CHINA AND JAPAN IMPORTS.

YOKOHAMA.—Business continued inactive, and the market still showed a decline for most staples, chiefly in consequence of a further depreciation in the value of native coin. Stocks were accumulating, the Brilliant having arrived with a general cargo from Liverpool. Yarns were easier, as were also Velvets, Camlets, Blankets, and fine Cloths; 7lbs Grey Shirtings were comparatively scarce and formed the sole exception to the general fall. The current quotations were as follows:—Cotton Yarn: Nos. 16-24, per picul, $45.50 to 47.0; 28–32, $49.0 to 50.50; 38–42, $50.50 to 51.0. Grey Shirtings, 7 lbs., per piece, $2.50 to 2.55; 8.4 to 8.8 lbs., $2.80 to 2.88. White Shirtings, $2.80 to 3.60. T-Cloths, 6 lbs., $1.70 to 2.20. Camlets, S, $15.0 to 16.0; SS, $14.0 to 14.50. Long Ells, $8.0 to 9.50. Cloth Broad, per yard, $1.50 to 2.0; Blankets, per lb., $0.70 to 0.80. Iron Nail Rod, per picul, $3.45 to 3.80; Hoop, per picul, $2.90 to 3.25; Bars, per picul, $2.75 to 3.50; Lead, per picul, $7.50 to 8.0.

SHANGHAI.—Cotton: There had been much more doing during the fortnight than was reported last mail. Plain Cotton Goods had met with very fair enquiry, and sales had been made at gradually declining prices. Chinese dealers were the principal buyers, attracted no doubt by low cost of the Goods. Grey Shirtings, 8¼ lbs. had been sold at Tls. 2.1.0 down to Tls. 2.0.0; 7 lbs., Tls. 1.9.1 to 1.8.5. White Shirtings were in good demand for arrival, and several contracts had been made. T-Cloths, 7 lbs. chiefly had been dealt in to a moderate extent at Tls. 1.6.0 to 1.8.0 for good to best qualities. No transactions in Drills were reported. Fancy Cotton Goods were dull of sale, and but few had changed hands. Woollens and Worsteds: Long Ells were difficult of sael. A few had been exchanged for Silk at Tls. 6.4.0. Spanish Stripes: Demand very small, prices rather firmer. Camlets SS in enquiry at low prices—Tls. 12.0.0 to 12.5.0 Figured Lustres continued to be sold at Tls. 3.6.0 to 3.9 0. Crape Lustres saleable for arrival at firmer rates. During the three days that elapsed between the departures of the P. and O. and French mails holders of Cotton Goods became firmer, and Grey Shirting obtained slightly better prices. Iron and lead had also improved. The following were the quotations current at the departure of the French mail on the 24th of January:—Grey Shirtings, 7 lbs., Tls. 1.8.3 to 1.8.8 per piece; 8.4 to 8.6 lbs., Tls. 2.0.0 to 2.0.5 per piece. White Shirtings, Tls. 1.9.0 to 3.0.0 per piece. T-Cloths, 6 lbs., Tls. 1.3.5 to 1.6.0 per piece; 7 lbs., Tls. 1.6.5 to 1.8.5 per piece; 8 to 8.4 lbs., Tls. 1.9.5 to 2.5.5 per piece. Camlets, English, SS., Tls. 11.5.0 to 12 2.5 per piece. Spanish Stripes, Tls. 0.5.7 to 0.8.0 per yard. Medium Broad and Habit Cloth, Tls. 1.0.0 to 1.6.0 per yard. Iron, Nail Rod, Tls. 2.1.0 to 2.4.0 per picul; Hoop, Tls. 1.8.0 to 2.0.0 per picul; Flat and Round, Tls. 2.4.0 to 2.4.5 per picul. Lead, Tls. 5.6.5 to 5.8.0 per picul. Tin Plates, Tls. 4.3.0 to 4.8.0 per box. Steel, Tls. 3.5.0 to 3.6.0 per tub. Coals—cargo quotations afloat, Cardiff, Tls. 11.0.0 per ton; North Wales, Tls. 10.0.0 per ton; English, nominal; Anthracite, Tls. 11.5.0 per ton.

HANKOW.—Plain Cottons: A steady inquiry was maintained at the commencement of the fortnight for 8¼ lbs. Grey Snirtings at Tls. 2.1.5 to 2.1.7; but large arrivals, and less favourable advices from Shanghai, had since lowered quotations to Tls. 2.1.0 to 2.1.4; 7 lbs. were still wanted at Tls. 1.9.5 to 2.0.0. T-Cloths: A considerable business had been done, chiefly for 7 lbs., though at a decline; 8 lbs. had been in better demand at unchanged prices. In Drills there had been but little doing, and the market was weak. White Shirtings showed a slight improvement. Fancy Cottons continued dull of sale. Woollens and Worsteds: Camlets, Lastings, and Figured Orleans had been in very limited request at lower rates. Scarlet Long Ells, of favourite chops, were reported rather higher. Lead was down 3 mace per picul, and was quoted Tls. 6.3.0 to 6.4.0, the demand having been freely met by the arrivals.

FOOCHOW.—The sale of imported produce during the interval had comprised the following:—2,000 pieces, 8¼ lbs. Grey Shirtings, at $2.90 per piece; 250 pieces Turkey Reds, at $3.20 per piece; and 2,300 piculs. Lead at $8.00 to $8.50 per picul for cash; and $9.00 against Tea.

HONG KONG.—The following is from Messrs. Olyphant and Co's. export, dated 25th of January:—Cotton Yarn.—Sales at private have again been confined to one small parcel of Signapore cargo, and further offerings at auction not fetching prices equal to those previously obtained, quotations for sound goods are nominally $2.50 per bale lower. The sales by auction have amounted to 32 bales Nos. 16 to 24, 15 do. Nos. 28 to 32, and 28 do. Nos. 38 to 42. Piece Goods.—The arrival of several vessels from London bringing more or less goods, and further offerings, announced, and prospective, of damaged parcels created a desire to realise, and some small sales of Grey Shirtings, and T-Cloths were made, shortly after despatch of last mail, on easier terms, but during the past week there has been some inquiry on the part of buyers for Tientsin, in anticipation of the re-opening of navigation, which has imparted a decidedly better feeling, and induced a display of more firmness, which will no doubt result in some advance in values, should the inquiry continue. Large additions have been made to the stock of Turkey Reds, which are five cents lower, but this is the only decline from last mail's quotations. The market is bare of Americans Cottons. Auction sales amount to 4550 pcs. 8.4 lb. Grey Shirtings, 1,000 do. 6lb., 5,000 do. 7lb., and 900 do. 8lb. T-Cloths, and 1,170 do. English Drills. Woollens: Long Ells and Blankets are again lower, but there has been some little demand for other descriptions, and prices have a tendency to advance, but the inquiry is still limited to best qualities of favourite makes. Metals: Iron of all kinds is less inquired for, and prices show a decline from former high values. Lead continues in good demand, and large sales have been made at a further advance. L.B. has been placed at $7.50, and there are still buyers at that figure, but holders are unwilling to sell, supplies here and on the way being light. There is no W.B. on the market. Tin is very materially dearer, and much wanted. Coal: Arrivals have been—263 tons English, 4,044 do. Welsh (2,259 to consumers), 1,765 do. Australian (775 to consumers), and 1,300 do. Anthracite (to consumers). The market is quiet, and sales only amount to 263 tons English at $10.25, and 528 do. Welsh at $11 (for Japan), and 621 tons Welsh at $11.10. Ginseng: Contrary to expectations, a fair demand has existed, and sales of some 60 casks Crude have been made at $131 to 137 per picul, showing a slight advance on former rates. Holders are firm for enhanced prices both for Crude and Clarified—the latter is very scarce. The following were the quotations:—Cotton Yarn, No. 16 to 24, per picul, $124 to 118; 28 to 32, $131.50 to 140; Grey Shirtings, 7 to 7¾ lbs., per piece, $2.35 to 2.30; 8 to 8¾ lbs., $2.70 to 2.62; White Shirtings, $2.35; Grey T-Cloths, $2.40 to 2.35; Long Ells, $8.35 to 8.65; Camlets, SSS, $14.50 to 14; SS, $16 to 16.50; S, $16,75 to 17; Iron Nail Rod, Nos. 1 to 6, per picul, $2.85; Hoop, $2.90 to 2.85; Bar, $2.70 to 2.75; Lead, large, $6 90 to 6.80; Steel, English, per tub, $4.05 to 4.20; Coals, afloat, per ton, English steam, $11 to 9.75; American Anthracite, $10 to 10.05.

## CHINA AND JAPAN EXPORTS

### TEA.

YOKOHAMA.—Business in Tea had continued on a fair scale. Settlements were almost entirely for the New York and San Francisco markets, and amounted to about 2,500 piculs, the greater portion of which had been settled at extreme rates. Prices had advanced from $1 to 3 per picul, and must be considered almost nominal for the higher grades, of which there were scarcely any parcels on offer. Stocks were reduced to a lower point than they had been during the season, and consisted of the common grades, anything approaching to fine being very scarce. The N. B. Palmer and Pallas had sailed for New York, making the export to 13th Januasy 7,179,797 lbs., against 5,620,511 lbs. last year. The Alcyone, Caractacus, Solent and John Norman were loading for New York. current quotations:—Common, $19 to 23 per picul; good common, $24 to 25; medium, $26 to 28; good medium, $29 to 32; fine, $34 to 37; finest, nominal; choice, nominal.

SHANGHAI.—Black: There had been more doing than advised in our last, and prices for fair black leaf kinds had ruled a li ttle easier, but an advance in exchange quite neutralised any reduction in laying down cost compared with previous quotations. Stock was in a small compass, with no further supplies worth speaking of to come down from the river ports. Settlements for the fortnight, 4,287 chests; reshipments on owners' account, nil; stock, 19 chops, or 5,600 chests. Quotations, duty paid (exchange for credits, at 6s. 0¼d. per tael, and freight at £2. 10s. per ton):—Dust, common, 6¼d. to 6¾d. per lb.; Hohow, common, 1s. to 1s. 0¼d.; Ningchow, common fair, 1s. 1¾d. to 1s. 2d.; Ooopack, fair, 1s. 3d. Green: There had been a good inquiry since last mail for all Teas with quality. Fine and finest Moyunes and Teenkais, from their scarcity, had commanded higher prices, whilst medium to common kinds, being in full supply, continued to tend downwards. Settlements during the interval—13,000 half-chests Moyune and Teenkai, at Tls. 40.5 to 46; 11,000 half-chests Moyune and Teenkai, Tls. 34 to 37.5; and 6,000 half-chests common Moyune and Fychow, at Tls. 31 to 33. Settlements for the fortnight, 30,220 half-chests; re-shipments on owners' account, nil; stock, 115 chops, or 70,000 half-chests. Quotations (exchange, &c., as above) were:—Fychow and Moyune, Gunpowder, 1s. 6d. to 3s. 7d.; Imperial, 1s. 2¼d. to 2s. 10d.; Young Hyson, 11¾d. to 3s. 2d.; Hyson, 1s. 1¾d. to 3s. 3½d.; Twankay, 9d. to 1s. 6d.

HANKOW AND KIUKIANG.—We have no transactions to report from either port.

FOOCHOW.—The following is from Messrs. Odell and Co.'s Circular, dated 15th January:—Our last report was dated 1st inst., since when a fair amount of business has been transacted. Congous.—In the early part of the interval further large purchases were made on Australian account, and a temporary advance in price was thus obtained, but latterly the Teamen have been willing to sell at our previous quotations, which has led to more business on English account. Arrivals from the country for the fortnight have been only 317 chests, and the stock is reduced to 9,465 chests, and the quantity still to come to hand does not, it is said, exceed 2,000 to 3,000 chests. Souchongs have been in limited inquiry, at previous rates. Oolongs and Scented Teas.—The supply of desirable kinds being exhausted, we have no sales to advise. About 1,400 packages Tea, ex Sovereign of India, have been sold by public auction, and realised very full rates. Settlements for the fortnight have been:—Congou, 9,981

Digitized by Google

chests, at Tls. 8.8 to 19.2 per picul, ship off; Souchong, 859 chests, at Tls. 16.5 to 18.8 per picul, ship off.

## SILK.

YOKOHAMA.—The market for this staple had been comparatively quiet during the fortnight. Arrivals had been more than equal to the demand, they had, however, consisted chiefly of Oshu sorts of inferior quality. Prices had a downward tendency for the commoner descriptions, and dealers evinced some anxiety to realise; no reduction, however, can be noted for fine silks; in fact, for really good parcels an advance in some instances might have been noted. Fine Hanks were seldom seen, and the yield of this description of Silk for this season seemed to be all but exhausted. The quotations (charges paid to London at exchange, 4s. 4½d.) were as follows:—Hanks—Mybash, Sinchu, &c., extra, 38s. 11d. to 41s. 8d.; best, 36s. 8d. to 38s. 1d.; medium, 33s. 7d. to 35s. 6d.; inferior, 29s. 7d. to 32s. 6d.; Oshu, extra, nominal, 36s. 3d. to 37s. 0d.; best, 33s. 3d. to 35s. 1d.; medium, 27s. 9d. to 30s. 8d.; inferior, 24s. 0d. to 26s. 3d.; Coshu, best, 31s. 5d. to 33s. 3d.; medium, 27s. 9d. to 29s. 11d.; inferior, 24s. 0d. to 27s. 0d.; Sodai, best, nominal, 29s. 7d.; medium, 25s. 10d. to 27s. 9d.; Etchesen, best, nominal, 27s. 0d. to 28s. 10d.; 2, 24s. 0d. to 26s. 2d.; inferior, 22s. 2d. to 23s. 3d.; Mashta, best, 24s. 0d. to 25s. 10d.; inferior, 20s. 3d. to 23s. 3d.; Hatchogee Tussah, 23s. 3d. to 25s. 10d.

SHANGHAI.—We extract the following from Messrs. C. J. Sheggs and Co's. report dated January 19:—A moderate business, amounting to about 1,000 bales, has transpired during the fortnight, a large proportion of it being in "barter" for Shirtings and Woollen Goods. For good and best Tsatlees prices show no alteration, although it may be said that dealers are somewhat easier owing to the near approach of China New Year, whilst for the commoner descriptions a decline of 5 to 10 taels may be quoted, which, however, with the advanced Exchange, still lay down fully 2s. per pound over home rates. A small parcel of Koo-fong-sings Chop is said to have been placed at 590 taels. In Kahing Taysaams no transactions are reported, whilst Chincums we need hardly quote, as they are taken for native consumption at very extreme prices. A considerable quantity of Yellow Szechuens have found purchasers at from Tls. 380 to 400, equal to 20s. to 21s. laid down, and a good many common and inferior Re-reels, drugged to an excessive extent, have been taken at prices ranging down to 23s. per pound. In Throwns, Trams have been in request at from Tls. 520 to 545, and Organzines at Tls. 570 to 590 per picul. The stock is estimated at from 2,500 to 3,000 bales.

## ARRIVALS.

At YOKOHAMA.—From Liverpool, Jan. 2, Brililant; from Swansea, Lawrence Brown.

At SHANGHAI.—From London, Jan. 7, Spindrift; 8, Ariel; 9, Corsair; 12, Kate Carnie; 14, Taeping; 16, Assyrian; 17, Lahloo, Serica; from Liverpool, 12, Northfleet; from Cardiff, 8, Dorothea; from New York, 7, Bengal; 9, Kate Young.

At HONG KONG and CANTON.—From London, Jan. 12, Crested Wave; 18, Channel Queen, Sir Henry Havelock, Shakespeare; 21, Southern Cross; from Liverpool, 14, Diomed (str.); from Cardiff, 14, Proteus; 15, Elise, Lily of Devon; 18, Madeira; from Glasgow, 21, Albany; from Newcastle, Atlantic; from Hamburg, 12, Martha; 14, C. Lorentz Meyer, Elvira; from Rotterdam, 15, Vesta, Stad Oldenzaal; from Havana, 21, Italia; from Boston, 14, Mutlah; from New York, 20, Agnes.

At MANILA.—From Liverpool, Jan. 19, Estrella, Flora; from Glasgow, Elisa; from Cardiff, 18, Salvadora; from Newcastle, 6, Hebe.

At SINGAPORE.—From London, Jan. 28, Star of Jamaica; from Glasgow, 26, Loudoun Castle, 27, Parana; from Cardiff, 20, Fritz and Anton, 25, Aline; from Hamburg, 27, Lizzie, Malabar.

At PENANG.—None.

## DEPARTURES.

From YOKOHAMA.—For Callao, Jan. 8, Agra; 11, Suliato; for New York, Dec. 31, N. B. Palmer; Jan. 5, Pallas.

From SHANGHAI.—None.

From FOOCHOW.—For London, Jan. 11, Beemah; 14, Sovereign of India; for Falmouth, 7, Victoria; for Boston, 5, Velocity; for New York, 9, Glenaros, Laurel.

From HONG KONG and CANTON.—For Havana, Jan. 15, Nadesda.

From MANILA.—For Liverpool, Jan. 8, Amigos; 19, Feliz.

From SINGAPORE.—For London, Jan. 18, Bristow; 24, Napier, Coleroon; for Liverpool, 29, Naworth.

From PENANG.—For London, Feb. 3, James Paton; for Boston, Jan. 28, Rocket.

## VESSELS LOADING.

At YOKOHAMA.—For United States, Caractacus, Alcyone, John Norman, Solent.

At SHANGHAI.—For London, Dundonald, Corsair; for New York, American Lloyds, Cingla, Queen's Own, Carnarvonshire, Annie.

Digitized by Google

At FOOCHOW.—For London, James Shephard (full), Chanticleer; for New York, none.

At HONG KONG and CANTON.—For London, Ombu, Fairleader; for New York, Caroline, Magnet.

At MANILA.—For London, Aurora; for Liverpool, Lyola; for New York, Asa Eldridge, Nina.

At SINGAPORE.—For London, Argo, Loudoun Castle, Star of Jamaica; for Boston, Madawaska: for New York, St. Paul.

At PENANG.—For London, Helensbank, Tek Li, Aldourie.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London there is no vessel loading. To New York, £3 to £3 15s. per ton of 40 feet.

At SHANGHAI.—To London the rate is £2 10s.; and to New York £3 per ton. There is some inquiry for tonnage for the northern ports.

At FOOCHOW.—To London, £2 7s. 6d.

At HONG KONG and CANTON.—To London £3 per ton of 50 feet; to New York, £3 per ton of 40 feet.

At MANILA.—Tonnage is scarce and wanted. The following settlements are reported:—Loyola, 567 tons, to Liverpool, with wet sugar at £3 10s., hemp at £4 5s. per 20 cwt., and light freight at £4 10s. per 50 cubic feet.

## CASUALTIES.

The American ship Surprise, from Foochow, bound to New York, via Amoy, with a cargo of tea, while proceeding to sea, went on shore near Rees Rock; she has since been towed back into port with about half her cargo damaged.

## VESSELS PASSED STRAITS OF SUNDA.

## COMMERCIAL POSTSCRIPT.

The Pacific mail steamer *China*, which left Yokohama on the 27th January, reached San Francisco on the 23rd February, with 625 passengers and 2,259 packages of cargo.

The failure is announced of Messrs. Waterhouse and Kendall, spinners and manufacturers, of Stockport, with liabilities estimated at £25,000. The *Manchester Courier* also reports the stoppage of Messrs. Leadbetter and Co., linen manufacturers, of Glasgow, but the branch establishments at Dundee and Belfast are not affected. The liabilities are stated at £70,000.

### SHIPPING.

ARRIVALS NOT IN THE TABLES.—March 4, off Dungeness, from Java, for Amsterdam, Jacob, Helena; off Isle of Wight, from Batavia, for Amsterdam, Nederland; 8, at London, from Shanghai, Hindostan; off Falmouth, from Batavia, for Amsterdam, Bremen; at Falmouth, from Rangoon, John Watt; at Queenstown, from Rangoon, Morning Glory; off Queenstown, from Bassein, for Liverpool, Vanda; from Akyab, Mirella; 8, at London, from Penang, Albuera; 6, at Queenstown, from Rangoon, Albatross; off Queenstown, from Rangoon, for Liverpool, Vancouver; 8, at Deal, from Shanghai, Ornate; from Moulmain, Josephine; Feb. 20, at New York, from Yokohama, Grenadier; 22, from Shanghai, Courser; 9, in the Downs, from Shanghai, Napoleon III.; 8, at Ryde, from Bangkok, Orion.

DEPARTURES.—March 8, from London, for Singapore, Red Riding Hood; 6, from Plymouth, for Batavia, Argo; 4, from Shields, for Shanghai, Athena; Feb. 20, from Baltimore, for Yokohama, Ellen Hood: from Boston, for Yokohama, Naples.

LAID ON.—At London, for Shangai, Albuera; for Singapore and Shanghai, Miranda (str.).

SPOKEN.—Almelo, Amsterdam to Batavia, Feb. 12, 41 N., 13 W.; Royal Standard, Colombo to London, Feb. 12, 13 N., 36 W.; Knut Akerhjelm (ship), Queenstown to Ceylon, Jan. 24, 2 N., 22 W.; Annie Sharp, Colombo to London, with bottom foul, Jan. 30, on the line, 21 W.; India, Sourabaya to Rotterdam, Feb. 8, 29 N., 41 W.; Orion, (Dutch barque), Bankok to Hamburg, Feb. 23, 39 N., 31 W.

MISCELLANEOUS.—Jan. 27, at Chinchas, loading for Amoy, Henri IV.

CASUALTIES.—The "Whirlwind," Graham, from the Clyde to Shanghai, which put into Dartmouth, March 3 leaky, &c., has been surveyed and part of her cargo ordered to be discharged.

Liverpool intelligence of March 4 states that the Ajax, Kidd, from Singapore and London, parted two anchors off Sandon Basin on the night of March 1, and while at anchor the next day was run into by the "Juliet" (ship), which had just come out of dock, had two bowplates stove and another damaged, started the forecastle deck, covering boards, rails,, stanchions, &c., and sustained other damages.

## PARLIAMENTARY NOTES.

Mr. CHILDERS, in his explanatory statement of the Navy Estimates last night, announced a reduction of the squadron in China waters from thirty-four to twenty-five ships, but did not specify in what class of vessels the change would consist. Colonel SYKES cordially approved, but Sir J. ELPHINSTON deprecated so large a diminution of the force, as it would admit of an increase of piracy, and entail a far heavier expenditure in the end. The proposed reduction will, nevertheless, be carried out.

Among notices of motion we are glad to see that there is one for "all papers and correspondence regarding the further exploration of the proposed railway route from Rangoon to Kiang-hung (Western China), in continuation of Parliamentary paper No. 28, 1 of Session 1867." We trust that this matter, in common with many others affecting the interests of the China trade, will receive a fair share of attention in the course of the present session.

## LATEST TELEGRAMS.

### RECEIVED VIA GALLE, FEBRUARY 27.

### CHINA.

HONG KONG, FEB. 7.—The inhabitants of the villages near Swatow who attacked the crew of the British gunboat *Grasshopper* have been satisfactorily punished. The details of the conflict show that eighty-eight natives were killed or wounded. Three English officers were wounded, but not seriously. The villages have been destroyed and the force has returned. The *Leander* has made the fastest run of the season from England to China, she having performed the passage in ninety-five days.

### RECEIVED MARCH 8.

HONG KONG, Feb. 8.—Markets unchanged. Total export of tea to date, 135,000,000 lbs. Exchange on London—Bank bills, six months', 4s. 5½d, to 4s. 5¾d.

SHANGHAI, Feb. 3.—Grey shirtings, 6½ catties, 8¼ lbs., 2,05 tls. Cotton, Shanghai, 16 tls. Tea—market closed. Silk—unchanged. Settlements since departure of last mail, 800 bales. Export to date (China and Japan) from commencement of season, 59,500 bales. Exchange on London—Bank bills, six months, 5s. 11¼d. to 5s 11½d.

[This telegram has occupied twelve days in transmission from Galle.]

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

BAYLIS—On the 22nd Feb., the wife of Alfred Baylis, Esq., of the Peninsular and Oriental Company's Service, of a son.

BIELFELD—On the 20th Jan., at Hong Kong, the wife of Alexander Bielfeld, of a daughter.

CHESHIRE—On the 5th March, at Forest Hill, the wife of Samuel Harley Cheshire, of a son.

EVANS—On the 9th Dec., at Hankow, China, the wife of Matthew Penefather Evans, Esq., of a son

HATCHISON—On the 4th March, at Cairngall, Aberdeenshire, the wife of William Hatchison, Esq., of a son

MACTAGGART—On the 15th Feb., at Blackheath-park, the wife of William Mactaggart, Esq., of a daughter.

MARTIN—On the 24th Feb., at St. John's-park, Blackheath, the wife of William Martin, Esq., of a daughter.

NEWBERY—On the 24th Feb., at Heathlands, Ottery St. Mary, Devonshire, the wife of Joseph Vickers Newbery, Esq., of a son.

PHILLIPS—On the 8th Jan., on board the *Harlaw*, at Shanghai, the wife of Capt. Phillips, of a daughter.

RICKETT—On the 17th Jan., at Hong Kong, the wife of John Rickett, Esq., of a daughter.

### MARRIAGES.

LOCK—MILLER. ARNOLD—MILLER.—On the 3rd March, at Windmill-street Chapel, Gravesend, by the Rev William Emery, Edward William Lock, of Hoddesdon, Herts, to Sarah Ann, eldest daughter of Alexander Miller. Also, at the same time and place, Frank Arnold, of King-street, Great Yarmouth, to Mary Jane, third daughter of Alexander Miller, of the Jerusalem, and 22, Park-place, Milton-next-Gravesend. No cards.

SCOTT—BOYLE—On the 17th Jan., at the Roman Catholic Church, Shanghai, William Scott to Alina Anne, relict of the late Patrick Boyle.

TRAILL—NEILLEY.—On the 15th Dec., at Rostella, Tasmania, by the Rev. Henry Plow Kane, M.A., George Hamilton Traill, Oriental Bank Corporation, to Jessie Frances Montague, youngest daughter of the late Captain Neilley, H.M.'s 40th Regiment.

### DEATHS.

EWING—On the 19th Feb., at New Lodge, Ryde, of acute inflammation of the lungs, Emily, the wife of Michael Ewing, Esq.

HANSARD—On the 19th Feb., suddenly, of disease of the heart, aged 47, Richard James Hansard, Esq., son of the late Luke Graves Hansard, Esq.

PADDAY—On the 22nd Feb., at Cliftonville, Brighton, Laura Maria, aged four years, second daughter of Reginald Padday, Esq., of Singapore.

RITCHIE—On the 24th Jan., at Singapore, in her 24th year, Agnes, eldest daughter of the late Alex. Ritchie, Esq., Glasgow, and granddaughter of Mr. John Anderson, of Singapore.

## STRAITS GRIEVANCES.

(MORNING STAR.)

A short time ago we directed attention to certain grievances in the Straits Settlements, which had previously called forth in our columns the earnest remonstrances of "A Singapore Merchant" Among the complaints upon which we then touched, the change which has taken place in the status of the judges since the administration of affairs has been transferred from the India to the Colonial office occupied a foremost place. The evil is so great—the discontent which it has provoked is so general—that we feel impelled to recur to the subject. The purity and the independence of the bench are synonymous terms. Where the judges are the mere creatures of authority they are likely to be its servile tools. In this country the profound confidence which everybody feels in the judiciary is based upon the knowledge that it can exercise its high functions without fear or favour. In some parts of America the judges are dependent for their original appointment and their continuance in office on the popular favour; but even this vicious arrangement is preferable to the system which obtains in our

Digitized by Google

Crown colonies. There a Governor—acting perhaps in concert with his Council, which, however, is mainly composed of the official element—may remove a judge; and judges undoubtedly have been so removed, and not always from the motives assigned to the Home Government. The Duke of Buckingham, in dealing with the special case of Singapore, founded his argument on the extraordinary statement that the gentlemen who were appointed to colonial judgeships were necessarily taken from a class of the profession inferior to that from which the English judges were selected, and that it was not expedient to confer upon them equal privileges. This is a doctrine which is, in our judgment, utterly at variance with justice and sound policy. A lawyer may possess all the moral and legal qualifications necessary for the performance of judicial duties, without attaining that high rank and enjoying that lucrative business which are the stepping-stones to the English bench. There is no difficulty in finding plenty of such men in our Inns of Court, who are an honour to the legal profession, and who, if sent to the colonies, would acquit themselves with credit and distinction without having the fear of "his Excellency" before their eyes. There, if anywhere, it is most desirable that the judges should be perfectly independent of the executive authority, and that the people should have confidence in the unbiassed and impartial administration of justice. Once let them suppose that there is a private door of communication between the bench and Government House, and the moral effect of the suspicion (even though it be ill-founded) will generate distrust, and bring the law itself into contempt.

But the case of the Straits Settlements does not wholly rest upon these considerations. When that dependency was under the Government of India the two judges were absolutely free from all control on the part of the Governor-General—in other words, they could only be removed by the Crown; and in the only two instances in which, since the establishment of the court sixty years ago, the conduct of the judges has been impeached by the Viceroy, the Home Government was appealed to as the sole authority by which the points at issue could be determined. The fact that only two charges have been preferred since almost the commencement of the present century, and that in one of these the highest tribute was paid by the Secretary of State to the motives of the judge, is a proof that the judicial machinery had worked very satisfactorily, and that no reason whatever existed for investing the Governor with the power which has been attached to him since the Settlements have been brought within the jurisdiction of the Colonial Office. Neither can it be alleged that the distance is so great as to render this change expedient. Singapore is within thirty days' sail of England; and if grave difficulties should arise between the judges and the Governor it is surely infinitely better that they should be dispassionately weighed by the authorities at home, and, if needs be, referred to the Judicial Committee of Privy Council, than that a man who might really be giving judgment in his own cause, and who has only a small council of military men and civilians to advise him, should be empowered to remove a chief justice or an associate judge. How this principle of Executive interference has worked we know from various cases which have been duly recorded for the benefit of industrious lawyers; and it is rather too bad that, from a sheer love of routine and precedent, and not from any well-considered regard for the public interest, an innovation which is so likely to provoke disputes, and to fetter the independence of those who should be absolutely independent, has been foisted on a colony in which it was previously altogether unknown.

The worst of the Singapore business is that it has irritated all classes of the community. On this subject it cannot be alleged that the public are apathetic—that they regard the centralisation of power in the hands of the Executive with indifference. On the contrary, from the moment that the obnoxious measure was carried into effect they protested against it. They protested against it at a public meeting convened by the European merchants. They memorialised the Duke of Buckingham in favour of its repeal. A reply was vouchsafed which showed only too clearly that the then Colonial Minister was quite unable to take a large view of the subject—quite unable either to recognise the reasonableness of the claim that the judges should be restored to their former state of independence, or to perceive that some deference should be paid to the opinion—or, as his grace might think, the prejudices—of the community, who, as they have to pay the judges, and are amenable to their authority if they resort to the courts, have really the greatest stake in the matter. The Europeans do not stand alone. The Asiatics, whether Chinese or Malays, are equally dissatisfied, although they may not employ precisely the same modes of expressing their dislike to the newly-made law. Many of the Chinese shopkeepers who, with the Europeans, are the backbone of the Settlements, have already fled the country, under the impression that they are not safe so long as the law authorising their compulsory deportation remains on the statute book. Is it desirable that this anomalous state of things should continue? Assuming that the judges are practically as independent under the new arrangements as they were under the old, still if the taxpayers of Singapore think differently—if they desire that the Chief Justice and his colleague should occupy a position analogous to that of the English judiciary—what possible harm can accrue from making this concession to them? The power to suspend a judge may or may not be safely entrusted to a colonial governor and his council; but it is certainly creditable to the people of the Straits Settlements that they should be so anxious to uphold the independence of those who are called upon to administer the law. If they persevere with their demand, it will be strange indeed if justice is withheld from them.

## THE BRINDISI ROUTE.

The following very interesting letter appeared last week in the *Examiner*:—

Sir,—The new route to Egypt *vid* Brindisi is so likely, ere long, to become the great highway to the East, that a very few words about it may not be uninteresting.

Much remains to be done as regards the service on the railways of France and Italy before it can be a postal route. As far as Caloz the express from Paris runs through well and quickly; at Caloz, however, a most unnecessary delay occurs, as the train to St. Michel waits for the omnibus train from Macon, and for a slow train from Geneva, thus involving a detention of two hours. Once started, it might be expected the distance between Caloz and St. Michel (sixty miles) would be done in three hours, but the train stops at every station for the convenience, apparently, of a few third-class passengers, and finally arrives at its destination at 2.25 P.M., having consumed four-and-a-half hours on the way. Then comes another detention at St. Michel, far, longer than is required, to shift the baggage to the Mont Cenis carriages, or to give the passengers time for dinner. Surely half-an-hour at St Michel would suffice, instead of which we passed there, as usual, an hour and a-half.

The Mont Cenis carriages are very small, long, and narrow. They are divided into two compartments, each holding twelve persons, who sit facing each other as in an omnibus; the windows are high up—so that to see out of them it is necessary to stand or kneel on the seats—and are fixed firmly in their frames, as when the *tourmente* (a high wind accompanied with snow) comes on it would penetrate to the carriages unless the windows were water-tight; the carriages are entered from each end, and the central division has a door usually kept open. The guard sits in the doorway of the last carriage, with his hand on the powerful breaks, and certainly he must at times be infinitely amused at the alarm and absurd questions of the passengers. There is still one diligence for those who cannot make up their minds to encounter the terrors of the Fell Railway; but to those who remember the torture of three hours cramped up in the *coupé*, or stifled in the interior of those horrible inventions, the railway (even if at first starting many might be slightly nervous) must be a welcome change. At present the engines are not powerful enough, and now and then come to a dead stop, when the train slips back, and the guard screws the breaks on hard. This moment is generally selected for a few smothered screams from some of the ladies, and a decidedly uncomfortable expression on the faces of some of the gentlemen; but this will be remedied when the new and powerful engines arrive which have been made at Birmingham. The present ones were made at Paris, and are entirely incompetent to perform their work properly. They puff and pant and groan up the steep ascent, giving the impression that they are about to break down at every instant; but the greatest inconvenience is that when going through the covered ways, which on the summit of the mountain protect the line from avalanches of snow, or the worst effects of the *tourmente*, the air outside the carriages is vitated by steam and smoke, which after a time penetrate to the interior, and render breathing difficult; to open the door is only to admit a cloud of smoke, and the feeling of suffocation is most painful; but this once over the descent is rapid and easy, and Susa is reached about 9.30 P.M. No train leaves for Turin till 10.50, and no train leaves Turin for Bologna till 7.45 A.M., just seven hours and a-half to wait; it usually ends by the passengers sleeping at Turin and going on by the night mail to Bologna. It starts at 6.46 P.M. and reaches Bologna at 2 A.M., and then taking the morning mail from Turin, we reach Brindisi at noon the next day. The country round Brindisi is a barren moor; not a tree visible for miles, and the city itself is a most dilapidated place. History and memory tell of its past glories as one of the great seaports of the Roman Empire, and it is still an Episcopal See; the harbour runs in a curve inland, sheltered by rising ground from every wind, and the steamers run up alongside the wharfs, which are still in course of construction. Brindisi is evidently waking up from her long sleep of decay and desolation, houses are building everywhere, dredging machines at work to deepen the harbour, and a new street with handsome lamp posts has been opened from the town to the wharfs; but much remains to be done; there is not a single storehouse for merchandise, the railway station is miserable, and there are only two inferior hotels.

The streets are crooked, narrow, and dusty; many of the houses are roofless; yet there is no appearence of poverty about the place. Evidently it once contained many more inhabitants than it does now (about 6,000). There is a Greek Church, but all deserted, and roofless too. Yet with all this there is an air of work and business about the place, which is an omen of its renewed importance. I was surprised, however, to see that the weekly market was held on a Sunday morning, and the country people around came in with their wares, and bought and sold, and drank their wine, and quarrelled, and made it up again, and all whilst high mass was going on in the cathedral, attended by sixty worshippers, all women. I asked my guide what the bishops and priests say to this, and why they did not try to stop it. He answered, that in and around Brindisi the priests had ruled too long and too hard, and tried to make the people believe too much and pay too much, and now they were free and did as they liked, and he feared that the most part of them, especially the men, believed nothing at all. Once the priests would not allow the wine shops to be opened till after mass, and now they were open all day. The market was held as well; the popularity of the change was evident, its moral effect may be doubted. It is the usual rebound, visible all over Italy, from excess of superstition to excess of licence in religious thought. To one thing in Brindisi, however, I must give unqualified praise, the wonderful beauty of the women; it is the rule, not the exception, and it is almost worth a journey here to see the lovely faces that are visible at every turn, and the glorious eyes that look slyly at first, then smilingly at the passing stranger. There must be Greek blood in their veins, their beauty is not of the Roman type; and one other most inevitable fact is, that I was not accosted by a single beggar. Brindisi, when the railroad arrangements are better, when wharves, warehouses, and docks are made, is evidently destined to become once more a great seaport. But the Italians must put their shoulders to the wheel, and that quickly, or they may lose the turn of the tide that leads to fortune; meanwhile, all success to the efforts they do make here and elsewhere to raise this noble land to a state of prosperity and comparative wealth, and to her proper position as one of the foremost nations of the earth. E.

*LONDON, TUESDAY, MARCH* 9, 1869.

## RELIGIOUS PERSECUTION IN JAPAN.

IN September last we received from Nagasaki intelligence of a fierce and relentless persecution of the native Christians at that port, which was stated to have been inaugurated by the infliction of a cruel death on upwards of one hundred of them. Subsequent accounts considerably modified the alarming statements contained in the first, it being explained that the Christians had not, after all, been put to death, but merely torn from their homes and families and deported to a distant province. These accounts were not only published in the *Nagasaki Times* and the China papers, but were confirmed by other advices *via* San Francisco. Yet now we receive Japan papers throwing ridicule on the whole affair, and pitying our credulity in having taken it *au sérieux*. It is really difficult to know what to believe. The *Missions Catholiques* —the principal organ of the French Missionary societies— publishes accounts from Japan of a recent date, in which it is asserted that the hostile measures adopted against native Christians are in no degree relaxed, and are carried to the greatest excess in the Gotto Islands (westward of Nagasaki).

The adherents of Christianity in this group are very numerous, and it is said they have almost all been imprisoned and tortured; two had died under their sufferings. These statements are given on the authority of Monsigneur PETITJEAN, Vicar-Apostolic of Japan, who also avers that at Fonsakadjima (in the Gotto group), one hundred and eighty-one Christians—men, women, and even children—have been imprisoned and horribly tortured because they would not renounce the faith. Nine had been condemned to die a violent death, and others to expire in slow agony. The account given is very circumstantial, and it is difficult to credit Monsignor PETITJEAN with having invented the whole of it. If these accounts are altogether untrue, or if they are purposely exaggerated, with the view of justifying French interference, the sooner some authentic refutation is published the better; but if, on the contrary, they are all true—as we very much fear is the case—then we can no longer doubt that the combined intervention of all the Christian Powers represented in Japan would be not only justifiable but an act of duty.

---

As we anticipated, judgment in the *Min* case has been recorded in favour of the appellants, reversing the decision of the Hong Kong Supreme Court in favour of the banks. The appellants have their costs also. The decision of the Judicial Committee—which we give at full length under "Legal"—is a lengthy and elaborate one, but deserves careful perusal, for it contains a most intelligent and lucid account of the circumstances of the case, and a clear exposition of the reasons for reversing the decision of the Court below. No one can read it without being impressed with the conviction that their Lordships have given the most careful consideration to the matter, and have arrived at the only just conclusion.

---

AN absurd statement recently appeared in a daily contemporary, to the effect that all the Japanese now studying in this country had been ordered to return to their homes forthwith. Of course there is no truth in the report. Some, who were sent to Europe by the now defunct Government of the SHIOGOON, have (like his brother, MIMBOUTAYOU) returned to Japan; but a number of youths sent by other DAIMIOS are still pursuing their studies here.

## OFFICIALS *VERSUS* MERCHANTS.

THAT regulation was wisely conceived, whereby members of the British Consular and diplomatic services are prohibited from engaging in trade. There may be some slight drawbacks attaching to it; for instance, when a Minister or a Consul appears to regard the interests of commerce with indifference, and to be absorbed almost exclusively in the contemplation of his own grandeur as the representative of British majesty, one is apt to suspect that to him the grapes are sour—that by reason of being debarred from joining in the race for wealth, he loses all sympathy for those whose legitimate pursuit is trade. But how much better it is that an English Consul, a Minister, should look coldly on the mercantile aspirations of his countrymen, than that he should enter the lists as their rival, and devote his energies to competing with them on their own ground! It is greatly to be wished that in this respect other foreign Governments could be induced to follow the excellent example of our own, but unfortunately the converse system has struck deep root among them, and it bears no wholesome fruit, as too many of our readers can testify. In Japan the evil appears to have attained greater magnitude than in China, though there it is bad enough. In Japan, not only do officials trade who were merchants before they received Consular appointments, and who therefore occupy their double position with the sanction of their Governments, but even the representatives of Powers that adopt the better system of separating official from mercantile life do not disdain to profit by their position, and fill their pockets with ill-gotten gains, to the detriment of legitimate trade. In point of fact, the Foreign Minister who uses the influence attaching to his diplomatic position to secure contracts for supplies of stores, machinery, vessels, or European goods of any kind required by the Japanese Government or Daimios, is simply plundering the merchants, whose interests he is sent there to protect. And the evil results of the system do not stop here, especially in Japan, where trade is traditionally regarded as ignominious. An official in high position who trades *on* that position must degrade himself in the eyes of the native Government, and his influence with them for all good ends is necessarily diminished, while foreign prestige suffers as a whole. A correspondent at Yokohama mentions a case in point. The Japanese Government wished to enter into a contract for large importations of rice, but instead of being able to invite tenders for the supply from the merchants, the department on which the operation devolved found itself hedged in by a phalanx of trading Ministers and Consuls, all clamorous for the tempting monopoly. What contemptuous derision must lurk under the urbane demeanour of the two-sworded gentry, under such circumstances as these! To do them justice, our own officials, both consular and diplomatic, have consistently held aloof from the contamination; but it seems strange that Sir HARRY PARKES, with the influence that he ought by this time to have gained in the Council of the native Government, has not been able to put some check on the abuse. It appears to us, too, that something more might be done by Sir HARRY to raise the position of the English merchant in the eyes of the Japanese. Bearing in mind the prejudice against trade already alluded to, extreme care should be taken not to draw too marked a distinction between officialdom and commerce, to the disparagement of the latter; yet we see that in the recently-issued notification announcing the opening—or partial opening —of Yedo, British subjects generally are laid under restrictions from which "officers in uniform" are exempt. Such mistakes as this can only tend to perpetuate the prejudices that we ought to strive, by every legitimate means, to overcome.

---

WE are glad to hear that the cable for the British Indian Telegraph Company is already in course of manufacture, and that there is no doubt of its being ready for shipment by the time the *Great Eastern* has completed her impending task of laying the new French-American Transatlantic Cable. In July, 1868, while commenting on the refusal of the Government to guarantee a direct submarine line to India, and on the reluctance of the promoters of the new Red Sea Cable to proceed without such a guarantee, we wrote:—"If they "would only be content, once for all, to abandon the idea of "a Government guarantee, and boldly launch their schem "on its own merits, they could not fail to meet with a satis- "factory response." The prediction has been fully verified.

## SIAM AND THE SHAN STATES.

AMONG Eastern monarchs there have been few better friends to civilisation and commerce than the late King of SIAM, and it would be a serious misfortune should anything happen to interrupt the friendly relations that have subsisted between this country and Siam during his reign. Yet some news we have recently received seems to suggest the possibility of complications that would greatly imperil this good understanding. The King of SIAM has on the north of his territory three Shan States or provinces—Zimmai, Labong, and Lagong. These were formerly tributary to Burmah, but during a war carried on in another direction by the Burmese these States took advantage of a temporary freedom from surveillance to revolt and transfer their allegiance to Siam, whose ruler they have since acknowledged as their suzerain. But of late years, and especially since the French established themselves in Cochin China, annexed Cambodia, and ascended the river of that name which borders these States, their chieftains have shown renewed signs of restlessness, in the form of a disposition to throw off their allegiance to Siam and place themselves under French protection, the pretext for their present attitude of disaffection, or passive hostility to Siam, being an objection to consider themselves bound by any treaties entered into by Siam with foreign Powers. In this state of things we regret to hear that the Governor of British Burmah is sending an exploring party from Moulmein to Zimmai to survey the intervening country, without, as we understand, any previous communication with the King of SIAM. The origin of this expedition is to be found in the failure of that to Bhamo, the Governor of British Burmah being now impressed with the belief that if any practicable trade route can be found, and a treaty of convention negotiated with the chiefs of these Shan States, trade may be carried on from Moulmein through this country to Kiang-tsen, a Burman Shan State on the Cambodia River, and by that stream to Kiang-hung on the Chinese frontier. Apart from the practicability of the scheme—in which we have little faith—it is evident that in thus treating with rebels we should be giving grave cause of offence to the King of SIAM, besides running the risk of coming into collision with France, and thus precipitating the threatened annexation of these three States by that Power. It is to be hoped that the Foreign Office is fully cognisant of the proceedings of the Governor of British Burmah, and will take care that he is not allowed to compromise us with our good ally, the King of SIAM.

---

IT will be remembered that, in 1866, Captain TYLER, R.E., was despatched by the Government then in office to examine the route *via* Mont Cenis to Brindisi, with a view to ascertaining its capabilities for the conveyance of the India and China mails. Captain TYLER'S report, while pointing out the defects of the transit, and the difficulties in the way of its adoption (which at that time were not a few) gave on the whole a highly favourable opinion on it, and pointed to its ultimate adoption as almost a matter of necessity. We observe that Captain TYLER is again at Brindisi, where he has been sent to examine the harbour, after which he will make a further inspection of the railway between that port and Susa. This fact may be accepted as evidence that the advantages of the new route are not likely to be ignored by the present Government, and that as soon as the minor difficulties now in the way can be overcome there will be no unnecessary delay in its adoption.

---

WE learn that his Imperial Majesty the EMPEROR of the FRENCH has conferred the Order of a Commander of the Legion of Honour upon his Excellency the KALAHOME, now Regent of Siam. Setting aside political considerations, this is a well-timed compliment, showing his Imperial Majesty's estimation of the high functionary the honour has so worthily fallen upon, to whom all foreign subjects are equally indebted for the care of their interests and welfare. Some time since we heard that it was the intention of the British Government to similarly recognise his Excellency's unceasing efforts in the cause of civilisation. We trust that this disposition still exists, as such a distinction could not but be appreciated by his Excellency.

## WESTERN CHINA.

THE agitation for opening a direct trade route from Rangoon to Western China still continues, and we believe that the matter is now likely to receive the serious consideration of Her MAJESTY'S Government. It is quite time. A memorial recently forwarded to the Treasury by the Wakefield Chamber of Commerce—which embodies a very able and elaborate exposition of the manifold advantages of Captain SPRYE'S route, as compared with rival schemes, includes also a recapitulation of the memorials already sent in by other Chambers of Commerce, showing these to be no less than forty-seven in number. An ably written article that lately appeared in the *Leeds Mercury* throws the whole blame of the delay that has taken place on Sir STAFFORD NORTHCOTE, but in this we are unable to agree. The Indian Council is the incubus that is, and (so long as it is constituted as at present) always will be, a dead weight on all projects for the advancement of commercial enterprise. It is, in fact, a secret and irresponsible Council of fifteen retired members of the various Indian services, whose only idea of India is that it has been acquired, and is to be retained, for the special benefit of these services, and for no other earthly purpose. Of the fifteen, no less than ten are retired members of the Indian Civil Service, three retired officers of the Indian Army, and the remaining two are retired judges of the Calcutta and Bombay Courts. A body more exclusively Indian in its composition cannot be imagined. There is no limit to their term of office; they have a power, in some things, overriding even that of the SECRETARY of STATE for INDIA; they are prejudiced in favour of the old state of things, having been brought up to look to monopolies alone for revenue. From such a body as this how can we expect any concessions to the spirit of progress that goes hand-in-hand with free trade? "India for the Indians" is their motto, but the time has come when home interests in India must be represented too. In these days of Reform—and of changes that are perhaps not always reforms—this curious anomaly can hardly escape attention; but there is one satisfactory feature in the case—when change does come, it cannot possibly be for the worse.

## CHINESE CITIZENS IN AMERICA.

THE improved position held by Chinese in the United States, under the Treaty recently concluded by Mr. BURLINGHAME, is likely to influence a fresh tide of immigration, and this tendency will be fostered by the great facilities of transport now provided by the Pacific Mail Company. The probable influx of Chinese that may thus be anticipated becomes a serious thing when viewed in connection with the recently-passed constitutional amendment, which accords the suffrage to all alike, without restriction as to race, creed, or nationality. It is apprehended that, should immigration set in on a large scale, the Chinese would quickly swamp the white population of the Pacific States, and perhaps eventually of the whole Union. A New York contemporary remarks that China could spare five, or ten, or twenty millions of people without missing them, and if even but a single million were to come over within the next two or three years, they would outnumber the population of all the States lying between the Rocky Mountains and the Pacific Ocean, and would, after going through the easy process of naturalisation, control their politics and their destiny. It is but little encouragement the Chinaman requires to come. With all the advantages and disabilities under which they labour in California, tens of thousands of them have emigrated there within the last ten years; and the growth of emigration has been in proportion to the increase in the facilities of transportation. The Chinese seem to make tolerably good citizens in the Australian colonies, but how they will behave in a country whose laws place all power absolutely in the hands of the majority, is a problem yet to be solved; perhaps the solution is not so far off as it may appear.

---

A RUSSIAN paper, the *Goloss*, states that an English company has secured a concession, enabling them to lay a telegraphic cable between the coast of China and the Russian harbour of Possiet, on the Gulf of Okhotsk. Wires are already laid down between Khabarovka, on the Amoor river, and Possiet harbour, so that it would only remain to unite the former town with Sretensk, which is in communication with the network of Russian telegraphs, to complete the chain of communication from Europe to China by that northern route.

## JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.

FEBRUARY 19.

Present—Lord Chelmsford, Sir J. W. Colville, and Sir Joseph Napier.

JUDGMENT OF THE LORDS OF THE JUDICIAL COMMITTEE ON THE APPEAL OF BODGER V. THE COMPTOIR D'ESCOMPTE DE PARIS AND OTHERS.

This was an action of trover brought by the respondents against the appellants in the Supreme Court of Hong Kong for 355 bales of merchandise, which were shipped in London for Hong Kong on board a vessel called the *Min*. by the direction of George Lyall and Charles Frederick Still, of London, deliverable to Lyall, Still, and Co., or their assigns, according to the bills of lading, of which the respondents became the transferees. The appellants were the owners of the *Min*. They pleaded a denial of the conversion, and also a denial that the goods were the goods of the plaintiffs (the respondents) as alleged.

The case was tried at Hong Kong before the Chief Justice and a special jury, and a verdict was found for the plaintiffs for the amount of the value of the goods. A motion was afterwards made to have this verdict set aside and a nonsuit entered, pursuant to leave reserved at the trial, on the ground that the plaintiffs had not proved that they were indorsees of the bills of lading for valuable consideration without notice so as to pass property, or that a new trial should be directed on this and other grounds of objection. An order was made that the motion be refused with costs.

This appeal was brought for the purpose of having this order and the verdict found for the plaintiffs set aside, and judgment of nonsuit entered or a new trial directed. The proceedings were fully reported in our issue of the 22nd ult.

It appears on the Chief Justice's notes of the evidence of the plaintiffs, that the goods in question were purchased from merchants at Manchester, in the autumn of 1866, by George Lyall and Charles Frederick Still, of London, for their firm at Hong Kong, which traded there under the style of Lyall, Still, and Co. Mr. George Frederick Maclean was the resident partner and manager at Hong Kong. One parcel of these goods was purchased from B. Liebert and Co., on a ten months' credit, which was the usual course in such transactions as between Manchester and Hong Kong merchants. It was part of the contract that remittances of proceeds of sales should be made from Hong Kong to meet the acceptances of George Lyall and Charles Frederick Still, given for the price of the goods, on receipt of the bills of lading. The second parcel was purchased from Samuel Mendel on a nine months' credit, with a stipulation of a similar character as to remittances. The third parcel was purchased from Calvert and Co. on a six months' credit, without any special stipulation. The object of the long credit was to give ample time for realising proceeds, so as to make remittances according to agreement.

When the time arrived for forwarding the goods from Manchester, Lyall and Still, of London, employed Killick, Martin and Co. as shipping agents there, to secure tonnage in the *Min*, which was then on the berth for Hong Kong." When this was secured, Lyall and Still directed the vendors at Manchester to forward the goods to Killick, Martin, and Co., for shipment in the *Min;* and they also directed Killick, Martin, and Co. to receive the goods so to be forwarded to them simply for the purpose of the shipment. In accordance with these instructions the goods were packed and marked at Manchester ready for shipment, and were sent up to Killick, Martin, and Co., with whom Lyall and Still had contracted for the carriage from Manchester to Hong Kong. All the charges were included in one through freight. The goods were shipped on board the *Min;* bills of lading for them, deliverable to Lyall, Still, and Co., or their assigns, were signed by the master, and were handed over to Lyall and Still, who accepted the draft of the vendors for the price in each case.

Before this period the firm at Hong Kong was in a failing condition; their deficit was about 4 lacs of dollars, and in November their condition had not improved. At the end of November and beginning of December Maclean had bill transactions with the respondents (two banking firms at Hong Kong), by which he got large advances on the undertaking to furnish shipping documents for silk cargoes, to be ready for the mail of Dec. 15 from Hong Kong. On the 13th Dec. the transactions of the firm were at a stand; they had ceased to make purchases or shipments of tea or silk as theretofore; they were under the necessity of returning bills of their correspondents, and had refused payment of their acceptances to the amount of 150,000 dols. This was well known at the time in Hong Kong.

On the 14th December, Mr. Kaiser, the manager of one of the two banks, addressed a letter to Lyall, Still and Co., requiring them to furnish, in the course of the day, the shipping documents according to their undertaking; to which Mr. Maclean replied that they were unfortunately unable to comply with this request. On the 17th Dec. Mr. Kaiser wrote another letter, insisting on getting the documents or a return of the advance made on the faith of the undertaking to furnish them, and he concludes his letter in these words:—"I must ask your immediate attention to this matter, and beg to warn you that my now offering to receive back the money obtained by you must not be looked upon as in any way binding me to treat the matter as one of debt, as I shall hold myself perfectly at liberty to deal with the matter as one of a much more serious character than a mere debt, if it be not at once satisfactorily arranged."

Mr. Kaye, the resident manager of the other bank, had had a conversation with Mr. Maclean in reference to the refusal of Lyall, Still, and Co. to pay their acceptances. He also became impatient and urgent for an arrangement, on account of the advance made by his bank. The two banks then combined, and Maclean was pressed, as he could not give them the documents he promised, *to give them all he had*. He was asked, what can you give us? He made out a memorandum which he handed to Mr. Pollard, the counsel for the banks, in order that he might prepare a formal assignment. This was prepared, and was executed, on the 22nd of December, by Mr. Maclean in the name of the firm, which was at this time insolvent, with liabilities uncovered to the amount of 8 lacs of dollars.

The assignment states the consideration of it to be, first, a debt of 85,714 dols. 28c. owing by Lyall, Still and Co. to one of the banks, and of 50,000 dols. to the other; next, the agreement to furnish bills and shipping documents, upon the faith of which the advances were made, which constituted the debts to the banks and the release of all claim upon the part of the banks in respect of this agreement. It then proceeds to make over to the banks, "the whole of the property, premises, and chattels specified in the schedule at the foot, with all the estate, right, title, interest, claim or demand of Lyall, Still and Co. therein or thereto, or arising thereout or therefrom. It further provides for doing all acts that might be required to give full and formal effect for securing and perfecting the assignment. In the schedule the first item is a share in the Hong Kong Club. There are other items of shares in various insurance companies; an equity of redemption, and two items in these words:—"All goods and bills of lading or other documents for all goods now on the way hither to arrive in December, 1866, or January, 1867. All goods, or documents for goods, alluded to in a telegram dated 9th November, 1866, from London partners to Hong Kong firm, received by steamer *Clan Alpine*, via Calcutta, in the words, 'are shipping more goods; shirtings thirteen six, shipment remitted;' and all goods or documents for goods purchased and shipped and now on the way hither."

The documents arrived on the 27th December, 1866, and 1st January, 1867, including the bills of lading for the goods shipped in the *Min*. These were indorsed, and handed over by Mr. Maclean (together with the policies on the goods) to Mr. Kaiser, *in performance of the agreement in the assignment*. After the arrival of the *Min* at Hong Kong, a demand was made on the part of the unpaid vendors, by persons authorised on their behalf, to claim possession of the goods, and this demand was acceded to on behalf of the owners of the *Min*. Subsequently the respondents, as transferees and holders of the bills of lading, made a like demand, which was refused.

In order to decide between the rival claimants two questions have to be answered:—

First. Did the *transitus* terminate before the demand was made on behalf of the appellants?

Secondly. Was the transfer of the bills of lading made to the respondents for valuable consideration, and without notice of such circumstances as rendered them not fairly and honestly assignable, and so as to transfer to the respondents a property in their goods freed and discharged from the proprietary lien of the unpaid vendors?

The general rule is that, where goods are sold to be sent to a particular destination named by the vendee, the right of the unpaid vendor to stop them continues until they arrive and are delivered there according to the bills of lading. The *transitus* continue whilst they are in the charge of some third party contracted with as carrier for the purpose of forwarding them, and who has them in charge simply for this purpose. It may suffice to refer to the recent case of Bernadon *v.* Strong (4 L. R. Eq. 481). The documents in evidence, as well as the oral testimony in the present case, establish beyond doubt that Hong Kong was the destination agreed upon between vendors and vendee; and the other parties who intervened for the purpose of having the goods forwarded to their destination had them in charge for this purpose only. Their lordships, therefore, entertain no doubt that the *transitus* had not ended before the arrival at Hong Kong.

The second is the real question in the case. The respondents contend that they gave value for the bills of lading; that they had no notice of any special terms of agreement between the vendors and vendees of which they say that they were not informed, and as to which they also say that they were not bound to make inquiry. The managers of the banks (Messrs. Kaiser and Kaye), were not examined as witnesses at the trial; but it plainly appears on the evidence adduced by the plaintiffs (the respondents) that the insolvency of Lyall, Still, and Co. was known to the banks at the time of the assignment, and it is but reasonable to suppose that they were quite familiar with what also, on the same evidence, appears to be the usage of trade as between Manchester and Hong Kong (see Newsome *v* Thornton, 6 East, 19). At the time the bills of lading were handed over to them no money was advanced, no benefit was conferred or promised on the faith of these securities. They were transferred simply (as stated in the evidence of the plaintiffs) *in performance of the agreement in the assignment* We have, therefore, to refer to the assignment itself to see what was the interest in these bills of lading that was agreed to be transferred, as part of what was assigned for the consideration expressed.

The general rule, so clearly stated and explained by Lord St. Leonards in the case of Mangles *v.* Dixon (3 H. of L. C. 702), is that the assignee of any security stands in the same position as the assignor as to the equities arising upon it. This as a general rule was not disputed, but it was contended that the case of a bill of lading is exceptional, and must be dealt with on special grounds. Doubtless, the holder of an endorsed bill of lading may in the course of commercial dealing transfer a greater right than he himself has; the exception is founded on the negotiable quality of the document. It is confined to the case where the person who transfers the right is himself in actual and authorised possession of the document, and the transferee gives value on the faith of it, without having notice of any circumstance which would render the transaction neither fair nor honest. In such a case, if the vendor is unpaid, one of two innocent parties must suffer by the act of a third; and it is reasonable that he who by misplaced confidence has enabled such third person to occasion the loss should sustain it (Lickbarrow *v.* Mason, 2 T. R, 70). But in this case, at the time of the assignment, Maclean had not possession of the documents; nothing was advanced on the faith of them. There is merely a general description of documents expected to arrive, without knowing their contents or how far they might be limited or qualified. The property of the firm in the goods expected was not only subject to special sti-

Digitized by Google

pulations in the contracts of sale in the case of two of the three parcels, but was also subject in all the three to the lien of the unpaid vendors. And can it be contended that before Maclean got possession of the documents, when his firm was in a condition of undoubted insolvency, and the terms of the documents were not disclosed, there was conveyed to the respondents by this assignment the benefit of a prospective breach of trust and violation of contract? There is not a word in the instrument that could be held to convey a greater interest than the assignors had. The power they might afterwards acquire of committing a fraud upon the vendors is not "property, estate, interest, claim, or demand, legal or equitable." "It is," says Sir Edward Coke, "a general rule that whensoever the words of a deed or of the parties without deed may have a double intendment, and the one standeth with law and right, and the other is wrongful and against law, the intendment that standeth with law shall be taken." (Co. Litt., 42 a.) *Constructio legis non facit injuriam;* as it is pithily said in the passage from the Touchstone referred to by Sir Roundell Palmer in his able argument: "The law in its genuine construction prefers a less estate by right to a larger estate by wrong."

The rule that words shall be construed most strongly against him who uses them gives place to a higher rule; higher because it has a moral element, that the construction shall not be such as to work a wrong. The lien of the unpaid vendor is allowed by law for the very purpose of protecting him against the insolvency of the vendee; and the assignment in this case, which left the assignors in insolvency, even if it could be said that it did not find them so, would be sufficient to originate the very right, which according to the argument for the respondents, it is also sufficient to extinguish.

In the case of Spalding *v.* Ruding (6th Beav., 376), the vendor's right was asserted as against property which had so far passed into the hands of the consignee that he was enabled by mortgage of the bills of lading to pass the interest in the goods to the extent of that mortgage; the right of stoppage *in transitu* was upheld as against the surplus, in preference to a claim of the mortgagee to apply it to liquidate the balance of a general account. This (as Vice-Chancellor Wood observes in the case already referred to on the question of *transitus*) was in some degree an extension of what was supposed to be the right of the consignor, and it shows the desire to give this right a full and equitable protection.

Doubtless the vendor's claim cannot prevail against the claim of a transferee for value given on the faith of a negotiable security fairly and honestly taken; to the extent to which he has so given value he has a prior claim. But the rule is founded on the reason of it, as already explained; *cessante ratione, cessat ipsa lex.* Where there is no advance made or value given upon the faith of the documents; where the object is simply by a sweeping clause to gather in whatever may be got to recoup the creditor of a debtor who had become insolvent, for an improvident advance made upon the faith of a totally different security; where, upon the true construction of the assignment, no interest passed that would place the assignee in a better position than the assignor, and the bills of lading which subsequently came to hand were transferred expressly in performance of the agreement in this assignment and without other consideration whatsoever, it appears to their lordships that such a transfer so made, and under such circumstances, cannot be held sufficient to defeat the vendor's claim.

Their lordships therefore are of opinion that the Chief Justice ought to have nonsuited the plaintiffs, inasmuch as, upon their evidence, it did not appear that they had acquired a property in the goods sufficient to sustain the action of trover for the conversion alleged, which took place after the assertion of the right of stoppage. They will therefore recommend Her Majesty that the order appealed against should be set aside, together with the verdict found for the respondents, and that a judgment of a nonsuit should be entered.

The appellants to have their costs of this appeal.

Agents for appellants: Messrs. Reed, Phelps, and Sedgwick. Agent for respondents: Mr. Ambrose Parsons.

---

MONDAY, FEBRUARY 22.

**Present**—Sir C. J. Selwyn, Sir G. M. Giffard, Sir J. Colvill, and Sir Lawrence Peel.

IN RE GEORGE LYALL.

On the 19th of June last Mr. George Lyall obtained leave from the Judicial Committee to enter and prosecute his appeal from the adjudication in bankruptcy, on the 23rd of May, 1867, in the Supreme Court of Hong Kong, whereby, it will be recollected, the three partners, George Lyall, Charles Frederic Still, and George Francis Maclean, constituting the firm of Lyall, Still, and Co. in Hong Kong, were adjudged bankrupt.

Mr. Lyall wishes to set aside the bankruptcy in Hong Kong as against himself, and is prosecuting his appeal with that view. The present application was for liberty to add the names of the assignees in bankruptcy in Hong Kong as parties respondent to the petition of appeal.

Some difficulty arose in consequence of a change in the assignees, and the petition omitting to state the names proposed to be added, but ultimately leave was given to add the name of Mr. F. S. Huffam, with liberty to amend if it should turn out that he was not the official assignee.

The facts in connection with this appeal appear to be these:—Mr. Lyall was in England at the time of the adjudication of bankruptcy in Hong Kong, and never personally surrendered there, but he sent out a power of attorney authorising a declaration of insolvency or bankruptcy to be made in his name, and other acts, having in view the winding up of the affairs of the firm.

Before this power could have reached Hong Kong proceedings in bankruptcy were taken in England against Mr. Lyall, and on the 18th April, 1867, he was adjudged bankrupt by the Court of Bankruptcy in London, and it is said that the power of attorney was thereby revoked, and all action taken under it invalid.

Under the provisions of the Colonial Bankruptcy Ordinance of 1864, Mr. Lyall might be exposed to serious pains and penalties for not surrendering, and he could not dispute the validity of the adjudication unless he commenced some proceeding for the purpose of having it annulled within twelve months after the advertisement of the bankruptcy in the *Hong Kong Government Gazette.* Hence the appeal, for which leave was asked so long ago as November, 1867, although no order was made until June last.

It is understood that Mr. Lyall does not wish to affect the adjudication so far as Messrs. Still and Maclean are concerned, but being apprehensive that neither himself nor his consignments would be safe in China, in the present state of the bankruptcy proceedings there, he wishes to be freed from them.

The effect of annulling the adjudication might be to disturb the title to property in China, sold by the official assignee on the faith of the adjudication being good; it is necessary, therefore, that he should be a party to the appeal.

Agents for the petitioner, Messrs. Lawrence, Plews, Boyer, and Baker.

Agent for respondent G. F. Maclean, Mr. Ambrose Parsons.

## DURHAM ASSIZES.

A CHINA CLIPPER CAPSIZED IN SUNDERLAND DOCK.—HAY AND OTHERS V. THE RIVER WEAR COMMISSIONERS.

(Before Mr. Justice Brett.)

This action was brought by the plaintiffs to recover compensation for damage done to the *Coral Nymph* (the well-known China clipper), on the 22nd of January last, which capsized in No. 1 graving dock at Sunderland, owing, it was alleged, to defendants' negligence.

Mr. Manisty, Q.C., and Mr. Shields appeared for the plaintiffs; and Mr. Quain, Q.C., and Mr. Kemplay for the defendants.

The evidence for the plaintiffs went to show that Mr. Simpson, the dockmaster, took charge of docking and undocking ships, and that he had been cautioned on several occasions to put sixty tons of coals, which had been purchased by the plaintiffs, on board, before attempting to take the *Coral Nymph* out of the dock. He had, however, only put fourteen tons on board, and, on the water being admitted to the dock, the ship capsized. In cross-examination, however, it came out that ships were taken out and in the dock by men employed for the purpose by either the owners of the vessel or shipwrights, and that the dockmaster merely gave a general superintendence.

For the defendants, Mr. Simpson was called, and he stated that on the night previous to the accident he had told Captain Winchester, master of the *Coral Nymph*, that the coals ordered had not arrived. The latter said she must come out, coals or no coals, the following morning, and that they could steady her with the booms and the topsail halyards. Fourteen tons of coals were put on board, the remainder of the sixty tons not having arrived. The booms, however, could not be got into the dock, but a rope was run out from the topsailyard to a block on a quay. This, however, gave way, and led, according to Mr. Simpson's statement, to the ship canting.

His Lordship having summed up, the jury returned a verdict for the defendants.

---

# MISCELLANEOUS.

HOW WE SHALL TRAVEL ON THE PACIFIC RAILROAD.—In *All the Year Round* we find an excellent article on the Pacific Railways, wherein is the following seductive, but we fear somewhat too fanciful picture of the way in which the traveller of the future will cross the American continent:—"If you journey from St. Louis to San Francisco you will enter the train at St. Louis, and you need not leave it until you can see the Pacific rolling at your feet You may sleep in luxurious state-rooms, your feet cushioned with the best Brussels carpets, your water service complete, your linen of the finest, your toilet conveniences without a want. By day you will have drawing-rooms, where, on the most yielding of sofas and fauteuils, you may lounge the daylight hours away over books. When hunger calls, you may repair to a sumptuous *salle a manger*, and at a fixed tariff regale yourself with the choicest viands of the season—especially the rich wild game of the western forests — made yet more palatable by genuine chateaux Margaux or Chablis, or the pure young wines of the Californian hillsides. No comfort to be found in the best American hotels is to be absent. If you emerge from your carriage at a quiet far western station, it will be rather to admire the primeval landscape, and take a glimpse of the recent settlements, than to gobble down a half-cooked dinner in a quarter of the time necessary to its consumption. You will have all the delights of the Atlantic voyage without its distresses; and you may actually write your great work of travel, which is to give Europe new light on the western world, *en route.* And the expense of travelling thus luxuriously will be less than it now costs the poor emigrant to make his weary way across the seemingly boundless plains.

THE COLONIAL SOCIETY.—The inaugural dinner of the Colonial Society is to take place on the 10th instant, at Willis's Rooms; the president of the Society, Viscount Bury, will take the chair. Among those who have promised to be present are the Prime Minister and Earl Granville, the Secretary for the Colonies. The society has been formed with the special objects of protecting the interests of our colonial possessions, and of affording means of intercommunication between persons especially interested in those places.

A LETTER recently addressed to *Le Nord* from St. Petersburg states that a Chinese deputation is expected in the Russian capital, coming with the object of soliciting the concession of a railway extending the Russian system to the borders of the Chinese Empire.

AT the Levée which took place on Friday, the 5th inst., Mr. P. J. Hughes, H B.M. Consul at Kiukiang, was presented to Her Majesty by Lord Clarendon.

Digitized by Google

# Monetary and Commercial.

The appeal to the Privy Council against the decision of the Hong Kong Supreme Court in the *Min* case has been decided against the respondents with costs. A petition to set aside the bankruptcy of Mr. George Lyall is now before the Judicial Committee.

Mr. H. G. Gordon has resigned his seat at the board of the Ceylon Company (Limited), the directors of which, on accepting the resignation, expressed their "unabated confidence in his honour and integrity."

A further call of £5 per share has been made by the official liquidators of the Bank of Hindustan, China, and Japan.

The Master of the Rolls has sanctioned the payment of a first dividend of 12s. 6d. in the pound to the creditors of the China Steamship and Labuan Coal Company (Limited), and the same will be payable by the liquidators, at the offices of Messrs. Harding, Whinney, Gibbons, and Co., on the 1st of March.

The unsatisfactory state of the trade of Lancashire leads to the repeated announcement of small failures. The stoppage of Mr. George Black, a manufacturer, has been notified. A meeting was held also of the creditors of Mr. W. S. Sawyer, a yarn agent, with liabilities for £13,720, and assets £7,890. In the case of Messrs. R. Watson and Co., of Church, near Accrington, and of Warrington, it is feared the liabilities will reach about £100,000. The assets will depend upon the realisation of debts, &c.

Manchester advices announce the stoppage of Mr. John Pennington, spinner and manufacturer, of Colne, with liabilities estimated at £55,000, and assets at £25,000. At an adjourned meeting of the creditors of Messrs. John Sparrow and Co. it was resolved to accept a composition of 6s. 8d. in the pound, a previous offer of 5s. being refused.

The failure of Messrs. Adam and Co., of Glasgow, Batavia merchants, for £70,000, has been announced, and it is stated that a considerable portion of their liabilities will fall on Manchester.

According to a document just issued in Madrid, the production of sugar in the Philippine Islands, which in 1858 was 557,000 piculs, and in 1859 832,000, was in 1867 about 1,300,000 piculs, and in 1868, 1,650,000. About half the latter quantity came to England. In 1868, in addition to sugar, the Philippines exported 465,000 piculs of hemp, 47,000 of coffee, and large quantities of indigo, hides, cigars, &c.

At the meeting of the Telegraph Construction and Maintenance Company, the report recommending a dividend of 10 per cent. for the year was adopted. The retiring directors (Sir D. Gooch and Mr. John Pender) were re-elected. It was stated the company had in hand contracts for 7,200 miles of cable.

Mr. Thomas B. Green, whose circular announcing that he has established himself as a public tea inspector we have already noticed, has issued a second circular (dated 84, Great Tower-street, E.C.), announcing that he is now prepared to characterise and value, as well as to inspect, parcels of tea.

A moderate amount of Mexican dollars (including those brought by the West India packet), has been disposed of at 59¾d., being an advance of ⅛d. upon the last rate. Bar silver is flat, the demand for India having for the moment subsided.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton, on the 20th instant, was—in gold, to Bombay, £18,350; to Madras, £9,151; to Calcutta, £4,985; in silver, to Bombay, £15,930; to Singapore, £24,400; to Hong Kong, £24,740; to Shangai, £17,440; total in gold, £32,486; in silver, £82,510.

The amount of bullion by the P. and O. Company's steamer Bangalore, on the 6th inst., was—in gold, to Galle, £1,116; to Bombay, £11,000; to Madras, £16,817; in silver—to Bombay, £4,000; to Singapore, £14,891; to Hong Kong, £24,944; to Shanghai, £36,840; to Yokohama, £1,820—total in gold, £28,933; in silver, £82,495.

## BOARD OF TRADE RETURNS.

After a considerable delay the Board of Trade Returns for the month and twelve months ended 31st December, 1868, have been issued. The following shows the exports of British and Irish produce and manufactures for December in the last three years:—December, 1866, £14,914,563; December, 1867, £13,252,593; December, 1868, £14,638,990. It will be seen from the foregoing that in December the export trade experienced a revival whereby it nearly regained the level noticed in December, 1866. The annexed statement of the exports for the entire twelve months, however, shows that even with this recovery the aggregate of 1867 was not quite regained, while, compared with the year 1866, the past year showed a falling off of about nine and a half millions sterling—a falling off, however, more noticeable in values than in quantities. The figures stand as follows:—Twelve months 1866, £188,917,536; twelve months 1867, £180,961,923; twelve months 1868, £179,463,644; showing, with regard to 1868, a reduction of about ¾ per cent. from the total of the preceding year, and of about 5 per cent. from 1866. Although business was without animation, much general steadiness prevailed, none of its branches showing any wide variation. Thus the principal instances of decrease have been cotton yarns, 1 per cent. (but with an increase of 3 per cent. in quantity); cotton manufactures, 5½ per cent. (with an increase of nearly 5 per cent. in quantity); hardware, 2½ per cent.; beer and ale, 2½ per cent.; coal, about ¾ per cent.; linen yarn, 6 per cent.; linen manufactures, 5 per cent. (with an increase in quantity of about 3 per cent.), and woollen manufactures about 3 per cent. (with an increase in quantity of about 12 per cent.). In the iron trade the value of our shipments has been about fifteen millions, which is almost exactly the same as in 1867 Silk manufactures show an increase of 5 per cent., and in the large number of articles classed as "unenumerated," and which amount in value to nine millions, there has likewise been an increase of 5 per cent.

With regard to the import trade, a distinct revival was observable in November, that being the latest date to which, owing to the disgraceful delays in the Statistical or other departments, the values of imports are given. The following are the figures:—November, 1866, £18,967,881; November, 1867, £16,748,563; November, 1868, £20,079,214. For the eleven months ended 30th November the figures exhibit the following totals:—1866, £225,236,103; 1867, £208,526,055; 1868, £217,520,365. For December, 1868, the *quantities* of imports are given, and here the chief feature is the increase in cotton, as shown below:—December, 1866, 1,040,305 cwts.; December, 1867, 1,119,732 cwts.; December, 1868, 1,584,482 cwts.

We annex a summary of those figures which relate to our Import and Export trade with China and other countries in the Far East:—

## IMPORTS.

### TEA.

| | 1866. | 1867. | 1868. |
|---|---|---|---|
| Quantity for the month ended 31st December... lbs. | 15,487,873 | 22,482,967 | 33,771,265 |
| Quantity for the twelve months ending 31st December lbs. | 139,610,044 | 128,028,726 | 154,845,863 |
| Value for the month ended 30th November | £1,734,584 | £1,632,888 | £1,407,152 |

The import of Tea for December 1868, above stated, includes about 16,000,000 lbs. the cargoes of several ships which arrived late in November, the amounts of which had not been ascertained when the returns for that month were made up.

## THE TEA TRADE.

The following further communication from Mr. Sillar regarding the tea trade is well worthy of attention. The subject is one that wants ventilating. It appears to us that if shippers of tea in China and importers of the article in London knew a little more than they do of the "tricks of the trade," they would experience less difficulty than at present in understanding how it is that "tea shipments do not pay." Importers are at present the victims of a thoroughly vicious system, which must be broken up sooner or later—the sooner the better; and all who raise their voices to demand the needful reform will do service in a good cause.

SIR,—While thanking you for having allowed the attention of the trade to be directed by means of your columns to the want of early and correct statistical information, I now beg leave to trespass still further upon your space to lay before those interested one or two of the abuses known under the name of "Trade Customs," which have silently crept in, and are slowly, but certainly, undermining and destroying this important and once prosperous branch of the China trade.

I allude, firstly, to the practice of allowing the buyer 1½ per cent. upon the purchase money. Thus, if the buyer pays for any teas before the expiration of three months from the date of purchase, he can claim usury at the rate of 5 per cent. per annum for the number of days to run before the expiration of the prompt. The practice of the trade is for the seller to hold the warrants until the buyer hands him a cheque for the amount, when he gives them over to the buyer. Now what right has the buyer to claim usury for his money when the seller gets none for his tea? I presume that originally the buyer was not called upon to pay for his purchases if he could not conveniently do so, for three months, as an act of grace. Now he claims usury at the rate of 5 per cent. per annum if he pays before that time.

Secondly.—The importer receives payment for from 2 to 4 per cent. less weight than he actually gives according to the Queen's weights, and upon which duty is charged by Government. These may appear small matters, but they amount to no less a sum in sterling money than £600,000 to £700,000, which is taken every season from the importers and given to the dealers.

There are many more abuses in the trade, such as the "knock out" or "jobbing" system pursued at the public sales, which call for reform, and which tell severely against the importer, so much so that he has now become not only the servant of the buyer, but actually his slave. In hopes that these matters may be taken up by my fellow brokers, whose duty it is to hold the scales of justice between buyer and seller,

—I am, &c.,

J. C. SILLAR.

84, Great Tower-street, E.C., March 2.

# LONDON PRICES CURRENT.

Articles in the following list subject to duty are quoted with the duties paid as annexed, unless marked "in bond." Those articles against which no rate of duty is placed are admitted free.

NOTE.—Besides the duties of Customs payable on certain articles as mentioned below, an addition of ¼ per cent. in the said rates is also payable on entry for consumption, except Tobacco, on which the extra duty is five per cent. and ⅛ per cent.

RAINBOW, Penang to Boston, Feb. 2, 25 N., 65 W.

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports still continue low, with but little doing; coal freights from the Northern outports show no signs of improvement.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight, 45s. meast. To Nagasaki: 45s. weight, 50s. meast. To Tientsin: 50s. meast. To Newchwang: 55s. meast. To Shanghai: 40s. weight, 45s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or meast. To Penang: 30s. weight or meast. To Ceylon: 20s. to 25s. weight, 25s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £40. For Shanghai: £43. For Hong Kong: £30. For Singapore: £25. For Galle: £24. From Newport, Cardiff, or Swansea per ton.—For Hong Kong: £1 15s. For Manila: £1 15s. For Singapore: £1 6s. For Galle: £1 5s.

The Admiralty have invited tenders for the conveyance of 212 tons (Naval Boilers) and 950 hogsheads malt liquor from England to Hong Kong; 138 tons stores to Trincomalee, and 8 tons meast. stores to Colombo.

## CASUALTIES.

Advice from Capetown, dated Jan. 30, state that the Henrietta Gerardina Susanna, Dam, from Batavia to Rotterdam, put into Simon's Bay, Jan. 5, leaky, and with loss of sails; she had experienced a continuance of bad weather, and while at sea was making 13 inches water per hour.

The Clara Babuyan, which sailed from Sunderland, Feb. 4, for Shanghai, arrived at Deal Feb. 14, with loss of longboat, casks, and bulwarks, cargo shifted, and other damage.

A telegram from Vigo, dated Feb. 16, states that 600 packages had been saved, ex Cinco Hermanos, from Liverpool to Manila, wrecked off Cape de Mar, Vigo Bay, and that the salvage was progressing favourably.

The Dunmail, Thompson, from London to Hong Kong, which was off the North Foreland, Feb. 12, with crew refusing to proceed, has put back to the Victoria Docks, with loss of bowsprit, foreyard and foreroyalmast, having been in collision.

The Whirlwind (ship), bound to Shanghai, and the Herald of the Morning, bound to Singapore, both from Glasgow, were in collision, Feb. 13, at the tail of the Bank, Greenock; the mizentopmasthead of the former vessel was carried away, and the latter was slightly injured, and had to be taken into the Victoria harbour for repairs.

The Glenclune, Harvey, from Cardiff, to Japan, which vessel arrived at Waterford, Feb. 17, had lost anchor and part of chain off Creden Head.

The Resolute, Holt, from Shanghai, which arrived at New York, Feb. 6, had lost sails during a heavy W.S.W. gale, Dec. 9, in 37 S., 24 E., and was detained seventeen days off Cape of Good Hope with heavy W. gales.

Advices from Lisbon, dated Feb. 20, state that the H. J. Burton, Burton, from Rotterdam to Batavia, had put in there, Feb. 12, with loss of mainboom, and was discharging.

The Henrietta Gerardina Susanna, Dam, from Batavia to Rotterdam, which put into Simon's Bay Jan. 5, leaky, and with loss of sails, had been surveyed, and would discharge the cargo in the between decks to repair.

The Australia, Ertman, from Penarth Docks to Yokohama, arrived at Plymouth Feb. 27, leaky.

The Whirlwind, Graham, from Glasgow to Shanghai, which was in collision, Feb. 13, at the tail of the Bank, Greenock, and sailed from the Clyde Feb. 22, after repairing, has put into Dartmouth, leaky, and with other damage.

The Tartar, Bush, which sailed from Cardiff, Feb. 13, for Shanghai, put into Falmouth, March 4, having lost figurehead, cutwater, and bulwarks, and split sails, &c., March 2, when off Trevose Head.

## MISCELLANEOUS.

## LAUNCHES.

The new iron ship Kildonan, of 730 tons, A 1 at Lloyd's, and 20 years in Liverpool Registry, was launched on the 1st inst. by Messrs. Alexander Stephen and Sons from their works at Kelvinhaugh. This fine ship is owned by Messrs. William Ross and Co., of Glasgow, and is to be employed in the San Francisco and East Indian trade. The ceremony of naming was performed by Mrs. Donald Mackay, of Toronto.

There was launched on the 27th ult., from the building-yard of Messrs. Bowdler, Chaffer, and Co., of Seacombe, an iron sailing ship, of 1,300 tons register tonnage, named the Kirkwood, and intended for the Calcutta trade. This vessel will take the highest class in both Lloyd's and the Underwriters' book, and is built in excess of the requirements of either. The owner of the vessel is Joseph Steel, Esq., of Liverpool. This is the third vessel built by this firm for the same owner.

On the 27th ultimo, from the shipbuilding-yard of Mr. William Harkess, Middlesborough-on-Tees, the barque Elizabeth Graham, a very fine specimen of the composite build, she being a sister ship to the Alice Graham. The following are her dimensions:—167 feet over all, 29 feet extreme breadth, 18 feet hold, classed A 1 14 years Lloyd's. She is bound to Madras, and the owner is William Graham, Esq., of Newport, Monmouthshire. The day was fine, and a large company assembled to witness the ceremony.

From the yard of Messrs. Oswald and Co., Pallion, near Sunderland, on the 27th of February, an iron sailing ship, classed AA at Lloyd's, and twenty years Liverpool book. Dimensions:—210 feet between perpendiculars by 36 feet by 22; 1,200 tons register. Has been built for Messrs. Charles Saunders and Co., of Liverpool, for the India trade.

There has been launched from the west shipbuilding-yard of Messrs. Charles Connell and Co., at Overnewton, Glasgow, a composite sailing ship, of 1,174 tons, named the County of Forfar, to class 16 years A 1 at Lloyd's. She is owned by Messrs. R. and J. Craig, shipowners, Glasgow, and is intended for the Java line of packets.

On the 25th ult. Messrs. Robertson and Co. launched, on the Clyde, an iron sailing barque, named the Lucayas, of about 540 tons O.M., for Messrs. M'Arthur, M'Lean and Co., of Glasgow. She is built to class AA 1 Lloyds, and is rigged with double topsailyards, with which are combined all the recent improvements. Her lower masts, bowsprit, and lower yards are of iron, and she was safely launched with lower masts and topmasts standing, notwithstanding the heavy wind blowing at the time.

There was launched, 27th ult., from the building-yard of Messrs. Thwaites, Shoreham, a finely-moulded and burthensome brig, of the following dimensions:—Length, 121 feet; breadth, 26 feet 3 inches; depth, 14 feet 9 inches; 294 tons. The vessel, as she glided into the water, was christened the Merchant, and is the property of Mr. John Sharp; to be commanded by Mr. William H. Mitchell.

HOLLOWAY'S OINTMENT and PILLS.—MODERN SCIENCE.—The time is not remote when all skin diseases were pronounced to be incurable, but, happily for all such sufferers at the present day, the use of Holloway's noble remedies will speedily dispel this discouraging delusion. Scrofulous sores, strumous affections, and inflammations yield a ready obedience to the cooling, rectifying, and strengthening properties of this Ointment and these purifying Pills. Their accompanying directions will enable every one to apply these remedies to the best advantage. A main point in favour of using Holloway's medicaments in constitutional complaints lies in the fact of their power to purify without interfering with established habits or weakening the frame.

| London Agency . . . | LONDON & CHINA TELEGRAPH OFFICE, 2, Cowper's-court, Cornhill. |
| Head Office . . . . | KIACHTA, ORIENTAL SIBERIA, C. MITCHELL GRANT, Proprietor. |

I have the pleasure to report to those interested in GRANT'S TRANS-MONGOLIAN TELEGRAMS SERVICE that the Line has realised during the past year the anticipations which I formed on issuing my last circular. The couriers have run with great regularity during the whole of the season, the average time between Tientsin and Kiachta being under twelve days. In many instances Telegrams from Shanghai have been delivered in London in seventeen days.

New contracts have been concluded for the Season of 1869.

The contract time from Kiachta to Tientsin is ELEVEN DAYS! a speed never yet attained by either the Chinese or Russian Governments between these two towns.

The Director General of the Telegraph Department, St. Petersburg, has given stringent instructions regarding all Telegrams addressed to my care. In future they will always be REPEATED as in "recommended" Telegrams without extra charge.

The community of Hong Kong can now take advantage of this line to reply to Telegrams or Letters received by the P. and O. Mail Service from Europe. A Telegram bag will be made up at Shanghai on the arrival of each P. and O. Mail Steamer from Hong Kong, and Telegrams from Europe will be forwarded by first steamer from Shanghai.

I have to thank my constituents for the increased support they have given to my line, and in order that it may be still further used, it is my intention to reduce the charges so soon as the capital due to subscribers has been paid up.

KIACHTA, December 31st, 1868. **C. MITCHELL GRANT.**

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships, and repair and refit of STEAM MACHINERY AND BOILERS.

Their large Granite Dock is 307 feet in length, fitted with a caisson-gate, and with a centrifugal steam pump of great power, ensuring despatch in all states of the tides. At average spring tides this dock can receive vessels drawing 16 to 17 feet, and during the autumn and winter months 18 feet. Their two smaller docks, also built of granite, can receive vessels drawing 12 to 13 feet.

The premises comprise a large smithy and boiler shop, carpenters and boat-builders' shops, an

ENGINEERS' WORKSHOP,

fitted with lathes and tools driven by steam,

AN IRON FOUNDRY

for castings up to 5 tons weight, and a BRASS FOUNDRY.

The different departments are superintended by experienced Europeans, viz., engineer, blacksmith, and shipwrights.

The Company keep on hand copper and metal sheathing, spars, timber, paints for iron vessels, and all material for dockyard use.

A DRY GODOWN for reception of stores of vessels requiring to discharge them.

Good quarters for officers of ships under repair in the dock.

Amoy, 16th December, 1867.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

The best course of education will be combined with all the advantages of a comfortable home. The house and garden are large, and in the neighbourhood of the Crystal Palace. Terms, £100 per annum each.

Address "T.," "London and China Telegraph" Office 2, Cowper's-court, Cornhill. Unexceptionable references given and required.

## ROBERT COCKS AND Co's NEW MUSIC.

THREE NEW BALLADS, by Mr. WRIGHTON.

No. 1. SHE SANG AMONG THE FLOWERS.
No. 2. GRIEVE NOT FOR ME.
No. 3. THEY ARE COME, THE PALE PRIMROSES.

3s. each; free by post for 19 stamps each.

"'She Sang among the Flowers' is one of the best of Mr. Wrighton's ballads; our musical readers will not regret adding this pretty ballad to their folios."—Vide Bath and Cheltenham Gazette.

"Full of rich varieties, beauties, and expression."—Vide Court Circular.

"We have not for a long time met with a more gay, sparkling, and joyous song."—Vide Bayswater Chronicle.

"'Grieve not for me'—A good song, with an expressive melody, and very appropriate accompaniment."—Vide Scotsman.

"M. Wrighton deserves much credit for having wedded the words of this pretty song to music so successfully."—Vide Berwick Warder.

"'They are Come, the Pale Primroses.'—This song only requires to be known to become popular; it is set to a very pretty little melody."—Vide the Press.

THE SNOW LIES WHITE (An Old Wife's Song), poetry by Jean Ingelow, music by Miss M. LINDSAY (Mrs J. W. Bliss) 3s.; free by post 19 stamps.

NEW VOCAL DUETS, by the Author and Composer of "What are the Wild Waves Saying?"—No. 1, "Let us Roam," and No. 2, 'The Beautiful and True." 3s. each; free for 19 stamps each.

THE FLOWER GATHERERS. Vocal Duet. By the Author and Composer of "What are the Wild Waves Saying?" 4s.; free by post 25 stamps. "This cannot fail to be a favourite duet."—Vide Dublin Express.

HAMILTON'S MODERN INSTRUCTIONS for the PIANO. 659th Edition. 70 large folio pages. 4s.—Order of all musicsellers and booksellers.

MEDICINE JACK. Serio-Comic Song. Written and Composed by ALFRED SCOTT GATTY. Illustrated 3s.; free by post, 19 stamps.

OH! YE TEARS, OH! YE TEARS, THAT HAVE LONG REFUSED TO FLOW. Song. Words by CHARLES MACKAY. Music by FRANZ ABT. No. 1 in C. No. 2 in D. The same for two voices. Ditto, Piano Solo, by GEO. F. WEST. Each 3s., free by post for 19 stamps each.

ONE HUNDRED NEW MUSICAL WORKS, consisting of Songs, Vocal Duets, Piano Solos, Duets and Dances. The list may be had gratis and post free of the Publishers.

London: ROBERT COCKS and Co., New Burlington-street, and of all Musicsellers.

# TANJONG PAGAR DOCK COMPANY

(LIMITED).

## VICTORIA DOCK, SINGAPORE.

This Company's Granite DRY DOCK, 450 feet in length, 65 feet width of entrance, and 20 feet depth of water on the sill, was OPENED on the 17th inst. In the high tides of the North-East Monsoon there will be a foot to eighteen inches more water.

In connection with the Dock is a complete range of workshops, fitted with steam machinery, driving all descriptions of engineers' tools required in the construction and repair of vessels and machinery, and a foundry for iron and brass castings.

The Company's extensive Wharves and Godowns for receiving and storing cargo immediately adjoin the Dock.

Having an efficient European staff in each department, the Company is now in a position to guarantee the best workmanship, executed with every possible despatch, as well as low rates of charges.

**LONDON AGENTS.**

Messrs. MACTAGGART, TIDMAN, and CO., 34, Great St. Helens.

Singapore, Oct. 24, 1868. E. M. SMITH, Manager.

---

No. 22, Great St. Helen's, E.C.

STEAM TO JAPAN.—To leave the East India Docks on the 10th March, with leave to call at St. Vincent, the Cape, and Singapore, to coal for Yokohama and Hiogo, the splendid new composite screw steamer C. J. TEXTOR, A1 16 years at Lloyds, 690 tons register. This fine high-classed vessel has beautiful accommodation for cabin passengers, and presents an unusually good opportunity to shippers, as she will steam the whole way out.

For Freight or Passage, apply to GELLATLY, HANKEY, SEWELL, and Co., 8, York-street, Manchester; or 27, Leadenhall-street, London, E.C.

BOMBAY DIRECT (under engagement to the Council of India), the magnificent iron clipper ship COLDINGHAME, AA1 (owned by Messrs. John Willis and Son, 1,072 tons register, J. M. WHYTE, Commander; loading in the East India Docks. This beautiful vessel, built in 1866, offers a most desirable opportunity to shippers requiring despatch.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 8, York-street, Manchester; or 27, Leadenhall-street, E.C.

With despatch.

FOR SHANGHAI, the splendid Clyde-built Clipper TAMERLANE, AA1, 764 tonsregister; G. P. WILSON, Commander; East India Docks. This well-known ship is celebrated for her rapid passages.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, E.C.

To follow the "Sarah Watson." Will meet with the usual quick despatch.

DIRECT for COLOMBO, the beautiful clipper ship WAR CLOUD, A1 10 years, 406 tons register: JOSEPH IRVINE, Commander; West India Docks. This magnificent vessel is considered one of the fastest afloat, her last passage from Colombo being eighty-eight days and offers a most desirable opportunity to shippers of fine goods, as she will not carry creosoted sleepers, or manure of any description.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Will meet with Quick Despatch, having the greater part of her Cargo engaged.

FOR POINT DE GALLE, CEYLON (with leave to call at Trincomalee), the beautiful clipper ship DOROTHY, A1 9 years, 310 tons register; W. DAVIES, Commander; West India Docks. This magnificent vessel is considered one of the fastest afloat, and offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage, apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "War Cloud." Will meet with the usual quick despatch.

DIRECT FOR COLOMBO, the beautiful clipper ship, PASSOVER, A1 10 years, 456 tons register; MATTHEW PEARSON, Commander; West India Docks. This splendid vessel, built in 1868, is considered one of the fastest afloat, and offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

FOR SHANGHAI DIRECT (having the greater portion of her cargo engaged, will be immediately despatched), the clipper ship STANLEY CASTLE, A1 10 years, 443 tons register, D. M'DOUGALL, Commander; loading in the East India Docks. This splendid vessel, built in 1868, especially for the China trade, has proved herself well adapted for it.

For Freight or Passage, apply to the owners, Messrs. PORTER, RIXON, and Co., 63, Fenchurch-street, E.C., or to NORRIS and JOYNER, 60, Cornhill, E.C.

### THE MAILS, &c.

The present mail is delivered with the usual punctuality of the P. and O. Company's service. The next homeward mail will be either the English leaving Hong Kong on the 23rd, or the French leaving about the 25th of February; the two may very likely be delivered together, but this we trust will be the last time. Telegrams in advance of the former were received here on the 19th, being nine days in transmission from Galle. *Via* Kiachta, Shanghai telegrams have been received in eighteen days.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles per P. and O. steamer *Peru*, arrived March 20.—From Shanghai: Mr. Hyde. From Hong Kong: Mr. Paterson, Mr. Levy, and three second-class passengers. From Singapore: Mr. and Mrs. Young, child, and servant, Miss Powell, Dr Robertson, and three second-class passengers. From Batavia: Mr. Wickers, and one second-class passenger. From Ceylon: Bishop of Colombo, Mrs. Claughton, Mr. Temple, Mrs. Temple, child, and servant.

By last mail to Southampton per P. and O. steamer *Ceylon*, arrived March 15.—From Shanghai: Mr H. Hargreaves. From Hong Kong: Commander Theobald, Mr. Wise, and one second-class passenger. From Singapore: Capt. Foord. From Galle: Mr. Millie. From Ceylon: Mr. Wood.

### PASSENGERS OUTWARD.

Per French mail steamer *Said*, from Marseilles, March 20.—(Booked from London): None.

Per P. and O. steamer *Tanjore*, from Southampton, March 20.—To Yokohama: Mr J. H. Longford. To Shanghai: Mr. H. R. Hearne, Mr. E. H. Parker, Mr. W. D. Spence, Mr. T. L. Bullock, Mr. W. S. Ayrton, Mr. R. Gardner. To Singapore: Mr. W. H. Newman. To Ceylon: Miss Hardy, Mr. R. W. W. Dickson.

Per P. and O. steamer *Ripon*, from Marseilles, March 28.—To Shanghai: Mr. A. Thurburn, Mr J. T. Brand, Mr. J. J Kelly, Mr. J. G. Weston, Mr. C. Lucas, Mr. C. Rainbow. To Hong Kong: Mr. W. M. Gilman, Mr. H. Lawrence, Mr. Marcus Daly, Mr. and Mrs F. Luddeke, Mr. W. P. Galton, Capt. Hon. A. Denison, Mr. J. Fearon Mr. and Mrs. Larken, Mr. Kinnear, Mr. John Macgregor, Mr. Lay. To Singapore: Mr. and Mrs. Oscar Mooyer, Mr. and Mrs. W. C. Hannay, Mr. H. Buchanan. To Batavia: Mr. D. N. Meyners. To Ceylon: Mr. David Wilson, Mr. Thomas Clark.

Per P. and O. steamer from Southampton, April 3.—To Shanghai: Mr. W. H. Gracie. To Ceylon: Mr. and Mrs. J. Norcott D'Esterre and three children, Staff Assistant Surgeon Eager, Mr. B. F Hartshorne, Miss Gale.

Per P. and O. steamer, from Marseilles, April 11.—To Shanghai: Mr. J. A. Hawes, Mr. J. Porter.

Per P. and O. steamer from Southampton, April 17.—To Hong Kong: Miss Woodhouse.

Per P. and O. steamer from Suez, May 2.—To Yokohama: Mr. Thomas Thomas

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

From this port our advices by the present mail are to Jan. 27. No later mails had arrived out than those of Nov. 18 and 20, received together on Jan. 13.

The *Japan Times* gives the following summary of news:—

On the 30th inst. H.I.M. the Mikado left Yedo for Kioto, whither he goes to perform certain necessary rites in honour of the *manes* of his deceased father, and thereafter to take unto himself a wife. His progress was unattended by the same state as had distinguished it on the occasion of his coming to Yedo in November last, and, though the same accommodation was provided for foreigners as then on the Tokaido, very few residents availed themselves of it. It is stated that his Majesty will return in about a couple of months, and it seems exceedingly probable that Yedo, with its outport of Yokohama, will ultimately become the political and commercial capital of the Empire, for which its geographical position and other circumstances undoubtedly fits it.

There is no doubt that his Majesty's visit to the northern capital has been attended with good results. The whole of the foreign Ministers having formally visited him, they have, in the eyes of the Japanese, given to his Government a pledge of support of no mean value, while his presence in the ancient stronghold of the Tokugawa clan—whose chiefs are quietly settled elsewhere, are officers in his Court, or in exile—has necessarily had its due effect in reconciling so eminently conservative a people as this to the change which has taken place. We may hope soon to see a return of its commercial prosperity to Yedo and a revival of our own trade.

The only obstacle to the complete restoration of public confidence is now the presence in Hakodadi and one or two other places in Yedo, of Enomoto and his companions, of whose submission we have not yet heard. They are said to be strongly fortifying the port of Hakodadi, under the directions of the French officers who have thrown in their lot so foolishly with them. All operations against them must be deferred of course till the spring, but the necessary preparations are being made. If the Mikado's forces have to invest Hakodadi, the question will certainly arise whether we too may not, for the full enjoyment of our treaty rights, assist him. Hakodadi is an open port, declared so by solemn engagements between the Government of Japan and the Treaty Powers, and we should have a fair claim to enforce, were we to insist upon its being again opened to us. Being now in the hands of men no better than pirates, it is virtually closed, for they exact customs dues, which foreign merchants cannot legally pay to them, and which they will be liable to pay over again to the Mikado's officers on their re-entry.

Meanwhile, "rebellion has had ill-luck"—they have lost the finest ship of their fleet. The *Kayomaru*, a splendidly-equipped and most solidly-built new Dutch frigate, sold to Japan the year before last, and of which we gave a detailed description on her arrival, has gone to pieces on the coast, a few miles north of Hakodadi. The *Eagle*, another of their best ships, is also reported lost. Should this, too, be confirmed—and Japanese reports of the loss of ships are seldom without foundation—they have received a heavy blow, and the best thing they can do is to submit while they can get fair terms.

The *Japan Herald* says:—"A melancholy occurrence reaches us from the North. Two Russian officers were going to fire a salute with their revolvers in honour of their New Year, when one of them whilst manipulating his weapon accidentally discharged its contents into the head of his friend. The grief of the unintentional homicide was so great that he endeavoured to poison himself, but by antidotes administered to him by the doctor of the *Satellite* there is a chance of his recovery."

Digitized by Google

### NAGASAKI.

The *Nagasaki Times* records the opening of a patent slip, lately constructed under the auspices of Messrs. Glover and Co. An experiment was made on the steamer *Naruto*, which reached her destined position safely fifty minutes after starting. The *Times* says:—"The site for the slip has been well chosen, and looks expressly designed by nature for the purpose; in a small cove, protected from the wind by a hill on each side, with a never-failing stream of fresh water for the use of the machinery. A greater portion of the ways are on the solid rock, it having been necessary to pile only about 150 feet of the deepest portion. They are warranted to support a vessel of 1,200 tons, which we think will be quite sufficient for the requirements of the port." The *Naruto* came off safely, and the *Albion* went on. Several vessels are waiting their turn, so that the financial prospects look well, and we predict a brilliant future for the Nagasaki Patent Slip.

A fire had occurred in the native city, by which about sixty houses were destroyed.

## CHINA.

### TIENTSIN.

The correspondent of the *North China Daily News*, writing under date of 13th January, states that rumours were current that Tso-tsung-tang, generally called conservation Tso-kung-paou, the Governor-General or Shanse and Kansuh, and Commander-in-Chief in those provinces, had suffered two reverses against the Mahomedan rebels, at places somewhere between the city of Yulin-foo, lying 1,753 li from Peking, and straight due east from there to the Hwang-ho, which there separates Shanse from Shense. Tso-tsung-tang, after the Nienfei had been put down in this province last summer, left Peking during the middle of last autumn for his Governor-Generalship, the official place of residence of which is in Langchow-foo, the capital of Kansuh. But he, up to this hour, has never got further on his way to his Yamun than to Sin-gan-fu, the capital of Shense; having, since he entered Shense, been constantly engaged against the Mahomedan rebels, who have for some months back been disturbing that province. It is surmised that it may be the intention of the Mahomedan rebels to enter the province of Chihli by the pass of Kalgan, and rush on Peking, but nothing definite is known as to their organisation, or as to the objects of the rebellion; but as they are now calling the attention of the world to their movements, before long something authentic will be heard in relation to them and their leaders. Common rumour says that a woman, a widow, is the head of the body, and that they have Chinese from all parts of the north in their ranks.

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Feb. 2, 1869.

The London mail of the 4th December, with telegrams to the 28th December, arrived on the 23rd January. This evening we received news of the arrival in Hong Kong of the French mail of the 19th December, bringing telegrams to the 5th ultimo.

The P. and O steamer *Malacca*, which leaves with the mails, &c., to-morrow morning at daylight, carries 481 bales China silk and 613 bales Japans.

The chief event of the fortnight has been the deliberation of the Chamber of Commerce in framing a reply to Sir R. Alcock as to the opening of new ports. I send you the report, to be handled as you see fit.

A case has been heard before Sir Edmund Hornby, sitting in Vice-Admiralty, wherein the question involved was whether the officers and crew of the barque *Alicia Annie*, who had allowed certain salvage claims of theirs to be appropriated towards cancelling a bottomry bond and supplying the vessel with necessaries, could recover the sums thus virtually lent, in precedence of the mortgagee's lien. After hearing the arguments on both sides a decree was granted for the sale of the ship by private contract, the salvage question to be argued on a future day. The question of the priority of wages to the mortgagee's lien was not raised.

The meeting of the French Gas Company, which I mentioned as adjourned in my last, has been held. Overtures were made to the English Company to obtain from them the supply of gas necessary for the French Settlement. But the English gas manufacturers having offered to supply the French Company at the rate of 3 dols. 50 c. per thousand, a delay of eight months being demanded, the latter boldly retorted with an offer to supply the English Company at 2 dols. 25 c., stating that even then it would gain 41 cents per thousand; for, with the privilege of supplying the three Settlements, the French Company calculate on being able to make gas at 1 dol. 84 c. per thousand. At present it produces a very limited quantity, at the cost of 3 dols. 14 c, and sells it at 4 dols. 50 c.

Bitter complaints having recently been made regarding the obstructiveness of the working and trading guilds in Shanghai, the district magistrate has just published a set of rules adopted by the carpenters' guild, into which have been amalgamated the hitherto rival corporations of Ningpo and Canton. The only one of these rules likely to interest foreigners is No. 6, which runs as follows:—

Old hands shall give their best attention to teaching new ones who are deficient in their knowledge of business; and not take them to work in the yards until they are sufficiently instructed. This rule is made because in 1848 all the shipyards gave us a certificate of superior skill and ability, published in the newspapers, and we do not want our reputation injured.

A temperance society has been started here, and already numbers nearly a hundred members. A commodious building has been secured on the Hong Que bund, and a well-stocked library already marks one of the aims of the society. A course of monthly lectures, on literary and scientific subjects, is being organised, and the benefits both of the library and lecture room are to be extended to the public, whether "temperate" or not, on the payment of a small subscription.

The working of the Mixed Court continues to give unmixed dissatisfaction. As an example of its decisions, two boys were recently sentenced to sixty and forty blows respectively, the first for prompting, and the second for executing a daring robbery of several hundred dollars worth of jewellery. This is really offering a premium to crime, and contrasts remarkably with purely Chinese decisions. Thus, a man who stole a child the other day, and sold him, was sentenced by the Chi Hsien to be placed standing in a cage, with his hands tied up, and his head through the top, his toes only touching the ground, and to remain in that position until he died from starvation and exposure. He underwent this torture for one day, but on the petition of the prosecutor, the sentence was then commuted to confinement for a certain period in the cangue.

The creeks in the neighbourhood of Shanghai have lately been the scene of several outrages upon native boats. But within the last few days a foreign house boat was attacked by a body of creek pirates, who, however, were quickly repulsed by the fowling pieces of the party on board. The Taoutai has informed the Consuls that several foreigners have joined with Canton and Ningpo rowdies to scour the creeks, and he therefore begs that for the future passport regulations be strictly enforced.

A meeting of the Royal Asiatic Society was held last evening, when office bearers were chosen for the current year. Mr. Medhurst was elected president, and Mr. Robertson recording secretary.

The question of life risks in Shanghai as compared with those at home is at present under discussion. The facts elicited up to the present seem to point to the conclusion that the annual mortality here is no more than 1·25 per cent., or 0·36 per cent. higher than that given in England as the annual mortality of insured persons of the age of thirty-three years. Assuming the average of age in Shanghai to be thirty-three years, and making allowance for the number of persons who from infancy, advanced age, known delicacy, or irregular habits, would not be accepted by an insurance company, it is fair no assume that the actual death rate is not higher than in England. I can only trust that this will not induce too many persons to flock *all together* to the overstocked labour market of Shanghai.

The French Consul at Ningpo has published a notice warning mariners of an island not laid down in any of the charts, situated in lat. 0.52 S., and lon. 166.54 E, from the meridian of Paris. It is described as about four miles in length, and visible from a distance of about fifteen miles. It has been named "Elie Island," from the discoverer, Captain Elie, of the French brig *Emma*.

A despatch has been addressed to the English Consul by the Taoutai of Ningpo covering instructions from the Imperial Commissioner to the effect that, although missionaries possess the right to teach in the interior, they must when renting houses make use of a third party to witness the agreement, and "clearly state their object to the local authorities." The ostensible reason for this regulation is that the officials fear that the people may sell property not their own, but the missionaries assert that it is designed to limit their rights, and they are all therefore up in arms against it.

The last news from Yangchow is to the effect that the Chu-jen-ko, who was accused of being a ringleader in the late outrages, and who absconded from the city, has been arrested, and identified by Mr. Taylor. He has not yet been brought to trial, but it is clearly understood that he shall be banished for life beyond the frontier.

From Hankow we have no news of importance. The only topic of local interest is a dispute between the Sabbatarians and the Rationals as to whether the club shall be opened on Sundays, and bowls and billiards be indulged in on that day. Each party threatens withdrawal if its views be not carried out. For the credit of English institutions it is to be hoped that the Sabbath will be respected.

Mr. Harry Parkes McClatchie, a nephew of Sir Harry Parkes, has been transferred to Formosa. Mr. Oxenham succeeds him on the British Consular staff at Hankow.

At Wuchang the missionaries are now preaching daily without molestation, in consequence, it is believed, of the dread inspired by the recent proceedings at Yangchow and in Formosa.

The foreign residents of Chefoo have decided upon opening a public school for the children of those who cannot afford to send the younger branches of their family to England to be educated. A lengthy prospectus has been published, and forms of application for shares in the concern have been circulated. The general im-

Digitized by Google

pression here is that the extremes of heat and cold cover too wide a range in Chefoo, and that, while the expense of sending children there by steamer would be as much (from a southern port) as that involved in sending them home by sailing ship, parents and children would practically be as widely separated under the new plan as they are under the old.

Peking is at present threatened by another Mahomedan host. A number of Tartar braves and 1,500 of the Tientsin disciplined force are under orders for Shensi to oppose the rebels. A traveller in Shensi describes the condition of that province as most deplorable. He says:—

"The people are certainly the best in China, affable and complaisant. . . Sin-gan-fu is in the midst of a fertile plain, which now, however, is almost waste. Instead of villages one finds only bare walls, and looks around in vain for the former inhabitants of the ruins. No one is to be seen but Honan braves, who are little better than the Nienfei or Mahomedans."

The old Imperial town of Sin-gan-fu is still in existence. It will be remembered that it is the site of the now celebrated Nestorian monument.

(FROM OUR SPECIAL CORRESPONDENT.)

SHANGHAI, Feb. 3, 1869.

The London mail of Dec. 4, with telegrams to 28th, was received here on the 23rd ult. *The London and China Express* was of more than usual interest, containing, as it did, such a full list of new M.P.'s, *resume* of opinion on the Yangchow missionary affair, reports of companies connected with China, and the intended departure of the Burlinghame Mission from London for Paris, without having accomplished anything beyond a presentation to Her Majesty. The Mission is not looked on here with favourable eyes, the preponderance of opinion being that it is a gigantic humbug. This is especially so amongst Americans, so that your articles, "Burlinghame and Bunkum," have taken immensely.

One of the most satisfactory items by the mail is the reduction in the price of telegrams by Galle. Mr. Walter Pearson, the agent for Reuter, announces the rate at Tls. 15 for twenty words. The regularity of the P. and O. Company's service is now gaining considerable satisfaction from all the communities in China and Japan. The fixed days of departure are well appreciated, and we only now want the French service to harmonise.

The successor to Sir R. Alcock continues to be the topic of conversation. Sir Harry Parkes has many backers; but there is a strong expression of opinion in favour of a new man, one trained to diplomacy, and not hampered with a long knowledge of China. The idea of Winchester, Wade, or Hornby having the post is laughed at. The impression is, however, that Wade will be sent out to relieve Sir Rutherford, and act as Chargé d'Affaires until the post is conferred on somebody else.

One of the best tests of the magnitude of the trade of Shanghai is to be seen in its Exchange operations. The transactions for 1868 are estimated as follows:—

| | | |
|---|---|---|
| Bank Bills on London | ... ... | £4,705,000 |
| Do. | Paris ... ... | F.3,825,000 |
| Do. | India ... ... | Rs.17,630,000 |
| Do. | Hong Kong ... | Dols.4,995,000 |
| Mercantile Bills on London... | ... | £8,330,000 |
| Do. | Paris ... | F.8,050,000 |
| Do. | Hong Kong | ... Dols.1,937,000 |

These are gigantic figures, and if they represented a profit of 10 per cent. the Shanghai folks would be doing well.

Ship after ship arrives from London with goods to a losing market, and your echo is the same from this side. With heavy losses on tea and silk exports, and the same on shirtings, &c., imported, the prospect is not very cheerful. The losses on tea and silk must be near half-a-million dollars, though I am satisfied that fully two-th rds fall on houses at home, and a huge proportion of this on houses not to be considered in the China trade. The tea-dealers and others who sent out credits to buy will now be convinced that there is no necessity for them to increase the elements of competition here in purchasing tea. The China houses are still of sufficient means to buy the season's tea, and if left alone would conduct it more to their profit. The indiscriminate credits are to blame for 1868's disasters

Hard times are of undoubted service in some cases, and no place has benefited more by them than Shanghai. If it once bore the name of being the fastest and most reckless it is now entitled to be called one of the most steady-going business places of the Far East. Even racquet courts and rowing clubs are now reduced to matters of business, and it is almost ludicrous to see the business-like way in which such institutions have their meetings, balance-sheets, &c.; but so it is, and to indicate the change that is now supplementing utter despondency, it is only necessary to state that the Racquet Club at its meeting actually had a drawing for paying off its debentures.

Tenders have been invited by Mr. Kidner, architect, for the building of the new premises on the Bund for the Oriental Bank, the present building being in a state of decay. In the meantime, the bank has rented the building on the Bund, formerly occupied by the Hindustan Bank, and belonging to Messrs. Siemssen and Co. Several of the buildings put up in 1850 to 1856 are very shaky, and when better times do come there will be plenty of work for architects and builders. Contracts have also been put out for repairing the "old dock," now under the lesseeship of Mr. Roberts, who pays a rental of Tls. 9,300 per annum.

The capital invested in the dock is Tls. 220,000, in 440 shares of Tls. 500, and is managed by a board of directors and a paid secretary, Mr. Geo. J. W. Cowie. The market value of the shares is now about Tls. 150, and buyers at this rate get a dividend of about 12 per cent. per annum.

The famous Brick and Saw-mill Company, founded by the great architect of fortunes, Pedro Loureiro, is not entirely extinct. There is still a balance due to the creditors, and the shareholders, who are still solvent, will probably make some compromise to settle the matter up. The amount due is about Tls. 10,000.

The Shanghai Gas Company, which has gone through many vicissitudes, is at last in a satisfactory state, and at the meeting to be held shortly the charmed words "profit and dividend" will be sounded in the ears of the shareholders. The capital invested in this concern is Tls. 150,000 and 4,000 debentures, and is managed by Mr. Cowie, Secretary, and a board of directors consisting of Mr. Baker (manager Chartered Mercantile Bank), Mr. Cameron (liquidator Commercial Bank), Mr. Brand, Mr. Fearon, Mr. Probst, and Mr. Overweg. The use of gas is now very general and an immense boon to the pedestrian, the streets being now lighted. The Chinese are also using it, and no doubt a reduction on the present rate of dols. 4.50c. will soon be established. This rate, however, is not so high as in San Francisco, where it is six dollars. The French gasworks, for supplying the French settlement, is not so prosperous, and with a view of reducing their expenses offered to shut up their works if the English company would supply them at dols. 2.50c.; but dols. 3.50c. is demanded. From the contiguity of the French settlement to the Chinese city it is quite possible that in time the city will be a large customer.

The spirit of rebellion against registration continues, and a memorial to the Foreign-office is now being prepared. Certainly it is one of the meanest measures ever sanctioned by H.M.'s Government. British subjects have no objection to register at the Consulate on arrival—that is a reasonable request; but the impost of five dollars, and one dollar for mechanics, is paltry, and the repetition yearly unnecessary. It resembles the Chinese mode of squeezing, which Englishmen are not used to, and their Government not generally guilty of. If it was exacted with a view of raising something from Britishers towards the expense H.M.'s Government are put to in providing consuls, &c., the amount is simply absurd. The distinction between mercantile people and artisans is most vexatious. In places like the ports in China the absurdity of attempting to draw the line is sure to produce endless trouble to the Registrar. The only distinction that can be drawn with success is the simple one of master and man—the partners and clerks, and other subordinates; but the squeeze for registration is objected to in toto as unworthy of H.M.'s Government. If it is considered that we should have a tax imposed on us by the Imperial Government for the use of Consuls and other protection let it be discussed; but the proposition could not be equitably or legally sustained. The merchant here, as in other parts of the world, does his full share in contributing to the revenues of England by the goods he imports and exports. It is to be hoped that the memorial will have the desired effect of sweeping off the obnoxious if not illegal tax.

The liquidator of the Commercial Bank, Mr. Cameron, in consequence of the depressed condition of things here, is still unable to realise the assets of the bank. A great deal of house property and the docks, known as the Pootung Dock, still have to be kept going for the benefit of the estate, and there appears no help for it but that the shareholders should settle with the creditors, as reported by last mail, at about 17s. in the pound The Pootung Lock originally consisted of some seventy shares of 3,000 taels, of which Mr. Muirhead, who is still working it, held a considerable share; it might be struck into a new company of say about 75,000 taels, and on that sum the working would yield probably 12 per cent. Of course, 75,000 taels is a great drop from 210,000 taels, but if the liquidator wants to close up this is what he must accept, and a similar drop on the house property—in short, accept about one-third of the value he has outstanding here, supposed to be about 700,000 or 800,000 taels. Mr. Jackson, manager of the Hong Kong Bank at Hankow, is here, *en route* to Yokohama, to relieve Mr. Grigor, who takes charge during Mr. McLean's absence in England on leave. Mr. Herbert Cope has taken charge at Hankow. The next mail will carry the report of this bank, which it is expected will be very favourable. The liquidation of the China Fire Insurance proceeds, and it is expected that a bonus will be distributed to the shareholders over the capital of about 50 per cent. What a contrast to the winding up of most companies! The trustees of the estate of Messrs. Dent and Co. have but little more to realise at this port. The valuable houses on the Bund, known as "Paon Shum," have not been put in the market, as it appears they are the property of Mr. Wilkinson Dent, who had withdrawn from the firm many years before it failed.

Notwithstanding the splendid passages of the clippers they cannot come up to steam, the *Diomed*, one of Holt's line, making the passage out, calling at Mauritius, Singapore, and Hong Kong, in eighty-two days. She is loading for London at £3 10s. and

Digitized by Google

£4, and will leave in a few days, calling at Hong Kong to fill up. Two more clipper passages have to be recorded, that of the *Undine* in 100 days, from pilot to pilot, and the *Leander*, in ninety-five days, from Plymouth. On the 21st of January a ball was given by the partners of Messrs. A. Heard and Co., Mr. Dixwell, and Mr. and Mrs. Fearon, and on the 29th the annual masonic ball was given at the magnificent Masonic Hall on the Bund, both being thoroughly enjoyable. There are not many finer halls or ball-rooms in the old country. The number of guests may be computed at about 40 ladies and 200 gentlemen.

If the Japanese had said a truce to steamer buying, the Chinese business men have not. The steamer *Dragon*, Captain Gibbon, which has been running between all the coast ports and in the Tientsin trade under the ownership of Mr. William Hargreaves, has just been sold to Chinese merchants for the Tientsin trade for 85,000 dols., at present exchange about £18,500. She has been well handled, making extraordinary runs considering her small power. She has been taken into the most out of the way places to make a freight without damage, and only once docking. Captain Gibbon proceeds to England shortly.

The North China Steam Company—Trautmann and Co., agents—held a meeting of shareholders, when a statement showing the result of the working was produced, showing satisfactory results. It was discussed whether the profits should be at once divided, or retained towards the outlay for a new steamer now building in England. No decision was arrived at, and the meeting was adjourned. This line of steamers runs to Tientsin, Chefoo, and Newchwang.

The American steamers of the Shanghai Steam Company, managed by Russell and Co., also have boats on this line, in addition to the *Yangtsze, Ningpo*, &c. The Union Company, managed by Glover, Dow, and Co., at present are running only the *Rona* and *Tientsin* on the Yangtsze, under the English flag. They work in accord with the Shanghai Steam Company, and the current freights of four and five taels per ton yield a good profit—in fact, a very handsome one, the last dividend being equal to 30 per cent. The operations of the Union Company will doubtless be extended.

The Shanghai company above alluded to have a large fleet of sixteen steamers, nearly all built in New York, in the usual style of river steamers. Another one is on the way out. The boats for comfort and general commerce in river traffic are unexceptional, but being constructed of wood they are perishable, and cause a large outlay to their hulls after a few years' running. Iron steamers are peculiarly adapted for river traffic, as in fresh water the bottom does not foul. The company have had to buy up opposition steamers, or steamers likely to be used as opposition, so that they have not had a chance of adding iron boats, but will do so as soon as possible. The last attempt at an opposition was the negotiation for two steamers at New York, by Messrs. Olyphant and Co., but Messrs. Forbes and Co., Boston, acting for Messrs. Russell and Co., bought them. The fleet here includes the boats built by Messrs. Dent, Lindsay, Fletcher, &c. The *Lamont*, built on the Clyde (iron), under the superintendence of the late Captain Castillar, is also included in the fleet.* Another steamer is expected in a few months from the Calcutta or coast line, for Messrs. Jardine, Matheson and Co.; a large vessel of about 3,000 tons and small consumption of fuel.

The line of Messrs. Kroes and Co., Shanghai, worked in joint ownership with Messrs. Adrian and Co., Japan, consists of five steamers. These steamers are the only regular opportunities for the inland sea and ports of Japan, and for goods from England intended for Nagasaki or Hiogo. This route is much more expeditious than *via* Yokohama.† The rate of freight is 4 dols. to 5 dols. per ton, and the transhipping is conducted by Messrs. Kroes and Co. at a small expense.

The church, which has been delayed for some time, is now proceeding rapidly, and is expected to be opened in a couple of months. It is a fine building, well suited to the hot weather, and will accommodate about six hundred.

The splendid club on the Bund, which has gone through many vicissitudes, is now in steady working trim, with about 350 members, at an annual subscription of 48 dols. The management, under Mr. Hornby Evans, is very satisfactory. The accounts show a profit on the working, but not sufficient to divide any dividend amongst the shareholders. The mortgage interest on 35,000 taels is a heavy drawback.

The following notification has been issued by the Customs. On the whole, the Customs officials give satisfaction, and about the only grumbling heard of now is the delay in proving drawback duties and the system of only allowing drawback certificates in payment of other duties, and not in silver. This has been specially represented to Peking in the revision of the treaty and tariff. The system was adopted to prevent fraud on the Customs.

In accordance with treaty stipulations and the wish of the community, the Customs at this port will, from the 1st of February, require export duties to be paid before permitting the shipment of goods.

A branch of the Hai Kwan Bank has been opened in the Custom-house, in order to receive payments expeditiously. In the case of silk, it is requested that the duty receipt usually handed over by the Chinese seller to the foreign buyer be sent to the Custom-house by the latter with his application to ship. T. DICK, Commissioner of Customs.

* The shares of this company, at one time at about 70 discount, are now at par.

† Vessels here, by means of the wharf facilities, discharge in three days against three or four weeks in Yokohama.

With reference to the coal fields of China the *North China Herald* says:—"The estimate that has been made by Mr. Kingsmill, of the extent of country covered by the Northern coal fields of China, is 87,000 square miles, while the total area of coal fields in Great Britain and Ireland is estimated at 12,000 square miles, and that of the United States at 113,000 square miles.

"With such vast coal fields, therefore, as China possesses, all the interests of the nation are deeply concerned in the earliest possible opening of them to the unrestricted enterprise of foreigners and foreign methods; and even in slow moving China it is evident that the question is rapidly approaching a favourable solution. It is essentially a step for the enrichment of the Empire, a new source of extensive employment for the people, a commencement of industrial organisation which, applied to manufactures, may lead to an important amelioration of the condition of the poorer classes. China has something to look forward to in its extensive mining prospects; and it would be difficult to forecast the more or less of its national greatness, when a truly enlightened policy is firmly grasped and energetically carried out by an intelligent Government. The present tariff on native coal was imposed at a time when foreigners did not foresee the important position that this article would assume; and least of all, probably, was it foreseen that this export duty, which might appear at first sight harmless, as no expectation was entertained of China exporting coal, would prove a heavy tax on coal passing from port to port. The export duty is now four candareens per picul, and the coast trade duty one-half more, so that Formosa coal has to pay at Shanghai six candareens per picul, or about one tael per ton. On an article of such small intrinsic value this is very burdensome, and we scarcely think that the Chinese Government would persist in levying the tax if proper representations were made to them. Mr. FitzRoy showed, in his Report on the Trade of Shanghai for 1866, that on Formosa coal the duty was equal to 23 per cent. of its value in Shanghai; so that here is an enormous encumbrance on the price and supply of coal finding its natural level, even when it is produced under the present restrictions as to mining. It is equivalent to at least one tael per ton, so that native coal, which might be expected to be laid down in Shanghai free of duty, is charged twenty times as much as foreign coal. Thus, the Chinese Government place their own subjects at a considerable disadvantage in their competition with foreign coal, and a higher standard of prices than would otherwise prevail has to be paid principally by foreigners. We hope to see the coal mines opened soon, and there is no doubt the question has been amply discussed at Peking; but it is perfectly evident that the opening of the mines and the abolition of the duty, or its reduction to the same amount as that levied on foreign coal, namely, five cents per ton, must be simultaneously granted."

We are glad to hear that a Committee is being formed in London for the promotion of mining and railways in China, with a view to influence the Foreign Office in a direction opposed to the policy laid down in Art. VIII. of the new American treaty.

We find the following letter in the *Shanghai Evening Express*:—"DEAR SIR,—Having taken trouble in moving Lord Stanley, at the request of the British residents in Saigon, to appoint a consul for that place, allow me to correct your impression and that of your contemporary at Hong Kong, the *China Mail*, as to the Consul being subject to the jurisdiction of our Minister at Peking. He will, like his brother Consuls at Batavia and Bangkok, be under the direction of the Foreign-office in London.—Yours faithfully, F. J. ANGIER, Editor of the *London and China Express*. Jan. 29, 1869."

## FOOCHOW.

The following particulars of the outbreak at the above port with respect to which various accounts have been given, was published by the *Daily Press*. It appears that for some time past the missionaries have been anxious to establish a sanitarium at Sharp-peak, the small island at the entrance to the river, and, as it is understood, a fishing station belonging to some wealthy Chinaman on the mainland. This individual exerted himself to keep the foreigners out; and Mr. Wolff, of the Church Missionary Society, going down to take possession of the ground he had purchased, was molested and stoned. At the request of Mr. Carroll, H.B.M. Vice-Consul, the *Janus* went down to put an end to the trouble; and a crew of a boat from her was mobbed by a crowd of Chinese, one of whom threatened Lieutenant Keppel with a spear, and was shot down. It is also stated the Chinaman with whom the disturbance originated has been wounded or killed.

The accounts of the affair given in the Northern papers, with the exception of one which appeared in the *Evening Courier*, agree in substance with the above. In the *Courier's* account above-named it is stated that opposition to Mr. Wolff was only made because there was a dispute in the title to the land; but that paper also contains a letter from another source, in which this alleged flaw is stated to be merely a pretext, among many others, made to prevent the missionaries obtaining possession of the land.

By the *Yesso*, which arrived on the 30th Jan. from Foochow, intelligence was brought that a disturbance was imminent in that city. The whole place had been placarded by the Chinese, calling on the natives to rise in a body and murder the European population. So great was the fear of this being carried out that the

Digitized by Google

British Consul, Mr. Charles Sinclair, ordered the gunboat *Janus* up from Pagoda anchorage. There was no positive demonstration when the *Yesso* left, but very serious apprehensions were entertained as to the intentions of the natives.

## HONG KONG.

The present mail left Hong Kong on the 9th February. The outward French mail of Dec. 18 was received on the 28th January. The latest telegraphic advices from London were to Jan. 17, *via* Calcutta. We take the following items of news from the *China Mail*:—

A circular has been issued by the Bishop inviting support to a movement for the establishment in Hong Kong of an orphanage for destitute European and other children. The effort, which we hope will be successful, will be directed under the auspices of H. E. the Governor, Vice-Admiral Keppel, Major General Brunker, and the Chief Justice.

A private meeting of several gentlemen interested in the resuscitation of the China Asiatic Society was held a few days since at the residence of the Rev. D. B. Morris (the present secretary of that moribund institution), for the purpose of discussing what measures could be taken to that end. In the course of conversation it was discovered that there were still members of the old society in Hong Kong, and it was determined that they should be communicated with, and their inclinations ascertained. If willing to remain as an associated body, several leading and other residents would be willing to join the society, while, on the other hand, if desirous of closing their connection with it, a new society might be formed under the old title. The meeting being conversational in its nature, no detailed report need be given, but we trust that before long some public steps will be taken in the matter. It is a matter for congratulation that a strong desire exists to reorganise so important an association.

The wreck of the *Reiver* was the subject of investigation before a marine Court of Inquiry, at the harbourmaster's-office, on the 26th Jan. Mr. J. J. Francis, solicitor, watched the case on behalf of Captain Clifford. The Court was composed of Mr. May, P.M., Mr. Thomsett, Mr. Duncanson, J.P., Capt. Gillson, and Capt. verbury. It appeared that a Court of Inquiry had sat at Calcutta, and the evidence of officers and crew taken there, but owing to want of jurisdiction, the papers had been sent to the Hong Kong Government. The Court's decision suspends the captain's certificate for eighteen months, on the ground of neglect.

By the Report of the Hong Kong and Shanghai Banking Corporation, to be read at the meeting fixed for the 15th inst., we observe that unabated success has attended the business transacted during the past half-year. A dividend of 6 per cent. is again declared for the six months, and the amount carried to the Reserve Fund brings it up to the high figure of 700,000 dols. We congratulate the Shareholders upon so satisfactory a result.*

The approach of the Chinese holidays and New Year settling time has been this year accompanied by a larger number of robberies, and other acts of fraud or violence, than we can remember to have occurredfor some years back, and would seem to infer an unhealthy financial state of things, at least amongst the more desperate class of the native community. On shore, in boats, and on board ship, the thieving trade appears to flourish; and we have an array of unpunished robberies which reflects anything but credit upon some one.

### THE LATE OUTRAGE AT SWATOW.

A correspondent of the *Hong Kong Daily Press* gives the following account of the expedition against the braves, who, as mentioned in last report, fired upon the crew of the gig belonging to H.B.M. gunboat *Cockchafer*:—

SWATOW, Jan. 30, 1869.

The lesson is taught, submission made, and it is to be hoped the sword is finally sheathed. The Commodore arrived on Thursday, with the *Rinaldo*, *Perseus*, and *Bouncer*, and on Friday morning at daylight we were off; the Marines, about 160, under Captain Hale, the Blue Jackets, under Captain Stevens; the boats, under Lord C. Scott, and the field pieces under Captain McHardy, R.N., altogether about 450 men, the Commodore, accompanied by Captain Sim, R.E., Lieutenants Tyler and Gurden, and Mr. Alabaster, H.B.M. Acting Consul, going up in command. On arrival at Tongtung, the first of the offending villages, the Marines, who had marched up, were drawn up, and two pieces landed. A man came out, "chin-chinned," but immediately disappeared again, so that Mr. Alabaster, who went out to meet him, was unable to speak to him. When the Marines had approached to within a short distance of the village, the natives opened fire upon them, and negotiation was afterwards, of course, impossible. The village was forthwith taken, the retreating braves being followed up into and through the adjoining one, Captain Stevens, in the meantime, engaging and driving off the fellows to the left. Having advanced a mile or more, no one but an old woman (carefully sent out by the wretches as cover) came within range, and we returned to the boats after setting the village on fire. It might have been supposed that this would be sufficient to show the braves the folly of resistance, but such was not the case. When, later on, the party advanced towards Outingpin, a large town, the men of which had headed the attack on the *Cockchafer's* boats, they actually came out with flags flying and matchlocks popping to attack us again; so we went on, and sparing a village which had had the sense to keep quiet, we very soon got either over the wall or through the gates, and sent the fellows flying. After thoroughly burning this village, there being no more enemies to meet, we returned, and next morning the elders came down to beg for mercy, which was at once accorded.

There was no real fighting, the Sniders making near approach impossible; but we had a few casualties in the streets, and a couple of stink-pots fell uncomfortably enough among a party of us, headed by the Commodore, as we were getting in at one of the gates, fortunately doing no serious damage. The Chinese gunboat arrived at Swatow during the fight, and the captain with his boat's crew came up to offer the assistance of one rifle. The Taoutai did not appear on the scene, but "the day after the fair" wrote to say he was coming, and begged everything might wait.

I do not think there was any great loss of life, the long range of the Sniders frightening the braves before they were near enough to be steady marks; and it is no doubt a subject for congratulation, as the lesson given will be quite sufficient. When we went up the Swatow people laughed, saying that no one of us would come back; and the intervening villages were all prepared to join against us if we got a check, which, as the gunboats would not go up, was confidently expected. On our return all the arrogance and bluster had disappeared, and the Swatow people now shake their heads with an *Ai-yah le-hai* ("Very, very dreadful") when they speak of foreigners. The fact is the eighteen villages resisted Koxinga, the conqueror of Formosa, successfully, and have ever since fancied themselves invincible; and it is probably a saving to themselves that their error has been dispelled.

The steamer *Kwang-tung*, which arrived at Hong Kong on the 7th Feb., brought news from the above port to the 6th Feb. At that date all was going on well. Commodore Jones and Mr. Acting-Consul Alabaster had entered the village where the disturbance took place, and, although they were unguarded, no attempt wa made to molest them. Steps are now being taken to secure the tranquillity of the neighbourhood, and there seems every hope that in future it will be possible to live in security at Swatow. The results, in fact, are in every way satisfactory, especially as the number of casualties seems to have been much exaggerated, the official returns placing the loss on the Chinese side at fifty-five.

There appears to have been perfect unanimity upon the propriety of the course adopted, and the support and co-operation of the United States Consul aided greatly in the settlement of the difficulty.

* The report appears in full in our advertising columns.

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

Advices from Singapore are to the 16th Feb. The outward mail of Jan. 1 arrived on the 5th Feb., but the latest telegraphic news from London was to the 27th Jan., received by the extra P. and O. steamer *Sunda*. The *Straits Times* gives the following summary of news:—

Business may be said to have been nearly at a standstill during the fortnight. The Europeans have been celebrating with due honour the fiftieth anniversary of the Settlement, and the Chinese have been devoting their exclusive attention to the usual festivities and rejoicings with which they welcome their New Year.

Politically the fortnight has been almost a blank. Some official changes are reported. A Captain Shaw has been announced as the new Lieutenant-Governor of Malacca, in place of Mr. Cairns. Captain Playfair is said to have been appointed Assistant Colonial Secretary, and Mr. Harvey, cadet, Private Secretary to the Lieutenant-Governor of Penang—two new offices it is to be noted. Ill-health necessitated change of air for the Rev. Mr. Beckles, Colonial Chaplain, and the Rev. Mr. Hose, Chaplain of Malacca, is officiating in his place.

The Legislative Council is to meet to-morrow, at noon, when the Session of 1869 will be opened with the usual ceremonies, and with a speech from H.E. the Governor.

The celebration of the fiftieth anniversary of the Settlement of Singapore was inaugurated by a ball—one of the most successful ever witnessed here, which was given in the Town-hall on Friday, the 5th inst., at which were present H.E. the Governor, H.H. the Maharajah of Johore, the Hon. the Chief Justice and Lady Maxwell, and most of the European residents. The speech of H.E. Sir Harry Ord, in proposing the "Prosperity of the Settlement," made a favourable impression, and his positive reiterated statement, for which he claimed undoubting faith from the public, that facts and figures would ere long show that the revenue was increasing, and was amply sufficient to meet the expenditure, gave considerable satisfaction. Most have accepted this statement in good faith, but there are still doubters and unbelievers who will not be convinced, who will have it that the colony is getting deeper into debt every day. This appears to us to savour somewhat of hyper-infidelism, in face of his Excellency's plain straightforward assertion, that, provided the revenue remains at its present rate, there would be no necessity for any further loans, or any taxation, or any additional burden whatever.

Saturday, the 6th inst., the anniversary day, was kept as a close holiday, and sports were held on the Esplanade.

Digitized by Google

The Chinese New Year-day fell this year on Thursday, the 11th inst., which, with the next day, was a general holiday, and the firing of crackers, which began on Wednesday night and has not quite finished yet during the specified hours, has been something astounding. There have been no accidents, however, and no breaches of the peace or law, so far as we can learn, beyond the usual petty offences, A new steamer was launched at Teluk Ayer on Saturday, the 30th ult. She is the property of Messrs. Buyers and Robb, the owners of the Bon Accord Dock, and was christened the *Pilot Fish*. Messrs. Buyers and Robb are building the new steam launch for Government.

The extension of the telegraph from India down to Java and Australia, and from India through Siam and Cochin China to Hong Kong, has been again the subject of revived discussion. It is stated that the enterprise will soon be undertaken and carried through.

There is little or no news from the neighbouring States. A frightful epidemic continues its ravages through portions of Java. A correspondent calls attention to the island of Timor, of which the Dutch, he states, want to be rid. If it be so, the British Government has the right of pre-emption by a clause in the Treaty of 1824. The letter deserves perusal, as the island would no doubt be useful and convenient as a station from which to lay a telegraphic cable to the northern coast of Australia. From Labuan a correspondent has furnished us with an account of the New Year's sports held there for the first time, which seem to have been a great success. Everything is quiet and peaceable in Sarawak, in Cochin-China, and in Siam.

# Commercial Report.

## STRAITS, CHINA AND JAPAN IMPORTS.

YOKOHAMA.—Our report by the present mail is very unsatisfactory. There was an almost entire absence of demand for every description of imported produce, prices were lower, stocks were increasing, and there was no inducement to re-export to China. The native New-year holidays were about to commence, when there would probably be an entire cessation of business. The opening of Yedo had had no effect upon the market. Current quotations:—Cotton Yarn: Nos. 16-24, per picul, $44.50 to 46.0; 28-32, $46.50 to 48.0. Grey Shirtings, 7 lbs., per piece, $2.45 to 2.55; 8.4 to 8 8 lbs., $2.72 to 2.80. White Shirtings, $2.80 to 3.60. T-Cloths, $1.70 to 2.20. Velvets, Black $8.0 to 9.60. Camlets, S, $15.0 to 16.0; SS, $14.0 to 14.50. Cloth Broad, per yard, $1.50 to 2.0; Blankets, per lb., $0.50 to 0.55. Iron Nail Rod, per picul, $3.40 to 3.70; Pig, $1.05 to 1.15; Lead, $7.50 to 7.0.

SHANGHAI.—Throughout the fortnight native dealers had shown a disposition to purchase any moderately cheap plain cottons. A fairly large business had resulted, many contracts having been made for cash, others for delivery and payment after the Chinese holidays. Most of the purchases were intended to be held until the reopening of the Tientsin trade. Grey Shirtings, 8¼ lbs.: Sales had been effected at prices ranging from Tls. 1.9.7 to 2.0.6; 7 lbs., Tls. 1.8.3 to 1.8.5. T-Cloths, 7 lbs. Mexicans, Tls. 1.7.0 to 1.8.0; ordinary qualities, Tls. 1.5.5 to 1.6.5; 6 lbs., Tls. 1.3.0 to 1.5.0; 8 to 8¼ lbs., 38 inch, Tls. 2.0.0 to 2.1.5. Importers had met the demand freely for all weights. White Shirtings had been in less inquiry. American and English Drills were slightly lower in value. Fancy Cottons continued dull of sale. Woollens and Worsteds—Camlets, SS: A few sales were reported. Lastings: Business limited. Figured Lustres: Sales effected had been principally in barter against silk; good assortments and patterns were rather easier of sale. Crape Lustres: In fair request for arrival. Coals: The coal market was depressed, and the prices given must be considered nominal. The arrivals had been: From Great Britain, 2,663 tons; America, 1,750 tons: Australia, 2,910 tons; Japan, 197 tons; Formosa, 1,140 tons; in all 8,660 tons—of which 2,087 tons were to order. Current quotations were as follows:—Grey Shirtings, 7 lbs., Tls. 1.8.5 to 1.9.0 per piece; 8.4 to 8.6 lbs., Tls. 2.0.0 to 2.0.5 per piece. White Shirtings, Tls. 1 9.0 to 3.0 0 per piece. T-Cloths, Tls. 2.5.5 per piece. English Drills, 40 yards, Tls. 4.0.0 to 4.1.5 per piece. Dutch Drills, 40 yards, Tls. 3.8.0 to 3.9.0 per piece. Gentian Shirtings, Tls. 3.2.0 to 3.2.5. Camlets, English, SS., Tls. 11.5.0 to 12 2.5 per piece. Spanish Stripes, Tls. 0.5.7 to 0.8.0 per yard. Medium Broad and Habit Cloths, Tls. 1.0.0 to 1.6.0 per yard. Lead, Tls. 5.6.5 to 5 8.0 per picul. Coals: Cardiff, Tls. 11.0.0 per ton; North Wales, Tls. 10.0.0 per ton; English, nominal; Anthracite, Tls. 11.5.0 per ton.

HANKOW.—During the fortnight there had been a dragging market, and prices for Cotton Goods had gradually given way. Woollens and Worsteds had been heavy of sale at previous low prices. Grey Shirtings, 8¼ lbs.: A moderate business had been done at Tls. 2.0.5 to 2.1.0, at which the market closed firm; 7 lbs. had declined fully 1 mace per piece, and were quoted at Tls. 1.8.2 to 1.8.7. T-Cloths had been taken to a fair extent at Tls. 1.7.0 to 1.8.5; 8 lbs. had been neglected; 6 lbs. Tls. 1.4.0 to 1.5.0. Drills: The season was nearly over, and buyers scarce. Fancy Cottons met with no inquiry. Woollens and Worsteds: Camlets, SS Assorted had been sold at Tls. 12.5.0 to 12.7.0, but the demand had been very small. Lastings: A few had changed hands at former prices. Long Ells: H H Scarlet had slightly advanced: other descriptions unchanged. Figured Orleans had been in no demand. Lead: The demand was satisfied, and prices had declined to Tls. 6.3.0 to 6.3.5 for big pigs, and Tls. 6.1.0 to 6.2.0 for small pigs of best brands.

FOOCHOW.—The following had been the sale of imported produce during the interval:—1,000 pieces, 8¼ lbs. Grey Shirtings, at $2.90 per piece; 249 pieces T-Cloths at $3 20 per piece; and 700 piculs Lead at $9.00 per picul, the last-named transaction being against Tea.

HONG KONG.—The following is from Messrs. Olyphant and Co's. Circular, dated 8th of February:—Cotton Yarn: About 100 bales, Nos. 16 to 24, have been placed at slightly better rates, and holders are firmer. There is no inquiry for the higher numbers, quotations for which are unchanged. Auction sales have only been of 23 bales, Nos. 16 to 24, and 4 do. Nos. 28 to 32. Piece Goods: Transactions, in the aggregate, have been moderate, though to a somewhat greater extent than was anticipated, Chinese New Year being so close at hand. 7 lb. Grey Shirtings are much wanted, and have advanced fully 5 cents per piece, and more disposition has been shown to purchase other weights, though only at easier prices, and these importers are unwilling to accept, anticipating that dealers will soon be obliged to enter the market. T-Cloths are in large supply, and sales have been made at lower rates, but there is more firmness at the close. Common White Shirtings are inquired for on former terms, and a slight inquiry for Turkey Reds has led to an advance of 5 cents per piece. English and Dutch Drills are not wanted, but American, if on the spot, would be readily saleable at last quotations. Jeans and Sheetings are nominaly 10 cents lower. Woollens: Long Ells are much neglected, and have further declined. There has been some little demand for best assorted Spanish Stripes at a very trifling advance. Blankets are unsaleable. Lastings dull and weak. Crapes steady, Camlets are more firmly held, dealers having worked off their former supplies, and evincing some desire to replenish their stocks, while Importer's stocks are light. Metals: Nail rod and Bar Iron have been more freely taken at the late decline. Hoop is held for an advance. Wire is again lower. Steel unchanged. Lead continues in demand, and L.B. and W.B. have been sold at $8.00 and $8.50 per picul respectively. Last sales of L.B. were made, to arrive four months hence, and at the moment, parcels on the spot are held for $8.50. Malacca Tin is much wanted, and first arrivals will probably fetch $30 picul. Coal: The only arrival has been 800 tons Sydney, and the only sale 600 tons do. at $6.75—a figure at which there are now no sellers. We make no change in quotations. Ginseng: The demand has continued good, and sales have been made of 19 casks Crude—indifferent quality—at $90 to 95; 21 do. at $120; and 89 do. at $134 to 135, fully maintaining the improvement last advised. The current quotations were as follows:—Cotton Yarn, No. 16 to 24, per bale, $115 to 125; 28 to 32, $130 to 135; Grey Shirtings, 7 lbs., per piece, $2.35 to 2.40; 8.4 lbs., $2.65 to 2.70; White Shirtings, $2.20 to 4.20; T-Cloths, $1.70 to 2.75; Turkey Red Shirtings, $2.75 to 3.00; American Drills, 14 lbs., per piece, $4.90; 15 lbs., per piece, $5.40; Spanish Stripes, Scarlet, per yard, $0.80 to 0.95; Assorted, $0.78 to 0.94; Camlets, S, $18.00 to 19.00; SS, $15.75 to 16.00; Iron Nail Rod, Round, Square, and Flat Bar, per picul, $2.90. to 2.95; Hoop, $2.85 to 2.90; Lead, per picul, $7 40 to 7.50; Steel, per tub, $4.20 to 5.25; Quicksilver, $64.25 to 64.50; Coals, English, $10; Welsh, $11.

SINGAPORE.—The market had been very quiet, transactions had been on a small scale, and latterly there had been an entire cessation of business, owing to the holidays at the Chinese New Year. It was probable on the resumption of business that the market would have a firmer tone, as many importers seemed disposed to hold for an improvement in values. Grey Shirtings, 8¼ lbs., had been placed at an advance on last quotations, and rates were firmer; several holders refusing to sell at current prices, a limited business had transpired chiefly at $2.75 per piece; 7 lbs. firmer, but sales trifling; stocks of 6 lbs. light, and no business reported. Long Cloths without inquiry, and quotations nominally unchanged. Maddapollams had met with a moderate inquiry, stock light. T-Cloths quoted firmer, business limited. Dutch drills unaltered, stock nearly cleared Grey Yarn, No. 40s., firmer; there was some inquiry, and a few small sales had been made; No. 30s. had been in request, stock light; the lower numbers continued without inquiry, and no sales had transpired. White Shirtings of medium qualities in request, stocks almost cleared, demand slack for the finer qualities, a few sales reported at previous rates. Imitation Irish Linens in demand; stocks light. Cambrics of the coarser qualities had been placed at previous rates. Figured Shirtings firmer, and there was a little more inquiry. Plain Dyed Shirtings dull. Dyed Figured Shirtings in more inquiry. T. R. Cloth without improvement, and transactions small. T. R. Mulls difficult to place; no sales reported. Prints unaltered; sales small. T. R. Yarn in limited inquiry at previous rates. Coloured Yarns slightly weaker; small sales reported. In Metals there had been more business doing. Bar Iron in heavy stock, and demand dull; Nail Rod placed at $2.60 per picul; small sales of Swedish Iron. Lead advanced in value; stocks nearly cleared. Yellow Metal in demand, and prices firmer; several sales had transpired. Brass Wire of the lower numbers in good demand. Cardiff Coals in good demand, and prices firmer; West Hartley without inquiry.

## STRAITS, CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—Little or no change has to be noted in the Tea market, the business done having been on a par with that of the previous fortnight, and settlements were computed to be about 2,500 piculs, which, as before, were all for the San Francisco and New York markets. Stocks continued small, and a comparative scarceness of the medium grades may be noted. Prices for all kinds remained unaltered. The Caractacus, for New York, had sailed with 691,632 lbs. The Alcyone, John Norman, Solent, and Brilliant were loading for the same port. Quotations:—Common, $19 to 23 per picul; good common, $24 to 25; medium, $26 to 28; good medium, $29 to 32; fine, $34 to 37; finest, $38 to 39; choice, $40 to 42.

SHANGHAI.—Black: The settlements had been on a very limited scale, only 753 chests Congou and 1,066 chests Dust having changed hands, the former at slightly stiffer rates, and the latter at an advance of from ½ to 1 tael per picul. Settlement for the fortnight, 1,819 chests; reshipment on owners' account. 778 chests; stock, 19 chops, or 4,788 chests. Quotations, duty paid (exchange for credits, at 5s. 11¼d. per tael, and freight at £3 per ton):—Dust, common, 7¼d. per lb.; Hohow, common, 1s. 0½d. to 1s. 0¾d.; Ningchow, common to fair, 1s. 2d. Green: There had been less doing, and the demand had been chiefly for common to medium Moyunes and Teenkais, which had been taken at very irregular prices; on the whole, however, rates had again ruled rather in favour of the buyer. In fine and finest we hear of no transaction, but for these teamen would not accept any reduction. Settlements were—14,373 half-chests, common to medium, Moyunes and Teenkais, at Tls. 33 to 38; and 1,700 half-chests,

Digitized by Google

common to fine, Fychow, at Tls. 27 to 34. Settlements for the fortnight, 16,073 half-chests; re-shipments on owners' account, nil; stock, 105 chops, or 59,145 half-chests. Quotations (duty paid, exchange, &c., as above) were:—Fychow and Moyune, Gunpowder, 1s. 6d. to 3s. 7d.; Imperial, 1s. 2¼d. to 2s. 10d.; Young Hyson, 11¾d. to 3s. 2d.; Hyson, 1s. 1¾d. to 3s. 3½d.; Twankay, 9d. to 1s. 6d.

HANKOW.—The season was closed.

KIUKIANG.—No arrivals of Black Teas had taken place, nor had there been any settlements of either Greens or Blacks. Receipts of Greens during the fortnight amounted to about 6,000 packages, almost all of which had gone forward to Shanghai.

FOOCHOW.—Messrs. Rusden, Phipps, and Co. report as follows:—Our season may be considered closed, the present stock of Congou and Souchong being about 4,000 chests. About 15,000 chests Congou have been settled during the month at gradually advancing prices, which may now be quoted ½ tael to 1 tael advance on those ruling at the date of our last, the 2nd January. The Chanticleer and Henry Grenfell will probably close our export to England. Settlements for the fortnight have been:—Congou, 4,280 chests, at Tls. 9.8 to 19.05 per picul, ship off; Souchong, 1,725 chests, at Tls. 16.8 to 27.3 per picul, ship off; Oolong, 444 ½-chests, at Tls. 17.8 per picul, ship off.

AMOY.—Oolongs had been in active demand for America, and the stock was reduced to about 32,000 half-chests, almost all of which would probably be carried over until after the holidays. Prices had been irregular, but, on the whole, showed an advance of a dollar per picul, and in some instances as much as three dollars. The market closed very firm, but buyers were ready to close the remaining stock so soon as teamen were willing to sell on the basis of former settlements. The John C. Munro and Charlot had been taken up at £2 10s. per ton of 50 cubic feet to load for New York, and the John Worster was expected from Foochow for the same voyage, having been closed at $13 gold.

## SILK.

YOKOHAMA.—The bulk of business done had been in coarse Oshus, and these had been obtainable on somewhat easier terms. What few of the better re-reels appeared, had obtained old rates. In Hanks the arrivals were smaller and smaller, and very little was of better than medium quality. Holders adhered to high rates, which buyers were indisposed to pay. In Coshus, Etchesens, &c., the assortment was very small and poor; the common grades of these were also weaker. Settlements were about 600 bales, a portion on native account. The current quotations (laid down in London at exchange, 4s. 5½d.) were as follows:— Hanks—Mybash, Sinchu, &c., extra, 39s. 7d. to 42s. 3d.; best, 37s. to 38s. 10d.; medium, 33s. 10d. to 36s. 7d.; inferior, 30s. 1d. to 33s. 1d.; Oshu, extra, nominal, 37s. to 37s. 8d.; best, 33s. 10d. to 35s. 9d.; medium, 28s. 2d. to 31s. 3d.; inferior, 24s. 5d. to 26s. 8d.; Coshu, best, 32s. to 33s. 10d.; medium, 28s. 2d. to 30s. 5d.; inferior, 24s. 5d. to 27s. 6d.; Sodai, best, nominal, 30s. 1d.; medium, 26s. 4d. to 28s. 2d.; Etchesen, best, nominal, 27s. 6d. to 29s. 4d.; medium, 23s. 3d. to 25s. 7d.; inferior, 19s. 9d. to 22s. 7d.; Mashta, best, nominal, 24s. 5d. to 26s. 4d.; inferior, 20s. 8d. to 23s. 8d.; Hatchogee Tussah, nominal, 28s. 8d. to 26s. 4d.

SHANGHAI.—The following is from Messrs. C. J. Skeggs and Co.'s Circular, dated February 2:—A very small business has been done during the fortnight, estimated at about 400 bales, and which has again been almost entirely in barter for Shirtings and Woollen Goods; prices are consequently very irregular, and although in some cases a shade lower, the general run of purchases do not show any quotable decline. A large proportion of the settlements consists of common re-reels, which are apparently cheap as compared with other silks, but are still looked upon with suspicion owing to their loaded state. No transactions are reported in chops, as they are firmly held, but medium to common Tsatlees are rather easier. A few common Kahings have been taken at Tls. 425, and good Szechuens at Tls. 400 per picul. Throwns are getting very scarce, Trams being firmly held for Tls. 530 to 540, and Organzines Tls. 570 to 590 per picul. The total settlements are about 43,000 bales, we having over-estimated them 200 bales in our last issue. The stock is about 2,000 to 2,500 bales.

## STRAITS PRODUCE.

SINGAPORE.—The produce market had been quiet, Pepper and Sago flour had been taken up to some extent, but other articles had been dull, and there was very little alteration to notice in quotations. Gambier had been without animation; a very small business had transpired, supplies were coming forward slowly, and the market was firm. Black Pepper had maintained its previous value, about 10,000 piculs having been taken up chiefly at $6.37½ per picul. White Pepper had met with a good demand and supplies had been readily bought up at slightly weaker rates. Tin had been fluctuating; there were few buyers in the market. Pearl Sago weaker, limited business. Sago flour in good demand; large supplies of Bruni had arrived and had been taken up at rather lower rates. Coffee weaker and demand slack, supplies falling off. Hides had been bought at previous rates. Horns much wanted, prices advanced considerably Gutta Percha in steady inquiry and prices well maintained. India rubber in demand at full rates. Camphor firmer and market nearly cleared. Rice in steady demand and prices firmer.

## ARRIVALS.

At YOKOHAMA.—From London, Jan. 20, Chrysolite; from Cardiff, Brewster.

At SHANGHAI.—From London, Jan. 25, Sir Jamsetjee Family, Western Chief; 27, Undine, W. E. Gladstone; 30, Leander; from Liverpool, 25, Jane Sprott; from Cardiff, 24, Bernhard Carl; 26, Sanderson; 29, Andreas; from New York, 28, W. G. Russell.

At AMOY.—From Cardiff, Jan. 27, Oscar.

At HONG KONG and CANTON.—From London, &c., Niger (str.); from Hamburg, Jan. 29, Clipper; Feb. 5, Elise.

At MANILA.—From London, Jan. 30, Olano; from Cadiz, 19, Bilbaina.

At SINGAPORE.—From Newcastle, Feb. 10, Alpha; from Shields, 12, Pilot Fish; from Swansea, 14, Catharina; from Marseilles, 10, Isaure.

At PENANG.—From London, Feb. 16, Vanguard; from Liverpool, 15, Achilles (str.).

## DEPARTURES.

From YOKOHAMA.—For New York, Jan. 18, Caractacus; for Callao, 11, Suliate.

From SHANGHAI.—For London, Jan. 26, Dundonald; 30, Corsair; for New York, 25, American Lloyds.

From FOOCHOW.—For London, Jan. 20, Peterborough; 23, James Shepherd.

From HONG KONG and CANTON.—For Callao, Jan. 26, Gesine Brons; for New York, Feb. 2, Magnet; 5, Caroline.

From MANILA.—For Liverpool, Jan. 21, Loyola; for New York, Feb. 1, Asa Eldridge.

From SINGAPORE.—For London, Feb. 9, Nabob; 12, Star of Jamaica; 13, Loudoun Castle; for England, 2, H.M.S. Serpent; for Falmouth, 3, Aline; for Boston, 3, Madawaska.

From PENANG.—For London, Feb. 11, Helen's Bank, Tek Li.

## VESSELS LOADING.

At YOKOHAMA.—For London, Chrysolite; for New York, John Norman, Alcoyne, Solent.

At SHANGHAI.—For London, Assyrian, Diamond (str.); for New York, Queen's Own, Annie.

At FOOCHOW.—For London, Chanticleer, Henry Grenfell.

At AMOY.—For New York, J. C. Munro, Ferdinand and Charlot.

At HONG KONG and CANTON.—For London, Fairleader, Sophie.

At MANILA.—For London, Aurora; for New York, Jan. 15, Nina; 31, Nellie Chapen.

At SINGAPORE.—For London, Corypheus, Lammermuir, Merse; for Liverpool, Enterprise; for New York, Arracan, Ortelius, St. Paul.

At PENANG.—For London, Parana, Aldourie, Vanguard.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, £4 per ton of 50 cubic feet. To New York, per sailing vessel, £2 15s. to £3; per steamer, $45 per ton of 40 feet.

At SHANGHAI.—To London, there are only two vessels loading—the Assyrian and Diomed(s.)—the former at £2 10s. per ton of 50 feet, the latter at £3 10s. per ton of 40 feet. A fair business has been done in coast charters at low rates.

At FOOCHOW.—To London, £2 10s. per ton.

At HONG KONG and CANTON.—To London £3 per ton of 50 cubic feet; to New York, £3 per ton of 40 feet.

MANILA.—The Circular of Messrs. Tillson, Hermann, and Co. quotes as follows:—The high rates demanded, £4 for sugar, and £4 10s. to £4 15s. for hemp and measurement goods to England, have stopped business, and we have not a transaction to report. At a reasonable rate one or two vessels could find immediate employment.

At SINGAPORE.—To London, £3 10s. to £3 15s.; to New York, $10 sugar, $11½ Hemp.

At PENANG.—The Parana is loading for London, under charter, at £3 15s. for sugar and 4½d. per gallon for rum; she has also engaged tin at £3 10s., light freight at £3 17s. 6d., and measurement at £4 per ton (less 5 per cent.).

## COMMERCIAL POSTSCRIPT.

The amount of bullion by the P. and O. Company's steamer *Tanjore*, from Southampton on the 20th inst., was, in gold, to Galle £77; to Bombay, £14,550; to Madras, £288; to Calcutta, £120; in silver, to Bombay, £27,500; to Singapore, £5,700; to Hong Kong, £24,896; total in gold, £15,035; in silver, £58,096.

### SHIPPING.

ARRIVALS NOT IN THE TABLES.—March 18, at Deal, from Shanghai, Tyburnia; off Falmouth, from Maulmain, for Aberdeen, Hindostan; at Liverpool, from Akyab, Empire of Peace; 19, at Deal, from Foochow, City of Quebec; at London, from Foochow, Ironsides; from Colombo, Percy Douglas; 18, at Falmouth, from Hong Kong, Ta Lee; 19, at Plymouth, from Hong Kong, Randers; 15, off Scilly, from Java, for Amsterdam, Albion; 17, at Brouwershaven, from Sourabaya, Johanna; 16, at Zierikzee, from Batavia, Kinderdyk; 18, at Belle Isle, from Saigon, Auffredy; at Gironde, from Singapore, Aurelie; 18, at London, from Manila, Palm Tree: 20, in the Downs, from Manila, Antrim; from Sarawak, Otter; at London, from Colombo, Ocean Rover.

DEPARTURES.—March 17, from Penarth Dock, for Yokohama, Imatra; 18, from Cardiff, for Shanghai, Raleigh; 14, from Liverpool, for Singapore, Ringdove; 20, from London, for Shanghai, Tamerlane; for Cardiff and Singapore, Empress of India; 19, from Cardiff, for Singapore, Utina.

LAID ON.—At London, for Shanghai, Tyburnia; at Glasgow, for Penang, John Paul.

CASUALTIES.—Advices from St. Helena, dated Feb. 10, state that the Caroline, Bourbis, from Saigon, put in there, Jan. 28, leaky, and after survey had been ordered to partly discharge. Advices from Gibraltar, dated March 17, state that the Continental, Erving, from Cardiff to Yokohama, which vessel was on shore in the bay, March 15, had been got off by tugs. A telegram, received March 19, from Galle, states that the Enoch Arden (barq.), Callown, from Cardiff to Shanghai, with coals, was burnt in the China Sea, Feb. 13; master and crew arrived at Batavia.

SPOKEN.—Doesborgh, Batavia to Amsterdam, Jan, 14, 22 S., 82 E.; Garibaldi, Batavia to Rotterdam, February 3, 4 N., 22 W.; Laura and Adele, Amsterdam to Batavia, Feb. 13, 41 N., 11 W.; Grefve Berg (Russian ship), Batavia to Falmouth, Jan. 4, 36 S., 27 E.; Andromache (Dutch barque), Padang to Rotterdam, Jan. 20, 13 S., 10 W.; Sophia Koningen der Nederlanden, Sourabaya to Rotterdam, Feb. 4, 7 N., 14 W; County of Argyle, Sourabaya to Rotterdam, Feb. 26, 42 N., 27 W.; Innisfallen, Shields to Galle, Jan. 22, 29 S., 23 W.; Golden State, Shanghai to New York, Feb. 1, 28 S., 9 E.; Sindbad, Bali to Amsterdam, Jan, 21, 34 S., 24 E.; Anita, from Foochow, Jan 28, 33 S., 20 E.; Gleaner, Bangkok to Bordeaux, Jan. 8, 27 S., 55 E.; River Eden, Manila to London, Jan. 26, 32 S., 14 E.; Clytie, Manila to London, Dec. 18, 14 S., 102 E; Admiral de Ruyter, Bali to Amsterdam, Dec. 4, 9 S., 114 E.; Marie (barque), Rotterdam to Batavia, Nov. 27, 19 N., 25 W.; Deerfoot, London to Yokohama, Feb. 9, 3 N. 23 W.; Scharnhorst, Bremen to Batavia, Feb 11, 5 N., 26 W.; Banian, Shanghai to New York, Dec. 12, in Straits of Sunda; Jeannie Eastman, Batavia to Amsterdam, Dec. 29, 23 S., 76 E.; Numancia (American ship), Shanghai to New York.

Off ASCENSION.—Jan. 22, Johanna, from Batavia, for Amsterdam; Feb. 10, Sliedrecht, from Java, for Amsterdam; 12, Cymbeline, from Philippines, for Falmouth.

At ASCENSION.—Feb. 4, Nahotka (str.), Brolin, from Southampton, and left 9 for Eastern Siberia.

At ST. HELENA.—Feb. 5, Lalla Rookh, Wilson, from Saigon, and sailed 6 for Belle Isle; 7, John Lidgett, Polson, from Macao, and sailed 8 for London; 9, Shun Lee, Melbank, from Macao, and sailed 10 for London; 10, Alcyone, Krusinga, from Sourabaya, and sailed for Amsterdam.

At TABLE BAY.—Feb. 1, Pactole, Ollivand, from Macao, for Havana, for supplies. Jan. 23, Brinkburn, sailed for Ceylon.

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

BAYLIS—On the 22nd Feb., the wife of Alfred Baylis, Esq., of the Peninsular and Oriental Company's Service, of a son.

CHESHIRE—On the 5th March, at Forest Hill, the wife of Samuel Harley Cheshire, of a son.

GIBBS—On the 28th Feb., at 1, Lancaster-street, Hyde Park, the wife of George L. M Gibbs, Esq., of a son.

HATCHISON—On the 4th March, at Cairngall, Aberdeenshire, the wife of William Hatchison, Esq., of a son

INGLIS—On the 7th March, at Bellwood, Kirkaldy, Scotland, the wife of David D. Inglis, of Nagasaki, Japan, of a son.

OSMOND—On the 1st Feb., at Hong Kong, the wife of Mr. C. Osmond, of a daughter.

PHILLIPS—On the 14th Jan., at Amoy, the wife of George Phillips, Esq., H.B.M.'s Consular Service, of a daughter.

SANDILANDS—On the 14th March, at Bridge of Allan, N.B., the wife of G. M. Sandilands, Esq., of Penang, of a son.

STEAINS—On the 11th March, at Ellersile, Sydenham, Mrs. James Steains, jun., of a daughter.

### MARRIAGES.

CREAGH—FISHER.—On the 1st Feb., at St. Peter's Church, Colombo, by the Rev Brooke Bailey, Denis Creagh, Esq., Paymaster 59th Regiment (late Lieut. 14th Regiment), eldest son of Pierce Creagh, Esq., Limerick, Ireland, to Lucy Ellen, daughter of the late Wm. Fisher, Esq., Chief Superintendent of Police, Ceylon, and late Capt. of the 78th Highlanders.

DASHWOOD—DICKSON.—On the 11th Feb, at Singapore, Mr. Robert Boyce Dashwood to Miss Jane Emily, second daughter of the late Captain W. H. Dickson, of the British barque *Borneo*.

DAVIS—WALKDEN.—On the 11th March, at the Congregational Church, Blackheath, by the Rev. Joseph Beazley, Arthur Owen Davis, of the P. and O. Steam Navigation Company, to Hannah Rebekah (Annie), eldest daughter of Samuel Walkden, of Blackheath and Lawrence-lane. No cards.

HANNAY—WILLIAMSON.—On the 16th March, at Doon Park, near Castledouglas, Kircudbrightshire, by the Rev. George Greig, W Cathcart Hannay, Esq., of Manila, to Julia Christian Williamson, daughter of the late Rev. D. S. Williamson. No cards.

HARRIS—CLOW.—On the 11th March, at Trinity Church, Marylebone, by the Rev. Henry Harris, vicar of Horbling, Lincolnshire, the father of the bridegroom, Henry Harris, Esq., of 83, Great Tower-street, City, and Highstone, Snaresbrook, Essex, to Henrietta Sophia, third daughter of Leonard Clow, Esq, of Fitzroy-street, Fitzroy-square. No cards.

HOARE—ROBINSON.—On the 30th Jan., at Colombo, Ceylon, Arthur Calvert, third son of J. J. P. Hoare, Esq, of Bittern, Hants, to Charlotte Rosina, fifth daughter of the late J. J. Robinson, Esq., of Banff, N.B.

LAUGHTON—MAN.—On the 14th Jan., at Christ Church, Port Blair, Andamans, Arthur F. Laughton, Esq, M S C, Sub-Assistant Commissary-General, to Georgiana Emily, eldest daughter of Col. H. Man, M.S.C., late Resident Councillor of Penang. No cards.

MACINTYRE—HAY.—On the 16th March, at St. Mark's Church, Notting-hill, by the Rev W. L. Collett, vicar of St. Stephens, Donald MacIntyre, Esq., of Highbury-crescent, to Maria, widow of the late W. J. Hay, Esq., Ceylon, and second daughter of George Canham, Esq., Shepherd's-bush, late of Purneah, Bengal. No cards.

MILLER—ALLEN.—On the 6th March at St. Matthew's, Oakley-square, S. F. Miller, Esq., fourth son of the late Reader Miller, Esq., of Ryarsh-house, in the county of Kent, to Katherine Frances, second daughter of Dr. Henry Alleyne Allen, of Springfield, Singapore.

### DEATHS.

BEAZLEY—On the 28th Feb, at 33, Bristol-gardens, Maida-vale, Mariamne Dyte, relict of the late Samuel Beazley, Esq., in her 46th year.

BARNES—On the 1st February, at Shanghai, of bronchitis, Edmond Cecil, youngest son of F D. Barnes, Esq, aged sixteen months.

HIGGINSON—On the 11th March, at 32, Cadogan-place, Harriet, relict of the late Rev. Henry Higginson, Chaplain to the East India Company, and incumbent of their chapel at Poplar.

HOLWORTHY—On the 24th January, murdered, near his residence at Hong Kong, Wilmot Wadeson Holworthy, Esq, Military Store Staff, second son of Charles Wilmot Holworthy, Esq., St. John's-wood, London, aged 34.

LAKE—On the 20th Dec, at Nagasaki, on board H.M.S *Manila*, after a short illness, Frank Toovey Lake, aged 19 years, second son of the late John Lake, C.E., of Kings Langley, Herts.

LITTLE—On the 26th Feb., at Anderton-house, near Devonport, aged 54, William John Little, Esq.

MACDONALD—On the 4th March, at 9, Lauder-road, the Grange, Edinburgh, Isabella, the beloved wife of Col. Macdonald, Ceylon Rifles, deeply regretted.

OXFORD—On the 12th March, at Nice, Joseph Oxford, Esq., of Laurie park, Sydenham, in his 58th year.

PALMER—On the 28th Jan., Sarah, the adopted daughter of Mr. H. B. Palmer, aged three years.

PALMER—On the 2nd Feb., Henrietta, the infant daughter of Mr. J. Palmer, aged ten months.

SCOTLAND—On the 22nd Jan., at Yokohama, Robert Burn Scotland, of typhoid fever, aged 42.

TENNENT—On the 6th March, at 66, Warwick-sqnare, very suddenly, Sir James Emerson Tennent, Bart., of Tempo Manor, county Fermanagh, aged 65.

TOOKEY—On the 10th Dec, on board the s.s. *Ajax*, Cameron, younger son of the Rev. Charles Tookey, M.A., Birchfield, Birmingham.

VIAULT—On the 19th Jan, at Kobé, of typhoid fever, after an illness of nearly three weeks, Jules Theodore Viault, H.I.M. Vice-Consul at the Port of Hiogo, and Consular Agent for Italy, aged 32.

## LATEST TELEGRAMS.

### RECEIVED VIA GALLE, MARCH 18.

### JAPAN.

YOKOHAMA, Feb. 13.—The representatives of the foreign Powers have formally announced the termination of the civil war, and have withdrawn their notification of neutrality.

### CHINA.

SHANGHAI, Feb. 16.—Grey shirtings, 6½ catties, 8¼ lbs., 2.15 tls. Cotton, Shanghai, 16¾ tls. Tea: Market closed. Silk: No. 3 Taatlees, 595 taels. Settlements since departure of last mail, 420 bales. Export to date (China and Japan) from commencement of season, 60,000 bales. Exchange on London—Bank bills, six months, 5s. 11d. Freights: Tea, £3.

HONG KONG, Feb. 22.—Grey shirtings, 6¼ catties, 8¼ lbs., $2 80c.; large speculative business. Water-twist, 16-24, $1 25c. Cotton, Bengal, fair medium, $16½. Exchange on London—Bank bills, six months, 4s. 6d.

[This telegram occupied nine days in transmission from Galle.]

SOMEWHAT PENSIVE.—There are three kinds of pens sold by a celebrated Edinburgh firm, under the names of the *Waverley* pen, the *Owl* pen, and the *Pickwick* pen. Now, whatever may be the case with regard to the middle one, the other two are doubtless, unrivalled, for what can equal the pens of SCOTT and DICKENS?—*Judy*.

## HOUSE OF LORDS.

### ENGLISH MISSIONS IN CHINA.

(March 9th.) The Duke of SOMERSET: On rising to put a question to the noble earl at the head of the Foreign-office respecting missionaries in China, I may explain that the delay which has occurred since I gave notice of it is partly attributable to the new rule which has been adopted with regard to questions. In the House of Commons questions which do not lead to debate may be put without notice, and I think it would be well if this were allowed in your lordships' House also.

Earl GRANVILLE explained that the recommendation of the committee was that questions likely to lead to debate should not be put without notice, and before a quarter-past five, as had previously been the case.

The Duke of SOMERSET: In one of the papers lately presented to Parliament relating to China your lordships will find it mentioned that a society called the China Inland Mission having established a mission in the town of Yangchow, near Nanking, a riot occurred, and great violence was used, the result being, as usual, that the English naval force was sent for, and that after some remonstrance the Chinese gave way and the mission was restored. The Consul, I observe, states that the arrival of the force produced a very good effect, not, however, on account of any sympathies for the missionaries, but because a considerable quantity of money was expended by the crews. Now, what I wish to ask is, what right have we to send missionaries to the interior of China? (Hear.) If a preacher goes to Birmingham and begins to expound his opinions about Catholicism or Protestantism, we all know what happens. First of all a mob breaks the windows, then they break each other's heads, the police and military are thereupon called in, and after a great deal of noise the two parties retire with their heads broken and their Christianity very much impaired. That is what happens in a town peculiarly intellectual, where the people are so wise and sensible that you call upon them to decide questions of State policy and religion. What, then, can you expect from the people of Yangchow? As might be expected, they rise up and are furious. Look back to what occurred twenty years ago. An adventurer, calling himself a follower of Jesus, raised a great mob, attacked and took several towns, forced the young men to join him, and massacred the women and children. When at the Admiralty I saw many officers who gave an account of the state of towns that had been visited by these so-called followers of Jesus, and nothing more horrible could be conceived. No wonder, then, that when missionaries appeared, calling themselves by the same name, the feelings of the people were excited, and it is most unjust that the English naval power should be used to support them. (Hear.) I find no fault with the despatch of our representative at Peking, nor with Lord Stanley's, except that they do not go far enough, for we ought to try and do something more effective to stop these outbreaks. Our treaty rights were insisted upon by the English and French Ministers, and I believe it was more the wish of the French than of the English Minister that certain rights should be given to missionaries. The Chinese Minister remonstrated, urging that it would lead to great distraction and misery. In fact, the papers represented him as using a very good argument. Whether he really used it I cannot say, but he is reported to have said:—

"Here you are, the representatives of the most powerful and wisest nations in the world. You have come here as friends in everything else, but you differ in your Christianity. Now, as you are so wise and such good friends, why could you not settle among yourselves which is the true form of Christianity before you distract our country with your rivalry?"

I think that disciple of Confucius put a question which it was very difficult to answer. I object to the system of supporting inland missionaries in China, because it is unfair to the Chinese and because it is most unjust to our naval officers. Their business is to look after pirates, but a missionary is insulted, and, pending satisfaction from Peking, they are pressed to use their Armstrong guns and fire on the people, as the only way of saving the life of the missionary. Now, a young officer thinks nothing of taking a Chinese town. He is delighted with the task; with fifty or sixty men he will take any Chinese town. (A laugh.) But these proceedings are calculated to break up our friendly relations with China, and those relations surely ought not to be allowed to depend on the judgment of a missionary or on the patience of a mob. (Hear, hear.) My noble friends wish to reduce the navy in China. Now, if you reduce your navy you must reduce your missionaries, for every missionary almost requires a gunboat. (Laughter.) The fact is, we are propagating Christianity with gunboats, for the authorities of inland towns know perfectly well that if they get into trouble with the missionary a gunboat will soon come up. In doing that in a weak country which we could not possibly do in a more powerful one, it seems to me we are entirely wrong. The Chinese, I believe, dislike the French missionaries as much as they do the English; they turn the French missionary out of the town, and they knock the English one on the head; so that there is perfect religious equality. (A laugh.) My noble friend (the Earl of Clarendon) is quite right in saying that Christianity can only go in the wake of civilisation and progress. It is true you may easily get a certain class of Chinese to be converts to Christianity; there are plenty of Chinese who will be converts to anything in the shape of dollars (a laugh); but really to make China a Christian country must be a work of time, and the way in which we are proceeding is not the way to do it. Why, what is the example we set? Suppose a Chinaman asks what effect this new religion has upon the people, and goes to Shanghai to see, what does he behold? Naval and civil officers who are acquainted with all the chief ports in Europe, America, and Asia inform me, that though seaport towns are not usually very moral places, there is no such sink of iniquity as Shanghai. And yet you expect that, having seen your example, and how you force Christianity on by gunboats and Armstrong guns, the Chinese will embrace Christianity. We ought, I contend, to recall these inland missionaries. My noble friend, I am aware, is not responsible, for he gives very good advice; but this is one of those things which are readily given and hardly ever taken, and the missionaries do not take it. A missionary, indeed, must be an enthusiast; if he is not an enthusiast, he is probably a rogue. (A laugh.) No man would go and live up one of those rivers and preach Christianity unless he were an enthusiast, and if an enthusiast he readily incurs dangers. Now, I am anxious to know what chance we have of reducing these missions, or, at least, if not allowing them to go still further up the country, whereby they would, I am sure, seriously prejudice the cause of Christianity. It may, perhaps, be said that they go at their own peril; but this is not the fact, for if injured or killed, a naval force is called on to interfere, unless Peking is so close at hand as to allow time for an appeal to the Chinese Government. Nobody is responsible for this mischief but the London Missionary Society, and that society had much better send its missions to some other part of the world, and leave China unconverted, than pursue their present course. He wished to know whether the Government would adopt some more efficient and stringent mode of dealing with these missionaries, either by sending them out of the country, or by telling them that they should go no further and imperil our friendly relations with China by their proceedings. (Hear.)

The Earl of CLARENDON: I feel much obliged to my noble friend for having brought this question before your lordships, for it is one of growing and pressing interest, and it is right that the public should know exactly what is the policy of the Government, and how far we propose to deal with the present most unsatisfactory state of things. A Blue-book upon China not being very attractive, I dare say very few of your lordships have read the papers which have been laid on the table, and probably the general public know still less on the subject than your lordships. The interpellation, therefore, of my noble friend is likely to prove useful, by enabling me to draw the attention of your lordships and of the public to some passages in the papers which were recently presented. I cannot quite agree with my noble friend that a missionary must be either an enthusiast or a rogue. That, I think, is rather too strong. I cannot help admiring the spirit which animates missionaries, and the fearless zeal which leads them to promulgate religious truth. At the same time, I admit that that zeal often leads them to incur most unnecessary dangers, and creates a state of riot and bloodshed such as men of peace and goodwill should be the last to bring about. They require to be protected against this, and should be induced not to prosecute their labours in localities in the interior of the country, where no Consul resides, and where an appeal to the authorities against a fanatical mob is likely to be unavailing. The London Missionary Society suggested last year that in any new treaty to be negotiated with China there should be an article empowering them to purchase lands and reside in the interior. Now, Sir Rutherford Alcock, whose knowledge and experience of China may be relied upon, pointed out that, in the first place, such a clause is unnecessary, since the right exists under the French treaty, and, in the next place, that it would be very inconsistent with wisdom or prudence to insist upon it. He referred to the riots which had occurred as a proof that, not only the authorities and influential persons, but the whole population of China are adverse to the spread of missionary establishments. It is not only most dangerous for the missionaries themselves, but it is much to be condemned with respect to the Government and people of this country, that such proceedings as those described by my noble friend should be carried on. An outrage occurs, blood is shed, property is sacrificed, an appeal is made to the nearest Consul, who straightway calls to his aid the nearest naval commander, and gunboats go up to exact reparation. The consequence is, that we never know what tidings the next mail may bring us, and we are always on the brink of a war, not on account of the violation of any British rights, of any insult to the British flag, or of any injury done to commerce, but on account of the protection of good but imprudent men, who will not perceive the natural consequences of their acts. (Hear, hear.) This is a situation of affairs which certainly ought to be altered, and I will call your lordships' attention to one of the most recent instructions with reference to the employment of gunboats, which was sent to Sir Rutherford Alcock on the 28th of January:—

"You will have seen by my despatches of the 30th December and of the 13th and 14th of January that Her Majesty's Government attach the greatest importance to this point; and I have accordingly to instruct you to explain to Her Majesty's Consuls that the special purposes for which Her Majesty's ships of war are stationed in the ports of China and employed on the coasts are to protect the floating commerce of British subjects against piratical attacks in Chinese waters, to support Her Majesty's Consuls in maintaining order and discipline among the crews of British vessels in the respective ports, and, in cases of great emergency, to protect the lives and properties of British subjects if placed in peril by wanton attacks directed against them either on the part of local authorities or by an uncontrolled popular movement. As regards this last point, Her Majesty's Consuls must constantly bear in mind that the interference of naval force, either on their representation or on the part of naval officers acting on their own estimation of facts before them, will alone receive the subsequent approval of Her Majesty's Government when it is clearly shown that without such interference the lives and properties of British subjects would, in all probability, have been sacrificed; and even in such a case Her Majesty's Government will expect to learn that the alternative of receiving them on board ship, and so extricating them from threatened danger, was not available. Beyond this the circumstances of the case must be of a very peculiar nature which would be held by Her Majesty's Government to justify a recourse to force." (Hear, hear.) "Her Majesty's Government cannot leave with Her Majesty's Consuls or naval officers to determine for themselves what redress or reparation for wrong done to British subjects is due, or by what means it should be enforced. They cannot allow them to determine whether coercion is to be applied by blockade, by reprisals, by landing armed parties, or by acts of even a more hostile character. All such proceedings bear more or less the

Digitized by Google

character of acts of war, and Her Majesty's Government cannot delegate to Her Majesty's servants in foreign countries the power of involving their own country in war."

(Cheers.) Those instructions will be rigidly adhered to by the Government, and the Admiralty have sent similar directions to all the naval officers, not only in China but in different parts of the world. With regard to reducing the number of missionaries, my noble friend must be aware that the Government is not precisely responsible, and that if missionaries chose to go or stay there our power of evicting them from China is small. (A laugh.) My noble friend having passed severe strictures on the London Missionary Society, I would call his attention to a letter dated the 5th of February, which was received from that society, and which I must say was a very proper one. The latter part of it reads thus :—

"The directors of the London Missionary Society would be glad to ascertain from your lordship the views which Her Majesty's Government now hold of the range within which, according to existing treaties, missionaries in general may freely move. Because, while the opportunities for their usefulness have grown great and numerous, the directors are anxious that the operations of the missionaries of the London Missionary Society shall be so conducted as in no way to embarrass Her Majesty's Government, or even inadvertently to complicate the relations between the two Empires. That is the only ground on which they would venture to trouble your lordship in the matter."

That letter evinces no disposition to embarrass the Government, but, on the contrary, evinces some of the spirit which my noble friend is desirous to evoke. The society asked what interpretation I should put on our treaty rights, and I had a reply sent in these terms :—

"Lord Clarendon is not prepared to place any abstract construction on those treaty provisions. So much must always depend on the circumstances under which, and the grounds on which, treaty privileges are claimed, that specifically to define the practical extent of any such privileges would be more likely to mislead than serve as a sure guide for action. Lord Clarendon considers that in all cases of a doubtful nature, where a British missionary desires to receive counsel or directions, his safest course would be to apply to Her Majesty's Minister at Peking, and be guided by his advice. This course is more particularly to be recommended at the present time, inasmuch as it is clear that a strong feeling prevails among the authorities and people of China against the establishment of mission stations in the interior ; and it would be highly imprudent in missionaries to persist in disregarding the opposition either of the Chinese authorities or people, and braving their animosity, however unjustifiable or misplaced. It is impossible for Her Majesty's Government to protect a missionary establishment in places where no consular authority is at hand to require the local authorities to exert themselves in its defence; and it is no less impossible to suppose that the feelings of Parliament would be enlisted in favour of measures of coercion to avenge a wrong done to missionaries, which, even if they did not end in war, would, for a time at least, paralyse British trade, and might be open to much question in point of justice as between country and country. The London Missionary Society can, in Lord Clarendon's opinion, render no better service to their missionaries than by inculcating on them circumspection in regard to their own conduct, and the utmost consideration for the feelings and character of the people among whom they dwell. The missionaries will do well to follow in the wake of trade when the people have learnt to see in it material advantage to themselves, rather than seek to lead the way in opening up new locations. In the former case they will find people prepared to receive and listen to their instructions ; but in the latter there is too much reason to believe that their proffered instruction will be rejected, and their persons exposed to indignity, and even danger."

I have now stated the policy which Her Majesty's Government propose in future to observe, and I trust that the advice I ventured to give to the London Missionary Society, coupled with the disposition they have manifested to avoid embarrassment to the Government, will be sufficient to prevent further difficulty. If, however, it should turn out otherwise, the fault will not rest with the Government. (Cheers.)

The Bishop of ST. DAVID'S entirely agreed with the noble earl that the proceedings to which he had referred were not at all calculated to promote the interests either of Christianity or of England in China ; but he could not admit that there existed among the Chinese population so general an aversion from the Christian religion, and so general a spirit of resistance to all attempts to propagate it, as the noble duke had appeared to assume. Unless a bulky volume which he read some time ago were a tissue of fictions, there existed a flourishing Roman Catholic mission with a large number of converts, who lived very peaceably, and who, though they were continually extending their religion, met with no resistance or tumult. If this were the fact, was it not natural that those who held what they believed to be a purer kind of Christianity should show a generous and noble spirit of emulation, desiring to gain similar conquests for the Protestant faith? We ought not, he thought, to attempt to apply any positive restraint to missionary efforts either in China or in any other part of the world.

The Bishop of HEREFORD, bespeaking their lordships' indulgence on his addressing them for the first time, wished for an explanation of one or two expressions that had fallen from the noble duke and the noble earl, affecting, as it seemed to him, the position of all missionary societies and of all missionaries labouring in the less civilised parts of the world. The noble duke had given a piece of advice which he thought no missionary would accept, viz., to leave some particular part of the world unconverted, or flee from attempts to convert it, because, forsooth, British commercial interests might be prejudiced. The youngest and least zealous missionary would probably reply that, important as were the interests of British trade, there was something in his eyes more sacred even than that sacred opium trade for which Great Britain once thought it worth while to wage war, viz., obedience to the command of his Master to go forth and seek the conversion of his fellow-creatures, at whatever risk to himself or others. It was hardly generous for one in the safe security of their Lordships' House to taunt a man who took his own life in his hand in encountering barbarians with imperilling the interests of British trade, for whatever else he imperilled he had first imperilled his own life. Would the noble duke, who was anxious for stringent measures, propose to save a Chinese mob the trouble of executing or expatriating the missionary, or would he, as a member of a Christian Legislature, maintain that by becoming a missionary he lost the right of British citizenship, which he would retain if he became a trader? English subjects, as he understood, possessed rights under the treaty, and provided they did not transgress the limits imposed by the treaty they were equally entitled to protection, whether they sold cotton or Bibles. It was surely unworthy of a Christian nation to say that if its subjects engaged in any trade, however demoralising, they should be protected from the least infraction of their rights, but that if they became missionaries and happened to displease the susceptibilities of the Chinese they should be left to their fate, or saved from the mob by a forcible expatriation. He admitted, on the other hand, that it was not desirable, for the sake of the missionaries themselves, that they should go out with an army at their back, for that would make them reckless, unspiritual, and untrue to the mission of their Master. It was one thing, however, to say what a missionary ought to do for the sake of the cause of missions, and quite another thing to say what treatment he should receive at the hands of his Government, which was surely bound to maintain the rights of its citizens, whether missionaries or traders. He protested against the doctrine apparently laid down by more than one speaker that, because a man was a missionary he was, therefore, to be deprived of his rights as a British subject. The noble duke had advocated stringent measures towards troublesome missionaries, but had such a course been always and successfully pursued, had missionaries been always prevented from becoming "troublesome," neither the noble duke nor himself would have been Christians at the present day. (Hear, hear, and a laugh.) As to following in the wake of trade, would the noble earl (Clarendon) mention the kind of trade in whose wake they were to follow? (Hear, hear.) There happened to be trades carried on by British subjects, and protected with a high hand by the Government, which would make a most unhappy preliminary to the preaching of the missionary. (Cheers.) Should he wait till the beneficent influence of fire-water or opium had made the people more amenable to the preaching of the Gospel, and then preach to men whom the trader had demoralised or intoxicated with his liquor or his vices? Instead of waiting for this the missionary felt that he had a duty imposed on him by a higher Master to go out and preach the Gospel. He did not defend the indiscretions of any missionary or society, but he earnestly trusted that he had misunderstood what had been said, and that it was not the notion of the noble duke that the strong hand of Government should be used to suppress missionary exertion, nor that of the noble earl that the missionary was to go nowhere until preceded by the British trader. (Cheers.)

The Earl of SHAFTESBURY agreed almost entirely with the right rev prelate the (Bishop of Hereford). He had only risen, therefore, to state that those who had raised this fuss were a small independent body of men, acting under no central authority, and in no way connected with the great Missionary Societies of England, such as the Church Missionary, London Missionary, Wesleyan, or Baptist societies ; those great societies, which conducted their proceedings with so much zeal and judgment, should, therefore, be exonerated from the charge which had been justly brought against that small independent body. (Hear, hear.)

The subject then dropped.

## THE PROPOSED NEW PORTS IN CHINA.

BY the present mail we have intelligence from Shanghai of a meeting of the Chamber of Commerce, and the adoption of a reply to the request made by Sir RUTHERFORD ALCOCK, our Minister at Peking, for the views of the various mercantile bodies as to the best ports and places of inland traffic to be opened up to British intercourse. The Shanghai Chamber, at a general meeting held on the 29th January, decided to recommend the opening of Wenchow, a port already known to us below Foochow and Ningpo-Taichow, about one hundred miles distant. To the North, with a view of developing Manchuria, the port of Ta-ku-shan is recommended, and the Chamber thus notices the port :—

"Ta-ku-shan, the Chamber is informed, is a convenient channel for the trade of Corea, and part of Manchuria, and if opened to foreign vessels would facilitate the transport to various inland markets of merchandise, which at present has to follow circuitous routes, *via* Newchwang. It possesses, moreover, an independent trade of its own in pulse and other products, second only to that of Newchwang, and both cotton and woollen fabrics of foreign manufacture are imported, as well as Nankeen cloths, opium, and metals."

With reference to the ports on the Yangtze the Chamber reports :—

"The Chamber therefore learns with great satisfaction that it is in contemplation to establish certain subsidiary ports on the Yangtze as landing places for cargo and passengers. The city of Ngan king, though not known to be a centre of great trade, is the only town on the left bank of the river between Kiukiang and Chinkiang, and being moreover the capital of a province, it will doubtless be a convenience to the Imperial Government to make it a place of call for steamers.

Wu-hu, an outlet for the Fychow Tea districts, and connected by good water communication with a large and important tract of country, needs nothing more to recommend it as one of the proposed experimental ports on the river.

Ta-tung is known to be a feeder for a large extent of country on the south bank of the river, and it also enjoys the peculiar advantage of

Digitized by Google

commanding a navigable river or canal on the north bank. It is thus well situated for a landing place whence foreign goods would be forwarded into the interior. There are also some silk districts in the neighbourhood. If a choice were necessary Ta-tung might have the preference over Wu-hu, but as it is proposed to open both in the manner suggested, the Chamber can only express its entire concurrence in the wisdom of the step.

The Chamber would propose, in addition, that some port be opened on the Yangtze between Shanghai and Chinkiang, to facilitate trade with that populous region lying between that part of the river and the sea. Kiang-yin would appear to recommend itself from its position at the union of several water-courses.

The proposed opening of Yo-chow (on the Tungting lake) also calls for the unqualified approval of the Chamber, as if it posse-sed no other merit, it is at least a step in advance of our present out-ports, and one stage nearer to the only ultimate solution of all these questions, the opening of the whole country. A depot 130 miles higher up the Yangtze than the highest point open at present is an object of no slight importance. It is 130 miles nearer to the great emporium of Szechuen, the producing districts of Hunan, and the consuming marts of Siangtan, Changsha, and others lying to the south of the Tungting lake. But it should be kept in view that Yo-chow has no pretensions to be itself a centre of trade.

Intimately connected with the extension of ports of entry on the Great River is that of the right of navigation of the inner waters generally. After the discussion on this subject that took place in 1866 between this Chamber and Sir R. Alcock it is unnecessary to say that the Chamber and the whole community of Shanghai and other places look forward to the full permission of the Chinese Government to foreigners to travel freely, "for their pleasure or for purposes of trade, to all ports of the interior," which right has been withheld from temporary causes; but the Chamber is deeply disappointed to find that this freedom of locomotion is only proposed to be granted under certain almost prohibitory restrictions. The limitation of the privilege to boats "not propelled by steam" the Chamber conceives to be fatal to the development of trade, which is the sole object of the revision of the Treaty."

The Chamber then proceeds to state a conviction that nothing short of the complete "opening up of China," in its length and breadth, will give satisfaction to foreigners; complete freedom of intercourse being the best security against lawlessness. This is completely in accordance with our own views. We have been scraping at the outer shell of China long enough, and we hail with considerable satisfaction the views thus enunciated by the merchants of Shanghai as the only sure footing on which we can take our stand. The opening of ports with expensive Consulates and mercantile establishments we have had enough of. As to the inland wants the Chamber adds:—

The Chamber would first point attention to the vast productive and commercial region of Szechuen, from which foreign trade is almost entirely cut off. In the order of importance among the trading towns on the banks of the upper Yangtze, Chung-king stands pre-eminent as an enormous distributing centre. Situated in the heart of a rich country, at a distance of 720 miles from our present most inland station, Hankow, and commanding the commercial channels from Kwei-chow, Yunnan, and Kansuh, it circulates in every direction foreign goods of various kinds—silver, gold, copper, tin, lead, coal, wax, silk, and hemp—and is a purely commercial town, containing half a million of people. The opening of such a mart as that to foreign trade, would, in the opinion of the Chamber, create a demand for English manufactures which would amply repay any trouble, risk, or expense entailed on the Government in making it a port of trade.

Following the downward course of the Great River, and passing over the minor commercial stations of Wan (hien), Kwei-chow, and several others, about which little definite information is to be obtained, the next important place is I-chang, 360 miles from Hankow. The present commercial importance of I-chang is inconsiderable, the trading centre being Sha-sz, 76 miles lower down the river; yet as the highest point on the Great River to which the large steamers now running on the river could reach, it should be opened provisionally to foreign trade, that is until some more convenient station was found. All authorities seem to agree as to the navigability of the river up to I-chang; and all equally agree on the impossibility of any steamer, unless built specially for the work, ascending the rapids between I-chang and Chun-king; but the practicability of overcoming these obstacles by mechanical contrivances must necessarily be left for future investigation.

Leaving the Yangtze there is another very important water route which the Chamber would point out, leading through the rich province of Hunan and to districts productive of Tea, Coal, Iron, Timber, Corn and Oil. The Seng river, running through the Tungting lake, is said to be navigable by steamers for 300 miles from Yohchow. The town of Siang-tan on this river is well known as a vast emporium of trade, and a distributing centre for foreign manufactured goods. This town is one which the Chamber would urge should be selected as a depot for foreign trade, probationally, for the Chamber is informed that the irregular barrier levies which are so prohibitory to foreign trade in other districts do not prevail there, and therefore the advantages to be derived from the opening of the port would be almost confined to the substitution of steam conveyance for that of native boats.

The next important line of water communication is the river Han, which forms the main channel of a large portion of Honan, Shensi, and Hupeh. The emporia of Fan-ching, adjoining the city of Seang-yang, nearly 400 miles above Hankow, and Laou-ho-kow, fifty miles higher up, are described by travellers as very extensive, and the boat traffic generally on the Han is very great. It is a remarkable fact that few foreign goods find their way from Hankow up the river Han, but the Chamber is not in a position to furnish an explanation of this circumstance. With regard to the commercial capacities of this route, as well as the Upper Yang'ze and the river Seng, the Chamber feels that more accurate information is needed before any final decision is taken. For this purpose it would seem that a commission to examine and report on these subjects would render a very valuable service.

The navigation by small steamers of the channels of the Poyang lake has been so fully treated of in the memorial addressed to his Excellency by the merchants at Kiukiang, dated 2nd July, 1867, that this Chamber has only to add its own opinion to that of the community of Kiukiang in favour of the opening of the routes to Woochin, Shuy Hung and other places where steam can be effectively introduced. The port of Kiukiang would be a convement point from which supervision over the movements of foreign vessels in the Poyang lake could be maintained.

Which of the ports and places thus enumerated would be classed among the new ports of entry or registry, and which would be considered as subsidiary to some larger centre, would be decided according to the exigencies of each case. The Chamber is of opinion that Consular and Customs' establishments would only be required at a few of the principal places on the river; that the inner waters, more strictly so called, might be traversed by foreign steamers taking their departure from a Consular port.

But perhaps the most important question of all is the Transit Dues, and while referring to the remarks of the Chamber in the Memorial of 1867 on the subject, it may be well to reiterate that the principle on which this should be decided is, that the 2½ per cent., or whatever charge may be agreed upon, to be charged in the shape of Transit Dues, shall not be paid into the Imperial Treasury, but shall be handed over to the provincial authorities. These latter are held responsible for the due administeration of their governments, and must raise a revenue. And in cases where goods pass through more than one province, a method of dividing the amount of duty between the different authorities represented might be devised.

It was proposed to insert a paragraph suggesting the formation of a guarantee fund out of the transit dues and other sources, which should be available for the settlement of just claims against the Chinese Government; but this was wisely overruled. It would been have treated by Sir RUTHERFORD in his well-kuown contemptuous and antagonistic manner.

The Chamber also points out the urgent need of developing the coal mines of China by the introduction of European skill and machinery. There is plenty of good coal in the valleys of the Yangtze and in the neighbourhood of Peking, and we hope that the efforts of Mr. HENDERSON and others in this direction will soon have a practical reward. We also trust that all these suggestions will be received by Sir RUTHERFORD ALCOCK in a different spirit to that in which he treated the last representations of the mercantile bodies. Sir RUTHERFORD'S reply on that occasion, dated 17th Feb., can only be characterised as a tirade of arrogance, totally unbecoming in the representative of Her MAJESTY. Lest our readers should doubt the necessity for such strong language, we extract from the letter the following, which will convince the most forbearing and charitable. To ask the opinions of merchants and acknowledge them in such a style must be condemned, even by the Foreign-office itself. It is not the rule of English officialism to be in despatches cynical and insulting.

Extract from Sir R. ALCOCK'S despatch, Feb. 17, 1868.

"Apart from the criminative matter, these memorials "demand, with little variation, the reduction of Custom-house "vigilance, exception from restriction and surveillance, toge-"ther with the better administration of the law in cases of "litigation, either with the customs or the natives, constitute "the burden of the whole. . . . Unless the mercantile "community, therefore, be perfectly clean-handed in the "matter of Custom-house frauds and violation of treaty stipu-"lations, their representatives would probably have done "better for their interest had they dealt more sparingly in "charges of bad faith. The tone of virtuous indignation in "which such acts are condemned would of course be just as "applicable to foreigners as Chinese, upon conviction. Such "arms as these when employed against foreign Govern-"ments, however immaculate the assailants, are seldom "without a dangerous recoil, however safely they may be "used against their own. And whether the objects sought "be claimed as concessions, or demanded as treaty rights, a "flourish of weapons of any kind hardly seems the best mode "of preparing the way for successful negotiation."

---

AT the commencement of February, 1869, the extent pierced on the great Mont Cenis tunnel was as follows:—On the Bardonnèche side, 6,015 yards; on the Modane side, 4,288 yards; total, 10,303 yards. At the commencement of January, 1869, the total distance pierced was 10,184 yards, so that the progress made in January amounted to 119 yards, of which 55 yards related to the Bardonnèche side and 64 yards to the Modane side. At the commencement of February the distance still remaining to be pierced was 3,317 yards, so that at the present rate of progress the tunnel will not be completed before the autumn of 1872.

## THE ARMY ESTIMATES AND COLONIAL GARRISONS.

THE debate on the Army Estimates, which took place in the House of Commons on the 11th instant, possessed several points of interest for our readers. We must allude in the first place to a Parliamentary paper recently issued, showing separately the amounts included in the Army Estimates which refer to the colonies—*i.e.*, the relative cost of the various colonial garrisons, and the amounts to be recovered in the way of payment for them. The total amount to be expended under these heads is £2,589,886, and the aggregate of the military contributions levied on the several colonies is only £352,000, by which it would appear that a paternal Government contributes nearly two millions and a quarter towards the maintenance of forces to protect its dependencies. This looks on the whole tolerably liberal, but the illusion as usual fades on a closer examination. Many of the colonies that require the heaviest outlay return absolutely nothing, while one or two of those least able to bear it are saddled with a heavy contribution. Ceylon, against an expenditure of £150,801, repays no less than £160,000, showing an excess of nearly £10,000, manifestly an unjust taxation, even if we grant that the troops are maintained there for the exclusive benefit of the colonists, and not for Imperial purposes or convenience. The Straits Settlements, out of an expenditure of £87,115, repay £59,300, or nearly 70 per cent.—a high ratio when we come to consider that in this important and central position the troops are required (to say the least) quite as much for Imperial as for Colonial needs. Hong Kong figures as usual for a contribution of £20,000, but this year there is no *per contra* item showing the cost of its garrison; it is "lumped" with China and Japan in a grand total of £182,595. We can hardly wonder at the return from Gibraltar, the West Coast of Africa, and St. Helena being put down as *nil;* but then Canada and the West Indies are also exempt, and they should surely be as well able to pay something as Hong Kong. The vast and wealthy Australian territory, which demands a military expenditure of £143,560, returns to the national exchequer only £44,000, or 30 per cent., against 70 per cent. repaid by the Straits Settlements and over 100 per cent. by Ceylon. And it is whispered that in a future budget Hong Kong may experience the blessings of a Liberal Government in the shape of an increase on the present tax!

We must own our surprise at the inactivity at the present time of such bodies as the Ceylon League, the Straits Settlements and Hong Kong Associations. During the debate above alluded to not one member was found to call attention to the unjust distribution of these colonial military contributions, although Mr. CARDWELL'S statement on the point was so careless and inaccurate as to invite criticism. One valuable admission he certainly made, in saying, "There is the widest "distinction between those colonies that are occupied for "the purposes of colonisation and those maritime ports "which are occupied for Imperial objects as stations for our "fleets. *We therefore deduct all the expenditure* for Gibraltar, "Malta, Bermuda, Halifax, *and the China Station*," &c., &c. Now, in the Parliamentary paper before us, Hong Kong (as we have already said) does not appear separately, but is included in "China and Japan," and Mr. CARDWELL in his statement includes that station as one maintained "for Imperial purposes," and therefore returning nothing to the Exchequer; yet in the schedule of colonial contributions Hong Kong does appear separately for the usual sum of £20,000. Is this either just or consistent? Nor was this Mr. CARDWELL'S only misstatement, though the others are of less interest to ourselves. For instance, he included Malta as one of the non-contributing stations, whereas it is down in the same schedule for £6,200. In his reply to the very lenient criticisms called forth by his statement, Mr. CARDWELL took occasion to remark that—"In the Straits Settlement the number of "troops proposed to be maintained was 1,722, as against "1,609 for last year, and in China 2,266, against 2,685 for "last year. He had been particularly desirous of reducing "the force in Hong Kong, in consequence of the unhealthi-"ness of the climate and the expense of lodging the troops. "The changes that had been effected in the force stationed "at that place and at Ceylon and at Galle would result in a "considerable reduction of expenditure, and in an improved "distribution of the troops." If there is to be a diminution in the number of troops and in the expense of their maintenance, why not in the Colonial contributions also? Although, as far as Hong Kong is concerned, nothing will convince us that that unhappily overburdened barren bit of rock ought to contribute anything at all. The garrison there is simply the nucleus of a force kept up in China and Japan for Imperial purposes, and to protect the China trade generally; and if there must be some return made to the national exchequer towards the cost of maintaining it, a small tax on the trade itself—in the shape of a slightly increased duty on some articles of China or Japan produce—would be far more in accordance with justice than "squeezing" the Hong Kong community, although such a measure as we have hinted at would hardly be a popular one.

## THE MISSIONARY QUESTION.

THE Yangchow affair has been pretty fully discussed in the House of Lords, and the debate—which we give, without abbreviation or condensation, in the usual place—has elicited fresh comments from most of the leading journals. No new facts have been brought to light, but Parliament and the home press have at last become aware that Mr. TAYLOR and his party were not attached to any of the leading societies, but formed a sort of irregular, wandering mission, carrying on a guerilla warfare—if we may be allowed the expression — on their own account, against Chinese idolatry; a fact fully explained by ourselves some two months ago. The Duke of SOMERSET, who opened the debate, based his clever and humorous speech on an entire misconception in this respect, for he laid all the blame on the London Missionary Society. Lord CLARENDON contented himself with thanking his noble friend for introducing the subject, and recapitulating the instructions he had sent out as a guide to the British authorities in the event of similar emergencies again arising; he also said a good word for the Society in question, but failed to point out the Duke's cardinal mistake. The Bishop of ST. DAVID'S, in a speech of great moderation, deprecated the Duke of SOMERSET'S severe strictures on missionaries in general, but freely acknowledged that the proceedings of the Yangchow mission were not at all calculated to promote the interests of Christianity. The Bishop of HEREFORD, on the other hand, rebuked Lord CLARENDON for his dictum that "missionaries should follow in the wake of trade," and asked whether the influence of opium was likely to be a good preliminary to the preaching of the Gospel? An awkward question, to which the right reverend prelate got no reply. Earl GREY owned his admiration for the zeal which actuated missionaries who courted danger in the exercise of their vocation, but pointed out that the true course would be to treat all British subjects alike in the matter of protection; let them have its fullest benefit so long as they were content to remain within proper limits, and pursue their avocations in a peaceful and inoffensive manner; but when they carry on their operations—whether as missionaries, merchants, adventurers, or smugglers—in remote places, and in a manner calculated to provoke hostility, they should no longer be entitled to protection. It was reserved for Lord SHAFTESBURY to state that those who had raised this fuss were a small independent body of men, acting under no central authority, and in no way connected with the great Missionary Societies of England, such as the

Digitized by Google

Church Missionary, London Missionary, Wesleyan, or Baptist Societies. And there the discussion ended.

We notice that the China press regards with marked disfavour the tone of the home journals with regard to this affair. This is doubtless very natural. The local papers look on the Yangchow affair, not as an isolated case to be judged on its own merits, but as one of a long series of outrages that should be punished simply *as* an outrage against British subjects, without much reference to its individual peculiarities. In this view we cannot altogether agree, and we will briefly explain why, lest to some readers our unsparing condemnation of the BURLINGHAME sham may be thought inconsistent with our objection to the use of the strong arm in such cases as that of the Yangchow Mission. In the first instance the Central Government should be held responsible for all injury to British life or property that may occur in any part of the Empire, provided always that the parties aggrieved have not wilfully placed themselves beyond the pale of British protection. As regards the immediate measures necessary for preserving life or property in a sudden emergency, of course no time should be lost, but such measures should be as far as possible only precautionary or preventive. Subsequent claims for redress or indemnity should be made at Peking; if they cannot be obtained without pressure, let such pressure be applied at headquarters. But should the Central Government avow itself incapable of punishing the offenders, and invoke the aid of our forces, or should they authorise our authorities themselves to use the necessary coercion, *then* indeed the *ultima ratio* may be brought to bear upon local or provincial authorities without any compunction. Exceptional cases will sometimes arise; the recent events in Formosa, for instance, must be regarded in a very different light from those happening in a central province of the Empire; but, as a rule, we believe the course we have described to be the most equitable and likely to be most beneficial in the end. Firmness, by all means, but the less force the better. To the missionaries we would suggest patience and moderation. Those belonging to the leading English societies or the American Episcopal Mission require no such counsel; they have always been discreet. But others, whose zeal is apt to outrun their discretion, should bear in mind that they cannot reasonably expect an ignorant Chinese mob to listen meekly to vehement condemnations of all they reverence. It would involve a total, and indeed impossible, change in their nature—a miracle such as all the gunboats in China would fail to work. And although *we* may see the absurdity of such sayings as that "every missionary requires a gunboat at his back," the Chinese, when they find any misunderstanding with missionaries so promptly followed by the appearance of gunboats, are not unlikely to conclude that Christianity is, after all, a religion of fire and sword, and to receive the advances of its ministers with less favour than ever.

## PROGRESS OF TELEGRAPHIC COMMUNICATION.

WE recently announced the formation of a company for the construction of a direct line of telegraph to India; direct, that is, in the fullest sense of the term, by avoiding all contact with the Continent of Europe. The prospectus of this company was expected to appear almost simultaneously with that of the BRITISH INDIAN Company, but was for some reason delayed, and we then took occasion to regret the postponement of an enterprise which we had consistently supported, from its inception, as being calculated to afford incomparably the best and most efficient method of establishing a satisfactory communication with India, and ultimately with the Straits, China, and Japan. This company (the DIRECT ENGLISH, INDIAN, AND AUSTRALIAN SUBMARINE TELEGRAPH) has now laid its scheme before the public—a scheme which is as promising from a commercial as it is interesting from a scientific point of view. There has of late been a good deal of talk about a new description of cable invented by Mr. VARLEY, which was asserted to be only a fraction of the weight of the (now) old-fashioned iron-wire cable, and far cheaper. Mr. VARLEY has now brought his invention to perfection; his improved cable has been severely tested by Sir WILLIAM THOMPSON, one of the first electricians of the day; has been pronounced by him to be in all respects satisfactory, indeed far superior to any other form of wire; and it has been accordingly adopted, with all confidence, by the projectors of the new line. So cheap is it that the India-rubber Gutta-percha, and Telegraph Works Company have contracted to lay the first section of it—that between Suez and Bombay—for £606,800, while the corresponding section of the British Indian Company is to cost nearly twice that sum. The portion on this side of the Isthmus—from England, *via* Gibraltar and Malta, to Alexandria—will be proceeded with afterwards. The electricians are confident that the cable will transmit messages at a minimum speed of ten words a-minute; and when the line is completed messages between England and India can be delivered within an hour, quite independent of any complications that may arise on the Continent of Europe.

Another peculiarity of this undertaking is that the lightness of the cable, and consequent rapidity of construction, will give it several months' start of the British Indian, and if all goes well it may be laid and in working order while the heavy cable of the latter company is still coiled in the tanks of the *Great Eastern*. In short, the success of the lighter and cheaper cable, once established, will work a complete revolution in ocean telegraphy, not only by facilitating the laying of new lines, but by causing a sensible diminution in the charge for transmitting messages. *The Times*, in noticing the new project, says its apparent identity with the British Indian is perplexing, and the rivalry wasteful and useless. Were it proposed to lay a second heavy iron-covered cable by the same route, side by side with the first, this might be true; but the circumstances are entirely different. The "rivalry," far from being foolish and wasteful, is intelligent and beneficial; it is the cheap and expeditious method *versus* the slow and dear; the direct sea route against that across the Continent, and therefore subject to interruption. In July last we blamed the projectors of a new Red Sea Cable for waiting for Government aid, and wrote:—"If they "would only be content, once for all, to abandon the idea of "a Government guarantee, and boldly launch their scheme "on its own merits, they could not fail to meet with a satis- "factory response." The prediction has been fully verified by one company, and now here is a second in the field, with every chance of equal, if not greater success. We fully believe there is work for both; at any rate, between the two we are tolerably sure of having an efficient line in the course of another year.

It is badly wanted. The old Indian lines, which had been on their best behaviour for a brief period, are playing worse tricks than ever. Some messages take a fortnight in transmission, some come mutilated beyond possibility of recognition, and others are never heard of at all. The late commercial telegrams from China have taken from nine to twelve days in transmission from Galle. The Northern China ports and Japan have a resource in GRANT'S line, which is working admirably. We are now receiving messages from Shanghai by this route in eighteen days, a much quicker rate than can be attained by way of Galle, even under the most favourable circumstances.

This is already a somewhat discursive article, but the subject of China telegrams leads us to ask, how is it that the China merchants themselves do not think it worth while to co-operate with the efforts that are being made in this country towards the extension of telegraphs to the Eastward? Joint-stock enterprise has sustained some reverses in China, as elsewhere; but, on the whole, has been successful. In three of the most legitimate branches—banking, insurance, and steam navigation—undoubted triumphs have been achieved, as evidence of which we need hardly point to the present position of the Hong Kong and Shanghai Bank, the North China Insurance, and the Shanghai Steam Companies. Why should not a telegraph company, to commence by laying a cable from Galle to Hong Kong, *via* the Straits, be added to the list? Everything points to the feasibility of such a scheme, and we are confident that if boldly launched success would be a matter of certainty. No *Great Eastern* is required now. Mr. VARLEY'S light, slender cable could be conveyed out, and laid, by a couple of vessels of very moderate size; the needful amount of capital, which by the old method would have necessarily presented a formidable array of figures, would be diminished by one-half; and there would also be a great saving of time—which is money. The money "dropped" in one season on ill-judged speculative shipments of tea would more than suffice for it; a consideration which we commend to the attention of our readers at Hong Kong and the tea-shipping ports. A considerable proportion of the capital could no doubt be raised in Singapore also.

## THE BRINDISI ROUTE.

AMONG the difficulties in the way of the adoption of the Brindisi route for tfie mails, that of French reluctance and passive opposition need no longer be considered, for there is little doubt that if obstacles be thrown in the way of the Mont Cenis line, an equally advantageous route may be found across the Brenner. In this way the service will be from Ostend, through Belgium and Germany, without touching French territory at all; and here no jealous interference need be feared. Both the Governments and the railway companies of those countries are eager to encourage the adoption of this route. At a preliminary conference, held at Stuttgart in December (which we have already noticed), representatives were present from the Austrian Southern Railway Company, the Bavarian State Railway, the Wurtemberg State Railway, the Baden State Railway, the Rhenish Company, and the Belgian State Railway. The feasibility of the plan was demonstrated with so much success that a committee of delegates was appointed to confer with the Italian Government and the Italian railway companies, and 'the result is considered so satisfactory that a final conference is now to take place on the 15th of April, at Florence, to settle the details of the plan. At this congress no less than seventeen railways will be represented, and they are confident that their terms will be found so favourable that the English Government will not hesitate to accept them. The saving of time between London and Alexandria will, it is understood, be not less than three days and three nights each way, over the present route *via* Marseilles. As for Brindisi itself, the place seems to be at last waking up from its long sleep. In another column we publish an interesting letter, describing the progress lately made with the harbour, improvements in hotel accommodation, and other movements in the right direction. Sir JOHN LAWRENCE, the Duke of SUTHERLAND, and other persons of distinction have lately adopted this route, and it seems to be fast growing in public favour.

---

THERE is great and very just discontent at Singapore regarding the working of the P. and O. mail service. The rule that the homeward steamer shall remain only twenty-four hours at that port is frequently a cause of very great inconvenience to the merchants there, and this fact was forcibly brought to the notice of the late Postmaster-General by the Chamber of Commerce, but their representation was received with scant courtesy, and proved unavailing. It was the Duke of MONTROSE who was applied to for a relaxation of the rule, and who so rudely refused; we cannot suppose that the directors of the P. and O. Company, if left free to act, would perpetuate so needless a restriction. The time lost by a slightly prolonged delay at Singapore might be easily made up afterwards, and in cases where the steamer reaches Singapore before her due date (which not unfrequently happens), the strict adherence to the obnoxious limit is simply senseless. We trust that a renewed appeal to the present Postmaster-General will have a more satisfactory result.

---

WE hear from Osaka that the mint machinery purchased by the Japanese from the Hong Kong Government for seventy thousand dollars is now being erected, but is not expected to be in working order for another year. We wish we could see the Chinese Government taking similar steps to supply the want so greatly felt of an uniform system of currency for the whole Empire, even though the chance of immediate success would be perhaps but small. The new college at Peking we hear is already pronounced a failure, and it is by no means unlikely that many of the first efforts made in the way of progress may be similarly doomed to disappointment. But that is no reason why we should despair of ultimately introducing into China many of the germs of civilisation that are so eagerly welcomed in Japan, notwithstanding the transparent hostility of Mr. BURLINGHAME to all Western innovations.

---

MR. CHILDERS, in his explanatory statement of the Navy Estimates on the 8th inst., announced a reduction of the squadron in China waters from thirty-four to twenty-five ships, but did not specify in what class of vessels the change would consist. Colonel SYKES cordially approved, but Sir J. ELPHINSTONE deprecated so large a diminution of the force, as it would admit of an increase of piracy, and entail a far heavier expenditure in the end. The proposed reduction will nevertheless be carried out.

THE inaugural dinner of the Colonial Society was given on the 14th inst. at Willis's Rooms, Viscount BURY in the chair. There were a great many "distinguished" guests, including Mr. REVERDY JOHNSON, Mr. GLADSTONE, the COLONIAL SECRETARY, and several other Ministers, with about two hundred gentlemen connected with, or supposed to be interested in, the Colonies. After "The QUEEN and Royal Family," the first toast was "The United States of America," to which Mr. REVERDY JOHNSON replied in one of his usual flattering speeches. The PREMIER acknowledged the toast of "Her Majesty's Ministers," and proposed "Success to the Colonial Society," to which the Chairman replied. Lord GRANVILLE spoke for the British Colonies generally; Sir GEORGE CARTIER for Canada; Sir BARTLE FRERE for India, and Sir C. NICHOLSON for Australia. No one said a word on behalf of Hong Kong, the Straits Settlements, or Ceylon, and in fact during the whole proceedings there was not the remotest allusion to any of our Colonies in the Far East; for which reason we consider it unnecessary to devote any space to a lengthened report of the speeches. The Society will in no respect supersede the independent Associations already formed to represent the various Eastern colonies.

## NORTH GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, March 12.

In one of my last letters I informed your readers that the case of the Bremen ship *Lesmona*, captured by Chinese pirates as the crew refused to offer any resistance, had caused a great sensation in Germany. Count von Bismark, as Chancellor of the North German Confederation, has now taken action in the matter, and addressed a circular to the Governments of the Federal Maritime States, calling their attention to the subject, and inviting them to furnish him with suggestions how such a disgrace to the flag and loss to shipowners and underwriters can best be prevented in future. As it has been shown that the chief reason assigned by the German sailors for not defending the ship and the honour of their flag was the uncertainty about their future existence if maimed, and of their families if killed, the Count has further directed his diplomatic representatives in the other maritime States, more especially in England and the United States, to report to him how such things are managed in other countries. The Senate of Bremen has already replied to the inquiries made by stating that several of the shipowners of that city, whose vessels are engaged in the carrying trade in the Far East, have armed their vessels at their own cost, and organised such a system of defence as to be able to give the piratical junks a warm reception if the crew, who have been trained to the guns, have only the courage to stand by them and defend themselves resolutely. In order, however, to achieve this object it would be needful to make some general regulations on the subject. As every German is now obliged to serve for a certain time in the army or navy, it is therefore proposed to consider such a defence of the national flag from an attack by pirates as a service done to the State, and recognised as an act of warfare, which should not only be rewarded by a certain pecuniary compensation, in accordance with the greater or lesser danger to which the sailors were exposed—to be awarded by a jury of Germans, presided over and impanelled by the Consul—but that such effective resistance be considered as a year of active service in the navy, entitling them, if wounded or disabled, to the same compensation or pension, and a suitable provision made for their widows and children, if killed in the act of defending their ship. This suggestion has been well received at Berlin, and will probably be acted on.

### COMMERCIAL.

In Tea there is no alteration to notice; there is a fair demand, and about 800 chests of Congou, Souchong, and Pecco, with a few parcels of green, have changed hands this week. The two cargoes direct from China are not yet in the market. Rice quiet; the cargo from Bangkok, reported below, was sold before arrival. Cassia continues in favour at 13½ sch. bco. Pepper rising, some parcels of black Singapore having been sold at 4 9-16ths to 4⅝ sch. bco. Refined Camphor is higher, 10,000 lbs. were taken at 17 sch. bco., and now none is to be had under 18. More business has been done in Spelter at rising prices; among the transactions of the past week were 1,500 centners for spring delivery, at 14 mks. 6 sch. bco., 2,500 ditto loco, at 14.8, 1,000 do. W.H. loco, at 14.14, and 5,000 do. for spring delivery at 14.8. The present quotations are 14.10 for loco, and 14.8 for delivery, and the market is firm.

### SHIPPING.

ARRIVED.—Susanne, from Saigon; Anna Maria, from Foochow (5,430 chests tea); Hainan, from Amoy and Foochow (5,178 chests tea); Lorenzen, from Bangkok (7,370 bags rice and 1,740 pieces sapanwood).

SAILED.—Volador, to Nicolayefsk.

### SHIPPING AT BREMERHAVEN.

ARRIVED.—Wild Hunter, from Batavia; Europa, from Bangkok (22,710 bags rice and 1,947 pieces sapanwood); Nestor, from Bassein (9,850 bags rice); North Wind, from Rangoon (11,526 bags rice and 1,120 chests catch); Anna Scott, from Bangkok (3,920 bags rice and 200 pieces sapanwood.

## HOLLAND.

—o—

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, March 9.

The members of the Second Chamber of the States General have at last dealt with the Bill to alter the conditions of the concession granted to construct a railway from Samarang, via Souracarta, to Djoejocarta. In a former letter I told you that the original capital of the Netherlands India Railway Company had proved insufficient, and that a further sum of three million guilders was wanted. There was no chance of this surplus capital being obtained from the public, the company having failed in an endeavour to raise the original capital. The Government, therefore, being convinced of the nece-sity of assisting the company, proposes to increase the guaranteed interest from 630 000f. to 765,000f., to enable the company not only to complete the main line, but also the branches to Willem, and between Batavia and Buitenzorg. Several members, both Liberal and Conservative, took part in the discussions, and it was clearly evident that they all wished to bring the matter to a satisfactory conclusion. Most of the speakers, however, declared themselves against the proposal to increase the guaranteed interest, and thought it more desirable that the Government should advance a sum of five million guilders, at an interest of 4½ per cent., rather than increase the guarantee, which measure had not proved serviceable to the company. Messrs. Mirandolle and Viruly Verbrugge were the only members who defended the Bill as proposed by the Government, and they refuted several of the complaints made against the company, as well as against the proposed measure. Mr. Rochussen also urged that the State should assist the company by increasing the guarantee. The Bill was supported by the Ministers of the Colonial and Financial Departments, who, while acknowledging that the company had made some miscalculations, proved that circumstances made it necessary to assist the company, because should it become bankrupt—and this could not fail to be the case if the Bill was thrown out—the State would be compelled to construct the railway at the public expense. One of the members of the Liberal party, M. Fokker, then said that to prevent the Bill being outvoted—which would make a very bad impression in India—he would propose a motion to abandon the question of a line from Batavia to Buitenzorg, and to advance a sum of five millions to the Netherlands India Railway Company especially, for the completion of the line from Samarang to Djoejo. This motion came under discussion in yesterday's sitting, and found no defenders, being finally outvoted by 52 against 11 votes. Thereupon the debate upon the original measure was resumed with a masterly speech from Mr. van de Puttein favour of the Bill, which was ultimately carried in its original orm.

Some days ago a treaty was concluded between Holland and Austria to decrease the postage on letters by the mail to India. It would be more desirable if our Government did something to promote the adoption of the route via Brindisi.

The Conservative paper *Het Dagblad* published some days ago an item of news, which the Editor himself believes to be a *canard*, but which has, nevertheless, been received from an authentic source. According to this *entre filet* the Minister of the Colonial Department has forwarded to the Council of State a Bill authorising the Governor-General of Netherlands India to lease ground at quit rents, which ground, after a certain period has elapsed, will become the exclusive property of the tenants. The Liberal papers do not say, up to this moment, one word about this communication.

The Huet scandal has not yet come to an end. I told you that he took passage by the mail (Messageries Imperiales), as a functionary of the Government, and that his passage money was, according to a contract between the Government and the Messageries Imperiales, largely decreased. The company has, however, arrived at the conviction that Mr. Huet was not a functionary of the State at all, and the amount deducted is now reclaimed. The Chamber of Accounts declines to allow the claim, so that either Mr. Huet or his protector, the former Minister of the Colonial department, Mr. Hasselman, will be obliged to pay.

The appointment of General Kroesen as Commander-in-Chief of the Netherlands India army is greeted enthusiastically by the press, and especially by the Conservative journals, the *Nieuwe Arnhemsche Courant* stating that this is the most lucky appointment made of late. He undertakes a heavy charge, but no one has more ability for the task.

There have been several Royal decrees issued of importance for the Far East. The Netherlands Consul at Kanagawa is, now that the harbour of Yedo is opened, appointed Consul also in the last-named place, Mr. R. A. Mees being appointed Vice-Consul. H.M. has conferred the order of the Netherlands Lion on Mr. A. R. J. Cramerus, ex lieutenant-colonel of the National Guard at Batavia.

ROTTERDAM, March 18.

Messrs. D. Banduin, A. W. P. Kup, and P. F. Hubrecht, in their capacity as managers of the Rotterdam Bank, issued on the 12th inst. a circular to enable the shareholders to judge of the present condition of the Bank. According to this report the balance for 1868 shows a deficit of only f.156,551.12. This improvement—you will remember that the loss amounted to f.337,629 83 in June last—is due to the favourable results obtained by the India agencies, who made a profit on behalf of the bank of f.128,098 50½. The managers offer their thanks to these agents for having obtained such a result in the face of the unfavourable condition of business in our colonies, which is still far from satisfactory, the large number of bankruptcies of China houses, the failure of three important firms in intimate relations with the bank, and the impossibility of doing business to the same extent as if the bank had been in a normal position. The directors further state that in the forthcoming year the amount which can be set aside from the current expenses may be estimated at 101,300f. They regret being compelled to lay before the shareholders a balance-sheet showing a deficit, and that they leave the bank at a moment fraught with so much uncertainty regarding the future. They certify, however, that the bank is quite in a position to meet all its liabilities. This circular produced, when first issued, a good impression; but the day after its publication Messrs. F. J. Plate and A. Rueb, commissaries of the Rotterdam Bank, inserted in the *Nieuwe Rott-rdam Courant* an advertisement, stating that the report of the managers had been put in circulation without the knowledge or permission of the commissaries; that they do not guarantee the accuracy of the figures showing the result obtained in 1868, because no balance has yet been struck and the India accounts have not been laid before them. I give you these facts without comment, and only with the assurance that the meeting of shareholders, on the 18th inst. will be very stormy.

Some days ago the case "the State of the Netherlands *v* E. Francis," ex East India functionary, was tried in the High Court. The action was, as I stated in a former letter, to recover an amount of money, which Mr. Francis thought was due to him. The Court, however, returned a verdict in favour of the State.

A commission has been appointed here to promote the plan of erecting at Batavia a statue to the memory of J. P. Koen. This plan does not meet with the sympathy it deserves.

The vessel *Steeds Voorvaarts*, now building at the yard of Messrs. C. Gips and Zoon, at Dordrecht, for the Japanese Government, will be launched early in April.

### COMMERCIAL INTELLIGENCE.

COFFEE.—Since the Trading Company announced its March auction, which will be held on the 17th, there has been a lively demand, and an advance of 1½c. on the last auction has been paid. The private transactions include 1,500 b. Java, ex Triton and Johannes, at 35c. to 43½c.; 1,220 b. Macassar, ex Triton and Mary Goddard; 1,400 b. Java, ex Ilma and Triton; 1,643 b. Java, ex Triton, at 36½c. to 47¾c.; 3,531 b. Padang, ex Padang Packet; 925 b. Java, ex Chili, at 33½c. to 44¾c.; 1,000 b. Java, ex Friesland.

SUGAR (RAW).—To-morrow will be offered in auction by the Trading Company 70 055 mats Java (see "Latest"). In waiting for that auction a dullness prevails in the market. There are no transactions to report except 800 mats Sourabaya, No. 15, at f.37½.

RICE.—Market inactive. 5,560 b. Java, ex Isabella, and 2,300 b. do., ex Emilie, changed hands at prices that did not transpire.

TEA.—The market is dull, but prices are very firm. There is some demand for the lots imported ex Mountain Ash. The cargo, ex Albis, will be offered on the 7th April.

SPICES.—Good and fine qualities have been in steady request at improved currencies. Nutmegs, No. 1, 96c.; No. 2, 87c. Mace, E, 141c. Pepper, 625 b. Sumatra, ex Patriarch Samhiri, sold at 23c.

TOBACCO (Java).—The following parcels have been sold at auction: 617 bales Java, Losarie, at 31c.; 41 bales, S, at 19½c.; 58 bales, A. J. Walter, at 31c.; 527 bales, Tikong, at 35c.; 301 bales, BDR, at 36½c.; 79 bales, BT, at 22,c.; 223 bales, ROW, at 19c.; 283 bales, Siengge, at 31c. Prices in general are well supported, especially for the inferior qualities. The stock is reduced to 2,646 bales.

DRUGS.—Camphor: Unaltered. Gum Damar: 280 chests, ex Zeenymph, sold at secret prices. Gutta Percha: In good demand. Preserved Ginger: Fine quality 75c., but holders decline to operate at this price. Japan Wax: A, 55f.; B, 54f.; D, 44f.

RATTANS.—An active business has been done at advancing prices: 1,774 b., ex Ilma; 6 800 b., ex Rahtinas; 1.505 b., ex Mary Goddard; 3.018 bales, ex Parana; 125 pic., ex Triton, and 194 pic., ex Janet Mitchell. The Trading Company will sell in auction, on the 7th of April, 7,029 piculs.

ARRACK.—164 cases Batavia, ex Northumberland, have been sold.

INDIGO.—121 chests Java sold at firm prices.

BANCA TIN.—The market has been inactive, and quotations have had a downward tendency. The rather nominal quotation is 79f.

MISCELLANEOUS.—Terra Japonica, 11½f. was paid for 100 b. Java Curcuma: Some transactions took place at 10½f. Kapok: 160 b. were sold privately.

### SHIPPING INTELLIGENCE.

ARRIVALS.—March 13, at Brouwershaven, from Banjoewangie, Professor van der Boon Mesch.

DEPARTURES.—March 11, from Hellevoet, for Singapore, Ellina; from Texel, for Batavia, Maria Adolfina; for Singapore, Johan; 14, from Texel, for Batavia (via Newcastle), Minister Fransen van de Putte; 15, from Brouwershaven, for Batavia, Noach I.

PASSENGERS OUTWARD.—For Java, per Maria Adolfina, Messrs. N. Stark, D. Westhoff, A. Bommell, J. Kruseman, A. F. Dethling, S. Siberg and family, J. C. de Bruin; Mrs. Camphuis; per Noach I., the officer, C. G. H. F. Van Schendel, the Lieut., L. L. André, and 170 soldiers.

PASSENGERS INWARD.—From Java, per Elizabeth, Messrs. Van der Haar and family, J. J. Schneither and family, J. Schyder and family, S. S. de Vries and family, Ledeboer, Mrs. Mehlbour, Miss Kroon, Messrs. Beerens, Bernolst Moens.

MISCELLANEOUS.—The Trading Company has chartered the following vessels to convey produce from India:—

To Amsterdam: Djawa, R. P. Bakker, 626 lasts at f.84.90; Senior, A. van Det qq., 311 lasts at f.85.50; Laura and Adele, C. H. Pohlmeijer, 279 lasts at f.86.50; Vrede, D. van der Plas, 399 lasts at f.87 80; Hollandstrouw, F. de Vos, 397 lasts at f.88.74; Antje, P. van der Hoog, 452 lasts at f.89.47; Mentor, H. W. Butenuth, 394 lasts at f.89.68; Insulinde, J. M. J Jollie, 516 lasts at f.89.68.

To Rotterdam: Maassluis, J. G. Kuchler, 471 lasts at f.86.80; Constantia, J. D. v. Monnom, 391 lasts at f.87.45; Baron van Pallandt van Roosendaal, D. H. Dietz, 751 lasts at 88.76; Kortenaer, M. Roovers, 514 lasts at f 89.39; Sumatra, J. Buyser, 347 lasts at f.89.49.

To Dordrecht: Grootmeester Nationaal, A. F. Giesse, 399 lasts at f.89.45.

To Middelburg: Schelde, A. L. Hoffmann, 348 lasts at f.86.50; Vier Gezusters, S. R. Otto, 389 lasts at f.88

## JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.

MARCH 16.

BANK OF HINDUSTAN, CHINA, AND JAPAN V. EASTERN FINANCIAL ASSOCIATION.

Lord Justice Selwyn terminated the sittings of the Committee by giving judgment in the case of "The Bank of Hindustan, China, and Japan v. the Eastern Financial Association," which was specially appointed for hearing. It was an appeal from a decree of the Judges of the High Court of Bombay, which affirmed a degree of a single judge as to a compromise accepted from a bank in liquidation. The points were—whether the Court below had power to sanction a compromise so as to bind all the contributories, and, further, whether the compromise was of a character to be accepted.

Sir Roundell Palmer and Mr. Leith were for the appellants; Mr. Mellish, Q.C., and Mr. Graham Hastings represented the respondents.

Lord Justice Selwyn, at the close of the argument, gave the judgment of their Lordships. It was held that the Court at Bombay had jurisdiction to sanction a compromise of the nature entered into, and that it was a proper one to be embraced by the parties in litigation. Her Majesty would, therefore, be advised that this appeal should be dismissed, with costs.

The judgment in the case closed the sittings, and they will probably not be resumed until June.

## DURHAM ASSIZES.

A CHINA CLIPPER CAPSIZED IN SUNDERLAND DOCK.—HAY AND OTHERS V. THE RIVER WEAR COMMISSIONERS.

(Before Mr. Justice Brett.)

This action was brought by the plaintiffs to recover compensation for damage done to the *Coral Nymph* (the well-known China clipper), on the 22nd of January last, which capsized in No. 1 graving dock at Sunderland, owing, it was alleged, to defendants' negligence.

Mr. Manisty, Q.C., and Mr. Shields appeared for the plaintiffs; and Mr. Quain, Q.C., and Mr. Kemplay for the defendants.

The evidence for the plaintiffs went to show that Mr. Simpson, the dockmaster, took charge of docking and undocking ships, and that he had been cautioned on several occasions to put sixty tons of coals, which had been purchased by the plaintiffs, on board, before attempting to take the *Coral Nymph* out of the dock. He had, however, only put fourteen tons on board, and, on the water being admitted to the dock, the ship capsized. In cross-examination, however, it came out that ships were taken out and in the dock by men employed for the purpose by either the owners of the vessel or shipwrights, and that the dockmaster merely gave a general superintendence.

For the defendants, Mr. Simpson was called, and he stated that on the night previous to the accident he had told Captain Winchester, master of the *Coral Nymph*, that the coals ordered had not arrived. The latter said she must come out, coals or no coals, the following morning, and that they could steady her with the booms and the topsail halyards. Fourteen tons of coals were put on board, the remainder of the sixty tons not having arrived. The booms, however, could not be got into the dock, but a rope was run out from the topsailyard to a block on a quay. This, however, gave way, and led, according to Mr. Simpson's statement, to the ship canting.

His Lordship having summed up, the jury returned a verdict for the defendants.

## THAMES POLICE-COURT.

SEA WAGES.—THE "GRESHAM."

Captain Lewis C. Brayley, the master of the *Gresham*, appeared before Mr. Paget to answer a summons taken out by James Clifford, a seaman, who claimed a balance of £16 10s. for services on a voyage from England to China.

Mr. Young appeared for the claimant, and Mr. Pelham defended.

The complainant shipped for £2 10s. per month, and from the wages bill rendered by the defendant it appeared that his services extended over a period of nine months and fifteen days from July 15, 1867, to May 1, 1868, for which the complainant was credited with £23 15s. The principal item under the head deductions was—"May 3 to June 5, fined six days' pay for one continued wilful disobedience, 33 days equal to 198 days, £15 10s." A balance was made due to the *Gresham* of 3s. 10d., and the account terminated as follows:—"Dated at the Fort Foo-chow-foo this 8th day of June, 1868."

Mr. Young characterised the account as a disgraceful one, on which Mr. Pelham said that was a flight of extravagance on the part of his friend the account did not deserve, and that it entered very fully into particulars.

Mr. Young then said the account was an extraordinary one, and very ridiculous, and he was justified in saying so. Now what was the first item, "Reduction of wages while in prison, from July 15, 1867, to the time of refusal of duty, May 1, 1868, nine months and fifteen days, at £2 10s., £23 15s.," and then on the other side of the account was a charge of £15 10s. for 198 days' pay, from May 3, to June 5. The man was in prison from May 1 to June 5, and he was charged six days' pay for every twenty-four hours' absence while he was in prison. That was illegal, and not authorised by any section of the Merchant Shipping Act.

Mr. Pelham said that the complainant was brought before the British Consul at Foo-chowfoo and committed to prison. The Consul had the authority to commit to prison. The defendant had to hire four Chinese substitutes, at a ruinous expense, for three English sailors absent from the ship. The British Consul had certified on the articles that the complainant was left behind with his authority.

Mr. Paget said the captain gave the seaman wages to May 1.

Mr. Young: Yes, sir; we only claim wages to May 1. I contend the Consul had not power to adjudicate in this case and send the man to prison. The powers of the Consular officers are set forth in sections 160, 195, 197, 207, 268, and 279. Those clauses state the acts to be done by, and persons included in, the expression Consular officer. The British Consul could have sent the man home for trial if he had been guilty of any indictable offence.

Mr. Pelham said it would be a hard case if the owners of the *Gresham* had to pay £127 for the services of four Chinamen for the desertion of four seamen, and then be compelled to pay this demand. The complainant was left behind by the authority and with the sanction of the Consul.

Mr. Paget said he had nothing to do with the Consul or the Consul's mind.

The defendant said that he had no charge to make against the complainant until May 1, but after that he was guilty of wilful disobedience, and in prison the greater part of the time from May 1 to June 5.

Mr. Young: For which you charge us 198 days' pay.

Mr. Pelham argued that the deduction ought to be allowed.

Mr. Paget said the defendant allowed wages until the 1st of May, and the complainant only sued for wages up to that date. The captain could not repudiate his own discharge. The captain had distinctly told him that he had no complaint to make against the complainant until the 1st of May. The defendant could not build up with one hand and pull down with the other. He would not give effect to the ingenious arguments of the defendant's advocate. He ordered the wages claimed, £16 10s., to be paid, with one guinea costs.

SEA WAGES.—THE "POLMAISE."

Captain Charles Butler, the master of the ship *Polmaise*, lying in the East India Docks, appeared before Mr. Paget, on Thursday, the 11th inst., to answer a claim for wages made by James Notting, a seaman. Mr. Smith appeared for the complainant, Mr. Pelham for the defendant.

There was only one item in the wages account disputed, a charge of 25s. for a new boom-iron, alleged to have been lost by the negligence of the complainant in the port of Shanghai. The account of the accident was thus set forth in the log-book, as read by Mr. Pelham:—"James Notting was sent aloft with the royal studdingsail boom-irons. He clumsily allowed one of them to drop overboard. By his own statement he laid them on the top, without making them fast, put his foot on them, thereby heaving it out of the top. It fell, splitting the mainrail, and dropping in the water."

Mr. Smith contended that the complainant was not liable for an accident which happened to a seaman in the discharge of his duties any more than a domestic servant was liable to pay for breaking a dish, a plate, or a pane of glass. The principle had been settled very long since, and if every seaman was to be compelled to pay for every little thing broken or lost on a voyage there would be no seamen offer themselves to man our ships. To make the seaman liable it must be shown there was culpable or wilful negligence.

Mr. Pelham said the iron was of small value, but the owners of the ship thought the seaman ought to be made liable for the loss of the boom-iron, and that he had been guilty of something more than a mere act of clumsiness or carelessness. The owners also considered there was an important principle involved in the matter, whether seamen were to be continually losing, and damage done to the stores of a ship, without being compelled to pay for the same. The mates of ships had often been compelled to pay for deficiencies and loss of cargo and stores, and the same principle ought to be applied to common seamen. In a case heard in that court some years ago, and during the lifetime of his (Mr. Pelham's) father, a magistrate had decided that a mate of a ship in hoisting tea into a ship, and who had been expressly directed by his captain to use guy ropes to steady and swing the suspended chests of tea in addition to the ordinary tackle, and who disobeyed the orders of the captain and lost the tea, was held liable to make good the loss, and the whole of his wages were forfeited.

Mr. Paget: How was that?

Mr. Pelham: The value of the tea lost absorbed the whole of the wages. In other cases of a deficiency of cargo mates had been compelled to pay for the loss.

Mr. Smith said there was a well-known case arising out of proceedings in that Court, where the mate of a ship was ordered to pay for a hogshead of sugar which he had entered as having been received, and was not to be found when the cargo was discharged. The mate was ordered to pay for the sugar on the ground of neglect. The hogshead of sugar was afterwards found at a receiving-house in Islington. It was stolen from the ship while under the charge of the dock authorities.

Mr. Pelham quoted several cases in support of his argument, that seamen should be compelled to pay for their clumsiness.

Mr. Paget said if a groom injured a horse by accident, or a butler let a tray fall and broke his master's decanters and glasses by accident, he could not be made to pay for them. The loss of the boom-iron appeared to be an accident, and it would be unjust to make the seaman liable. He ordered the wages claimed, £13 4s. 7d., to be paid, with one guinea costs.

---

RETURN OF SIR JOHN LAWRENCE.—Sir John Lawrence arrived on the 15th inst., about six o'clock, at the Charing-cross station, where he was met by Sir R. Montgomery, Sir A. Phayre, Colonel Becher, C.B, Mr. George Campbell, and other gentlemen among his friends and acquaintances, who were anxious to welcome the late Viceroy of India on his return to his native country. Sir John came in Her Majesty's steamer *Caradoc* to Brindisi, and thence over Mont Cenis and by Paris to England.

THE ROUTE FROM INDIA *via* Brindisi would appear to be rapidly obtaining favour among English travellers. A telegram through the Reuter agency states that the Adriatic and Oriental Company's steamer, which arived at Brindisi on 17th inst., brought seventy-seven passengers, and that of these thirty-seven were Englishmen returning from India. The vessel left Alexandria on the 14th inst., and the voyage occupied seventy-three hours.

# Monetary and Commercial.

The prospectus has been issued of the "Direct English, Indian, and Australian Submarine Telegraph Company, Limited," the object being to lay submarine telegraphs between England, Gibraltar, Malta, Egypt, India, China, and Australia, so that the lines "shall be in English hands from end to end." The total capital is fixed at £2,500,000, in 500,000 shares of £5 each, but the first issue is limited to £750,000, or 150,000 shares, applicable to lines from Malta to Brindisi, Malta to Egypt, and Suez to Bombay. The Indian Rubber, Gutta Percha, and Telegraph Works Company, Limited, will contract to make and lay the lines from Suez to Aden, and from Aden to Bombay, for the sum of £606,800.

The Anglo-Mediterranean Telegraph Company will pay an interim dividend of 4s. per share, free of income-tax, on account of profits for the three months ending 15th March, 1869.

The proceedings in the appeal before the Judicial Committee of the Privy Council in the case of Rodger *v.* the Comptoir de Escompte of Paris, but in which Mr. S. Mendel, Mr. B. Liebert, and Messrs. Calvert and Co. were the real appellants, have been published in the form of a pamphlet, extending over nearly 100 pages of close type.

The state of trade at Manchester is far from favourable. Last week's advices announce the suspension of Messrs. James Black and Son, commission agents, of Glasgow. This and previous bad debts have led to the failure of Messrs. Ward, Armitage and Co., of Manchester.

The failure is announced of Messrs. Waterhouse and Kendall, spinners and manufacturers of Stockport, with liabilities estimated at £25,000. The *Manchester Courier* also reports the stoppage of Messrs. Leadbetter and Co., linen manufacturers, of Glasgow, but the branch establishments at Dundee and Belfast are not affected. The liabilities are stated at £70,000.

The stoppage of Messrs. Leadbetter and Co., of Glasgow, has led to that of Messrs. Pigott and Co., of Manchester; but their liabilities do not exceed £10,000.

The suspension of Messrs. Dolby and Chapman, of Bradford, who have only been in business as spinners and manufacturers for a few years, is announced. The liabilities are estimated at £20,000, the assets at £8,000.

We have received from the *North China Herald* office a publication entitled the "Desk Hong List; a General and Business Directory for Shanghai." The compilers of this volume deserve great praise for the careful and complete manner in which they have fulfilled their task.

We have received an intimation, dated London, March 1st, to the effect that from the 1st of May next the business of Kinnear and Co., of Foochow, will be carried on under the firm of Kinnear, Larken, and Co., the partners being Mr. Wm. B. Kinnear and Mr. Thos. L. Larken.

The amount of bullion by the P. and O. Company's steamer Bangalore, on the 6th inst., was—in gold, to Galle, £1,116; to Bombay, £11,000; to Madras, £16,817; in silver—to Bombay, £4,000; to Singapore, £14,891; to Hong Kong, £24,944; to Shanghai, £36,840; to Yokohama, £1,820—total in gold, £28,933; in silver, £82,495.

## BOARD OF TRADE RETURNS.

The Board of Trade returns for January have been issued close upon those for December. Those now published give the amount of imports for the year 1868, and it is satisfactory to observe the large increase over the preceding year, amounting to upwards of 6 per cent. The total for 1867 was £234,358,887, and for 1868, £249,616,302, or £15,300,000 of an increase. The year 1866 was about £4,000,000 larger than 1867, so that for 1868 we not only made an improvement over 1867, but such a substantial improvement as to place us considerably above 1866. The activity of imports in December last was remarkable, showing an improvement of £6,000,000 over December, 1867. The exports for January show a considerable improvement over those of the corresponding month last year, the figures being £13,621,114 for January, 1869, and £12,252,688 for January, 1868. The totals of cotton yarns and cotton manufactures exhibit a falling off. There is a decrease also of the "quantity" of yarn exported as compared with January, 1868, but there is an increase in the quantity of manufactures. The export of woollen cloths shows a large improvement over January, 1868, and even over January, 1867.

We annex a summary of those figures which relate to our Import and Export trade with China and other countries in the Far East:—

### IMPORTS.

## THE TEA TRADE.

(To the Editor of the *London and China Telegraph.*)

SIR,—As one who has been interested in the Tea Trade for upwards of twenty years, I beg you will allow me, in common fairness, to remark on Mr. J. C. Sillar's letter in your issue of the 9th instant. I submit first that, to call discount and interest "usury" is to insult commercial understandings. The meaning of the first is an allowance on a payment made before the same is due; of the second is—a charge made on a payment which has been deferred until past due; that of the third, "usury," is an extortionate, because excessive, rate of interest charged on a payment not met, or on a loan. Usury is incompatible with a fair and honourable business such as the tea trade is. I resent its application to it, and question whether any trade embraces among its members more real gentlemen. Mr. Sillar alludes to the practice of allowing 5 per cent. per annum discount on all payments made before prompt day. He says the buyer has no right to it. To prove that he has, it is but necessary to mention that three months' credit, and discount allowed on prepayments, is a condition of the purchase and sale. Where is the "usury" in this? If tea was sold for cash, and not at three months prompt, the seller would probably not get so much by ¼d. per lb., whereas the discount on three months' tea does not amount to one-eighth of a penny on the average price of tea. Again, if tea was only sold for cash but few could buy, and that few could then rule the price, to the prejudice of the importers' interests. This is a proof that the system which Mr. Sillar disapproves of is a positive advantage to the merchants, because it increases the number of buyers, and competition is so keen between these that the seller gets the utmost value for his tea.

As regards the tare allowed by the merchants above that of the Customs, that arises from the fact that the Customs' tare is often that which would be considered unfair between man and man; the extra allowance brings about that end besides being some recompense for deteriorated tea found between the lead and the package.

I quite agree with you that Mr. Sillar's statistics are useful, although statistics seem lately to have been disregarded by the trade; but I deny the validity of his charges against the buyers, and would remind him that in his letter he has lost sight of the fact that all favourable conditions of sale are taken into consideration by those who bid the the tea, so that the importer gets his equivalent for the same in for price given.—I am, Sir, your obedient servant, C.B.

London, March, 1869.

## THE SALT PROHIBITION.

Mr. W. Hadfield, London agent for the Salt Chamber of Commerce, writes as follows:—

Sir,—I adopt the advice lately given by the new President of the Board of Trade to the Associated Chambers of Commerce, and on behalf of the Salt Chamber of Commerce I beg to bring the following statement under your notice relative to the opening up of a very important trade:—

In the year 1858—soon after the Salt Chamber had been established—the late Lord Elgin completed his commercial treaty with China, from which Salt was excluded, and formed one of the prohibitory articles A memorial was presented by the Salt Chamber of Commerce to Her Majesty's Government calling attention to the omission, and urging their claim. *The Times*, under date of Sept. 13, 1858, had a long leader on this memorial, and after twitting the Salt Chamber for being late in the field, concluded as follows:—"But are these Cheshire salt proprietors quite sure they have exhausted all their own resources in this matter? In China the salt monopoly is farmed out to a corporation of merchants, who make the salt as cheaply as they can, and sell it, under certain limits, as dear as they can. The salt farmers are very different from other Chinamen if they are not shrewd calculators. If Cheshire can place large salt mounds upon the banks of the Peiho at a less price than the mounds there have cost, we shall be much surprised if the salt farmers are not found amenable to reason. We have, perhaps, said too much upon the subject of this memorial, but, with every wish to see these British salt merchants push their produce into China, we feel the paramount importance of keeping the public mind well informed at this special crisis upon all matters, having relation to our newly-opening intercourse with that swarming people." From that time to the present, now a period of ten years, the salt trade, as represented by the Chamber, has not failed to urge their case on Her Majesty's Government, who have made every effort to procure the admission of English salt as an article of commerce, but hitherto without success. So the prognostications of *The Times* have not been realised. The visit of Mr. Burlinghame, the Chinese Envoy to this country, was availed of by the Chamber to make an appeal which is embodied in the copy of a letter herewith. The same arguments as were used in the case of India apply with double force in the case of China, and there can be little doubt the same results would follow, namely, the creation of an outlet for a valuable branch of our manufacture to the extent of 300,000 tons per annum, with return cargoes of Chinese rough articles of produce. The exclusion of English salt from China is more a question of prejudice than of revenue, as it can be clearly shown that even with a large import duty our salt can compete successfully with that manufactured in China. The Chamber has reason to believe their case will be favourably placed before the Chinese people by Mr. Burlinghame, and they also seek the influential support of the Press.

BREAKFAST.—EPPS'S COCOA —GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼lb., ½lb., and 1lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.—[ADVT.]

### FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports still continue very quiet; in coal freights from the Northern outports there is no improvement, and but little doing; tonnage is plentiful.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight or meast. To Nagasaki: 45s. weight, 50s. meast. To Hiogo: 60s. weight or meast. To Tientsin: 60s. meast. To Chefoo: 60s. weight or meast. To Newchwang: 55s. meast. To Shanghai: 40s. weight, 80s. meast. To Hong Kong: 40s. weight, 80s. meast. To Manila: 40s. weight, 70s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 25s. weight or meast. To Penang: 40s. weight or meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £40. For Shanghai: £43. For Hong Kong: £30. For Singapore: £25. For Galle: £24. From Newport, Cardiff, or Swansea per ton—.For Yokohama: £2 5s. For Singapore: £1 5s. For Galle: £1 4s.

### CASUALTIES.

Advices from Lisbon, dated March 6, state that the Baltic, Jessen, from Newcastle to Singapore, which put in there Feb. 8 leaky, had discharged all her cargo and been placed in dry dock.

Advices from Amsterdam, dated March 11, state that the Elisabeth, Feenstra, from Batavia, which arrived there March 10, had encountered severe gales from Feb. 28 to March 2; on the latter day, in lat. 48 N., lon. 7 W., she was struck by a heavy sea, which carried away part of bulwarks, &c., damaged steering apparatus, and started stem and deck. During the bad weather water mixed with sugar was pumped up, and the master feared that the cargo was damaged.

The North America (Amer. ship), Mitchell, from Batavia to Rotterdam, whilst putting into Lisbon on the night of March 12, leaky, struck on the bar, and was towed in and beached at Belem, full of water.

The Continental (ship), of Liverpool, Erving, from Cardiff to Yokohama, with coals, arrived at Gibraltar, leaky, and was stranded in the bay.

A Dutch brig, from Antwerp to Batavia, with a general cargo, was seen to strike on the Longsand on March 10, but she came off without assistance and proceeded.

## KEATING'S COUGH LOZENGES.

UPWARDS OF FIFTY YEARS' experience has fully confirmed the superior reputation of these Lozenges in the cure of ASTHMA, WINTER COUGH, HOARSENESS, SHORTNESS OF BREATH, and other PULMONARY MALADIES.

Sold in boxes, tins, and bottles of various sizes.

## KEATING'S CHILDREN'S WORM TABLET

A PURELY VEGETABLE SWEETMEAT, both in appearance and taste, furnishing a most agreeable method of administering a well-known remedy for INTESTINAL or THREAD WORMS.

It is a perfectly safe and mild preparation, and is especially adapted for children.

Sold in tins and bottles of various sizes.

## KEATING'S PERSIAN INSECT DESTROYING POWDER.

This Powder is QUITE HARMLESS TO ANIMALS, but unrivalled in destroying Fleas, Bugs, Emmets, Flies, Cockroaches, Beetles, Gnats, Mosquitoes, Moths in Furs, and every other species of insect in all stages of metamorphosis.

Sold in packets, tins, and bottles of various sizes.

☞ The public are particularly requested to observe that all the above preparations bear the Trade Mark as herein shown.

Sold by all Chemists and Druggists.

HOLLOWAY'S OINTMENT and PILLS. DIPHTHERIA, SORE THROAT, QUINSEY, MUMPS, and similar complaints always abound in wet weather and are most safely and effectively subdued by rubbing Holloway's Ointment at least twice a day upon the chest and glands of the throat. The Ointment penetrates the skin, reduces inflammation, and heals ulcerations. This treatment is sufficient for curing the most serious and complicated throat affections, provided Holloway's Pills be taken at the same time. When swallowing gives pain, the Ointment alone may be relied on till improving symptoms admit of painless deglutition. In asthma, bronchitis, pneumonia, whooping cough, the early stages of consumption, scarlatina, and measles, Holloway's medicines are not less valuable in mitigating the most troublesome features, and in ultimately curing.

# HONG KONG AND SHANGHAI BANKING CORPORATION.

## SEVENTH REPORT OF THE COURT OF DIRECTORS

**To the ORDINARY YEARLY GENERAL MEETING of SHAREHOLDERS, to be held at the Banking-house of the Corporation, HONG KONG, on MONDAY, the 15th February, 1869.**

## TO THE PROPRIETORS OF THE HONG KONG AND SHANGHAI BANKING CORPORATION.

GENTLEMEN,—The Directors have now to submit to you a General Statement of the affairs of the Corporation and Balance-sheet for the half-year ending on 31st December last.

The net profits for that period, including 70,674.14 dols. brought forward from last account, after paying all charges, deducting interest paid and due, and making full provision for bad debts, amount to 460,649.22 dols., of which, after taking out Rebate on Bills not yet due, and remuneration to Directors, there remains for appropriation 443,252.14 dols.

From this sum the Directors recommend the distribution of a Dividend of 7.50 dols. per share on the paid-up shares, and of 1.50 dols. per share on the new shares, being equivalent to 6 per centum for the half-year; this will absorb 180,000 dols.; and of the balance, the Directors propose carrying 200,000 dols. to the Reserve Fund and 63,252 14 dols. to the credit of new Profit and Loss Account.

If this appropriation of profits be confirmed by the Meeting, the Shareholders will have received as Dividend for the year 1868 the sum of £360.000 (twelve per centum on the paid up Capital), and the amounts carried to the Reserve Fund during the same period aggregate 325 000 dols., raising this fund to 700,000 dols., so that on the 31st December, 1868, the fund stands at a sum equal to 23⅓ per cent on the paid up Capital of the Corporation, i dependent of the sum of 63,252 dols. 14c. undivided profits to be carried forward; thus showing a total net profit for the year 1868 of 748,252 dols. 14c. (or 24·27 per cent. on paid up Capital), after deducting charges, expenses and allowances of every description, including the rebate on bills maturing after December 31—a result which compares most favourably with the results of the Bank's working in previous years, the profits amounting to—

| | | |
|---|---|---|
| Dols. 617,276.60 | for the year | 1867 |
| 457 604.44 | ,, | 1866 |
| 178,781.00 | ,, | 1865 (8 months only). |

These figures show so conclusively the continued prosperity of the Bank, that further statistics seem unnecessary, and the Directors confine themselves to a comparison between the aggregate amount of deposits and notes in circulation at the end of this year, and the similar totals at the end of each previous year of the Bank's working;

| | | | |
|---|---|---|---|
| The amount on 31st December, 1868, was | ... | ... | Dols. 7,064,465 76 |
| ,, ,, | 1867, ,, | ... ... | 6,279,121.25 |
| ,, ,, | 1866, ,, | ... ... | 4,132,651 00 |
| ,, ,, | 1865, ,, | ... ... | 3,384,876.62 |

showing a steady advancement in public favour, which must be as gratifying to the Shareholders as it is to the Board.

In congratulating their co-proprietors upon such a healthy state of things, the Directors would again express their determination not to recommend the distribution of any higher dividend than twelve per centum per annum, until the Reserve Fund shall have been further raised to such an amount as shall render it unnecessary to withdraw from division amongst the Shareholders such a large amount of the realised profits as they think caution and a prudent care of the true interests of the Bank demand at present. The Directors are of opinion that when the Reserve Fund shall have reached a Million of Dollars, the time will have arrived when they can with safety recommend the division of a larger proportion of the profits in the shape of Dividend, and the large amount proposed to be carried to Reserve Fund by this Report enables them fairly to anticipate such a result at an early date.

### RESERVE FUND.

The whole of the Reserve Fund has been invested in Indian Government paper. It is the intention of the Court to augment the Bank's holdings in the same securities up to the sum of a million of dollars; a portion of such stock to be kept as a Standing Reserve in London and the balance in India, where it may eventually facilitate the Exchange operations of the Bank, which steadily increase in importance.

### BOMBAY AGENCY.

The development of the business of the Corporation through India (strictly confined as it is to Exchanges, the Bank not in any way entering into transactions of a local character) calls for the establishment of a special Agency of the Bank at Bombay, on the same footing as the one created in Calcutta in March last, the working of which has answered the expectations of the Directors.

The Court, on this occasion, deem it due to the present Agents of the Bank at Bombay, Messrs. B. and A. Hormarjee, to acknowledge publicly the great obligations under which they are to them for the highly satisfactory manner in which they have taken care of the interests of the Corporation during the last four years.

As has already been stated by the Directors when the Calcutta Agency was in course of formation, the business to be carried on by the new Bombay Establishment is to be regulated by specific instructions from the Head Office and restricted to transactions of a definite character connected with the general course of the Bank's Exchange operations in the East.

### CALLS.

The Proprietors will not be surprised to hear that the progressive development of the Bank's business and the extension of its field of operations, suggest the advisability of a corresponding and gradual increase of the Paid-up Capital of the Corporation; they are also aware that, according to the terms of the Bank's Incorporation, the deferred period granted by H.M.'s Government for compulsorily calling up the balance of the Subscribed Capital expires on the 31st December, 1874.

After a careful consideration of the matter, and feeling confident that the sums intended to be called up can be profitably employed, the Court has resolved, with the unanimous consent of its members, to call up the Two Millions of Dollars now remaining unpaid on the 20,000 new Shares, and to divide the sum of 100 dols., due upon each share, into four Calls of 25 dols. each, payable on the following dates, viz.:

| | Dols. |
|---|---|
| 1st July, 1869 ... ... ... ... ... ... ... | 500,000 |
| 1st July, 1870 ... ... ... ... ... ... ... | 500,000 |
| 1st Jan., 1872 ... ... ... ... ... ... ... | 500.000 |
| 1st Jan., 1873 ... ... ... ... ... ... ... | 500,000 |
| | 2,000,000 |

The first of the above Calls will be made forthwith by the Directors, and notice will be given, in due course, of the ensuing ones, in respect of which, however, the Court retain the powers confided to them by the Deed of Settlement should any emergency necessitate any departure from the course now proposed to be followed.

It has moreover been resolved to allow the holders of new shares to pay up, by anticipation, the whole or any portion of the amount remaining unpaid on their shares; such payments to bear Interest at the rate of Five per centum per annum, payable half-yearly, until the respective dates at which the Calls to be made shall fall due and the sums so called up successively admitted to participate in the distribution of Dividends.

Trusting these important arrangements will meet the convenience and approval of the holders of the New Shares, the Directors will not dwell at more length on the advantages resulting from a system which will enable the Proprietors to calculate with more accuracy and certainty than heretofore the relative value of the two descriptions of shares, and ensure their entire assimilation within a determined period.

### DIRECTORS.

According to the provisions of the Deed of Settlement, three Members of the Court, Messrs. George J. Helland, William Lemann, and the Hon. J. B. Taylor, retire from the Direction, but are eligible for re-election, and offer themselves accordingly.

Mr. George F. Heard, late Deputy-Chairman, has been appointed Chairman for the year 1869, and Mr. Julius Monke, Deputy-Chairman.

### AUDITORS.

The Directors have much pleasure in recommending the election for the year 1869 of the present auditors, the Hon. W. H. Rennie and Mr. W. J. Bryans, the latter gentleman having acted in that capacity since the retirement of the Hon. Phineas Kyrie, who has left the colony.

GEORGE F. HEARD, Chairman.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships, and repair and refit of

STEAM MACHINERY AND BOILERS.

Their large Granite Dock is 307 feet in length, fitted with a caisson-gate, and with a centrifugal steam pump of great power, ensuring despatch in all states of the tides. At average spring tides this dock can receive vessels drawing 16 to 17 feet, and during the autumn and winter months 18 feet. Their two smaller docks, also built of granite, can receive vessels drawing 12 to 13 feet.

The premises comprise a large smithy and boiler shop, carpenters and boat-builders' shops an

ENGINEERS' WORKSHOP,

fitted with lathes and tools driven by steam,

AN IRON FOUNDRY

for castings up to 5 tons weight, and a BRASS FOUNDRY.

The different departments are superintended by experienced Europeans, viz., engineer, blacksmith, and shipwrights.

The Company keep on hand copper and metal sheathing, spars, timber, paints for iron vessels, and all material for dockyard use.

A DRY GODOWN for reception of stores of vessels requiring to discharge them.

Good quarters for officers of ships under repair in the dock.

Amoy, 16th December, 1867.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

New Harbour, Singapore, June, 1868.

## COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decree of 20th July, 1854, and 31st December, 1866.

Recognised by the International Convention of 30th April, 1862.

CAPITAL, fully paid up, £3,200.000.

Reserved Fund ... ... f 20,000,000 ... £800,000

## PROSPECTUS.

The object of this Company is to LAY and WORK SUBMARINE TELEGRAPHS between ENGLAND, GIBRALTAR, MALTA, EGYPT, INDIA, CHINA, and AUSTRALIA, which shall be in English hands from end to end.

This Telegraph will work by SUBMARINE CABLES, and will therefore be more accurate, reliable, and speedy than by land lines.

The cost of the Cable selected will be little more than half that of the deep-sea Cable ordinarily in use.

The Cable has been carefully tested under the direction of Sir William Thomson and Mr. Varley, and nothing could be more satisfactory than the results. The report addressed by Sir William Thomson to the Directors is appended.

With a view of ensuring direct and advantageous communication with the Continent of Europe, it is proposed to lay at once a short line between Malta and Brindisi. The contractors will engage to ship this Cable not later than the end of May.

The Directors reserve to themselves to decide whether, after this branch line is laid, a Cable from Malta to Egypt, or from Suez to Bombay, shall be next laid. In the event of the Cable between Malta and Egypt being undertaken first, no call will be made beyond the £2 paid on application and allotment till the Malta-Egypt line is laid and working. In the event of the lines from Suez to Bombay being undertaken first, £1 will be called in June, and £1 in September, and the remaining £1 in December, 1869.

With respect to the anticipated revenue, it has been generally admitted that it is not too much to calculate upon 300 messages per day; that is, 150 messages each way. Supposing the line from Suez to Bombay to earn an average of thirty shillings per message for 300 days, the number of messages given above would, at that rate, yield a gross annual return of £135,000 upon a cost somewhat exceeding £600,000. The working expenses of Submarine Telegraphs form a very small per-centage on the traffic.

Her Majesty's Government has furnished the Company with the latest surveys and soundings of the proposed route, which prove that the Beds on which these Cables will lie are unusually good.

40,000 Shares have already been taken up, and there remain 110,000 Shares, which are offered to the public.

Applications for Shares, accompanied by a deposit of £1 per Share on the number applied for, may be made to any of the Bankers of the Company. Prospectuses and Forms of Application may be obtained at the Bankers, or at the Offices of the Company.

The Deposit will be returned if no Allotment is made to the applicant.

Copies of the Memorandum and Articles of Association may be inspected at the Offices of the Solicitor or of the Company.

*(For further particulars see detailed Prospectus in Newspapers.)*

### COPY OF LETTER.

Sir William Thomson to the Directors of this Company.

London, 27th Feb., 1869.

Gentlemen,—After the severe tests to which I have subjected your Cable, yesterday and to-day, I have perfect confidence in recommending you to adopt it. I am convinced that it will give you a surer prospect of complete success in your undertaking than you could have with any other form of Cable hitherto devised or made.

In the varied experiments I have made, I have exaggerated every variety of rough usage and heavy strain to which it could be exposed in laying it, or even in hauling it up on a grapnel from a depth of three miles, and I find the mechanical qualities to be most satisfactory, much superior, indeed, to anything I could have anticipated. The protection afforded to the electric wire was quite perfect throughout all the rough usage both in respect of insulation and continuity.

I remain, your obedient servant,

(Signed) WILLIAM THOMSON.

2, King William-street, London, E.C., 9th March, 1869.

### THE MAILS, &c.

The present inward mail is delivered on its due date. The French mail may be expected on Wednesday, but as it brings only two days later dates, and the news (as foreshadowed by our telegrams) is of no importance, we do not propose to publish for it.

The next succeeding mail will be that with Hong Kong dates to March 9, due here on the 19th inst. Telegrams in advance of it were received on the 24th March, and will be found in the usual place. Those in advance of the mail of March 23 will be due in a few days. *Via* Kiachta we have advices from Shanghai to March 10, received on the 27th March.

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. steamer Delhi, arrived April 2.—From Yokohama: Mr. Newby. From Shanghai: Mr. W. Watson, Mr. Lindsay, Mr. Drage. From Hong Kong: Mr. Lyon. From Singapore: Archdeacon and Mrs. Chambers, M .C. Brooks and servant, Mr. H. G. Kennedy, Mr. and Mrs. Sager and child, Baron von Tinple. From Galle: Mr. Sabonadiere, Mr. Esdile, Mr. Tottenham.

To Southampton, per P. and O. steamer Delta, expected to arrive April 9.—List not to hand.

By last mail, to Southampton, per P. and O. steamer Poonah, arrived March 29.—From Hong Kong: Dr. Waller, Miss Ray, Mrs. Crawford, two children, and servant, Mr. Matsney, Mr. Ewaseya, Mr. Cooper, and one second-class passenger. From Galle: Mr. Dick, Mr. Gorman.

By last Bombay mail to Marseilles, per P. and O. steamer Bangalore, arrived March 26.—From Yokohama: Mr. Jacquemot, Mr. and Mrs. Short, two children, and servant.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Poonah*, from Southampton, April 3.—To Shanghai: Mr. W. H. Gracie. To Ceylon: Mr. and Mrs. J. Norcott D'Esterre and three children, Staff Assistant Surgeon Eager, Miss Gale.

Per P. and O. steamer *Delhi*, from Marseilles, April 11.—To Shanghai: Mr. J. A. Hawes, Mr. Rainbow, Mr. J. Porter. To Hong Kong: Mr. Lay, Mr. T. H. Chapman. To Singapore: Mr. C. H. Harrison. To Penang: Mr. T. Shaw. To Ceylon: Mr. B. F. Hartshorne.

Per P. and O. steamer from Southampton, April 17.—To Shanghai: Mr. A. Sim. To Hong Kong: Miss Woodhouse. To Ceylon: Mr. A. Hodge Wilson.

Per P. and O. steamer *Syria*, from Marseilles, April 25.—To Shanghai: Mr. W. Brand. To Ceylon: Mr. D. S. Wilkison.

Per P. and O. steamer from Suez, May 2.—To Yokohama: Mr. Thomas Thomas. To Hong Kong: Dr. J. H. Focke.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

The mail delivered this morning brings advices from Yokohama to the 10th February. The outward mail of December 4 reached that port on the 28th January. The following summary of political news is from the *Japan Herald*:—

The most important event of the fortnight has been the appearance of notifications from the foreign representatives of England, France, and Prussia, announcing the termination of the struggle between North and South, and the withdrawal of the Neutrality Notifications, which were published last year. Thus is the Mikado's victory virtually acknowledged, and the misguided men who remain yet in arms at Hakodadi have now to learn that their cause is hopeless and their doom sealed. Scarcely less interesting is a translation of a series of sentences which have been decreed by the General Council of the Empire against those princes and nobles and their retainers who were most conspicuous in their appeal to arms against the authority and rule of the Mikado. These documents are no less remarkable than interesting on account of the clemency displayed by the advisers of the Mikado towards those who raised the standard of revolt and so persistently resisted the supremacy of their sovereign at the expense of their country's wealth and commercial prosperity.

An extra number of the Yedo official *Gazette* was published on the 24th inst., giving copies of the sentences pronounced on all the Daimios hitherto in rebellion against the Mikado. The sentences are preceded by an Imperial edict declaring them to be the result of a discussion in the House of Assembly, formed of Daimios' representatives, declaring further that the Assembly, with almost unanimous consent, had adjudged the whole number of the offenders, and especially the Prince of Aidzu, to have incurred the penalty of death, but that the Mikado, in consideration of the way in which that Prince had been brought up—that is, in ignorance of affairs like so many of his compeers—and seeing that his chief retainers were responsible for his acts, had resolved to spare his life.

The sentences vary in severity, from those of the two Princes of Aidzu and the Daimio Hayashi Higo no Kami, whose territories are entirely confiscated and themselves condemned to life-long imprisonment, down to that of the Daimio Midzuno Idzumi no Kami, who is merely to confine himself to his house until further notice. Eighteen Daimios lose a greater or lesser portion of their revenues, this penalty being accompanied by a change of location, which in each case means the exchange of fertile for unfertile territory. Each of the twenty-five, except two, retire altogether in favour of a relation, to be presented hereafter to the Mikado for investiture. Only Yonezawa and Horie Sakio Noske, to the early defection of the former of whom the success of the Government is in some measure to be attributed, are allowed to hand over the succession to their own sons.

The *Japan Gazette* of Jan. 27 contains the following sensational paragraph:—"This afternoon, between two and three o'clock, a meeting took place between a gentleman well known to our fellow residents, lately described in a local journal as an American named Benson, and an Englishman of the name of Rickerby. Both of them had that easy, jaunty manner that bespeaks a mind at peace with itself, and no one seemed to presage such a catastrophe as followed. Mr. Benson advanced, and to the preliminary inquiry, 'Your name is Rickerby, I believe, Sir?' received a hesitating but affirmatory answer. Each had a riding whip in his hand, and weapons being so far equal, Mr. Benson waited for no other remark or consideration, but laid his whip about Mr. Rickerby in such a manner that the latter, though he tried to repay the assault in kind, was unable to offer but very weak returns Some gentlemen were near, and saw the punishment given; and, as our informant states, seemed disinclined to interfere until they thought

Digitized by Google

the whipping was sufficient. At length they did interpose, and drew Mr. Benson off. One of them told him that he ought to be ashamed of himself, in which remark we and all our readers recognise nothing but the baldest truth. The regard in which Mr. Rickerby is universally held by all the community will cause this paragraph to be read with general regret, and the conduct of Mr. Benson to be very fully commented upon. The idea of a magistrate taking the law into his own hands! What next, we should like to know? It is feared that the stripes laid on by him were so heavy and numerous that Mr. Rickerby may suffer from the effects for a long time to come. Of course the affair cannot end here." It is, however, stated by the bystanders that they interfered at once to put an end to the disturbance. Mr. Benson is in the employ of the Japanese Government.

### NAGASAKI.

The *Nagasaki Times* of Feb. 6 gives the following items :—

We have received information of a system of squeeze on the part of the Japanese Government—a squeeze which we consider it our duty to expose at once. The following are the facts which have been given us:—A foreign firm in Nagasaki, having under its protection a Chinese hong, heard that the Japanese Government had levied a squeeze of 10 per cent. on some gold, sold by the Chinaman to a native merchant, and not content with levying this illegal tax, had exacted 10 per cent. on all the previous lots of imported gold he has bought during the year. The matter was referred to the Consul.

There is some truth in the rumour regarding the persecution of Christians in Gotto. Some 300 have been arrested and placed in confinement. The Consuls have communicated with the governor, but he has no jurisdiction over the islands.

The small steamer *Chunle-ma* sunk on the 1st instant. It is supposed that she struck on a rock while being towed in shallow water for repairs. She was raised, by the aid of lighters, on the 5th.

The loss, by the Tokugawa expedition to Yedo, of two more of their ships, the *Meteor* and the *Nagasaki Maru*, is reported. Though their squadron is thus completely crippled, the transfer of their forces from the sea to the land may be the cause of much trouble. It may be very difficult to encompass them in such a country as Yedo, and bring the rebellion to such a head that it may be crushed.

## CHINA.

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, Feb. 16, 1869.

On the 3rd instant the M. I. steamer *Phase* arrived with the French mail, followed on the 5th by the English mail of the 18th December, and telegrams to the 9th January. On the 13th the P. M. S. S. Company's steamer *Costa Rica* brought the San Francisco mail of the 4th January, with London telegrams to the 3rd only.

The Chinese New Year holidays, which terminated on the 13th inst., put a stop to business for some days, but both natives and foreigners have since recommenced with increased vigour, more especially as the mildness of the season in the North warrants the expectation that the Peiho will open at a very early date. It is stated that four steamers have already been engaged full for Tientsin, the *Ying-tsze-fei* being destined to lead the way.

The discussion on the supposed candidates for Minister at Peking is now reduced to the respective merits of Sir Harry Parkes and Sir Edmund Hornby. Opinion runs on Sir Harry; but it is believed that the Home Government will be afraid to appoint him, owing to his well-known belligerent proclivities, and his position with the Chinese Government at Peking in the time of Lord Elgin. This is considered to be a dangerous element to again confront. Mr. Winchester is dismissed, as having no diplomatic ability, and Mr. Wade is altogether too Chinese and antagonistic to merchants. There are many supporters of Sir Edmund, but a large number hope for a man of known diplomatic ability, who has no knowledge of the Chinese, and will bring a mind free from prejudices. It is understood that Mr. Cunningham and other merchants have given their views separately as to the opening of ports, in addition to the Chamber of Commerce.

In my last letter I mentioned the case of the *Alicia Anne*, and stated that the point was reserved whether the master and crew had a prior claim over a mortgage to moneys accruing from salvage which they had allowed to be disbursed for necessaries connected with the ship. Sir Edmund Hornby has since decided in favour of the captain and crew, making, however, no order as to costs against the mortgagees. Unfortunately the money in court was insufficient to discharge the lien thus allowed. Another important shipping case has also been decided. Messrs. Wilkin and Robison, of Yokohama, had been (as they state) informally acquainted with the fact that a bottomry bond had been executed on the *Bolivar* and her cargo at Rio. The agents at Yokohama for the bondholders had not at the time of notice received the bond, but after they received it and produced it Messrs. Wilkin and Robison thought fit to pay the captain the freight. Sir Edmund Hornby decided that they were to pay into court all the sums paid on account of freight to the captain subsequent to their receipt of notice, together with costs.

At the last meeting of the Municipal Council, held on the 9th inst., reports were received from the Works Committee announcing the extension of roads in various parts of the English and American settlements, the planting of trees on the bund and along the Bubbling Well Road, and the re-construction and repair of the bridges over the Yangking Creek. These important works are being carried on in spite of mercantile depression, and thus give an additional proof of the proverbial enterprise of Anglo-Saxons.

The question of local squeezes is receiving renewed attention. No sooner is the system overthrown in one quarter than it springs up in another. It is now known that a tax of from 1 dol. to 2 dols. is levied on every bale of foreign goods purchased by native firms, that only licensed coolies are allowed to carry them, and that any goods which have not received the guild stamp, proving the payment of the tax, are seized by the Guild Police. So well organised is the system that there is actually an ex-president of a Peking Board stationed at Shanghai to control the working of the guilds. This mandarin is a junior guardian of the heir apparent.

There seems at last to be some security for the punishment of criminals sentenced by the Mixed Court. A constable from the British gaol has been appointed to reside on the Mixed Court premises and superintend the infliction of punishment.

A return of foreign burials in Shanghai for the year 1868 has just been published, from which it appears that, exclusive of 24 buried in the Catholic and Jewish cemeteries, 57 men, 1 woman, and 7 children were buried. Of these 8 were drowned, 43 were British subjects, 9 Americans, 8 Germans, 2 Swedes, 2 Portuguese, and 1 Italian. The grand total for the year was 89.

A meeting of the subscribers to the Seamen's Church at Pootung was held on the 3rd inst. The accounts show that Tls. 3,899 have been expended on the church and fittings, exclusive of special contributions for a communion service, font, and alms basin. The income is at present insufficient, and the trustees have appealed to the community for aid. The services are in accordance with the ritual and usages of the English and American Episcopal Churches.

The supporters of the Native Blind Asylum met the other day to report progress and solicit assistance. The asylum is in the Chinese city, where thirty blind are employed in making mats. If the demand equalled the supply, the institution would be nearly self-supporting, but as it is assistance is urgently required. Mr. Moon, of Brighton, has presented fifty copies of the "Sermon on the Mount," done into the Shanghai vernacular, and printed in raised letters, and perhaps some of your lady readers may feel disposed to send out work to be sold for the benefit of the asylum, and thus aid in supporting a most deserving institution.

At a meeting of the local branch of the Asiatic Society, held on the 9th inst., a report on the condition of the Yellow River was read by Mr. Ney Elias, F.R.G.S., who has himself made a survey. The shifting of the Channel has desolated a large tract of country, whole villages have been submerged, and the fields have been destroyed for agricultural purposes. This result was due to a gradual rise in the bed of the river, uncompensated by any attention to the embankments. It would appear that the catastrophe will recur, for the present bed is silting up with amazing rapidity. It is now ascertained that the river is navigable from its mouth, in the Gulf of Pecheli, to Tsi-nan-fu, the capital of Shantung. This represents a distance of about 200 miles. There is from five to seven feet of water on the bar at low tide, and a good anchorage outside, well protected by shoals.

It is reported that M. Brenier de Montmorand is about to return to Europe, the post of French Consul here being temporarily filled by M. Dabry, who is now incumbent at Hankow.

Mr. Thomas Falls, Superintendent of the Chinese Arsenal at Shanghai, has, together with his senior assistants, Messrs. Stevenson, Mellwrath, and Rolls, received high rank from the Regency.

The Yangtsze is unusally high at present, the water standing twelve feet above the level of this time last year. The traffic by steamers continues unabated.

In addition to the steamer ordered by Messrs. Trautman and Co., managers of the North China Steam Company, to be built in England, the Union Company (now running on the Yangtsze) are about to contract for a vessel there, to be built under the superintendence of Captain McQueen, who leaves the Shanghai Company, worked by Messrs. Russell and Co., and joins the Union, under Messrs. Glover, Dow, and Co. It is also stated that the Shanghai Company will keep up their fleet in future by adding iron and not wooden steamers. It has long been a matter of surprise that they have not done so before, as iron hulls are immensely superior to wood for fresh water, the rotting of wood being a serious drawback. The truth is, however, that they have had to increase their wooden ships by buying up opposition boats (either running or intending), as in the case of the *Walrus* and *Nautilus*, now at New York, already reported in the *London and China Express*.

Much interest is shown in the coal mines of China at the present time. Baron Richthofen, a geologist, who came out with the new American Minister, has been for some time on the Yangtsze and Poyang Lake, examining the mines in the neighbourhood. Mr. Rose, of Messrs. Russell and Co., Kiukiang, has just started up the lake with a similar object.

It is said that the French Consulate at Ningpo has been closed,

Digitized by Google

and that the establishment at that port is to be transferred to Foochow.

From Chefoo the diggers are escaping as quickly as possible, to the intense delight of the peaceable inhabitants, both native and foreign. The wonder now is how a number of men, without appliances of any kind or visible resources, contrived to exist for so long, but I imagine the villagers in the neighbourhood have been the sufferers. The miners are carefully disarmed before they are taken on board an outward bound vessel, and one shipmaster has already refused to take them under any circumstances. It is stated, but there has been no confirmation of the report, that placards have appeared at Chefoo calculated to excite ill-feeling against foreigners, and that the Consuls have appealed to the Taotai for redress.

The only news from Tientsin is of the exceptional mildness of the season, so that the ice is expected to break up during the first week in March. A correspondent of the *North China Daily News* thus describes the possibilities of Tientsin trade :—

"Should the revision of the treaty give us the right to open the coal and iron mines, work them on scientific principles, and give us roads to them, there is no place in China I know of would benefit so much as Tientsin. The whole country to the north is full of minerals, the finest steam and gas coals, iron, silver, gold, and other minerals. Shansi, also, about 55,000 square miles in extent, and of which Tientsin is the seaport, is full of iron and coal, and other minerals. The iron is said to be equal to the best Swedish, and the coal is brought to Tientsin for silver and gold refining, on account of its great heat. With a railway to Ta-yuan, the capital of Shansi, the wool, tallow, hides, &c., of Mongolia would find a ready outlet—brought down by the Yellow River and its affluents to the foot of the mountain which divides Ta-yuen from them. Or these articles from Mongolia might be brought even on a more direct way—via the rich coal mines of Chaitang and neighbourhood, where are also mountains of iron ore. There is only one low range of mountains between Chaitang and Mongolia in that direction, and they are pretty level on the top ; so, all the intervening country being level, Tientsin is the outlet from these countries in both directions ; and with roads from them to it, it would, and I have no doubt will, be the most important trading city in China."

Peking letters announce extraordinary gaiety amongst foreign circles at the capital, parties, dances, amateur theatricals, and fancy balls, following one another in bewildering succession. A rumour is current that a eunuch caught indulging his Imperial Majesty with a pipe of opium has been beheaded, and the naughty Emperor perhaps "tan-tan-ed" by his outraged mamma.

Newchwang is closed by ice, the last report announcing that the thermometer stood at 6 deg. Fahrenheit. There were no rumours of rebels in the neighbourhood. Quotations nominal.

The P. and O. steamer *Ganges*, leaving at daylight to-morrow morning, takes 94 bales Chinas, 190 bales Japans, and 44 bales Japan waste.

---

The following additional items of news are extracted from various local papers :—

We understand that one of the immediate results of Mr. Burlinghame's announcement in New York that the Chinese were holding out their arms to missionaries to come and plant the shining cross on every hill and valley has been that the American missionary societies have been touched by a sense of duty to the heathen, and are sending out a large body of missionaries with, we presume, a shipload of shining crosses. Mr. Burlinghame's rhetorical zeal undoubtedly outran his discretion in this case, and we hope that the new band of crusaders may not meet with a brickbat welcome.

A curious rumour reaches us from Peking. It is reported that the young Emperor was astonished to find one of the chief eunuchs of the palace smoking opium. The Monarch requested to be allowed to try a pipe, and the effects were such as might have been expected. While suffering from the sickness consequent on his excess, the Queen mother surprised his Imperial Majesty, and immediately took prompt measures. The eunuch was beheaded, and a fresh proclamation against the use of the drug was circulated throughout the country. Several copies of the edict have reached Ningpo, and are exciting much attention amongst the natives of that city.

We understand that the new treaty between the United States and China has reached Mr. Consul-General Seward by the present Pacific mail, for transmission to Peking.

It is stated that placards have appeared at Chefoo, calculated to incite enmity towards foreigners, and that the Taoutai has been applied to by the consuls to explain matters. We believe it is customary for miners taking passage to Shanghai to be disarmed on going on board a vessel, and, indeed, one captain refused to take them under any circumstances.

We hear that Mr. G. H. Noetzli, of the Imperial Maritime Customs Service, is about to take leave of absence to Europe, and that Mr. J. K. Leonard succeeds him as Deputy Commissioner in charge of the Returns Department. Mr. Noetzli deserves every credit for the admirable manner in which he has performed his duties, and with the weight of trade reports and returns from all the open ports of China upon his shoulders, to summarise and prepare for the press, his position must have proved no sinecure.

Information has been received from Szechuen of the murder of a French missionary, who was attacked at the altar in his chapel, and after his hands and feet had been cut off, was finally beheaded.

We regret to have to record the sudden death of Mr. George Beck, Vice Consul for Denmark, a gentleman much respected by the community. He was found dead in his cabin on board the *China*, in which he was about to proceed to Hong Kong.

A Consul General for Italy arrived by the French mail ; and the house No. 12, Peking Road has been taken as the Italian Consulate.

Messrs. H. Fogg and Co. announce that the interest and responsibility of Mr. H. M. Twombly in their firm ceased on the 31st December, and that Mr. Silas D. Webb and Mr. E. M. Billings have been admitted partners.

---

## HONG KONG.

From this port our advices are to the 23rd February. The outward mail of Jan. 1 reached Hong Kong on the 13th February with telegrams to Jan. 22. The following items of news are chiefly from the *China Mail* :—

The *Gazette* contains notifications that the Naval Yard Police Force Ordinance has been confirmed ; that the appointment of the Hon. J. B. Taylor, *vice* the Hon. P. Ryrie, to a seat in the Legislative Council is officially approved ; and that W. M. Deane, Esq., has been appointed Captain Superintendent of Police, the appointment to date from 24th July last.

The race meeting and its attendant festivities were fitly terminated on the 19th by one of the most successful balls which ever took place in Hong Kong. H.E. the Governor, Lady MacDonnell, and the *elite* of the community were present, and dancing was kept up until an early hour to the music of the band of the 75th Regiment.

His Excellency the Governor of Macao paid a visit to his Excellency the Governor of Hong Kong during the races. He was received with the usual honours.

By a paragraph in recent North China papers we learn that another French missionary has been barbarously murdered in the interior of China. It is interesting to speculate as to what action will be taken by the French Minister regarding this matter. This is another example, we presume, of the Burlinghame "shining cross" arrangement, the utter falsity of which has been demonstrated in a manner totally unforeseen by the envoy or his backers at Peking when he left on his mission to all creation. British subjects will watch with much curiosity the line taken by the French Minister. It is possible that the pacific instructions sent to Sir R. Alcock were framed to accord with the views of France, and that similar directions have been given to the representative of Napoleon III. at the Court of Peking. None, however, out here would be sorry to see France step in and exact a material guarantee from China for the frequent outrages which occur under the sanction of her officials, for Great Britain must follow suit in such a case. The result of the murder alluded to may be a total change within a few months of all foreign relations with China ; a change which we for one would be heartily rejoiced to see brought about.

Three men have been arrested at Macao on suspicion of being the perpetrators of the murder of Mr. Holworthy. Their capture is stated by the *China Mail* to be due to the efforts of Mr. D. R. Caldwell, in his capacity of manager and adviser for the licensees of the gambling farm.

The Hong Kong and Whampoa Dock Company held an extraordinary general meeting on Feb. 19, Mr. W. Keswick taking the chair. The object of the meeting was to obtain a vote from the shareholders, authorising the removal of the company's chief engineering establishment from Whampoa to Aberdeen. The expenses attending this change were estimated at 15,000 dols., and, after some discussion, the step was authorised. The memorandum of accounts submitted to the meeting was very satisfactory. It showed for the seven months ending 31st January, 1869, an excess of earnings over liabilities and expenditure of nearly 44,000 dols.

The following account, duly certified, of the average amount of bank-notes in circulation and specie in reserve in Hong Kong, during the month ended 31st Jan., 1869, is published for general information :—

| Banks. | Average notes. | Specie in reserve. |
|---|---|---|
| Oriental Corporation... ... ... | $513,584 ... | $171,194 |
| C. M. of I., L., and C. ... ... | 392,969 ... | 150,000 |
| C. of I., Aus., and China... ... | 809,445 ... | 105,000 |
| Hong Kong and Shanghai Corp. ... | 813,112 ... | 350,000 |
| Total ... ... ... | $2,029,110 ... | $776,194 |

The *China Mail* gives the following particulars of the recent cruise of the gunboat *Algerine* :—

H.B.M. gunboat *Algerine* left Hong Kong on the morning of the 11th of January, with orders to search the southern coast of the mainland and the coast of the Island of Hainan for any trace that might exist of H.I.M.S. *Le Monge*. It will be remembered that this latter ship left the port of Saigon on the 1st November last for Hong Kong. Up to the time of the *Algerine* leaving here nothing had been heard of her. Lieutenant Grey also received orders to examine the coast for pirates, and destroy any he might fall in with ; for that purpose a mandarin from Kowloon was appointed to accompany him on his

Digitized by Google

cruise. The *Algerine* shaped her course for the southern extremity of the island of Hainan, and after a four days' run under sail arrived off Nychow, the principal town on the coast. Nothing of the *Monge* was known at this place. After leaving Nychow the *Algerine* steamed along the east side of the island, touching at several places, but no trace of the French ship was found, nor were the inhabitants able to give any information on the subject.

No pirates were met with, and the *Algerine* then proceeded to Tun-peck, where she arrived on the 26th January. H.I.C.M. gunboat *Tienpo* was lying at that port, and her captain, Mons. De Longueville, informed Lieutenant Grey that the French mail from Saigon had passed a boat with the letter "M" on her bows, bottom up, off the entrance to the Tonquin Gulf. It is to be feared that it was all that remained of the ill-fated *Le Monge*. Captain De Longueville informed Lieutenant Grey that the coast about St. John's Island was infested with pirates, who had their headquarters in the island of Ton-qua, and that it was his intention to burn their villages on his return voyage. The *Algerine* left Tienpeck on the 30th of January, and having called at Hui-lin-sun and Namoa, arrived off Ton-qua Island on the morning of the 2nd of February. Having procured a guide from a fishing junk, Lieut. Grey and a party of twelve men and one officer landed at a part of the coast called Timah. Here they found four large piratical snake-boats drawn up on the beach, close to a hut which had evidently been lately abandoned. This was set fire to by orders of the Mandarian who accompanied the party, and while proceeding to destroy the boats a rapid and well directed fire was opened on them from some rocks about three hundred yards off. Lieut. Grey immediately directed his men to advance in skirmishing order, and as they approached the pirates retreated up the mountain, which was covered with rocks and boulders. The men pursued them with great spirit, keeping up a sharp fire with their Snider rifles, but owing to the difficulties of the ground were unable to come up with them. Having destroyed the boats, the party proceeded to the village of Chunglah, which was supposed to be piratical, but on arrival there the Mandarian would not authorise its being attacked. It being then dark they returned on board the ship. Next day the same party again landed at a place called Yuising; here they found some snake boats and a hut, which they destroyed; while doing so they were again fired on by a small party of pirates, who immediately retreated to the hills. On the morning of the 5th, when getting under way to proceed to Macao, two men in a sampan hailed the ship, and said they had only just escaped from the hands of pirates, who had captured their junk on the north-east side of the island. The gunboat having arrived near the place indicated, Lieutenant Grey, aecompanied by two officers and sixteen men, proceeded on shore in the junk they had released some days before. On nearing the shore they observed the junk they were in search of, as also another, both of which were in the hands of pirates, who abandoned them immediately they saw the party approach. Having brought the junk to an anchor, and leaving one officer and four men in charge of her, Lieutenant Grey, with the remainder of his party, pursued the pirates up a narrow creek, where they had retreated, but owing to the shallowness of the water were obliged in a short time to return. They then boarded the junks which had been captured, and found their crews down below with heavy guns placed over the hatches. Having released them, and it being then dark and the tide very low, Lieutenant Grey decided on remaining on board with his party during the night. Next morning they again landed and proceeded up the same creek as the night before. As they advanced they observed scouts running before them, and in a few moments a heavy and well-directed fire was opened on their front. This the men returned, and two or three of the enemy were observed to fall. The pirates then advanced on Lieutenant Grey's small party, but soon retired under the quick fire from the Sniders. Some distance further up the creek they found a number of large snake boats heavily armed, which they destroyed, and then returned to the junk and proceeded on board. During those five days they destroyed five piratical huts, twelve "snake" boats, some from sixty to seventy feet long, brought away three guns, spiked six, destroyed nearly three hundred pounds of powder, brought away twenty-one muskets, four "gingalls," thirteen spears, besides a large quantity of other small arms, and liberated and gave up to their owners four junks with valuable cargoes. The work was done by the men in severe weather, and under considerable difficulties, landing in a heavy surf on one occasion, and up to their waists in mud on another. During the whole time the men worked with indomitable spirit and energy, and when fired on stood their ground coolly and firmly.

It having been ascertained that all the piratical boats on the island had been destroyed, the *Algerine* proceeded to Hong Kong on the 8th inst. Lieutenant Grey, his officers, and men deserve much praise for their exertions.

HONG KONG AND SHANGHAI BANK CORPORATION.

The ordinary half-yearly meeting of the shareholders in this corporation was held on the 15th of February, at the head office, Queen's-road, for the purpose of receiving the report of the directors and statement of accounts to Dec. 31, 1868. The chairman (G. F. Heard, Esq.) and al lthe directors were present, with the following shareholders:—Messrs. C. Budde, W. Robertson, R. S. Walker, E. Behre, J. I. Murray, Davis, Medlin, Levyson, Haseland, M. do Rozario, Gaup, Noble, Andre, J. A. Lyon, Buxey, Kressar, Riddle, H. B. Dantra, A. Belilios, Chater, Pirkis, Ezekiel, Mellish, J. Jackson, Reimers, Diack, Coxon, Price, Pollard, Glennie, Rennie, Deacon and Dods.

The half-yearly report and statement of accounts gave general satisfaction, and were unanimously passed without comment.

Messrs. Rennie and Bryant were unanimously re-elected as auditors, on the proposition of Mr. Forbes, seconded by Mr. Belilios.

The three retiring directors were unanimously re-elected. It was intimated that the dividend would be payable from Monday, the 1st.

Mr. Andre proposed a vote of thanks to the chief manager, which was unanimously carried.

Mr. Kresser replied in a few very appropriate remarks, warmly thanking the shareholders for their support to the bank, the success of which he attributed to their efforts in its behalf.

Mr. Rennie proposed a vote of thanks to the directors, which was unanimously carried, and the meeting broke up.

## STRAITS SETTLEMENTS.

—o—

SINGAPORE.

Advices from Singapore extend to the 2nd March. The English mail of Jan. 15 arrived out on the 18th Feb., and the French mail of Jan. 21 on the 23rd Feb., the latter conveying London telegrams to Feb. 12; *via* Calcutta the latest London telegrams reached to Feb. 18.

The *Straits Times* gives the following as a summary of the fortnight's news:—On the night of the 16th, or the morning of the 17th February, a disastrous fire broke out in Commercial-square, in a large store, and by day dawn the whole store, together with the office and all the plant of this paper, which was above the store, and the building occupied by the Oriental Bank Corporation, which was next door, was totally consumed. The origin of the fire, and when it broke out, are unknown. The *Straits Times* office was covered for 10,000, dols., the store for 80,000 dols., and the Oriental Bank building for 33,300 dols. The proprietor of the *Straits Times* lost everything—all his books, accounts, types, printing presses, printing paper, lithographic and bookbinding stock, and all the files of the paper, but temporary arrangements have been made for the publication of the paper until a new stock can be procured from home. A Milner's safe, it is to be noted, proved practically worthless, its contents being all charred and half consumed, while one by Price, of Wolverhampton, preserved all its contents in comparatively good order.

The alarm was not given early, and much valuable property by which might well have been saved, was in consequence destroyed. There was great delay in getting the fire engines to play, and the hose of one of the steam engines having burst, only one steam engine was available. This is the second destructive fire which has taken place here during the last six months, and in view of this, and also of the inefficiency generally witnessed, of the measures taken to master a fire, steps have been taken for the formation of a European fire brigade.

The Session of the Legislative Council for this year was opened with the usual ceremonies in the Town-hall on the 17th February, and his Excellency the Governor delivered his customary speech. Various highly interesting papers were laid before the Council. The most important of these are papers regarding Government-house and the finances of the colony. An extraordinary and almost incredible miscalculation has been made in the estimate of the cost of Government-house. Instead of 100,000 dols., it will cost 150,000 dols., and probably a good deal more. The finances of the colony, according to the Auditor-General's statements and figures, are in a satisfactory state. The community generally are strangely incredulous on this point, and entertain uneasy apprehensions of the wastefulness and extravagance of the local Government, and, we may add, of the Colonial-office. Time alone can show whether these apprehensions are groundless or not; but meantime it may be noted that the Auditor-General asserts that on the 31st of December, 1869, there will be a probable balance to the credit of the colony of 38,576 dols., after paying the entire cost of the new Government-house and the new steam vessels.

At the first meeting of the Council nothing occurred of much interest after the delivery of the Governor's speech. The Attorney-General introduced and read a first time several new Bills, and a committee was appointed to report upon Government-house.

The Council met again on the 24th ultimo, and a smart discussion is reported to have taken place regarding the financial statements of the Auditor-General. The absurd, and, we believe, illegal standing rule of the Council, which excludes the representatives of the press, prevents our giving any particulars. The Hon. W. H. Read criticised the mode in which the estimates were framed, especially the manipulation of the items for convicts—these items being put down as cash actually received, when not one cent had been reimbursed by the Indian or other Governments. The report of the Select Committee upon the new Government-house was submitted, and a further vote of 40,000 dols., proposed and seconded by the official members, to complete the same, was passed.

Digitized by Google

It is rumoured that the Hon. Dr. Little has tendered the resignation of his place in Council to H.E. the Governor, finding himself unable, from other pressing calls on his time and attention, to attend to his duties as councillor. The retirement of Dr. Little will be a sensible loss to the Council, and one difficult to replace. One of the oldest residents in the Settlement, Dr. Little has thoroughly identified himself with its interests and prosperity. We are curious to learn who Dr. Little's successor is to be. It is said, we know not with what truth, that the seat has been offered to three of our merchants, and has been refused. Very properly so, too, if it be the fact, as stated, that the condition of supporting all measures initiated by Government was attached to the office. We are glad to see our merchants have spirit enough to disdain being dummies, or dumb dogs obedient always and thankful for a crumb from the official table now and then.

# Commercial Report.

## STRAITS, CHINA AND JAPAN IMPORTS.

YOKOHAMA.—This branch of trade continued to exhibit great depression; and quotations were again lower than those of last mail. The great fluctuation in the value of native currency and the near approach of the annual holidays made natives very cautious in their operations. Grey Shirtings had steadily declined, and very little business is reported. Best Eagle Chop, 8¼ lb. goods, had been sold as low as $2.72½ per piece. Cotton Yarn: Some considerable transactions had taken place at the reduced quotations, and the market closed firm. Quotations:—G. E. Grey Shirtings, 7 lbs., 38¼ yds. 39 in., per piece, $2.40 to 2.50; 8¼ lbs., do., $2.70 to 2.75. G. E. White Shirtings, $2.40 to 2.20. T-Cloths, 6 lbs. to 7 lbs., $1.65 to 2.20. Cotton Yarn: Nos. 16-24, per picul, $45 to 45½; 28–32, $47 to 48. Camlets, BBB and S, per piece, $15 to 16; Blankets, per lb., $0.50 to 0.60. Iron, flat and round, per picul, $3.0 to 3.50; Lead, $6.50 to 7.0.

HIOGO AND OSAKA.—Cotton goods generally had been in fair demand, and an advance had been obtained for Grey Shirtings and Turkey Red Cloth, stocks of which were well nigh exhausted. In Woollens and Woollen Mixtures a fair amount of business had been done, nearly all descriptions participating. Metals in less demand and transactions insignificant. Raw Cotton.—Sales to some extent had been made, but enquiry had since fallen off, and the market, notwithstanding relief afforded by re-shipments to Yokohama, closed weak.

SHANGHAI.—Cottons: Up to the 9th February a limited business in these goods was transacted; since when no sales of any consequence had been effected. Grey Shirtings: Up to the close of the market, business was done in 8¼ lbs. at Tls. 2.0 to 2.0.8, and in 7 lbs. at Tls. 1.8.0 to 1.8.3. Since the receipt of telegraphic advices from London, advising a firmer cotton and goods market, importers had been asking higher prices, and the nominal quotations for 8¼ lbs. Grey Shirtings were Tls. 2.0.8 to 2.1.3. The native dealers not being about, no sales had been effected. White Shirtings: Very few had changed hands. T-Cloths: In less demand, prices about the same as those last quoted. Drills were in but small inquiry, and Fancy Cottons, generally, were dull of sale. Woollens and Worsteds—Spanish Stripes: A few parcels had been sold at slightly better rates. Other descriptions of Woollens and Worsteds were neglected. Coals: Without any transactions whatever to advise the market, prices for Coals remained nominally at last quotations for all descriptions. Arrivals since 1st February, 2,195 tons from Australia and 600 tons from Formosa.

HANKOW.—The business in Cotton Goods, with the exception of 8¼lb. Grey Shirtings, had been on a small scale, but without much change in values. Woollens generally had been neglected, and few sales were reported. Grey Shirtings: The inquiry had been chiefly for best makes of 8¼ lbs., which had been in fair demand throughout the fortnight at Tls. 2.1.0. The market closed firmer, and quotations were—Tls. 2.0.5 to 2.1.2; 7 lbs. had again declined, Tls. 1.8.0 to 1.8.3. White Shirtings: 66 reed goods had been in small request at previous rates. T-Cloths: Moderate sales had been effected at Tls. 1.7.8 to 1.8.0 for 7 lbs., and Tls. 2.1.5 to 2.2.0 for 8 lbs. The stock was large. Drills were again lower; American, Tls. 4.2.5 to 4.3.0; English, Tls. 4.0.0 to 4.1.0. Fancy Cottons, and most descriptions of Wollens and Worsteds had been without any inquiry. Scarlet Long Ells were slightly firmer, and Spanish Stripes in moderate demand at firm rates.

HONG KONG.—We extract the following from Messrs. Olyphant and Co.'s Circular, dated 22nd February:—The festivities attendant on the China New Year and the annual races caused an almost total suspension of business during the greater part of the period under review, but latterly the generality of native dealers have resumed business, and the result of last year's operations, as a rule, having been more or less favourable, have shown a greater desire to replenish their stocks, and this has led to an advance in value of almost all descriptions of merchandise, importers being well aware that these stocks are mostly light. Cotton Yarn: Nos. 16 to 24 find a moderate degree of favour at an advance of $2.50 per bale, but a concession of an equal amount has had to be made to induce purchases of the higher numbers. Piece Goods: Purchases amounting to some 40,000 pieces 8.4 lb. Grey Shirtings were made by a foreign house during the early part of the interval at $2.75 to 2.80 per piece, which gave tone to the market, and sales have since been made to native dealers upon similar terms, though some importers are holding for still higher figures. About 4,100 pieces damaged have been placed at auction at proportionate rates. 7lb. Grey Shirtings are wanted at a further advance of 5 cents, but there are few sellers. T-Cloths are up 5 cents per piece, and 6 and 8lb. goods sell readily at the advance, but there is little doing in 7lb., which are in large supply. White Shirtings are enquired for, and stocks being very limited, a material improvement in prices has to be noted, especially in the better qualities. Of the sales reported, a portion have been made "to arrive." Turkey Reds, Assorted Brocades and Spotted Shirtings are also dearer. Quotations for American Cottons are still quite nominal, the market being bare of stocks, but English and Dutch Drills are taken at materially higher rates. 1,000 pieces 30 yard Dutch Jeans have been sold "to arrive at $4.05 per piece. Woollens: These, too, with the exception of Blankets, have been participated in the general improvement, though the improvement, on the whole, is not so marked as with Cotton goods. Scarlet Long Ells are attracting some attention from their comparative scarcity, and are 20 cents dearer, while Assorted are up but 10 cents, nominally, no sales having been made. Best makes of Spanish Stripes still find buyers, but inferior are quite neglected. Blankets are not wanted. Crape Lastings are very firm, and Lastings and English Camlets a trifle dearer. Sales of the latter embrace 100 pieces S.S., 480 do. S.S.S. and 180 do. B.B.B. Dutch Camlets are wanted at an advance of $1.50 per piece. Metals: Nail Rod Iron is advancing, and best Bar is 10 cents per picul dearer. Hoop is quiet. Wire firmly held at enhanced values. Lead still finds favour, and has further materially advanced; there is now no L.B. in stock. The small arrivals of Tin have been eagerly taken at quotations. Tin Plates are without change. Quicksilver firmer. Coal: Arrivals have been 320 tons Welsh, and 700 do. Sydney. The only sale has been 200 tons West Hartley, ex godown, delivered on board ship at $11 per ton. Ginseng: Sales have been 19 casks Crude at $125 to 150; stocks are very light, and holders firm, pending the arrival of further supplies now due. The current quotations were as follows:—Cotton Yarn, No. 16 to 24, per bale, $120 to 127; 28 to 32, $129 to 133.50; Grey Shirtings, 7 lbs., per piece, $2.37½ to 2.45; 8.4 lbs., $2.60 to 2.80; White Shirtings, $5; T-Cloths, grey, $1.84 to 2.30; Long Ells, H Scarlet, $8.20; Camlets, SS Assorted, $16.25; AAA Assorted, $17.80; Iron, Nail Rod, $2.90 to 2.95; Hoop, $2.95; Round, Square, and Flat Bar, per picul, $2.75; Lead, per picul, $8.10 to 8.25; Coals, English, per ton, $10; Welsh, $11.

SINGAPORE.—The Chinese dealers had resumed business, the holidays having closed, and there had been more activity in the market for Cotton goods; telegrams of the firmer tone of quotations at home having strengthened holders, prices generally had advanced and had an upward tendency. Grey Shirtings, 39 in. 8¼ lbs., had been in good demand, at firmer rates, and a fair business had transpired at $2.75 to 2.85 per piece; 7 lbs. had also advanced about 5 cents per piece, but sales have been small; 6 lbs. were scarce, and no transactions are recorded. Madapollams in limited inquiry, stock light. T-Cloths of all descriptions had risen about 5 per cents per piece; there had been a brisk demand for 6 lbs., and several clearances were noticed; 5 lbs. had been in limited request, the lighter weights were very scarce; 7 lbs. had met with a moderate inquiry. Dutch Drills firmer, stock very light, sales of English Drills are noted. Grey yarn, No. 40, in good inquiry, and business to some extent had transpired at firmer prices; No. 30s. scarce, no sales reported, lower numbers dull of sale. White Shirtings of medium reeds still in inquiry, the lower qualities more difficult to place at full rates; finer goods also in rather less request. Imitation Irish linens in some inquiry. Cambrics more active; considerable supplies had come forward, and several sales of fine goods made under last rates; No. 24s. placed at about previous prices. In Dyed Goods there had been a moderate business doing. In Woollens, Camlets had been sold at slightly firmer rates. Bombazettes were in limited inquiry. A sale of Scarlet Long Ells is noted. Metals had been more active. Bar Iron had been placed to some extent at low rates; Nail Rod was rather firmer, a moderate business having transpired. Pig Lead advanced in value, and much wanted. Yellow Metal firmer; there had been a speculative demand, and the stock was in few hands. Gunpowder difficult to place. Coals unchanged; Cardiff in demand, and transactions reported at about last rates; a cargo of Scotch coals sold at $7⅛ per ton cash; West Hartley without inquiry.

## STRAITS, CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—The Tea market since the departure of the last mail had been inactive, and settlements were very small, not exceeding 500 piculs, which had been made at last quotations. No reduction can be noted in prices, although dealers had shown a little more willingness to sell, wishing to realise their stocks before the new year. Stocks were very light, and supplies were coming forward scantily. The Alcyone, for New York, had sailed with 645,183 lbs. The Brilliant and John Norman were the only vessels loading, the Solent having been taken off the berth. Current quotations:—Common, $19 to 23 per picul; good common, $24 to 25; medium, $26 to 28; good medium, $29 to 32; fine, $34 to 37; finest, $38 to 39; choice, $40 to 42.

HIOGO AND OSAKA.—A considerable amount of business had been done, and settlements were about 3,200 piculs, the greater portion of which were made at previous rates; but in some instances purchases had been effected at Rios 2 to 4 over last quotations. There was little on offer, and the market closed strong with an upward tendency. Stocks were estimated at about 2,000 piculs.

SHANGHAI.—Black: There had been but a very limited business during the fortnight, only one parcel of three small chops having found a buyer. Prices remained unchanged, and natives continued to hold with extreme firmness; Settlements for the fortnight, 486 chests; Reshipments on owners' account, nil; stock, 16 chops, or 4,302 chests. Green: In this description also there had been very few transactions, nor was any active demand looked for until holders accepted a considerable decline. The fortnight's settlements consisted of 4,221 half-chests medium to fine Teenkai and Moyune, at Tls. 34.5.0 to 39.5.0; 793 half-chests Fychow, at Tls. 27.0.0 to 29.5.0; 1,086 boxes Pingsuey, at Tls. 36.0.0; and 1,151 half-chests Shanghai and Kiukiang-packed, at Tls. 25 to 31, showing no change in quotations; settlements for the fortnight, 6,436 half-chests; re-shipments on owners' account, nil; stock, 97 chops, or 53,227 half-chests.

KIUKIANG.—One chop, of 236 chests Congou, had been settled, but nothing had been done in Green Teas. A few chops of Blacks and about 4,200 packages Greens had come to hand, and been forwarded to Shanghai on native account.

FOOCHOW.—The mail steamer not having arrived at Hong Kong, advices are only to the 8th of February (four days later); the only settlements had been 409 chests Congou, and 450 boxes Scented Tea. There

Digitized by Google

had not been any further arrivals from the country, and the stock of Congou was reduced to 1,600 chests. The Metaris and Lady Belmore had sailed for Sydney, but their cargoes had not been circulated. The Chanticleer and Henry Grenfell were loading slowly for London.

AMOY.—About 6,000 packages Oolong had been settled, reducing the stock on offer to about 26,000 half-chests. Rates were slightly higher, and the market closed very firm. The John C. Munro, John Worster, Ferdinand, and Auguste Frederich were loading for New York, and another vessel was shortly expected from Hong Kong to load for the same port.

CANTON.—No transactions had taken place.

## SILK.

YOKOHAMA.—Arrivals had been very small; and the quality of stocks was very inferior, little or no fine Silk being on offer. This, combined with the effects of bad news from the home markets, had reduced business to a minimum, and settlements did not exceed 200 bales. Prices had ruled irregularly; some parcels seemed dearer, others cheaper, but seeing the small number of transactions and the generally inferior quality, it was difficult to make much change in quotations. It may be noticed that 150 bales had been sent back to Osaka, and the interior for home consumption. The current quotations (laid down in London at exchange 4s. 5½d.) were as follows:—Hanks—Mybash, Sinchu, &c., extra, none; best, 37s. to 38s. 10d.; medium, 32s. 9d. to 35s. 10d.; inferior, 27s. 6d. to 32s.; Oshu, extra, nominal, 37s. to 37s. 8d.; best, 33s. 10d. to 35s. 10d.; medium, 28s. 2d. to 32s.; inferior, 24s. 5d. to 26s. 8d.; Coshu, medium, 28s. 2d. to 30s. 5d.; inferior, 24s. 5d. to 27s. 6d.; Sodai, medium, 26s. 4d. to 28s. 2d.; Etchesen, medium, 28s. 3d. to 26s. 4d.; inferior, 19s. 9d. to 22s. 7d.; Mashta, inferior, 20s. 8d. to 23s. 8d.; Hatchogee Tussah, nominal, 23s. 8d. to 26s. 4d.

HIOGO AND OSAKA.—The business at both these ports had been extremely limited.

SHANGHAI.—The following is from Messrs. Skeggs and Co.'s Circular, dated 16th February:—Business has been entirely suspended during the fortnight, owing to the combined influence of the China new year holidays, and a report that private telegrams have been received quoting chop thirds 27s. 6d., so that there are actually no settlements, although we place them at 150 bales, which represent about 100 bales shipped at the close of last mail on native account, 17 bales by the steamship Diomed, and a few left over for the present steamer. Quotations are left unchanged, but we may expect to see some reduction for ordinary silks on the renewal of business.

## STRAITS PRODUCE.

SINGAPORE.—There had been some excitement, owing to telegrams of fluctuations on the home market. Black Pepper was bought to some extent early in the fortnight, but since the arrival of the French mail nothing had been done, as dealers were asking a considerable advance and shippers were not eager to buy until more certain advices were received of the prospects of the home market. A large business was done in White Pepper at $10 to 10.20, but the telegrams by the French mail, quoting 9½d. per lb., caused a considerable advance; a parcel had been bought at $11.60. Gambier had been quiet and the rate steady at $2.80; it was coming in slowly, about five hundred tons had been contracted for. Tin commanded higher rates, owing to the advices of a further advance in the China markets; there were few buyers. Pearl Sago remained nearly the same as last quoted. Sago Flour unchanged, market rather weaker, but the last telegrams had caused rates to close firmer, a fair amount of business having transpired. Coffee had been taken up at an advance on last quotations; supplies of Bontyne were small. Cloves scarce, and in some demand. Cubebs firmer, and supplies small. Hides rather easier. Horns in some demand, and maintained high rates. Gutta Purcha of good quality was readily taken up at full prices. India-rubber scarce and in good request. Camphor had been sold at higher rates. Rattans in good demand, and prices unchanged.

## ARRIVALS.

At YOKOHAMA.—From Liverpool, Jan. 30, Mattie Banks; Feb. 3, La Serana; from Cardiff, 30, Pegasus; Feb. 5, Vesta; from Baltimore, Jan. 28, J. Godfrey.

At SHANGHAI.—None.

At HONG KONG and CANTON.—From London, Feb. 10, Belted Will from Cardiff, 20, Bezuleel.

At MANILA.—None.

At SINGAPORE.—From London, Feb. 25, Sea Snake; from Liverpool, 16, Carl and Aguste; 18, Achilles (str.); from Newcastle, 22, Brodrene; 28, Hochelaga; from Glasgow, 22, Carrick Castle; from Bordeaux, 17, Comete; 28, St. Sauveur; from Rotterdam, 17, Nereus.

## DEPARTURES.

From YOKOHAMA.—For New York, Jan. 30, Alcoyne.

From SHANGHAI.—For New York, Feb. 8, Queens Own; for Halifax, 6, Carnarvonshire.

From HONG KONG and CANTON.—For London, Feb. 17, Sophie; for Cork, 21, Sarah Nicholson; for Havana, 7, Tamaris.

From MANILA.—For London, Feb. 13, Aurora; for New York, 9, Nina

From SINGAPORE.—For London, Feb. 23, Corypheus, Merse; 28, Diomed (steamer); for Liverpool, 26, Kate Carnie; for New York, 18, Arracan; 28, St. Paul.

## VESSELS LOADING.

At YOKOHAMA.—For London, Chrysolite; for New York, John Norman, Brilliant.

At SHANGHAI.—For London, Assyrian; for New York, Monkchester, Annie Bragington.

At FOOCHOW.—For London, Chanticleer, Henry Grenfell.

At AMOY.—For New York, J. C. Munro, Ferdinand, Auguste Frederick, J. R. Worcester.

At HONG KONG and CANTON.—None.

At MANILA.—For London, A. Lloreat, Sarah Scott; for Liverpool, Estrella, Olano; for Cadiz, Concepcion, Reina de los Angelos; for New York, Nellie Chapin, Harriot Erving, Agra, Golden Fleece; for Boston, Mullah.

At SINGAPORE.—For London, Carrick Castle, Lammermuir; for Liverpool, Alpha; for New York Ortelius, Syedpolen.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, per sailing vessel, £3 10s.; to New York, £2 15s. to £3; per steamer, $45.

Digitized by Google

AT SHANGHAI.—In coast charters there is very little doing, and for home the rate may be considered nominal, the only vessel on the berth being full at £2 per ton; to New York the rate is £3 per ton of 40 feet.

At HONG KONG and CANTON.—Coasting freights remain dull, and excepting a few charters to the North, hardly any other business has been done. Home charters, however, which are freely offering, are difficult to execute, owing to the scarcity of tonnage available for that quarter, and rates remain comparatively high. The chief demand has been for vessels to load at Bangkok, and three charters at from £3 7s. 6d. to £3 15s. per ton have been effected.

MANILA.—The following is from the Circular of Messrs. Tillsen, Hermann, and Co.:—We have a fair demand for tonnage, and the following vessels have been taken up since our last:—The Estrella, for Liverpool, with 700 tons sugar at £3 10s., and hemp at £4; the Olano, for same port, with 500 tons sugar at £3 15s., the vessel seeking any light freight. For London, the Sarah Scott, chartered in Hong Kong, is getting here £3 10s. for sugar, £4 5s. for coffee, £4 10s. for hemp, and measurement. For New York, the Agra, $12.50 gold for 350 tons sugar, $12 for hemp. The Golden Fleece and Harriot Erving load for same port, and the Mutlah for Boston, on private terms.

At SINGAPORE.—To London or Liverpool the rate is £3 dead weight, and £3 5s. light freight.

## VESSELS PASSED STRAITS OF SUNDA.

| Date. | Ship. | From | To. |

## COMMERCIAL POSTSCRIPT.

The amount of bullion by the P. and O. Company's steamer Poonah, from Southampton on the 3rd inst., was in gold, to Galle, £515; to Madras, £6,500; to Bombay, £13,500; in silver, to Calcutta, £30,000; to Shanghai, £15,515; to Hong Kong, £24,792; to Bombay, £30,000. Total in gold, £20,515; in silver, £100,307.

### SHIPPING.

ARRIVALS NOT IN THE TABLES.—April 2, at Falmouth, from Rangoon, Sydenham; from Bassein, Jane Rowland, River Dee; at Cork, from Maulmain, Cardross; from Manila, Serafin; 4, at Falmouth, from Yloilo, Cymbeline; from Bassein, Pride of the Thames.

DEPARTURES.—April 2, from Cardiff, for Shanghai, Europa.

SPOKEN.—Marie (barque), Rotterdam to Batavia, Nov. 27, 18 N., 24 W.

CASUALTIES.—The Continental, Erving, from Cardiff to Yokohama, which was taken into Gibraltar, after being on shore in the Bay, March 15, has been again under survey, and recommended to discharge the remainder of her cargo.

The Auffredy, Guillore, from Saigon to Rotterdam, which lost her anchors, March 20, in Belle Isle Roadstead, put into St. Nazaire, March 28, with damage to rigging, and to replace anchors.

Advices from St. Helena, dated February 20, state that the Caroline Bourhis, from Saigon, which put in there January 28, leaky, was again surveyed, February 25, and ordered to discharge the remainder of her cargo, the leak not having been found; a large quantity of the cargo was damaged, and a portion sold, February 22.

## LATEST TELEGRAMS.

RECEIVED VIA GALLE, MARCH 24.

### CHINA.

SHANGHAI, March 3.—Grey shirtings, 6½ catties, 8¼ lbs., 2.18tls. Cotton: Shanghai, 16¾ tls. Silk: prices lower. Settlements since departure of last mail, 850. Export to date (China and Japan) from commencement of season, 60,800 bales. Exchange on London—Bank bills, six months, 5s. 11¾d. Freights, £3.

HONG KONG, March 8.—Grey shirtings, 6½ catties, 8¼ lbs., $2 80c.; water-twist, 16-24, $125. Cotton: Bengal, fair medium, $17. Tea, nothing doing. Total export (China and Japan), 138,000,000 lbs. Exchange on London: Bank bills, six months, 4s. 5½d.

# Obituary.

## DOUGLAS LAPRAIK, ESQ.

We regret to record the death of Douglas Lapraik, Esq., late of Hong Hong, and one of the oldest and best known residents in the colony. After an uninterrupted sojourn of twenty-eight years in Hong Kong, Mr. Lapraik returned to this country in the year 1866, being then apparently in good health. Although retired from active business pursuits, he by no means lost his interest in the colony, but while the state of his health permitted, was one of the most active members of the Hong Kong Association of London. In the course of last year, however, signs of an insidious internal disorder manifested themselves; the case was some time since pronounced a hopeless one by the highest medical authorities. Life was prolonged to the utmost, by the incessant care taken to mitigate his sufferings, which were very acute, in every possible manner; but he ultimately sunk from the exhausting effects of his illness, on the 24th instant, at his residence, "The Oaks," Acton. The event, although not unexpected, has excited a feeling of deep sorrow among a large circle of friends here, and will be received with general regret in Hong Kong and elsewhere. This announcement will have been anticipated in China by telegraph.

The funeral took place on the 31st ultimo, at Highgate Cemetery, and was attended by a very large number of the friends of the deceased gentleman. Among others were several prominent residents in Hong Kong, including Messrs. R. Jardine, Whittall, Sutherland, Heaton, &c. Altogether there were from 100 to 150 persons present—a large attendance for a private funeral.

## CAPTAIN RODERICK DEW.

This officer, so well known in China, died suddenly while in command of H.M.S. *Northumberland*, one of the ironclad squadron now at Lisbon. The *Army and Navy Gazette* says:—"Her Majesty the Queen has lost a valuable servant, and the service of a popular man, in Captain Roderick Dew, R.N., C.B., who, at the comparatively early age of forty-six, died a day or two since at Lisbon. When we last week announced the fact that he was unable to proceed to sea in his ship we had very faint hopes of his recovery, as we were perfectly assured that nothing but sickness almost unto death would have kept so zealous an officer as he was from the discharge of his duty. We have before us a letter from one who knew him for the space of a quarter of a century, and who is able almost better than any other man in the Navy to pass an opinion and an eulogium on the merits of the deceased. The writer says, 'Poor Roderick Dew is dead, to my great grief; he was one of the very finest fellows who ever trod a quarter deck.' This is *multum in parvo*, and willingly do we bear our testimony to all that can be said in praise of one who was a thorough seaman, a smart officer, and a true friend. It is to be hoped that the Admiralty will convey to Vice-Admiral Sir Thomas Symonds an expression of sincere regret with which their lordships have received the intelligence of the loss which the country has sustained by the removal from this life of one whose career had been marked with brilliancy, and which promised so well for the future. The feeling expression of 'Poor Roderick Dew!' will find a re-echo in many a breast."

## BIRTHS, MARRIAGES, AND DEATHS.

### BIRTHS.

BRAYBROOKE—On the 11th Feb., at the Old Palace, Kandy, Ceylon, the wife of P. W. Braybrooke, Esq., of a son.

DICKINSON—On the 23rd March, at Hampstead, the wife of Henry Dickinson, of a son.

PATERSON—On the 17th March, at Beech-grove, Sydenham-hill, the wife of William Paterson, Esq., of a son.

SCOTT—On the 23rd Feb., at Singapore, the wife of Wm. Ramsay Scott, Esq., prematurely, of a daughter, stillborn.

### MARRIAGES.

FOSTER—LOVE.—On the 13th Feb., at St. John's Cathedral, Hong Kong, by the Rev. Canon Beach, William Hammond Foster, jun., of Boston, U.S., to Lelia, eldest daughter of the late Harlow S. Love, of San Francisco.

HANNAY—WILLIAMSON.—On the 16th March, at Doon Park, near Castledouglas, Kircudbrightshire, by the Rev. George Greig, W. Cathcart Hannay, Esq., of Manila, to Julia Christian Williamson, daughter of the late Rev. D. S. Williamson. No cards.

HOARE—ROBINSON.—On the 30th Jan., at Colombo, Ceylon, Arthur Calvert, third son of J. J. P. Hoare, Esq., of Bittern, Hants, to Charlotte Rosina, fifth daughter of the late J. J. Robinson, Esq., of Banff, N.B.

MACINTYRE—HAY.—On the 18th March, at St. Mark's Church, Notting-hill, by the Rev. W. L. Collett, vicar of St. Stephens, Donald MacIntyre, Esq., of Highbury-crescent, to Maria, widow of the late W. J. Hay, Esq., Ceylon, and second daughter of George Canham, Esq., Shepherd's-bush, late of Purneah, Bengal. No cards.

MORRIS—LOCKHEAD.—On the 9th Feb., at St. John's Cathedral, Hong Kong, by the Lord Bishop of Victoria, assisted by the Rev. Canon Beach, the Rev. David Bayne Morris, pastor of Union Church, to Indiana, daughter of John N. Lockhead, Esq., M.D.

### DEATHS.

KOEK—On the 1st March, at Tanglin, Jessie Emilie, wife of Edwin Koek, Esq.

LAPRAIK—On the 24th March, at his residence, The Oaks, Acton, Douglas Lapraik, Esq., late of Hong Kong.

MARQUES—On the 16th Feb, at Macao, Francisco Joao Marques, Esq., ex-Portuguese Consul of Ningpo.

DO ROZARIO—On the 18th Feb, at Hong Kong, Felix M. Do Rozario, aged 61 years.

BREAKFAST.—EPPS'S COCOA.—GRATEFUL AND COMFORTING.—The very agreeable character of this preparation has rendered it a general favourite. The *Civil Service Gazette* remarks:—"The singular success which Mr. Epps attained by his homœopathic preparation of Cocoa has never been surpassed by any experimentalist. By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected Cocoa, Mr. Epps has provided our breakfast tables with a delicately-flavoured beverage which may save us many heavy doctors' bills." Made simply with boiling water or milk. Sold by the trade only in ¼ lb., ½ lb., and 1 lb. tin-lined packets, labelled—JAMES EPPS & Co., Homœopathic Chemists, London.

*LONDON, MONDAY, APRIL 5, 1869.*

## COAL IN THE FAR EAST.

IT has long been a matter of wonder to the uninitiated that such immense shipments of English coal should be necessary to the Straits and China, when plentiful supplies of this fuel were known to exist in Labuan, Formosa, and Japan. Of course, the series of disasters that attended the working of the Labuan mines, under the unlucky company now winding up, prevented any substantial benefit being derived from those extensive coal-fields, and Japanese exclusiveness for the first few years precluded the aid of foreign engineering and machinery to work the valuable mines in the vicinity of Nagasaki; so that Japan coal, although plentiful enough, was but poor stuff, being all from the surface. So that for the general purposes of steam navigation in those Eastern waters neither Labuan nor Japan coal was of much value, and the demand had to be supplied almost entirely from Great Britain and Sydney. This state of things, however, does not seem likely to last much longer, and in view of the possible exhaustion of our English coal-fields in the course of a few generations (a possibility, by the way, which a year or two ago was looked on with serious anxiety, which has of late in some measure subsided), it is a good thing to know that the largely increasing requirements of our Eastern possessions will soon be supplied from sources more easily accessible. From Labuan we hear excellent accounts both of increased rapidity of production and improved quality of the coal, which bids fair in a short time to be quite equal to that obtained from Australia, and superior to the Formosa or other China coal; of course we cannot say much at present as to the produce of the Chai-tang mines, although an improved method of working, and proper means of transit to the coast, may eventually show those mines to be even more valuable than they are represented. In Japan, too, laudable efforts are being made to produce a better quality of coal, and (in one case, at least,) with every prospect of complete success. The Takasima mines, near Nagasaki, are situated on an island, the property of the Prince of HIZEN, and have been worked in a superficial sort of way for the last ten years, producing, even under these unfavourable circumstances, some 15,000 or 20,000 tons annually, of a quality considered the best in the country, and pronounced by engineers in H.M.'s Navy, after careful trials, to be in most respects equal to the best Newcastle coal. The primitive system of working adopted by the natives causes the galleries to be frequently flooded with water, and gave rise to other difficulties of so serious a nature as to result in the temporary abandonment of the mines. The PRINCE however has lately leased the island to an English firm (Messrs. GLOVER and Co.) for a long term of years, and a shaft is now being sunk under the superintendence of an English engineer upon the most approved modern principles; powerful pumping machinery is also being erected, and the best coal in the island—the deepest beds, which were quite beyond the reach of the natives—will shortly be brought into the Nagasaki market. We understand that this new shaft had reached a dept of ninety feet some two months ago, and the "coal measures" had then been reached, so that by this time the "black diamonds" are probably coming to the surface in large quantities. The cost of it, as supplied to vessels at Nagasaki, will probably be about 5 dols. per ton, and the trade will doubtless soon be a large one, and give a fresh impetus to the prosperity of Nagasaki.

## THE STRAITS SETTLEMENTS.

NOT many months since we likened the dwellers in the Straits to the frogs in the fable, who, being discontented with King LOG, got King STORK in his place, and found that they had, after all, hardly improved their position. Since then, every homeward mail has brought a "growl," more or less deep, against Governor ORD, who, if half that is said of him be true, must be a bird of prey before whom the fabled stork would sink into insignificance. There has hardly been a single act of Sir HARRY ORD'S, since his assumption of the reins of Government, that has been received with satisfaction by the Colonists; and if we pass in review a few only of the principal grounds of complaint against him—putting aside some of his measures as of merely doubtful wisdom, and many others as trivial—it must be owned that there is ample cause for the discontent they have aroused. The threat to deprive Singapore of its character as a free port—to destroy its trade, in fact—was never put into execution, for its folly was quickly recognised, and the intention as readily repudiated; not, we suspect, without some sacrifice of that precious commodity which proverbial lore places at the bottom of a well. But by a long list of apparently trifling measures, all bearing upon the trade and shipping of the port, Governor ORD soon managed to do serious harm. The Passenger Act, the introduction of compulsory pilotage, the tax on native ceremonies, and other oppressive measures, hampered the freedom of foreign and native commerce, and these were but a prelude to the gross outrage on justice comprised in the new dogma regarding the status of the colonial judges. Then came prodigal expenditure of the Colonial funds—its resources being already on the wane—on a palatial residence for the Governor, and a steam fleet of absurdly exaggerated proportions, apparently only useful for the Governor and his satellites for yachting purposes. We observe that at the celebration of the fiftieth anniversary of the Settlement the Governor positively stated that the revenue was increasing, and would be amply sufficient to meet the expenditure; whereat the colonists marvelled, but appeared satisfied—at least so the *Straits Times* says. We are not inclined, however, to put much faith in this assertion; and, even supposing it should prove true, that does not justify the reckless prodigality of the Government. The whole question of Colonial Governments is one that needs a thorough and searching examination. Not only in Singapore, but in every Crown colony similarly administered, the Governor is a despot, the Legislative Council his puppets, and the entire system a disgraceful mockery.

## TELEGRAPHS IN THE EAST.

IN our issue of the 22nd ultimo we took occasion to suggest to the Foreign communities of China and the Straits Settlements the feasibility of a scheme for connecting themselves by a line of telegraph with India, which we considered might be accomplished by a company formed in China to lay a cable—on Mr. VARLEY'S inexpensive plan—from Galle. Ten days later we received advices from Singapore to the effect that the project brought forward by Mr. W. H. READ a couple of years ago for connecting Moulmein by a land line with the Straits Settlements, Bangkok, Saigon, and Sumatra is by no means dead, though it has apparently been sleeping in the interval. It seems that the "Eastern Asia Telegraph "Company, Limited," has obtained some valuable concessions from the neighbouring Powers, whose territories would have to be traversed, and that their plans have been formally submitted to, and approved by, the English and Indian Governments. The only thing now wanted is the capital, and the *Straits Times* informs us that this difficulty will be obviated by an arrangement with the Telegraph Construction and Maintenance Company of a somewhat similar nature to that entered into by the British Indian Submarine Company, namely, that payment for the construction of the line shall be taken in shares. The first action to be undertaken will of course be that along the Malay Peninsula, but that once accomplished, extensions to China and Japan will be easy. The project of the Eastern Asia Telegraph Company has our earnest wishes for its speedy accomplishment and future success; but we still adhere to the opinion that a light submarine cable from Galle to Penang and Singapore, with subsequent extensions to China and Japan, would be found both practicable and profitable, without diminishing in any appreciable degree

Digitized by Google

the value of the proposed land lines to connect Bangkok, Saigon, and the Straits with the Indian system. In the *Penang Gazette* we read that Colonel FYTCHE proposes that a system of submarine cables be laid by the Indian Government to connect Saugor, the Cocos, Taory, Bangkok and the Straits Settlements; a very complete and satisfactory plan, no doubt, upon paper. But we have little faith in anything undertaken by the Indian Government. It is to independent capital and the enterprise of our merchants in the Far East that we look for a satisfactory extension of the Telegraphic system; and they will surely find it as remunerative as they have already found banking and insurance.

## COCHIN CHINA.

THE French authorities in Saigon have determined to carry out a certain number of improvements of public utility. The communal receipts are estimated to amount this year to £22,160, and in eighteen months they will, we are told, be augmented by £8,320. The authorities have voted the application of a portion of the funds to the following purposes:—The construction of a market in iron, covered with tiles, at the cost of £120; the laying of the most important streets in granite and Hong Kong sand; the purchase of a set of decorations for public fêtes; the establishment of a morgue; the construction of sewers and foot pavements; the search for good drinking water, and the establishment of wells, reservoirs, and public fountains. Finally, the Municipal Commissioner proposes to ask the Council for new credits for the formation of a large place in form of a cross, on that part of a Grand Canal which is now being filled up, and on the Gallivard Canal. According to the arrangements made all these works may be commenced immediately, or nearly so, and will, say the Paris journalists, present one of the rarest instances of such considerable improvements executed out of the ordinary revenues of a town without an appeal to the public for funds, or the creation of taxes or other exceptional resources. We congratulate the good folks of Saigon upon the lighting, cleansing, and beautifying of their town, and especially on the possession of a set of triumphal arches, flags, and illumination lamps for Imperial fêtes, the more particularly that, apparently, they are to have them free of expense. We wish some of our Governors were as economical—"other matters," however, to paraphrase the old quotation, "*not* being equal."

## NORTH GERMANY.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, March 27.

The opening of the Federal Parliament at Berlin followed so closely on the prorogation of the Prussian Chambers as to cause much inconvenience to many gentlemen who are members of both, and were thus precluded from returning to their homes, even for a flying visit. The chief debate that has hitherto taken place was on the motion made by Herr Lasker, to secure freedom of speech, and prevent members from being prosecuted for their utterances in Parliament. He made a similar motion in the House of Representatives of the Prussian Parliament and carried it; but as the Bill was subsequently lost by the opposition offered to it by the Upper House, he was now induced to bring it forward as a general measure, not only for the Federal Parliament, but for all the Legislative bodies of the States composing the North German Confederation. His motion was to the following effect:—"No member of any Legislative body belonging to the States of the North German Union can ever be made responsible or be prosecuted before a judicial tribunal, or otherwise, for his vote, or any expressions he may make use of in the conscientious discharge of his Parliamentary duties." The motion was seconded by Count Bethusy-Huc, who said that the abuse of free speaking was bad enough; but being dragged before a court of justice and punished for it was still worse. Herr von Mallinckrodt was of opinion that the question could not be mooted or discussed in that House, as it was a domestic subject between the Government and Parliament of Prussia, and the Federal Parliament was not to be considered as a Court of Appeal for all the separate States of the North German Confederation. Count Bismark took a similar view of the question, and expressed himself in opposition to the measure. He made a long speech, but did not state his views very clearly, so that it is difficult to discover what his real sentiments were, many considering him in favour of the motion, and others as opposing it. As Chancellor of the Confederation, and Head of the Bundesrath or Federal Council, the Count has no seat or vote in the House, though entitled to speak and take part in the debates, so that the division gives no clue to his opinions. It being considered a knotty and important subject, the President ordered a nominative division, when each member answers to his name and gives his vote. On this occasion the motion was agreed to and passed by an overwhelming majority of 140 to 51 votes, which elicited great cheering from the Liberal side of the House. The third and last reading of the Bill took place on the 18th inst., when Count Bismark was prevented by illness from being present, and the debate was not of long duration, the principal arguments having been exhausted on both sides at the second reading. The division showed another triumphant majority in favour of Lasker's motion, which is thus definitively carried, and the subject set at rest.

Referring to my remarks in my last letter on the subject of encouraging the German sailors to resist piratical attacks, I have to add that the Senate of Bremen instituted a searching investigation of the case of the *Lesmona*, and ascertained that only five of the original hands that sailed in her from Bremen were on board at the time of the attack, and they all were willing to fight, but were overruled by the rest, who had been picked up in different ports, and formed a motley assemblage of nationalities. Two of the five have since returned to Bremen, and received the assistance they had a right to claim from the Sailors' Union, whilst a third who is still abroad has had money sent him to enable him to come home.

From St. Petersburg we learn that the young Japanese who had been sent to Russia for their education have been recalled by their Government as since the death of the Shiogoon their remaining abroad is considered as useless expense. Only one of them is still in Russia, who has acquired great fluency in speaking and writing the language. As he now pays his own expenses he intends to remain at St. Petersburg for some time longer to complete his education.

The fur trade in Russia has now assumed great dimensions, as might be expected since there is no country in Europe where peltry is more requisite or in such general use, everybody from the Emperor down to the rudest peasant being clothed in fur for the greater part of the year. The stock of the ladies absorbs a large capital that is locked up and requires constant attention and looking after. Last year were imported from Siberia and Russian America no less than 10,027,000 skins of various sorts of the value of 4,652,500 roubles. Among those were 109,000 sables, 350,000 ermines, six millions of squirrels, 150,000 bisams, 6,100 black foxes, 54,000 white ditto, 45,000 red ditto, 15,000 lynx, 1,700 bear, 6,000 wolf, 4,000 otter, 1,200 sea otters, 30,000 beaver, 130 seals, and two million hares.

### COMMERCIAL.

The tea market is rather weaker and prices are a trifle in favour of buyers, who however come forward pretty freely. Of the two cargoes lately arrived from China direct 110 chests of Congou, 365 do. Souchong, and 61 do. Pecco were sold by the importers. Other parcels taken include 1,000 chests Congou of different qualities, 150 do. Pecco, 240 do. Caper, and 300 do. Gunpowder. The market at present contains a very good assortment of Souchong. Cassia lignea continues in lively demand at 13½ to 13¾ sch. bco. Pepper is again higher, Singapore sells readily at 4¾ to 4 13-16, white fetches 8½; of Penang there is none in the market, and the stocks of all descriptions are much reduced. For cleaned rice there is more inquiry, but rough is quite neglected. The high prices demanded for spelter have tended to check business, and the only transaction to report is one of 500 centners, special marks, at 14 marks 9 sch. bco. in loco. The nominal quotation for ordinary marks is 14.4 to 14.5, for loco and spring delivery.

### SHIPPING.

SAILED.—Adelheid, to Nicolayefsk, Rebecca to Shanghai.

The Hamburg three-masted schooner Hainan, of 330 tons, lately returned from China, is advertised to be sold by auction next week.

## HOLLAND.

—o—

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, March 27.

The members of the Second Chamber of the States General have left the Hague for the Easter recess. In the last sittings the Ministry was several times interpellated upon current questions, the principal questioners being Messrs. Sypesteyn and Insinger. The first named asked for some particulars about the actual state of our colonies on the West Coast of Africa. The Minister answered that he could not say much, because he had submitted a proposition for the approval of the King, but he nevertheless stated that the situation was so bad that strong measures would be necessary. Mr. Insinger interpellated the Cabinet to obtain some particulars respecting the rumoured railway question between Holland and France. Mr. Foek said that he had refused to ratify the contract concluded between the Dutch and French railway companies, and that he would probably, at a future opportunity, bring the question before the House. It is rumoured here that all these railway questions must tend to the establishment of a commercial league between France, Belgium, Holland, and some other States.

On the 18th inst. a meeting was held of the shareholders of the Rotterdam Bank. The principal question discussed was, whether the three new directors should be appointed before or after the settlement of the new statutes. The debate was very lengthened, and now and then very animated, and it was finally resolved that the appointment could not be delayed, because the present managers were to be discharged at the close of the present month. The result of the voting was that Mr. Muller was appointed by 619 against 182 votes, Mr. Canters by 525 against 231, and Mr. v. d. Kors by 625 against 126 votes. These appointments do not at all prejudice resolutions about the reorganisation of the bank, which may be carried afterwards, the three gentlemen having declared that they would submit themselves to all resolutions voted at the general meeting. The discussion upon the alterations of the statutes then ensued, and ten shareholders were elected to join the commissaries and the new managers in the task of revising the draft of the new statutes. This commission will lay its report before the shareholders at a future meeting. By one of the shareholders it was positively asserted—and his opinion was not contradicted—that neither

Digitized by Google

the commissaries nor the meeting had any right to impose further calls on the shares before the second and third series are placed.

The *Staats Courant* publishes a Royal decree by which the passage-money for functionaries of the State returning from or going to India is decreased. It is generally thought that this Royal decree will make a very bad impression in India, and that it will augment the opposition in our colonies against the present Minister of the Colonial Department. The passage-money was formerly so liberal that a considerable balance remained in the hands of the passenger, whilst it is now reduced to a sum only sufficient for a passage by a first-class vessel. The *Arnhemsche Courant* defends this decree, but at the same time thinks it necessary that the pay of Indian functionaries should be increased, and that they should be subject to the same rule as is applied to civil and military functionaries in British India.

H.M. has discharged honourably and on his own demand the major-general of the East India army, Mr. J. A. Waleson.

H.M. the King returned some days ago from his seat *het Loo* to the Hague. It is asserted that the Royal family will visit Amsterdam soon after Easter.

It seems probable that Mr. N. Olivier will be elected M.P. at Zuid Horn, to fill the vacant seat of Mr. Reinders.

### COMMERCIAL INTELLIGENCE.

COFFEE.—The result of the Trading Company's auction was very satisfactory, an advance of 2c. on the valuation being paid. Good ordinary greenish Java is now worth 38½c. The market closes very firm, with a lively demand. The private transactions include 6,133 b. Java, ex Bato, Australie, Vyfvrienden, Anth. van Hoboken, Jason; 1,363 b. Padang, ex Julie and Peking; 3,495 b. Java, ex Mary Goddard; 925 b., ex Chili; 974 b. do., ex Friesland; 500 b. Java, ex Bato; 600 b., ex Waterloo en Tweelingen.

SUGAR (RAW).—The result of the Trading Company's auction held on the 16th, and at which 70,055 mats were offered, was not so satisfactory as was expected. The whole quantity, however, was sold at 1½f. above the November prices for brown and yellow sorts, and at ¾f. for the white sorts. Since the auction there has been a steady demand, and the following parcels have changed hands:—558 mats Passaroeang, ex Noord Brabant; 480 mats do., ex Krimpen a/d Lek; 380 mats Samarang, ex do. The prices paid did not transpire. The stock in bond was, on the 15th, 40,422,545 kilo.

RICE.—The market is dull; 2,036 b. table, ex Emilie, and 1,480 b. Macassar, ex Vrachtzoeker, have been sold.

SPICES.—There is a good demand for fine qualities, but holders decline to operate without an advance, so that only 18 casks mace have been sold.

TEA.—The market is inactive, in anticipation of the forthcoming auction of the cargo ex Albis, from Foochow, which will be held on the 7th of April.

RATTANS.—The Trading Company will sell in auction on the 9th April 61,500 bundles.

INDIGO.—The market remains in a very favourable condition, 67 chests sold at very firm prices.

SAPANWOOD.—Twenty tons have changed hands at somewhat higher terms.

TIN.—The transactions have been of no importance, but nevertheless there is a further advance, Banca being quoted 81f. and to deliver out of the forthcoming auction 82f. Billiton is worth 80f., and floating 80½f.

FINANCIAL.—The market for stocks and shares closed rather strongly, and the tone of the quotations is firm. The easiness of the money market, the expectation that the supplies of capital will be full for some short period, and the favourable prospects of politics stimulate purchases. The demand for money is not active, and the Bank rate of discount remains unaltered. Dutch Two-and-a-Half per Cent., 56; Three per Cent., 64½; Four per Cent., 87½; Trading Company, 128¾ to 129½; Rotterdam Bank, 82 to 82½.

### SHIPPING INTELLIGENCE.

ARRIVALS.—March 17, at Brouwershaven, from Sourabaya, Johanna; 20, at Brouwershaven, from Padang, Maria Sarah; from Rangoon, John Watt; at Texel, from Banjoewangie, Albion; 21, at Brouwershaven, from Sourabaya, County of Argyll.

DEPARTURES.—March 17, from Texel, for Batavia, Galilei; 20, from Texel, for Hong Kong, Iduna; 21, from Brouwershaven, for Batavia, Jorgen Lorentzen; Kortenaer; Helena; for Singapore, Henriette Elisabeth Susanne; from Texel, for Samarang, Friso.

PASSENGERS INWARD.—From Java, per Maria Sarah, Mr. E. M. Coele and family.

## UNITED STATES.

### NEW YORK MARKETS.

TEA.

The total receipts of tea from China and Japan in the United States from the 1st January to the 11th March, 1869, were as follows;—Greens, 4,284,485 lbs.; Japans, 2,542,474 lbs.; Souchongs, 691,514 lbs.; Oolongs, 1,671,332 lbs.; other sorts, 204,500 lbs.; total, 9,394,305 lbs. The stock on the 1st January was 9,577,014 lbs.; which, added to the above total, gives a result of 18,971,319 lbs. Subtracting from this total the exports from 1st January to the 11th March, 446,555 lbs., and the withdrawals for home consumption during that period 9,606,425 lbs., there remains a total of 8,918,339 lbs., representing the stock on the last-named date.

The following is from Messrs. Beebe Brothers' Circular, dated 12th ult.:—We have to note a moderate business only, in green tea, since the 26th ult., at prices showing 2 to 3 cents decline on medium and low grades. Fine to finest kinds are more wanted by the trade, and for these quotations are better maintained. Sales reported from first hands since our last, 6,250 half-chests. 13,500 half-chests Japan have found buyers during the fortnight, at unchanged prices, chiefly from the cargoes ex Yokohama and Grenadier. For these, however, as well as for nearly all classes of tea, the market closes inactive, with a tendency to lower quotations. Oolongs are very little inquired for, and sales are limited to 2,600 half-chests new crop, ex Nellie Hastings and Havelock. Old crop goods are neglected, and a further concession in prices would be necessary to effect sales to any extent at the moment. No further supplies have reached us from the produce markets since our last.

Current quotations (in gold, duty paid):—Congou and Souchong Dusty and common, 43c. to 49; good cargo, 52c. to 55; superior, 57c. to 60; fine, 63c. to 65; extra fine to finest, 70c. to 90. Foochow Oolongs: Fair cargo, 50c. to 52; good, 54c. to 57; superior, 58c. to 63; fine, 65c. to 75; extra fine and finest, 85c. to 110. Amoy Oolongs: Fair cargo, 47c. to 50; good, 51c. to 54; superior, 55c. to 58; fine, 60c. to 65; extra fine and finest, 70c. to 80. Japans: Common, 55c. to 58; medium, 60c. to 62; good medium, 64c. to 65; fine, 67c. to 69; finest, 72c. to 75. Greens (Moyune, Twankay, and Fychow), Gunpowder, 82c. to 130; Imperial, 67c. to 108; Young Hyson, 55c. to 110; Hyson, 62c. to 102; Hyson Skin, 50c. to 65.

SILK.

The following is Messrs. Haywood and Co.'s Report:—We are glad to record at last a decided improvement in the tone of our market. It is not very great, for the manufacturers are for the most part fairly stocked with previous purchases; and business itself, although contracts for and sales of manufactured goods have been largely made, has not been very remunerative. But there is an improvement, and coming as it does with the news of a better feeling and more activity in the London market, we trust it may be the commencement of a better and steadier business than we have had during the past few months. Prices are steady, and as there is a firmer feeling on the part of the importer to hold for higher prices, there is little disposition shown to force sales.

Tsatlee and Taysaam of the usual reel have been more inquired for of late, but the demand is still considerably less than at this time last year. The finer and better descriptions, such as the standard "Classical" Nos. 2½ and 3, have been selling at high prices, but in small quantities. Re-reeled Tsatlee and Haineen have fallen off very considerably. The manufacturers are complaining not only that for the most part an inferior class of silk is re-reeled, but that it is weighted with foreign substance, which shows in some instances a heavy loss. Previous experience is somewhat against this class of silk; and, though we may always expect to see some demand when the difference in price is not disproportionate, we shall also expect to see the standard usual reel again in favour. Japans have been a little more inquired for, and fine Koshu and Mybash have been selling freely, but the market is fairly stocked and the demand at present is light. Canton Re-reeled have remained quiet during the past month, and sales have been made at low prices. During the past few days there has been a decidedly firmer feeling on account of the purchase of several outside lines, and prices are firm at quotations.

| | Packages. | Value. |
|---|---|---|
| The imports during the past month are | 886 | $373,944 |
| Against same month last year | 350 | 162,109 |
| Making the total imports from 1st January | 1,608 | 1,040,892 |
| Against same time last year | 995 | 556,060 |

### THE MERCHANT SERVICE.

(To the Editor of the *London and China Telegraph.*)

DEAR SIR,—I have read with great interest an article in your issue of November 18th, 1868, headed "Disasters at Sea."

So fully agreeing with the contents thereof, and knowing the sad tale these statistics teach us, I ask you to lend your aid to lessen this loss of valuable life and property, by drawing people's attention to the same, and to the "Merchant Shipping Bill," which, from press of business during the two last sessions, is still in an uncompleted state.

On the 20th February, 1867, a number of influential gentlemen met at No. 1, Adam-street, and formed themselves into a committee for improving the condition of merchant seamen, and asked all conversant with the subject to aid them by their experience and advice. A vast amount of valuable information was thus obtained, and that considered worthy was then published in the form of a pamphlet named "Report of the Committee of the Society for Improving Merchant Seamen;" Messrs. Mitchell and Sons, Charing Cross. The labours of the committee having ended, a deputation waited upon the Duke of Richmond, on the 30th March, 1867—Admiral Ryder, the chairman, drawing attention to the general purport of the report. His Grace stated that his predecessor had prepared the outline of an amendment to the Act, which embraced very many of the points touched upon in the report, and he hoped to introduce the Bill in the Lords shortly; he was also much impressed with the great national importance of the whole subject.

His Grace shortly afterwards carried a small Bill in the Lords, treating of lime juice, and stowage of stores in the forecastle—stating it was only from want of time that he had hurried this measure, to ensure the Bill becoming law. Mr. O'Beirne then appealed for a total revision of all former Acts. Mr. Cave, in reply, stated that it was the intention of the last Government to go thoroughly into the matter; upon this Mr. O'Beirne withdrew his motion. In 1868, from press of business, the Bill was ordered to stand over. This is the present position of affairs.

I also forward my opinions upon the matter, derived from a practical knowledge of the subject, they having been deemed worthy of notice by the press, the committee mentioned, and others to whom the subject is familiar. The letters contained in the report, from most experienced men, are well worthy of perusal. They nearly all advocate the appointment of inspectors above suspicion, in all ports of magnitude, to inspect the forecastles, crews, and general furniture, and also the depth to which a vessel is laden—they having power to detain, if necessary.

Digitized by Google

This to me seems the simplest plan of dealing with much of the evil, without expense to the State, as a small inspection tax would pay the salaries of those employed, and their railway fare, where one man has to act for three or four ports.

Factories, mines, &c., are inspected, then why should not shipping be also?—Apologising for intruding upon your time, I am, dear Sir, your obedient servant,

W. P. B. MANSER.

Peninsular and Oriental Steam Navigation Company,
Shanghai, Jan. 30, 1869.

# Monetary and Commercial.

The directors of the Chartered Bank of India, Australia, and China have decided to recommend to the shareholders at the general meeting, on the 21st April, a dividend for the half-year ended 31st December last at the rate of 6 per cent, per annum, free of income-tax.

The Agra Bank (Limited) and the committee of shareholders of the Agra and Masterman's Bank (Limited) have respectively issued their reports to be presented on the 14th of April. The former announces the payment of dividends completing the preferential dividends arranged by the articles of association to be paid out of profits for two years, and states that £3,136 remains to be appropriated in augmentation of the assets of the Agra and Masterman's Bank. The report of the committee of shareholders of the latter shows that the assets have not realised so much as was expected but still congratulates the shareholders that by the arrangements with the resuscitated Agra Bank they were enabled to meet their liabilities without the pressure of heavy calls.

The amount of bullion by the P. and O. Company's steamer *Tanjore*, from Southampton on the 20th inst., was, in gold, to Galle, £77; to Bombay, £14,550; to Madras, £288; to Calcutta, £120; in silver, to Bombay, £27,500; to Singapore, £5,700; to Hong Kong, £24,896; total in gold, £15,035; in silver, £58,096.

The Directors of the Oriental Bank intend to propose, at the meeting on the 22nd inst., a dividend of 6 per cent. for the half-year ended the 31st of December.

The failure has been announced of Messrs. William Dickinson and Sons, cotton manufacturers and loom makers at Blackburn, with liabilities estimated at about £70,000.

## BOARD OF TRADE RETURNS.

The Board of Trade Returns of imports and exports for the month of February have been issued. The following shows the declared value of the exports of British and Irish produce and manufactures for February in the last three years:—February, 1867, £14,446,072, February, 1868, £14,340,979, February, 1869, £13,485,026. This comparison exhibits a falling off of about one million, as compared with February, 1867 and 1868, so that the hopeful inferences suggested by previous Board of Trade issues are in a measure dissipated. The principal decline is in cotton yarn, cotton piece goods, linen yarn, woollen yarn, and haberdashery, while most kinds of iron show an increase. For the first two months of the last three years the exports are stated as under:—Two months, 1867, £27,232,914, two months, 1868, £26,593,667, two months, 1869, £27,106,140.

As regards imports, the chief feature was the extraordinary increase in wool, of which the month's imports, chiefly from Australia, are stated at 28,955,427lbs., against 8,234,925lbs. in Feb., 1868, and 12,095,898 lbs., in Feb., 1867. The present returns give the "computed real value" of the principal articles imported in January, which was as under:—Jan., 1867, £10,069,755, Jan., 1868, £9,489,492, Jan., 1869, £11,493,405. This comparison shows that we are importing and consuming foreign produce upon an increased scale; and this, if continued, is likely to be attended with an unfavourable effect upon the money market.

We annex a summary of those figures which relate to our Import and Export trade with China and other countries in the Far East:—

## FREIGHTS AND CHARTERS.

Berth freights to the Eastern ports are somewhat firmer, at the undermentioned quotations; coal freights from the Northern outports still rule low.

Current rates of freight for vessels on the berth:—To Yokohama: 40s. weight or meast. To Nagasaki: 45s. weight, 50s. meast. To Hiogo: 60s. weight or meast. To Tientsin: 60s. meast. To Chefoo: 60s. weight or meast. To Newchwang: 55s. meast. To Shanghai: 40s. weight, 30s. meast. To Hong Kong: 40s. weight, 30s. meast. To Manila: 40s. weight, 70s. meast. To Batavia: 25s. weight, 30s. meast. To Singapore: 25s. weight or meast. To Penang: 40s. weight or meast. To Ceylon: 20s. to 25s. weight, 20s. meast. At New York to China; $12 to $15 per ton of 40 cubic feet.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel.—For Yokohama: £40. For Shanghai: £42. For Hong Kong: £32. For Singapore: £25. For Galle: £23. From Newport, Cardiff, or Swansea per ton.—For Yokohama: £2 7s. For Hong Kong: £1 15s. For Singapore: £1 5s. For Galle: £1 5s.

The Admiralty have invited tenders for the conveyance of 525 tons stores to Hong Kong.

## CASUALTIES.

The Royal Standard, Whineray, from Ceylon, which arrived in the Downs March 21, was supplied with an anchor and 105 fathoms of chain, in lieu of others lost.

The Isaac da Costa, Klein, from Batavia for Rotterdam, which arrived at Plymouth March 22, had lost part of bulwarks and stanchions.

Advices from Lisbon, dated March 17, state that the North America, Mitchell, from Batavia to Rotterdam, which was beached at Belem, full of water, March 13, was discharging her cargo, and hopes were entertained of her being got off.

The Continental, Erving, from Cardiff to Yokohama, which arrived at Gibraltar leaky, and was stranded in the Bay March 15, has been got off by tugs; part of her cargo is being discharged.

The Sir Harry Parkes, Chapman, which sailed from London, March 16, for Shanghai, slipped from anchor and 90 fathoms chain on the 20th, in Margate Roads.

Advices from St. Helena, dated Feb. 10, state that the Caroline, Bourhis, from Saigon, put in there, Jan. 28, leaky, and after survey had been ordered to partly discharge.

Advices from Nantes, dated March 21, state that the Auffredy, of that port, Guillore, from Saigon to Rotterdam, lost her anchors in Belle Isle roadstead. March 20, and had to put to sea.

The Princess of Wales, Shields, from Hong Kong, which arrived at New York March 12, reported that during a N.W. gale on March 7 in lat. 38 long. 69, she shipped a sea which stove bulwarks and mainrail.

The Golden State, Delano, from Shanghai, arrived at New York March 14, with loss of bulwarks, having been in collision.

Advices from Lisbon, dated March 28, state that the North American, Mitchell, from Batavia to Rotterdam, which was beached at Belem March 13, had discharged and floated.

The Trinidad, de Larrinaga, from Zebu, which arrived at St. Helena Feb. 24, reported that on Feb. 10, in 34 S., 23 E., she experienced very heavy weather, during which she lost maintopmast, &c.

The Exonian, Whitburn, from Philippine Islands, for England, put into Table Bay, Feb. 4, for repairs, having experienced very heavy weather, during which she lost several spars, sails, &c.

The Annie Sharp, from Colombo to London, with a general cago, went ashore March 29, under Shakespeare's Cliff, Dover, and became full of water; tugs were sent alongside, but she could not be got off; the cargo would be discharged at low water.

## MISCELLANEOUS.

At ST. HELENA.—Feb. 13, Aurora, Garcia, from Macao, and sailed for Havana; 14, West Derby, Wilkinson, from Yloilo, and sailed 15 for Liverpool 15, Aldeboran, Mayboom, from Sourabaya, and sailed 16 for Am-

Digitized by Google

sterdam; Carmencita, Acordagoichea, from Zebu, and sailed 16 for Liverpool; Queen of the Age, Clyma, from Yokohama, and sailed for New York; 16, Havilah, Robertson, from Yokohama, and sailed for New York; Queen of the North, Green, from Colombo, and sailed 17 for London; Admiral de Ruyter, Witting, from Banjoewangie, and sailed 17 for Amsterdam; 17, Atalanta, Ballingall, from Bangkok, and sailed for Falmouth; Victory, Quance, from Bangkok, and sailed for Belle Isle; Zemindar, Currie, from Shanghai, and sailed for London; 20, Jenny, Ryselin, from Bangkok, and sailed for Falmouth; 21, Lucie, Didie, from Macao, and sailed for Havana; Cornwallis, Vaile, from Bangkok; 22, Annie Gray, Moore, from Bangkok, and both sailed for Falmouth; Petchelee, Owen, from Singapore, and sailed for Liverpool; 28, Doesborgh, Spaanderman, from Batavia, and sailed 24 for Amsterdam; 24, Maria Morton, Morello, from Macao, and sailed 25 for Havana; Trinidad, de Larrinaga, from Zebu; 25, Alexandra, Labey, from Yokohama, and sailed for New York.

Off ST. HELENA.—Feb. 15, Formosa (N. Ger. barq.), from Amoy, for New York; Pactolus (Fr. barq.), from Macao, for Havana; 18, Jannetje (Dutch barque), from Bali for Rotterdam; 19, Sunnyside (brig), from Colombo for New York; 20, Kinfauns Castle, from Singapore for Liverpool.

Off CAPE POINT.—Feb. 2, H. V. N. F. (Dut. barq.), from Yedo for New York; Kroonprinsen, from Bangkok for Falmouth.

At MAURITIUS.—Agamemnon (s.s.), from Liverpool for Singapore, China, &c.; Diomed (s.s.), from China, Singapore, &c., for London.

## LAUNCHES.

On the 27th ult. there was launched from the stocks of Messrs. Clover and Royle, Liverpool, an iron ship named the Mysore, built for Messrs. Eyre, Evans, and Co., and intended for the East India trade. She is 240 feet long between perpendiculars, and 260 feet over all; 39 feet 9 inches beam, and 24 feet deep. Her register tonnage is 1,599, and builders' measurement 1,800. She is fitted up with all the most approved modern improvements. On deck she has a steam winch and a patent windlass, which will do away with a great deal of manual wear and tear, and tend to facilitate the working of the vessel.

On the 29th ult. there was launched from the yard of Messrs. Robert Ritson and Co., Maryport, a vessel named (pro tem.) the Elizabeth Ostle. She is the only vessel that has been built there for the last four years. She is nearly 800 tons register, and was built for the East India trade, but is not yet sold.

A barque was launched from Mr. Hocking's building-yard, Stonehouse, on the 29th ult. She is 1,000 tons burthen and 750 tons old measurement, and is classed 14 A 1 at Lloyd's, was named the Zephyrus, and is to be commanded by Edward Radden. She is intended for trade between India, China, and Australia. Her cabins are well arranged for carrying passengers.

## KEATING'S COUGH LOZENGES.

UPWARDS OF FIFTY YEARS' experience has fully confirmed the superior reputation of these Lozenges in the cure of ASTHMA, WINTER COUGH, HOARSENESS, SHORTNESS OF BREATH, and other PULMONARY MALADIES

Sold in boxes, tins, and bottles of various sizes.

## KEATING'S CHILDREN'S WORM TABLET

A PURELY VEGETABLE SWEETMEAT, both in appearance and taste, furnishing a most agreeable method of administering a well-known remedy for INTESTINAL or THREAD WORMS.

It is a perfectly safe and mild preparation, and is especially adapted for children.

Sold in tins and bottles of various sizes.

## KEATING'S PERSIAN INSECT DESTROYING POWDER.

This Powder is QUITE HARMLESS TO ANIMALS, but unrivalled in destroying Fleas, Bugs, Emmets, Flies, Cockroaches, Beetles, Gnats, Mosquitoes, Moths in Furs, and every other species of insect in all stages of metamorphosis.

Sold in packets, tins, and bottles of various sizes.

☞ The public are particularly requested to observe that all the above preparations bear the Trade Mark as herein shown.

Sold by all Chemists and Druggists.

HOLLOWAY'S PILLS.—These celebrated Pills are especially useful in purifying the blood, cleansing the stomach, gently stimulating the kidneys, and acting as mild aperients. A few doses of this purifying medicine set the foulest stomach right, remove all bilious symptoms, steady the circulation, give strength to the muscles, and composure to the brain and nerves. The Pills are so innocuous that they may be taken by persons in the most delicate state of health, and with marvellous effect. When the system has been enervated by over indulgence, or exhausted by mercurial preparations, these Pills are excellent restoratives; they expel the poison, and enrich the blood.

## PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above port afford every facility for REPAIRING and SPARRING VESSELS, cleaning and painting iron ships, and repair and refit of

STEAM MACHINERY AND BOILERS.

Their large Granite Dock is 307 feet in length, fitted with a caisson-gate, and with a centrifugal steam pump of great power, ensuring despatch in all states of the tides. At average spring tides this dock can receive vessels drawing 16 to 17 feet, and during the autumn and winter months 18 feet. Their two smaller docks, also built of granite, can receive vessels drawing 12 to 13 feet.

The premises comprise a large smithy and boiler shop, carpenters and boat-builders' shops, an

ENGINEERS' WORKSHOP,

fitted with lathes and tools driven by steam,

AN IRON FOUNDRY

for castings up to 5 tons weight, and a BRASS FOUNDRY.

The different departments are superintended by experienced Europeans, viz., engineer, blacksmith, and shipwrights.

The Company keep on hand copper and metal sheathing, spars, timber, paints for iron vessels, and all material for dockyard use.

A DRY GODOWN for reception of stores of vessels requiring to discharge them.

Good quarters for officers of ships under repair in the dock.

Amoy, 16th December, 1867.

## SINGAPORE DOCKS.

THE PATENT SLIP AND DOCK COMPANY execute SHIPS' REPAIRS of all descriptions in the most efficient manner, under the supervision of European Engineers and Shipwrights.

The DRY DOCK (opened in March, 1859) admits two Vessels at the same time, being over 400 feet in length, with a depth of water ranging to 15½ feet. A second DRY DOCK of larger dimensions will shortly be completed, and available for the heaviest Steamers.

Adjoining the above there is extensive WHARF, WAREHOUSE, and other accommodation, including every convenience for coaling Steamers, discharging cargo, and storing goods, together with ample MACHINERY and appliances for repairing iron steamers, &c.

Apply at the offices of Messrs. PATERSON, SIMONS and Co., Singapore; or 21, St. Swithin's-lane, Cannon-street, London, E.C.

WM. CLOUGHTON, Managing Director.

| Madras ..... | Lobelia ..... | A1 13 yrs. | 823 | April 15 |
| Do. ..... | John Masterman ... | A1 13 yrs. | 602 | To follow |
| Hong Kong.. | Zenobia..... | A1 15 yrs. | 1145 | With des. |
| Shanghae ... | Albuera..... | A1 15 yrs. | 770 | April 5 |
| Do. ..... | Ornate ..... | A1 10 yrs. | 739 | Apr. 25 |

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., No. 8, York-street, Manchester; or 27, Leadenhall-street, E.C.

JOHN C. CAMPBELL will despatch the following splendid first class VESSELS:—

| Destinatn. | Ships. | Class. | Tns. | Dock. | Date of Sailing. |
|---|---|---|---|---|---|
| Colombo .. | Passover ... | A1 10 yr | 456 | W.I.D. | Withdes |
| Ditto ..... | Ocean Rover..... | A1 16 yr. | — | W.I.D. | Do. |
| Bombay ... | B. Lawn ... | A1 11 yr. | 551 | E.I.D. | Do. |
| Cochin, Calicut, Cannanore, & Mangalore ... | Antipodes . | A1 9 yr.. | — | — | Do. |

No. 22, Great St. Helen's, E.C.

## CHINA & JAPAN.—NORRIS and JOYNER will despatch the undermentioned first-class Clipper Ships as under:—

| Ports. | Ships. | Class. | Docks | Last Shipping Day. |
|---|---|---|---|---|
| Shanghai ... | John Lidgett | A1 17 yrs | E.I.D. | April 24 (unless previously full). |
| Tientsin and Chefoo ... | Belle ..... | A1 10 yrs. | W.I.D | With des. |
| Hiogo and Yokohama... | Westbury ... | A1 10 yrs. | E.I.D. | With des. |

For Freight or Passage apply to NORRIS and JOYNER, 60, Cornhill, E.C.

To follow the "War Cloud." Will meet with the usual quick despatch.

DIRECT FOR COLOMBO, the beautiful clipper ship, PASSOVER, A1 10 years, 456 tons register; MATTHEW PEARSON, Commander; West India Docks. This splendid vessel, built in 1868, is considered one of the fastest afloat, and offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the Passover. Will meet with the usual quick despatch.

DIRECT for COLOMBO, the beautiful clipper ship OCEAN ROVER, A1 16 years, 548 tons register; WILLIAM HAMMOND, Commander; West India Docks. This splendid high-classed vessel, built in 1867, is considered one of the fastest afloat, and offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Malabar Coast. First season ship. Will meet with the usual quick despatch.

DIRECT for COCHIN, CALICUT, CANNANORE, and MANGALORE, the beautiful clipper ship ANTIPODES, A1 9 years. 420 tons register; J. DUNN, Commander; West India Docks. This splendid vessel offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Mate's receipts must be left before bills of lading can be signed.

L. H. and B. will not be responsible for demurrage on craft sent alongside without their instructions.

With Immediate Despatch.

DIRECT FOR BOMBAY, the well-known clipper BOLDEN LAWN, A1, eleven years; W. HOPPER, Commander; 551 tons register. East India Docks. This splendid vessel (newly coppered), having a large portion of her cargo engaged, offers a first-rate opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

BOMBAY DIRECT, the magnificent iron clipper ship BALKAMAH, AA1, 1,378 tons register, J. POOLE, Commander; loading in the East India Docks. This beautiful vessel, built in 1866, presents a most desirable opportunity to shippers requiring despatch.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 8, York-street, Manchester; or 27, Leadenhall-street, E.C.

Regular line of Packet Ship. With despatch.

FOR HONG KONG, the well-known favourite clipper, INVINCIBLE, A1 13 years, 657 tons register; CHARLES BEECHING, Commander; West India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

To sail on the 10th April

FOR SHANGHAI, the splendid Aberdeen Clipper PEGASUS, A1, thirteen years, 525 tons register; ALEXANDER MACKEY Commander; East India Docks. This well-known ship is celebrated for her rapid passages.

For Freight or Passage, apply to SHAW, MAXTON, and Co., 2, Royal Exchange-buildings, London, E.C.

With quick despatch.

FOR HONG KONG, the regular trader ISABELLA RIDLEY, A1 10 years, 517 tons register; JOHN WATSON, Commander; lying in the East India Docks. This vessel, well known for her rapid passages and sound delivery of cargo, offers a favourable opportunity to shippers of fine goods.

For Freight or Passage, apply to MARTIN, MOORE, and JORDISON, 147, Leadenhall-street, E.C.

### THE MAILS, &c.

The next homeward mail is that bringing Hong Kong dates to the 23rd March, due here on the 3rd May; and the French mail, with a week's later news, will be due on the 9th. Should the French service keep good time on the homeward route no inconvenience will in future arise from the simultaneous arrivals of two mails, as hitherto. Telegrams from Hong Kong, *viâ* Galle, are to the 23rd March; from Shanghai, *viâ* Kiachta, to the same date; and from Japan the latest news is by Pacific mail *viâ* San Francisco, extending to March 4 (a week later than that by the present P. and O. mail).

## List of Passengers.

### PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. str. *Syria*, arrived April 17.—From Yokohama: Lady Parkes, three children and servant, Mr. Walsh. From Hong Kong: Mr. M'Iddleton, Mr. A. Purkis, Colonel J. Grant, Hon. C. Porston, Count D. Enares, Mr. Dunn. From Singapore: Mr. and Mrs. Davidson, Mr. A. Gray From Galle: Mr. Elliott, Mr. Sim, Mr. Stewart, Mr. Grimnell, Mr. Sherane, Mr. Buchanan.

To Southampton, per P. and O. str. *Bangalore*, expected to arrive April 23.—From Shanghai: Captain McKellar. From Hong Kong: Captain Donough, Hon. Mr. and Mrs. Bale, Mr. Holmes, Mr. Purkis, Lieut. Kerr, R.N., Mr. Seton. From Singapore: Mrs Curtis and child, Mr. Watson and servant. From Penang: Mr. and Mrs. Evans, Master Ord, and one second-class passenger. From Galle: Mr. Turnbull, Mrs. Hounis and two children, Mrs. Brown and child, and one second-class passenger.

By last mail to Southampton, per P. and O. steamer Delta, arrived April 9.—From Hong Kong: Lieut. J. O. Blake, Rev. Mr. and Mrs. Moule, four children and servant, Mr. S. Young, Mr Leith, and five second-class passengers From Penang: Mrs. Hodson, three children, and two servants, Misses Moreton, Mrs. Johnson, three children, and servant. From Galle: Mr. and Mrs. Wilkinson, Mr. Rositer, Mr. Gray.

By last Bombay mail to Marseilles, per P. and O. steamer Nyanza, arrived April 10.—From Galle: Mr. and Mrs Worthington.

To Gibraltar.—From Singapore: Mr. and Mrs. Williams and child.

### PASSENGERS OUTWARD.

Per P. and O. steamer *Syria*, from Marseilles, April 25.—To Shanghai: Mr. E. Chambers, Mr. W. Brand, Mr Rainbow. To Singapore: Mr. Thomas Down. To Ceylon: Mr. D. S. Gilkison, Mr. G. C. Thomson, Mr. Carlyon.

Per P. and O. steamer from Suez, May 2.—To Yokohama: Mr. Thomas Thomas. To Hong Kong: Dr. J. H. Focke.

Per P. and O. steamer from Southampton, May 1.—To Hong Kong: Mr. A. Falconer.

Per P. and O. steamer from Marseilles, May 9.—To Hong Kong: Mr. and Mrs. H. D. Williams. To Singapore: Mr. and Mrs. J. Campbell, Miss Hamilton, Mrs. Lessler and two children. To Ceylon: Mr. and Mrs. G. Vane and child, Miss Vane. Miss Lee.

Per P. and O. steamer from Suez, May 16.—To Ceylon: Mr. W. H. Anderson.

Per P. and O. steamer from Southampton, May 15.—To Ceylon: Sir Hercules Robinson, Lady Robinson, two children, and two Misses Robinson.

Per steamer *Ajax*, from Liverpool, April 11.—To Hong Kong: Messrs. Mark Lambert, Benjamin R. King, William M. Taylor, John Phillips, E. J. Murphy, J. T. S. Flynn, James Keah, G. T. Ludlow, J. Lock, G. W. Robins, F. S. Turner, J. Ellis.

## Summary of News from the Far East.

### JAPAN.

#### YOKOHAMA.

Our advices from Yokohama by the present mail are to the 24th February. The latest dates received from home were by the English mail of Dec. 18th. We take the following summary of news from the *Japan Times* :—

On the night of the 12th February a storm swept over Yokohama which exceeded in violence anything of the sort that has been felt in the Settlement for a long time. The wind, which was from the southward, had been increasing steadily during the afternoon and evening, until between the hours of 10 and 11 P.M., when it blew a perfect hurricane, which continued with unabated fury till daybreak next morning. Several vessels in the harbour dragged their anchors, but we believe without causing any damage either to themselves or others. On shore the effects of the storm were severely felt, tiles and shingles, bricks and mortar, hurtling through the air in all directions. Several houses in the native town were blown down. In the 10th's Barracks a good deal of shingling was blown off the roofs, and many of the unfinished villas on the Bluff suffered considerably. Part of the roofing of the Theatre of the Corps Dramatique was blown completely away, and the building sustained other damage; in fact, in theatrical *parlance*, the storm nearly "brought down the house" altogether. In the morning, the wind shifted round to the northward and eastward, and though another blow was expected from that direction, happily we escaped it. As the wind during the night was off shore, but little sea got up in the harbour, which accounts for the shipping escaping damage. The port is very much crowded, and had there been any sea on, certainly much mischief would have been done.

We have to record with deep regret, as the principal event of the fortnight, the total loss of the P.M.S.S. Company's steamer *Hermann*, which struck on a reef off Kawatzu Point, about seventy-five miles from Yokohama, at 9 P.M. on the 13th inst. She was on her way to Saugor Straits, which divide Yedo from the mainland. The Imperial troops have begun to move northwards, and the *Hermann* had on board 350 soldiers, together with a crew of eighty men. Of the latter fifty-eight remain alive; of the former, it is impossible to say how many, Captain Newell saying that he cannot estimate the loss of life. But from his account of the wreck it would seem that between 250 and 300 had perished. No inquiry has as yet been held into the circumstances—or, at least, no result of any inquiry has as yet been made public; comment from us would, therefore, be out of place. It is needless to say that a considerable excitement has been created here by the accident, and a thorough investigation is universally demanded. The behaviour of the Japanese soldiers, as described by Captain Newell, is worthy of the highest admiration; their calm courage and steady discipline in the face of death entitle them to a place in history beside our own heroes of the *Birkenhead*. There was "no stampede, no disorder," says the captain; "from the first they were quiet and cool, retaining wonderfully their presence of mind, and calmly awaiting the commands of their leader." After consultation with Captain Newell, this officer ordered them to keep in their cabins, which they did until the water rose, as the ship settled down, and drove them again on deck. Then, when permission was given to those who chose to take the risk, to try to swim on shore, they threw off their clothes, girded round their naked bodies their swords—"the living souls of *Samurai*, and boldly made the attempt, in too many cases, unfortunately, unsuccessfully—for the sea ran high, and though lifebelts, of which there was most properly great store on board, preserved them from drowning, most were killed or horribly mutilated by being dashed upon the rocks which fringe the coast.

The *Shaftesbury* has come down from Hakodadi since we last wrote, but has brought us no news of much importance. Enomotto's resources ebbing fast, he has commenced levying contri-

Digitized by Google

butions upon the country people, which does not at all add to his popularity in Hakodadi. Mr. Butzow, late Russian Consul there, has come down *en route* to Peking, where he is to take the post of *Charge d' Affaires*.

From Osaka and Hiogo our latest dates are to the 18th inst., with nothing of particular moment. Mr. Russell Robertson, who has made himself very popular at Hiogo as Vice-Consul, comes up here to take the place of Dr. Willis, late Vice-Consul for the Yokohama and Yedo district, the latter being temporarily detached from the Consular service to take charge of a Japanese hospital in Yedo.

His Majesty the Mikado arrived at Kioto on February 3rd, and was married on the 9th.

We have had here an unusually quiet fortnight. On Sunday last a coloured sailor, boatswain of the *Thales*, was mortally stabbed, in or near the Yoshiwarra, by another seaman, who has not yet been arrested; he died the next morning. The Japanese new year holidays have of course nearly stopped business, which can hardly be said to have recommenced. Banks have made holiday and Yedo has been full of visitors. We have had an unusually mild winter, and the trees have bloomed very early this year.

Among the passengers homeward bound by the present mail is Lady Parkes. Yokohama society loses in this lady one who has for some time admirably sustained the difficult part of its leader, and dispensed the hospitality of Her Majesty's representative with grace and dignity; and Lady Parkes has done more than this—she has ascended Fusiyama. Mr. Ernest M. Satow, of the British Legation, also goes home by this opportunity, on leave. At this period his absence will be seriously felt; his knowledge of the country and its politics, its people, and its language, is extensive and accurate. It is not too much to say that no other Foreigner now living has seen so much of Japan, or has so intimate and critical a knowledge of its dialects and literature as Mr. Satow.

## OSAKA AND HIOGO.

The *Japan Herald* gives the following items of news from these places, from whence the latest dates extended to Feb. 18th :—

We learn from our Hiogo files that the *Sunrise* was sold to the Mikado's Government for 55,000 dollars, and that she will be used as a sort of tender for the new lighthouse service.

A new phase in the purchase and transfer of steamers may be remarked in this instance; whereas usually, when a steamer is taken over by her Japanese purchaser, every anxiety is displayed for getting rid of her European crew, we find that the new owners of the *Sunrise* have made arrangements for some of the principal officers still to remain in charge. We look upon the commencement of the system of employing experienced Foreigners in their steam vessels as a step in the right direction, and we are confident that the Japanese themselves will soon notice the economy and extra protection of their property they secure by such a course.

We have learned since per *Mars* that the American steamer *Kankakee* was sold to the Japanese for 70,000 dollars. This will be a great acquisition to the Milkado's fleet.

Owing to the Japanese New Year, little or no business is doing, and the few foreigners here are necessarily obliged to close their offices and become unwilling spectators of the general festivities. The Princes Satsuma and Yonezawa, accompanied by a considerable number of followers, left here a few days back for their territories, in hired steamers.

The mint that was reported by you some time back as being almost ready for work, is not nearly finished; in fact, I think by the way things are going on in this department it will be another year before the "dibs" will commence pouring out.

## LATER NEWS *VIA* SAN FRANCISCO.

By the arrival of the Pacific steamer *Great Republic* at San Francisco on the 28th ult., advices from Yokohama are brought down to the 4th March—eight days later than the news by to-day's mail. The following is the summary of news published by the American papers :—

The Mikado arrived at Kioto on Feb. 3, and was married there on the 9th. A difficulty subsequently occurred at Kioto between the followers of Satsuma and Chaisiu. It is reported that several streets were set on fire, and the flames reached the palace of the Mikado, who fled to Osaka.

The report of the assassination of the Governor of Osaka proves untrue. It orignated in the fact that an official of high rank had been murdered there.

The Japanese Admiral Ennomatto, a supporter of the Shiogoon, has taken possession of the entire island of Yedo. He celebrated the event by firing a salute of a hundred and one guns from the fleet and batteries ashore. He notified all the consuls of the formation of a provisional government and of the appointment of the necessary permanent officers in the principal departments. His forces are rapidly increasing, and it will be no easy matter for the Mikado to subdue him and retake the island. Admiral Eunomatta is strongly fortifying his position near Volcano Bay, intending fight unless the Mikado complies with the demands of the exiled clans, that they be allowed to retain the island of Yedo, and that the late Shiogoon be sent to them as their ruler.

The ram *Stonewall* left, Yokohama on March 3 for Jeddo. She will be transferred to the Japanese Government on her arrival at that port.

## THE YANGTSZE.

—o—

### HANKOW.

(FROM OUR SPECIAL CORRESPONDENT.)

The Foreign houses at Hankow occupy a site set apart at the lower end of the Chinese City, and present a very imposing appearance from the Yangtze, which is here about a mile wide. The "Bund" is about the finest in China, and slopes down to the river, with a well made stone embankment. Jetties for landing cargo, &c., are placed at convenient distances. The Bund is about half-a-mile in length, and over 100 feet wide on the flat level. It cost the large sum of 100,000 taels, say over £30,000 sterling, and owing to the action of the tide, is a constant expense of about £500 per annum. But even this hardly keeps it together, and it is feared that a large expenditure will soon be required for rebuilding in many places. The houses are mostly fine-looking, but owing to the treacherous nature of the mud soil, and the piles on which they are built rotting, they have all more or less settled, and require various supports. Their value is enormously depreciated, and houses which four years since changed hands at 20,000 and 30,000 taels will not fetch now 5,000. Many firms who established here on the opening have closed, and those who remain, consisting of nineteen British and seven other nationalities (including three banks), have only one representative as a rule. There are several lots not built on, for which fabulous prices have been fixed, which would not at present fetch 100 taels. Many of these lots and several houses belong to the estate of the Commercial Bank, and are certainly unique specimens of what were called the "good times." However, Hankow will serve as a good warning for the future in opening up ports, and will thus serve its day and generation. The City wall encloses the foreign concession, as well as native city at the back, and is a splendid piece of work.

The Hankow Club cost about 20,000 taels, raised in shares of 500 taels, which are now worth about 150. The interior contains three billiard rooms, reading rooms, private rooms, and bowling alley, and is a very creditable institution so long as Sunday is respected. It is opposed to Anglo-Saxon notions to have such places opened on Sunday.

That we are to enjoy peace and quiet in China for many years together seems impossible, for while we are attacked by villagers at Swatow and Foochow, there is an uneasy feeling at Hankow and Wuchang (opposite to Hankow). A circular was sent out by the British Consulate, at the request of the Taoutai, warning Foreigners to keep in the concession during the passage of the "Braves" down the Han river. Another evidence of insecurity and aversion to the Foreigner is exhibited in a proclamation issued at Wuchang, to the effect that ground and houses were not to be sold to Foreigners.

This arises from the fact of our right of settlement at places in the interior not having been yet established. These cases confirm the general opinion as to the necessity of having the country opened, and our right of residence admitted in the revision of the Treaty now under discussion. We have scratched at the crust of China long enough, and our intercourse must take a different feature to what it has done in simply opening ports with expensive Consulates and mercantile establishments. Foreigners have grown up in the past twenty-five years to a greater fitness for travel in the interior, and the number who now acquire the language is considerable. Under a proper system of passes from the Consuls, to be granted only to persons of good reputation, we do not anticipate any trouble in carrying out the regulations, presuming that the Chinese Government would act in good faith, and not give a tacit acquiescence to acts of aggression on Foreigners so travelling.

We repeat, and it cannot be too strongly kept in view, that an intercourse with the Chinese such as ours entitles us to greater privileges. We have, in quelling the rebellion, done them an incalculable service, and it is much to be regretted that our Minister did not obtain from the Government some concessions before the dispersion of the rebels.

Li, who distinguished himself so much at Futai in the rebellion, and against whose cruelty Colonel Gordon made such strong remonstrance, is now on his way to be installed as Viceroy at Hankow. He is accompanied with an imposing fleet of steamers, including the *Confucius*, *Pluto*, *Tien chi*, and *Sycee*. A new style for a Chinese to travel ! !

Cotton continues to come from Shanghai by steamers, at the rate of 30,000 bales per month, each about 160 ibs. The French exploring party from Cochin China and Cambodia, which lately passed through Hankow, stated that war was still going on with the Mahomedans, and cotton from India across country into China had been stopped; hence the demand for Shanghai cotton, as in the country round Hankow the crop had been damaged by floods. It is uncertain how long this may last, but meantime it yields enormous freights to the steamers on the Yangtze, and of course affects their profits very considerably. The conveyance of brick tea from Hankow also forms a large item in the freights. This article is transhipped at Shanghai for Tientsin, and thence overland for consumption in Mongolia and Siberia, the annual quantity being about 60,000 piculs.

Coal on the Yangtze is now being developed very fast. The various steamers take on board at Hankow about 1,500 tons per month, at a cost of about five taels per ton. The distance of the mines from Hankow is about 500 miles up the river. Rough

Digitized by Google

wooden boats are constructed for its conveyance down, which are broken up on arrival. With European appliances coal could be produced in any quantity and of a better quality. At present there is a considerable proportion of dust.

The mission body at Hankow consists of the London Mission Society, Revs. Griffith John, Bryant, Bryson, and Dr. Shearer, M.D. Wesleyan Mission, Revs. Scarbourgh Hill, Napier, Dr. Smith, M.D. The American Mission, Bishop Williams, Mr. Holing. These missions have chapels in various localities, and are apparently making satisfactory progress in converts. Although missionary zeal may sometimes lead to indiscreet acts, there is no doubt that the merchants in China, and indeed the Government and all classes interested in the development of the country, are much indebted to their perseverance in exploring. A short time since the Rev. Griffith John and Mr. Wylie made an expedition in the provinces of Hunan and Szchuen, which was largely availed of by the merchants in drawing up their views as to the opening up of new ports.

The new church at Hankow will shortly be opened by the Rev. Mr. McClatchie, the chaplain. The building is extremely pretty and unpretentious. The community being small, the seats are £12 each per annum ! !

The Cemetery is an enclosed space outside the walls, in which repose some two dozen Foreigners who died chiefly in 1863, including Mr. Gingell, the first Consul. Unfortunately the graves are desecrated by the Chinese, who steal the iron rails. &c. The Consul should see to this. It is very painful to the friends of the deceased.

The Wesleyan Mission has just sustained a check in the shape of a notification from Sir Rutherford Alcock, stating that he could not uphold their claim to a piece of land purchased and paid for by the Mission at Wuchang. The following document was recently issued by the inhabitants of Wuchang. Our readers will understand that the peculiarly threatening style of the language is simply the Chinese custom, and that, as a rule, such emanations are not to be taken literally :—

Notice is hereby given, that the two districts called "Chien So Yin," "How So Yin," have determined, in meeting assembled, that all holders of house property in this district be prohibited renting to Foreigners, and also that they be not allowed to sell to the same; and lest any ignorant people, for the sake of gain, illegally combine to rent or buy on their behalf, and afterwards hand over to the said Foreigners, it is resolved that on the discovery of such vicious conduct, violating as it does the unanimous vote of the community, the aforesaid house or houses so rented or sold shall be confiscated, and turned over to a native benevolent institution for the public good, and that the agent in such transaction shall be banished the district; and that the seller, the agent, and the middle-men shall be fined an amount of money equal to that received for the sale of such property; all which money shall be devoted to public purposes.

In this resolution we all, fathers and sons (literally the mulberry and the sandal-wood trees), are unanimously agreed; and for this special object, that no one may have cause for after repentance, have issued this announcement.

Respect this.—Signed by every member of this district in meeting assembled.

At a meeting held lately of the land renters of Hankow, Messrs. Ramsay, Joseph, and Jerdein were elected members of the Municipal Council, and Mr. Mackellar secretary. The receipts for 1868 amounted to 4,868 taels, of which half is house and land tax and half on goods landed and shipped. The expenditure being 4,716 taels, of which 2,208 were for repairs to bund (a never-ending source of expense), and 2,508 taels for police, fire-engine, and sundries. The land tax is thirty taels on front lots, and ten to fifteen on back, and the house tax thirty-seven on front houses and twenty-two to thirty on back. The tax on goods is about two cents per package. These taxes apply to the limits of the concession only, the wording of these leases including the obligation of contributing to the municipal expenses. There are several houses outside the concession—Messrs. Russell and Co., Drysdale, Ringer, and Co., Evans and Rainbow, Turner and Co., the Customs, &c.; these firms, however, have tomainta in the landing-place to their own frontage. The great rise and fall in the river, in some instances equal to fifty feet, is a constant source of anxiety and expense. The river at present is some twenty feet higher than usual.

The Russian gunboat *Sabull*, Captain Oussoff, is now on a visit to Hankow. This vessel belongs to the Amoor river fleet, and returns next May. There are very few Russian vessels moving in China or Japan.

The merchants at Hankow have to complain of the tea purchases not being up to muster, and a representation has been made through the Consul to the Taoutai on the subject, similar to the one at Foochow. The Tauotai has promised to issue a notification warning the teamen that such practices are highly improper.

## KIUKIANG AND THE POYANG LAKE.

The opening of ports on the Poyang Lake, which lies but a few miles from Kiukiang, is of great importance for the future of Kiukiang. It is proposed, or rather suggested, by the merchants that Yaou-chow, Woochiu, and Shang Hung would be sufficient for the present. Teas are now often six weeks on their way, owing to the peculiar navigation. It is rumoured that Mr. Consul Swinhoe has been requested by Sir Rutherford Alcock to examine the lake and make his report as to the fitness of these places. It is not proposed to "open" them in the old style of expensive Consulates and mercantile houses; such mistakes have received a severe check in the case of Hankow and Kiukiang, where a large expenditure was made, and these palatial premises are now to a large extent abandoned. The number of mercantile houses in Kiukiang is reduced to five, and the entire community numbers thirty-five, of whom nineteen are connected with the Consulates and Customs. It seems an enormous and disproportionate staff for the Customs, but the truth is that the loading and unloading of the steamers is the principal business here, and the Customs staff is not too much to keep pace with it. Many of the places proposed to be opened on the lake are to be simply subsidiary to Kiukiang, and all vessels trading on the lake would have to call at Kiukiang for clearance. This would make it an *entrepot*, and probably save it from being entirely abandoned by merchants. The Poyang Lake and its tributaries, as is well known, is adjacent to the great tea producing districts. The memorial from Kiukiang of July, 1867, alluded to in the Shanghai Chamber of Commerce Memorial, which went home last mail, fully describes this, and would be useful at this time if published in the *London and China Telegraph*, as it was omitted in the Parliamentary papers of February 1868. The memorials of Chefoo and Hankow were also omitted.

In a special memorial by Messrs. R. Francis and Co., of Kiukiang, dated January last, they say :—

We would urge the appointment of a British official of suitable rank as intendant of trade at Nanking, the residence of the Viceroy, who controls this province and Keangnan; mercantile matters could then be referred from Kiukiang, and also from Shanghai and Chinkiang, to Nanking, instead of to Peking, late experience having shown the desirability of this change.

We would suggest that the transit duties be handed over to the local officials, and not to the Peking Government; in fact, some portion of the export duties might be treated in the same way, as at present the local authorities have little or no interest in Foreign trade; they therefore collect the local duties, which the transit duties were intended to replace, as if no special Foreign duties existed.

While on this subject we may mention that some misunderstanding exists as to these transit duties, it being considered by some that if the goods are not the actual property of British subjects during the transit they should not be protected; we take it that the transit duties were intended for the benefit of British trade generally, and that all British imports and exports are entitled to that benefit.

Mr. Pirkis, the late chaplain of Kiukiang, who has been the subject of much talk, proceeds to England by the *Diomed* steamer. Mr. Atkinson, who was connected with the Church Missionary Society, has taken the post of chaplain, subject to the approval of the Home Government and their willingness to supplement the salary given by the community in the usual way. Mr. Josiah Cox, of the Wesleyan Mission, has also left in the *Diomed*, after many years' service on the Yangtsze and other places, very much respected by natives and Foreigners. Two American missionaries, Mr. Hart and Mr. Tod, have lately settled at Kiukiang.

Considerable changes are looked for in the Foreign Inspectorate of Customs. The Chinese are beginning to see that it could be administered at a smaller cost, and cutting down is the order of the day. One step is that the married *employés* have notice that quarters will not be provided for them in future. The present salary of a first assistant is £800 per annum and quarters, but to cut out the latter is of course a serious difference. Another step is to order a medical examination of all persons below first assistants as to their general health and physique. The complaints as to promotion are also very loud; men who have been used as Acting Commissioners from place to place find themselves displaced by men who are much their juniors. No doubt Mr. Hart has a very difficult task to perform at Peking to reconcile the contending interests of all nationalities, but he should at least see justice done to those who have served the institution with fidelity for many years. The study of Chinese and a yearly examination is now one of the requisite qualities insisted on.

One of the interesting features lately has been the receipt at Kiukiang of a very superior coal from Lo Ping, near Yaonchow, on the Poyang Lake. This coal is very like Scotch coal, and seems superior to any native coal that I have heard of.

The Taoutai at Kiukiang is about to be relieved. During his term he has shown himself very inimical to Foreigners, and the community are glad that his term is out. It was with this Taoutai that the serious differences took place with Mr. Kleinwüchter, the then Commissioner of Customs, who was in consequence transferred to Swatow.

Mr. Lord, who has been acting as Commissioner at Hankow, has been transferred to Canton as first assistant only. He is entitled to leave of absence, and intends proceeding to England.

The coal mines in this vicinity consist of one at Lang Tang and one at Pa-whei. The former one is about twenty miles distant (near the river). A few pits have been worked, and the coal favourably reported on, but the Chinese Government have stopped the working. These mines and other minerals in the locality require to be developed by Foreign appliances. They consist of iron, plumbago, and antimony.

## CHINA.

—o—

### SHANGHAI.

(FROM OUR OWN CORRESPONDENT.)

SHANGHAI, March 2, 1869.

The P. and O. steamer *Malacca* arrived here on the 19th Feb., with the English mail of 1st Jan., and telegrams to the 24th Jan. These latter are at present our latest advices.

Admiral Sir Harry Keppel arrived on the 21st ult. in the *Salamis*. The *Rodney* is outside the mouth of the river, where it is understood she will remain while the Admiral visits Hankow and the other Yangtsze ports.

The contract for completing the new British consular gaol has been given to a native builder, who has engaged under a heavy penalty to complete the work by December, 1870. The present gaol has long, both on account of its small size and unhealthy situation, been unfit for its purpose, and its replacement by a more suitable edifice is a work much more important than the building of new Consulates, which has hitherto occupied the attention of the Government engineers.

It is stated that another public garden is to be opened in Shanghai. The foreshore on the Hongque side from a point opposite the American Church to the Astor House is to be bunded and filled in; the promoters of the scheme being Mr. Seward, the American Consul-General, and Messrs. Cunningham and Reid, who are the principal landowners ni the vicinity. Such are the plans as announced, but it remains to be seen whether the result will equal the expectations raised.

On the 26th ult. two foreigners, named George Ross and William Smith, were found suffocated on board a lorcha lying opposite the French Concession. A Chinaman had shared the same fate. No particulars as to the accident could be obtained, but it seemed probable that a stove fed by coal and charcoal, which was found overturned in the cabin, must have caused it. An inquest was held the same day before Judge Goodwin, when a verdict of accidental death was returned.

On the 17th ultimo a meeting of the treaty Consuls, the Harbour Master, and the Chairman of the Chamber of Commerce was held, to discuss bye-laws for the port. The only important items settled were that the number of pilots should be limited to sixty, that the present scale of charges should be retained, and that Tls. 10 per diem should be charged for detention at Wusung over forty-eight hours.

The No. 1 Fire-engine Company, which has lately been strengthened by the accession of the Custom-house officers, held a meeting of its members on the 17th February. Nothing was done save the election of officers, the adoption of a uniform and the drawing up of laws and regulations being left to a Committee. The following gentlemen form the executive for this year:—Mr. Bininger, foreman; Mr. Canham, first assistant; Mr. M. L. Smith, second assistant; Mr. Watson, captain of leading hose; Mr. McCarthy, first assistant; Mr. Lawless, second assistant; Mr. Learger, third assistant; Mr. Newberry, fourth assistant; Mr. J. Howes, captain of the suction; Mr. De la Cour, first assistant; Mr. Saunders, second assistant; Mr. Killeen, third assistant; Mr. E. J. Smith, fourth assistant; Mr. Vogelar, secretary.

The members of the Shanghai Club have held their annual meeting, at which the following gentlemen were elected as the committe for the current year:—Messrs. R. B. Baker, J. Ashton, F. D. Hitch, J. I. Miller, and R. Miller. It was announced that, under the present economical management, the club paid its way. The profit for the year 1868 was 2,303.98 dols.; but it is hoped that with increased attraction and careful supervision the year 1869 will exhibit a large increase in receipts, while the relative expenses will be diminished.

The German theatrical amateurs, in connection with the Club Concordia, gave their fourth representation for the season on the evening of the 27th ult. The house was crowded, and the performance most excellent. The courtesy and liberality of the German club in throwing these entertainments open to the public, the invitation required being little more than a form, contrasts strangely with the less disinterested plan adopted by the English amateurs, who charge three dollars for admission to their performances.

I gave you some mails ago an account of the commotion excited amongst the resident British subjects of Chinese descent by the publication of a notification, wherein Sir Rutherford Alcock ordered all such persons to wear European costume under pain of being denied the protection of the English flag. This sumptuary ordinance was bitterly criticised by the local press, and the persons most affected by it addressed a very respectful memorial to the Minister, protesting against the injustice of interfering with their dress. The following reply has just been received:—

British Consulate, Shanghai, 15th February, 1869.

Gentlemen,—I am directed by H. E. Sir Rutherford Alcock, K.C.B., H.B.M. Minister Plenipotentiary, &c., &c., &c., to acquaint you that he has received the memorial, together with a letter to the address of H.M.'s Principal Secretary of State for Foreign Affairs, which you placed in my hands for transmission to Peking, and I am to inform you that as you have addressed yourselves with a copy of your memorial directed to the Foreign-office, his Excellency deems it inexpedient to enter into the matter so referred to the higher authority.—I am, Gentlemen, Your obedient servant, W. H. MEDHURST, Consul.

To Lo-Yuen-Yew and others, British Subjects.
of Chinese descent.

The P. and O. steamer *Malacca*, which leaves at daylight tomorrow morning, takes 571 bales China and 95 bales Japan silk.

From Chefoo we heard ominous rumours of an intended assassination of all the Foreigners, at the Chinese new year. As it was thought that some disturbance might take place, the gunboat *Insolent* was moved into the bay, and patrols traversed the settlement each night during the festivities. Of course, nothing came of it, but it is said that interested parties are diligently circulating rumours amongst the villagers in the neighbourhood of Chefoo to the effect that the authorities have determined upon exterminating foreigners within a very short time. Curiously enough, the discomfiture of Tseng Kuofan has assumed the character of a victory during the transit of the news from Nanking to Chefoo. According to the report current the Yangchow affair was a Chinese triumph, the ships of war were beaten off with loss, and out of pity Tseng gave his foreign prisoners food and dismissed them. Very many miners have been arrested by marines sent up from the *Insolent*, and will be deported. Up to the commencement of the Chinese holidays trade was brisk, grey shirtings 8¼ lbs. having been freely dealt with at Tls. 2.16. The following is an abstract of Messrs. Holmes, Wadman, and Co.'s Circular of Jan. 22nd. It is interesting as affording a comparative view of the trade for the years 1867 and 1868:—

"The import of grey shirtings during 1868 was 542,018 pieces, as against 165,005 pieces in 1867, and 140,477 pieces in 1866. The excess in T-cloths was even more extraordinary, say 219,804 pieces in 1868, against 58,130 pieces in 1867, and 19,896 pieces in 1866. The quantity of drills imported in 1868 was 25,234 pieces, against 17,254 pieces in 1867, and 8,170 pieces in 1866. As regards exports the statistics are also somewhat curious. Of beancakes 630,206 piculs were exported in 1868, against 390,804 piculs in 1867, and 749,506 piculs in 1866. Peas were shipped in 1868 to the extent of 318,201 piculs, against 418,016 piculs in 1867, and 550,108 piculs in 1866. The export of cotton has fallen from 34,302 piculs in 1866, to 1,018 piculs in 1868; while shipments of straw hats have risen from 16,078 pieces in 1866, to 391,306 pieces in 1868."

The only news from Peking is to the effect that Mr. Ross Brown coincides with the Chinese Government in discouraging mining operations; but this certainly requires confirmation, especially when it is considered that Mr. Brown's reputation has been won, not as a diplomatist, but as a scientific miner.

---

The *North China Herald* says:—"We are glad to hear from Peking that Sir R. Alcock has received a despatch from Lord Stanley, approving Mr. Medhurst's action in the Yangchow affair, up to the time of his first withdrawal. This, of course, comprises approval also of the conditions insisted on. It remains to be seen what view the new Ministry will take of the subsequent measures adopted in pursuance of this policy, and to enforce these conditions."

The following is from the same paper:—"We hear that the Municipal Council have it in serious contemplation to order a steam roller from home, for the benefit of our streets. We pass over the prospect to brokers' traps; but the Council surely forget that they are dealing with Chinese soil, that steam interferes with Fengshuey, that a steam roller would lessen the employment of Chinese hand-labour—in a word, that they must consult Mr. Burlinghame before any such gross outrage on Chinese stereotyped custom can be permitted. Of course, the Chinese Government is most anxious for progress, panting, in fact, to introduce perpetual motion, if it could only be discovered. But it would like to put it off idefinitely; and a steam roller would be a terribly bad example. It might enlighten Chinamen on the subject of steam."

The *Evening Express* says:—"We are glad to learn that a subscription is in circulation to raise a fund sufficient to remove the remains of the late General Burgevine from their present resting place in the Pootung Cemetery to the Shanghai New Cemetery, and to erect a stone over them. One hundred taels has already been promised for this purpose, for which Tls. 170 in all will be required. We doubt not the balance will be speedily forthcoming."

The *Recorder* says:—

"We have to record the departure within the last week of three of the oldest steamer captains trading from this port. Captain Drage, late of the *Yuen-tsze-fei*, left by the last mail, on behalf of the North China Company, to bring out a steamer for the Northern trade. The vessel is now being built under the superintendence of Captain Blow, who, our readers will remember, was a long time in China, and employed latterly by Messrs. Trautman and Co. as their steamer manager. Captain MacQueen, who for the last eight years has been in command of steamers trading on the Yangtsze, left by the *Costa Rica* for England. He lately commanded the S. S. N. Company's steamer *Hirado*, but it appears that the opposition company require another steamer for the Yangtsze trade, and he has been selected to proceed home to get one built. This seems to be very unfair to Captains Howlett and Hutchison, who have both been in the U.S.N. Company since its formation, and, we should think, are as well able to superintend the building of a steamer for this trade as the gentleman who has superseded them. Their new steamer is, we understand, to be built on the same prin-

Digitized by Google

ciple as the *Hirado*, but of iron; the boilers will no doubt, instead of being placed on the guards, be in the hold of the vessel, which the passage from England would, we think, necessitate. By the French mail, Captain Gibbon, formerly in command of the S.S. *Antelope*, and latterly of the *Dragon*, has also, we hear, been deputed by a private firm to superintend the building of a steamer similar to the *Dragon*, for the Tientsin trade, which may be expected to arrive early next year. He will be succeeded in command of the *Dragon* by Mr. Harvey, chief officer of the *Nanzing*.

The same paper is credibly informed that the S. S. N. Company have determined on having a large iron river steamer for the Yangtsze built at Glasgow, and that Captain Dearborn, sometime of the S.S. *Yangtse*, has been entrusted with the supervision. This is most satisfactory after the reiterated assurances we have heard that if the English could build sea going vessels it was reserved for their Transatlantic cousins to rule the internal waters.

## FOOCHOW.

(FROM OUR SPECIAL CORRESPONDENT.)

Great difficulty is still experienced in acquiring land for building foreign houses near the water side. The tendency is now very strong to keep the mercantile houses together near the river, Messrs. Jardine, Matheson, and Co., forming the eastern boundary or lower side. Messrs. John Silverlock and Co., Holliday, Wise, and Co., Siemssen and Co., Gilman and Co., and Mr. Galton are building in this group, and in time no doubt but that the firms now located on the island connected by the bridge and those on the other side of the river will move down. The house and godowns of Messrs. Hedge and Co. form the latest improvement on the water side. It has been a standing and important inconvenience to the community here that a site has not been granted as a concession for Foreign residences—the necessity for each firm acquiring land and building without any plan or connection prevents those sanitary measures for draining, &c., only to be acquired by united action. The houses being now stuck about, the only approach is through the Chinese streets, which are about the most filthy and disgusting in China. Many of the houses either back or front on these streets, and in the summer time it is intolerable. The Foreigners cannot undertake to be scavengers for the Chinese, and any such suggestion to them is simply laughed at, for they seem in no way affected by the filth—use being to them second nature.

The gunboat *Lever* has left for Shanghai, leaving the *Dwarf* for this station. The American gunboat *Unadilla* is also here.

The difficulty in reference to the building of a house near Sharp Peak, at the entrance of the river, has completely subsided, and Mr. Wolfe, the missionary, will now get his house built at the cost of the Chinese, as compensation for the outrage. The Viceroy admitted our right to acquire the land and build there. It was out of this disturbance that the threat grew, by placards to expel all Foreigners, but the interest now felt in the Foreigners' dollars is too general to admit of such a catastrophe, and the residents were not in the least alarmed at the demonstration, although doubtless their friends in England would be anxious.

The clippers *Leander* and *Undine* have cleared for Shanghai with cargoes of wood on Chinese account. These trips are intended to pass the time away until the tea season comes round in May. The *Gabalva* has cleared for Boston with 453,700 lbs. tea, and the *Surprise*, which put back, will sail again shortly for New York with about 1,000,000 lbs. The *Henry Grenfell* sailed for London on the 27th February with 498,533 lbs., and the *Thomas Edwards*, for Sydney, with 184,500 lbs. This, it is expected, will complete the season's export, the figures standing as per export table in another column.

The teamen, it is expected, will use more caution in preparing the next season's congou, in consequence of the protest lately made by the merchants to the authorities. It is also expected that the teas will not be down so early as last season.

## FORMOSA.

Mr. H. F. Holt, who has for some time officiated at Tam-suy, has been transferred to the Ningpo Consulate as Interpreter. It was Mr. Holt who so ably vindicated the rights of British subjects in the recent "difficulty" arising out of the maltreatment of Messrs. Bird and Kerr by the Chinese, and it is gratifying to hear that he has received a handsome testimonial from the gentlemen whose cause he brought to a successful issue. The testimonal, which was accompanied by a suitable address, is a silver vase, modelled on the design of the famous China Challenge Cup that is annually shot for at Wimbledon, but of course on a much smaller scale; it bears the incription:—"To Henry F. W. Holt, from C. D. Kerr and S. E. Bird, in memory of the 12th October, 1868. Tam-suy, Formosa." This is almost the only instance in which a British Consular officer has received such a testimonal of appreciation of his exertions.

With regard to the salutary effect produced by the retaliatory measures so promptly adopted in Formosa, a correspondent of the Hong Kong *Daily Press* writes:—"The fruits of these recent proceedings we are now enjoying. Boeh merchants and missionaries are allowed to proceed with their work in peace. The latter have been allowed to return to Taiwan-foo, a treaty port, whence they were driven by Ting Taoutai four years ago. A foreigner now meets with ordinary respect, instead of the old shouts of obscene ridicule. The authorities are duly respectful to all communications from H.M.'s Consulate, and there is every reason to believe that this state of things may exist for a considerable time. I believe that your readers will be glad to learn what has been accomplished through the determination of our authorities to enforce a proper fulfilment of treaty obligations."

## HONG KONG.

The present mail brings advices from this port to the 9th March. The outward mails of January 15th and 2nd were received on the 26th February and 5th March respectively. The following leading items of colonial news are from the *China Mail*:—

The Postmaster-General's Report for 1868 has been published, and is eminently satisfactory. A most interesting report by the Inspector of Government Schools appears in the same gazette. The charges brought by Bishop Alford against the educational system pursued are very effectively met.

The decision of his Lordship the Chief Justice on the demurrer in the case of Regina *v.* Saint has not yet been given.

A wordy conflict has taken place between the Hong Kong and Whampoa and Union Dock Companies. The latter is thought to have the best of it.

Petitions for bounty for capture of piratical junks by H.M.'s gunboat *Haughty* have been granted. The Attorney-General agreed that future petitions should be made much fuller.

If any reliance is to be placed on statements made in Ceylon papers brought on by the *Achilles* there is shortly to be a change in some of the colonial governorships, in which we of Hong Kong will feel directly interested. Sir Henry Barkly, Governor of Mauritius, is to be transferred to the Cape; Sir Hercules Robinson will succeed him; Sir Richard MacDonnell will be promoted to Ceylon, and Mr. Pope Hennessey will ascend a step or two in the service of the Crown by removal from Labuan to Hong Kong. The programme is a likely one enough. If it should prove to be correct, Sir Richard MacDonnell's successor may congratulate himself on the inheritance that has been provided for him by the—well, we will call it the—energy of his predecessor. There will be a balance to credit in the treasury; there will be a nice substantial residence at the top of the Peak, beautifully sheltered from the violence of typhoons, but open to the genial monsoon that comes breathing its cooling influence on the torrid atmosphere of summer; there will be a commodious and well-built Government steam yacht, in which the delights of a little cruise may often be alternated with the luxuries of a land residence, together with a "launch" for police purposes, and which may upon occasion serve as tender to the yacht. It is only fair to the present incumbent of the office to say that his measures for suppressing piracy have proved effectual, so that the next presentation will be free of what was once a serious incumbrance. And all this has been done by what less than three years ago was a bankrupt colony, the Government of which had to use the money of suitors at law to support itself. If Mr. Pope Hennessey cares to learn the secret of this success, he may easily do so; but Sir Richard MacDonnell will tell him that really it is an incidental and undesigned result of his policy in a certain respect, and that, therefore, he is positively not entitled to the credit thereof. The gambling revenue came in his way, and he found it; but as for looking for it; oh, dear, no. And of course Mr. Pope Hennessey, who has the reputation of being a shrewd man, will accept Sir Richard's explanation.

A draft despatch from the Chamber of Commerce to H.M. Consul at Canton upon the opening of new ports is, fortunately, to be submitted to a public meeting on the 11th instant, before it is adopted as an expression of their collective opinion. From the custom which has hitherto obtained, we were somewhat afraid that nothing more would be heard of the matter until a sheet of foolscap had been irretrievably spoilt, and the reply had been received and recorded. We are, however, glad to have the opportunity of making some remarks upon the subject, fully assured that, if the committee are in earnest they will gladly welcome comment and discussion. Let us briefly examine the contents of the document before us:—

It commences by acknowledging the communication calling for the opinion of the Chamber, and then expresses the satisfaction felt by its members "that a subject of such importance as the *opening up of the country of China* was likely soon to be brought under discussion." There is surely some misapprehension on the part of those who drafted the despatch in this allusion to the question the Chamber has been requested to discuss. Its opinion was asked as to whether any, and if any what, new centres of trade should be thrown open to Foreigners on the Chinese seaboard. According to the popular, and in our opinion correct, view of the matter, the "opening up of the country of China" and the establishment of new "Treaty ports" are propositions diametrically opposed the one to the other. It is, therefore, to be hoped that, in the discussion about to take place, care will be taken to make such corrections in this paragraph as will obviate the misunderstanding which must arise if it remains unaltered; for the Chamber do not, we presume, intend to imply that they regard the opening of a few ports and the opening up of the empire as synonymous phrases.

Upon the question of subsidiary ports the despatch is vague and unsatisfactory. The Chamber considers that their establishment,

Digitized by Google

as recommended by the Amoy memorialists, "would be of considerable benefit to foreign trade;" but it enters into no details and brings forward no arguments in support of its opinions. As regards the Yangtze ports, the Chamber merely "ventures to give a general expression of its opinion as to the desirability of such measures being adopted"—a course sufficiently safe and easy, but scarcely worthy of being recorded as the only written expression of opinion upon so important a subject, emanating from a body which claims, rightly or wrongly, to be the leading commercial association of the Far East. Yet more singular is the alarming contradiction between the paragraphs in which the subsidiary and Yangtsze ports are alluded to, and that which follows them. In the one case, the Chamber (as quoted above) not only acknowledges the desirability of such a measure, but "cannot urge too strongly" the matter upon the attention of the British Minister; in the other, but a few lines further on, it is of opinion that "the inlets now afforded by the ports at present open to trade are quite sufficient." It is possible, though scarcely probable, that those of our readers whose political opinions have been developed in the favourable atmosphere of Hong Kong commercial life will be able to comprehend what the Chamber (or rather the despatch) is, vulgarly speaking, "driving at." For ourselves, we confess to considerable difficulty. We can only parallel the line of argument adopted by the celebrated sentence in an Irish biography—"This remarkable man left no children behind him but his brother, who was killed at the same time." It may be that the opinion of the Chamber has only been asked out of civility, just as close-fisted schoolmasters ask their boarders if they will take any more pudding—the answer being immaterial. The opinion of the Hong Kong General Chamber of Commerce is, quite possibly, "of no consequence, thank you." But self-stultification need not form part of the programme; and we trust that the ensuing discussion will render the application of such a term to the course pursued by the Chamber unnecessary.

In conclusion, we must express our extreme surprise that, whatever the opinion of the Committe as regards the river and coast ports, Hainan is passed over in total silence. No question as regards transit dues, transport, railways, or the navigation of inland waters by steamers, need form an obstacle to its being included in the list of either open or subsidiary ports. It is needless to advert to the interesting details which have lately been made public, but we would remind the Chamber that, while the opening of Hainan may not possess great importance for some of the many leading firms of the colony, there yet remains a large number anxious and able to cultivate the commercial relations with an island so rich in metallurgical productions. The reticence of the Chamber is the more remarkable, as a proposition to survey and report upon the commercial capabilities of the island but very recently emanated from the Chamber itself!

There are some points in the despatch which might call for commendation; but our avowed object is to deal with its apparent defects, as a contribution to the efforts of those with whom will lie the final adoption of the answer to be sent to H.M.'s Consul.

The approaching departure of Mr. Ball for England has naturally given rise to some little speculation as to who will be his successor as Judge of the Summary Jurisdiction Court. There is no lack either of aspirants for the post nor of duly qualified men to take it, though it is possible that the former class exceeds the latter in number. The ordinance under which the Summary Court is constituted empowers the Governor, "in case of the death, temporary illness, or absence of the judge," to appoint "any fit and proper person temporarily to discharge the duties of the said office," and it is a matter of much importance that the qualification here described be strictly insisted on. The judge himself must be "a barrister-at-law in England or Ireland, or an advocate in Scotland of not less than five years' standing," so his *locum tenens* should, if possible, fulfil the same conditions. There is, of course, no definition of what may constitute "fitness" in the eye of the Governor, but we have no reason to suppose that he would select an unqualified person, while at least four qualified men could be found in the colony to whom the offer could be made.

## STRAITS SETTLEMENTS.

—o—

### SINGAPORE.

The present mail brings advices from Singapore to the 16th March. The outward mail of January 29th was received on the 4th March. The following summary of the fortnight's news is abbreviated from the *Straits Times* of March 16th.

A very painful sensation was created early in the fortnight throughout the community by a fatal accident, which caused the almost instantaneous death of a brave soldier and a gallant gentleman—Lieutenant-Colonel John Curtis, of H.M.'s 8th Regiment M.N.I. Colonel Curtis was thrown on his head from his horse on the morning of the 4th instant, while taking his usual ride in company with a brother officer, Major Hailes, and died insensible in half-an-hour where he fell. He was buried next morning with military honours, the corpse being escorted to the grave by his own regiment, and detachments of the Royal Artillery, other troops on the station, and the Volunteers.

The North German war steamer *Medusa*, Capt. Struben, arrived in harbour from Batavia on the 4th instant, and is still here.

H. M.'s war steamer *Rinaldo*, Commander Lord Charles Scott, arrived from Hong Kong yesterday morning.

The right wing of H. M.'s 73rd Regiment left for Ceylon on the morning of the 8th inst., in the chartered steamer *California*. The departure of the wing is much regretted by the community, but perhaps this regret has a good deal of selfishness about it. There is the loss of a good band on every Tuesday in the Botanical Gardens, and there is also the loss of superior amateur theatrical entertainments. *Slamat jalan* say all.

There have been two meetings of Council during the fortnight, viz., on the 6th and 10th inst., and at both the chief interest centres on several attacks by the un-official members on the Governmental phalanx.

At the meeting on the 6th Captain Shaw took the oaths and his seat, and Mr. E. Isemonger, chief clerk, Auditor-General's Department, also took the oaths and his seat, as Acting Colonial Treasurer. Progress was made with the Treasonable Offences Amendment and Merchant Shipping Fees Bills. The honourable W. H. Read moved a resolution, which was agreed to, that a detailed account should be made public of the Travelling Allowance item which officials so coolly, and, we might almost add, shamelessly, appropriated for their own benefit, a short time ago, out of the public treasury.

At the meeting on the 10th instant the Travelling Allowance item was again brought up for discussion, and Mr. Read's resolution, on account of some informality, was re-proposed and agreed to. Progress was also made with the Merchant Shipping Fees and Malacca Land Bills. But the most interesting subject before the Council was one initiated by the unofficials, constituting attack No. 2 on the enemy. It began with a complaint of the extreme meagreness of the Minutes of the Council.

The motion made by Dr. Little was followed by one of Mr. Read's, proposing to place at the disposal of the Executive the sum of one thousand dollars to pay a short-hand reporter, which unique motion, so far as we can make out, was agreed to *nem. con.*

The use of the Commercial Code of Signals instead of Marryat's has been rigidly enforced on our flagstaffs since the 1st inst., much to the bemusement of the residents and the rage of skippers whose signalling *a la* Marryat is persistently ignored.

The news of the fortnight from the neighbouring countries is not of consequence. Sickness prevails still to a lementable extent over Java, although the ravages of the malarious fever have diminished somewhat. We have dates from Labuan to the 25th ult., and the little colony continues to prosper under Mr. Hennessy. Everything is quiet in Sarawak under Mr. Crookshank, who rules the principality during the absence of the Rajah in England.

Two topics have been subjects of discussion during the fortnight—Government house and a railway to New Harbour. The first is being rapidly completed, and looms in imposing dimensions over the whole island, reminding one of the towering castles of fairyland which Doré can so graphically depict. Its cost, however, will do full justice to its size, and the question now is whether the ultimate amount will be 200,000 or 250,000 dollars.

It appears that the project of a railway to New Harbour is likely to be carried into execution without any great delay. We welcome this proof of the rise of a spirit of legitimate local enterprise, and we have no doubt this project will be as financially successful as it is eminently desirable.

The fortnight has been one of great heat and weary drought Hardly a drop of rain has fallen. The drought, if continued much longer, will have a most material effect on many articles of produce—pepper and gambier for instance.

The *Ellora* arrived from China yesterday at ten o'clock and leaves to-day at two P.M. The P. and O. steamers seem now to have got into a groove of praiseworthy regularity.

The launch of the Government steam launch, named the *Mata Mata*, took place at the shipbuilding yard of Messrs. Buyers and Robb, of this port, before H.E. the Governor and suite and a number of Government officials. The ceremony of naming the vessel was performed by Lady Ord. Immediately upon a signal being given, a bottle of champagne was let fall across the bows of the vessel, and the shores having been knocked away, she glided gracefully into the water, amid the applause of the assembled spectators. The vessel then made two or three trips backwards and forwards, which appeared to give general satisfaction.

It is stated in the *China Mail* that his Excellency Sir RICHARD MACDONNELL, at present Governor of Hong Kong, will shortly be transferred to Ceylon, and that Mr. POPE HENNESSEY, now at Labuan, will succeed to the Hong Kong post. It is not, we believe, conclusive, but at any rate Sir RICHARD MACDONNELL has obtained leave of absence, and will probably leave Hong Kong by an early mail.

# Commercial Report.

## STRAITS, CHINA AND JAPAN IMPORTS.

YOKOHAMA.—Owing to the native New Year holidays business during the greater part of the interval had been entirely suspended in all markets. It had hardly been fairly resumed, but something had been done, and at slightly improved rates. Yarn had been most in request, but some inquiry had been made for Grey Shirtings. Woollens remained neglected. Cotton and Rice had slightly improved, in price as well as demand. The current quotations were as follows:—Cotton Yarn: Nos. 16-24, per picul, $45.25 to 46.50; 28–32, $47 to 48.25. Grey Shirtings, 7 lbs., per piece, $2.45 to 2.55.; 8-4 lbs., $2.77 to 2.83; White Shirtings, $2.80 to 3.60. T-Cloths, 6 lbs., $1.70 to 1.80.; 7 lbs., $2 to 2 20; Camlets, per piece, $15 to 16; Blankets, per lb., $0.50 to 0.55; Iron, nail rod, per picul, $3.40 to 3.70; Lead, $7.50 to 8.0; Tin; $17 to 18.

SHANGHAI.—Cottons: Since the receipt of London telegrams reporting the Liverpool and Manchester markets higher, there had been a large speculative business transacted. Foreigners had been the chief operators, natives having previously bought to some extent any parcels offered them at cheap rates. A considerable portion of the stock of Plain Cottons was held by foreigners, who were generally holding for still higher prices. Advices from the North and River Ports were favourable. Grey Shirtings had changed hands at various prices, ranging from Tls. 2.0.6 to 2.2.0 for 8¼ lbs.; Tls. 1.8.2 to 1.9.5 for 7 lbs.; and Tls. 2.7.5 to 3.0.5 for 9 10-12 lbs. Heavy Shirtings had been in good demand. At the close there was less excitement, and quotations may be considered if anything slightly lower. T-Cloths had been very largely dealt in, and quotations show an advance, although they were somewhat irregular. White Shirtings were firmly held, and but few had been sold. Drills, American and English, had been rather easier of sale. Fancy Cottons: There was rather more doing in these goods, but very little improvement was noticeable in prices. Heavy clearances of most descriptions of Cotton Manufactures were being made for the Northern Ports. Woollens and Worsteds: A very limited business had taken place in these goods, and prices showed but little alteration. Metals: For both Bar Iron and Nail Rods there had been a good inquiry at advancing rates. Good assortments of the former had realised Tls. 2.60 and of the latter Tls. 2.45 per picul. Stocks of Nail Rod Iron were heavy, but the market was firm at quotations. Lead marks 1 to 2 mace higher, owing to the better rates ruling in Hong Kong. Sales of L.B. at Tls. 6.20, holders were asking Tls. 6.30. The stock had been increased by about 4,000 piculs. Exports were estimated at about 3,800 piculs. Coals: There having been little demand, the rates given are almost nominal. The principal portion of the following arrivals had been to order:—From Great Britain, 475 tons; Australia, 2,335 tons; Japan, 1,155 tons; Formosa, 1,760 tons; in all, 5,725 tons. The following were the current quotations:—Grey Shirtings, 7lbs., per piece, Tls. 1.9.0 to, 1.9.2; 8.4 to 8.6 lbs., Tls. 2.1.0 to 2.1.8. White Shirtings, Tls. 2 to 3. T-Cloths, 6 lbs., Tls. 1.4.5 to 1.7.5; 7 lbs., Tls. 1.6.5 to 2.0.5; Camlets, English, S.S., Tls. 12 to 12.7.5. Iron, nail rod, small size, per picul Tls. 2.1.0 to 2.2.5; Fair to good Assorted, Tls. 2.3.0 to 2.5.0; Hoop, Tls. 1.8.0; Flat and Round, Tls. 2.5.0 to 2.7.0; Lead, Tls. 5.9.0 to 6.3.0; Tin Plates, per box, Tls. 4.3.0 to 4.8.0; Steel, per tub, Tls. 3.5.0 to 3.6.0.

HANKOW.—Plain Cottons: The market opened, after the native holidays, for Grey Shirtings, 8¼ lbs., at Tls. 2.1.2 to 2.1.5, for good makes, at which considerable sales were made. Business had since been checked by the increased firmness of holders. Closing quotations were Tls. 1.8.5 to 1.8.8 for 7 lbs.; Tls. 2.1.1 to 2.1.8 for 8¼ lbs.; and Tls. 2.9.0 to 2.9.5 for 9 10-12 lbs. White Shirtings had been dealt in to a small extent at previous rates. T-Cloths continued very dull, and stocks remained heavy. Drills met with no inquiry. Fancy Cottons: Small sales had been effected at rather weaker prices. Woollens and Worsteds: Camlets, SS, had been in fair demand at Tls. 12.2.5 to 12.6.0 for assortments. Lastings remained neglected. Long Ells: Scarlet were quoted 5 candareens lower, and few transactions had transpired. Spanish Stripes had been in some request at former rates. Figured Orleans had changed hands at Tls. 3.6.0 to 3.7.0. Lead: There was very little demand; holders were asking Tls. 6.4.0 to 6.5.0, while offers were Tls. 6.2.0 to 6.2.5 per picul.

FOOCHOW.—The following had been the transactions during the interval:—6 piculs White Wax, at $190.0 per picul; 570 piculs Lead, at $9.25 to 9.50 per picul; 1,500 pieces, 8¼ lbs., Grey Shirtings, at $2.92½ to 2.95 per piece; 600 pieces, 7 lbs. T-Cloths, at $2.60 per piece.

HONG KONG.—The following is from Messrs. Olyphant and Co.'s Circular, dated 8th March:—Cotton Yarn.—Sales of Nos. 16 to 24 have been on a somewhat larger scale, and at rather higher values, but other numbers are saleable only on easier terms, stocks being very heavy. Piece Goods.—Importers have been very firm throughout the fortnight, gradually advancing their asking prices for almost all descriptions, and though buyers have been very unwilling to pay the enhanced prices, their actual requirements have obliged them to enter the market and purchase at still higher figures than were demanded during the early part of the interval, holders being strengthened in their views by the home advices since received. Some large holders refuse to quit 7 to 8¼ lb. Grey Shirtings, 6 to 7 lb. T-Cloths, or White Shirtings at present quotations. Turkey Reds are out of favour at the moment, and are nominally 5 cents lower. English Drills, 40 yards, are saleable at higher figures, and Dutch on former terms. A small parcel of Dutch Jeans has been sold, "to arrive," at $5.12½. About 1,200 bales of American Cottons have been received, but have not yet been placed on the market, and quotations are quite nominal. Woollens: Few sales have been made. Scarlet Long Ells, despite their scarcity, are out of favour, and could not be placed, except at a reduction from former rates; but Dark Blue, Gentian, Green, and Purple are wanted, and we quote Assorted 20 cents dearer. There is no inquiry for Spanish Stripes, which are a trifle lower. Blankets are entirely neglected. Lastings easier. Crapes unchanged. S., S.S., and S.S.S. Camlets are 25 cents. lower. Other kinds maintain their former values, and Dutch are very firm. Metals: Sales generally have been on a larger scale, but at lower prices, buyers being unwilling to purchase at former figures, and holders disposed to realise. Malacca Tin has declined very materially, and for Lead there is no inquiry at the moment. Coal: Arrivals have been: 331 tons English (to consumers), 250 tons Anthracite, and 760 tons Sydney, the latter in two cargoes of 460 and 300 tons, which have found buyers at $7.50 and $8 respectively. Further sales have been made of 450 tons English, ex godown, at $10.25, and 250 tons Anthracite at $12, ex ship. There is a better feeling in the market, especially for Sydney, arrivals showing a marked falling off. Ginseng: The arrival of further supplies has induced buyers to hold off in hopes of bringing about some reduction in prices, and the only sale has been 13 casks Crude at $130 per picul, but holders remain very firm. The current quotations at departure of the mail were as follows:—Cotton Yarn, No. 16 to 24, per bale, $120 to 127.50; 28 to 32, $130 to 135; No. 38 to 42, $135 to 140. Grey Shirtings, 7 lbs., per piece, $2.50 to 2.55; 8-4 lbs., $2.75 to 2.85. White Shirtings, $2.30 to 5. Grey T-Cloths, 6 lbs., 32 in., $1.80 to 1.90; 7 lbs., $2.10 to 2.45; 8-4 lbs., 36 in., $2.65 to 2 90. White Spotted Shirtings, $2.77½ to 2.90; Dyed, $3.50 to 3.70. American Drills, 40 yds., 14 lbs., per piece, $5.25 to 5.30. Spanish Stripes, assorted, per yard, $0.78 to 0.94; Scarlet, $0.80 to 0.95. Medium, Ladies', and Habit Cloths, $1.10 to 2. Long Ells, H Scarlet. $8 80 to 8.40; Assorted, $8 to 8.50. Camlets, SS Assorted, $16 to 16.25; SS. Scarlet, $17.50 to 18. Blankets, per lb., $0.45 to 0.60. Metals, Iron Nail Rod, $2.75 to 2.80; Round, Square, and Flat Bar, per picul, $2.75 to 2.80; Hoop, $2.90 to 2.95; Wire, $7 to 7.25. Lead, per picul, $8 to 8.25.

SINGAPORE.—The market generally had been dull during the interval; a fair amount of business had transpired in Shirtings and T-Cloths at the commencement, but latterly the demand had fallen off; prices were mostly unchanged since last report. Grey Shirtings 39 in. 8¼ and 7 lbs. were taken up to some extent, at $2.82½ to $2.85 per piece; 7 lbs. were in small stock, and there was a moderate demand, prices being firmer than last quoted; the market was bare of 6 lbs. Maddapolams in some inquiry, and stocks light. T-Cloths 5 lbs. and 6 lbs. in good demand, and prices firm; a good business had transpired; 7 lbs. in less active inquiry; 4½ lbs. wanted, and market cleared. Dutch Drills firmer, stock very low; sales had been made at full rates. Grey Yarn No. 40's had been in fair inquiry, and a moderate business had transpired; No. 30's in request, at an improvement on last quotations; the low numbers had been in demand, the stock was low, and holders were firm for higher rates; no sales reported. White Shirtings of the lower and medium qualities had been placed to some extent, and previous rates were well maintained; the finer reeds in moderate inquiry. White Cambrics, No. 24s, of low quality, had met with some demand; No. 15 and 16's were moving off at rather weaker rates; there were heavy stocks in first hands. Figured Shirtings had been quiet, and sales were small. Jaconets neglected. There is not much change to report in Dyed goods; there being still an inquiry for Pink Figured Shirtings. The inquiry for T. R. Cloth had fallen off, and little business had transpired. Prints continued saleable at about previous rates. Sarongs of new designs were selling slowly, with a heavy stock in first hands, which was difficult to move. Batticks quiet. T. R. Handkerchiefs in limited inquiry; T. R. Yarn with a more active inquiry. Woollens: Spanish Stripes quiet; Camlets in limited demand, at a slight advance; Bombazettes in limited inquiry. Metals had been without animation. Iron neglected, and no sales had transpired; quotations nominally unchanged. Yellow Metal Sheathing firm, and the stock in few hands. Lead in demand, and market bare. Gunpowder unsaleable. Coals unchanged; the only transaction had been a sale of Cardiff at $10 per ton. Canvas of good quality in moderate demand. Provisions and Oilmans' Stores difficult to place. Beer in bulk wanted; a good demand for Bottled Ale and Porter of favourite brands, at fair prices.

## STRAITS, CHINA AND JAPAN EXPORTS.

### TEA.

YOKOHAMA.—Limited stocks and supplies had considerably curtailed transactions, and settlements for the American and Californian markets were estimated at about 600 piculs, which had been made at fully the prices last quoted; Holders being very firm and stocks low, no reduction was looked for. The John Norman and Brilliant were to be despatched for New York, the J. Godfrey has been laid on for the same port. Quotations:—Common, $19 to 23 per picul; good common, $24 to 25; medium, $26 to 28; good medium, $29 to 32; fine, $34 to 37; finest, $38 to 39; choice, $40 to 42.

SHANGHAI.—Black: There was little to notice under this head, as transactions had been unimportant, and prices continued unaltered. Small supplies had been received from Kiukiang, keeping the stock at nearly 4,000 chests. Settlements for the fortnight, 1,255 chests; Reshipments on owners' account, 325; stock, 12 chops, or 3,980 chests. Quotations (duty paid, exchange for credits, 6 months' sight, at 6s. 0¼d. per tael, and freight at £3 sterling. per ton); Common Oonam 1s. 0⅜d., common Ningchow 1s. 2d. to 1s. 2½d. Green: Quietness was still the prevailing feature in the market, but owing to a concession on the part of holders, a rather larger business had been done than in the fortnight before. Settlements, which were chiefly for America, had been very irregular, but on the whole we can quote prices of all descriptions about 1 tael lower; this, however, was partly counterbalanced by an advance in exchange. Settlements for the fortnight, 11,909 half-chests: re-shipments on owners' account, nil; stock, 95 chops, or 50,244 half-chests. Quotations (exchange, &c., as above) were as follows:—Fychow and Moyune Gunpowder, 1s. 6d. to 3s. 7d.; Imperial, 1s. 2d. to 2s. 10d.; Young Hyson, 11½d. to 3s. 2d.; Hyson, 1s. 1½d. to 3s. 3d.; Twankay 8½d. to 1s. 6d.

HANKOW.—In the absence of business there is nothing to report. Statistics remained unchanged. Quotations were nominal. Export of Tea from January 1 to Feb. 24, 1869, 277,158 lbs.; from January 1 to Feb. 24, 1868, 251,206 lbs.; from June 1 to Feb. 24, 1869, 45,959,821 lbs.; from June 1 to Feb. 24, 1868, 34,884,479 lbs.; stock, nil.

KIUKIANG.—There had been no arrivals or settlements either of Green or Black, and the only shipments to Shanghai had been a few parcels of the former.

FOOCHOW.—Messrs. Silverlock and Co.'s Circular reports:—Nothing whatever of importance has occurred in our market for Tea. Although there is a small quantity still remaining both in foreign merchants' and in Chinamen's hand, it is scarcely probable that another ship will be placed on the berth for London, and in consequence we may consider that the export for the season has ceased. As no business is doing, quotations are

Digitized by Google

quite nominal, but a few recent settlements show no decline in price since the beginning of February.

AMOY.—A quiet but steady business had been done in Ooloongs, some 8,700 packages having found buyers at hardening prices. The stock was reduced to about 12,000 packages, which were firmly held for an advance, and the market closed quiet, buyers showing no disposition to accede to the demands of teamen. The John C. Munro, John Worster, and Ferdinand had sailed for New York, leaving the Auguste Frederich and Albert on the berth. The Gabalva was expected from Foochow to complete her cargo for Boston.

CANTON.—Only one small purchase had been effected during the interval, and the season at this port may be considered closed.

## SILK.

YOKOHAMA.—There had been hardly a transaction on the market during the fortnight; 150 bales, chiefly Oshu, were expected to go forward by the steamer, but they were almost exclusively reshipments from other parts of the country. Arrivals had been about 150 bales; the stock was therefore of the same miserable character as before, and as natives had not returned to business since the holidays, there had been no opportunity of ascertaining how far they would reduce their pretensions. Quotations were quite nominal.

SHANGHAI.—Messrs. C. J. Skeggs and Co.'s report is as follows:—Business has only been resumed within the last few days, the Chinese having fairly given way to a considerable reduction in prices; the settlements are estimated at 500 bales, including actual purchases, transactions in barter, and shipments for native account, the latter amounting to at least one-fourth of the quantity. A few bales of Chooping's "Choey-Wun" have been settled at Tls. 570, so that the decline on chops may be placed at Tls. 20, while for medium and common Tsatlees Tls. 40 to 50 is readily accepted. In Hainings, No. 2 "Fatmows" have been placed at Tls. 462½, and No. 2 Kahing Taysaams at Tls. 430, both showing about the same reduction. A few of the best re-reeled Hainings have been bought at Tls. 590, being a fall of Tls. 20 on the last sale made, but some of the natives prefer to ship these rather than accept the decline. There are no Organzines now on the market, but a few bales of Trams are held for previous rates.

CANTON.—There had been more inquiry than was expected, considering the very unsatisfactory advices received regarding the London and Continental markets. A moderate business had taken place, but the purchases had, with a few exceptions, been on Indian account, and made at a considerable decline from the quotations previously given; one or two offers, we understand, had been made for Re-reeled Cumchook at $20 to 30 under quotations, for fairly good quality Silk, but holders were not disposed to accept such reductions. We give the following as the settlements for the fortnight, with quotations:—Tsatlee, market No. 1, sales 160 bales, at $480 to 500; Loong Kong, best, sales 30 bales, at $553; ditto No. 1, sales 20 bales, at $520; Re-reeled Cumchook, no sales, $580 to 590.

## STRAITS PRODUCE.

SINGAPORE.—Quotations for all the principal staples of export had been very firm, and in some instances an advance had been established. Supplies of most articles had been on a small scale. Gambier had been scarce, and dealers were delivering their contracts very slowly, and refused to make further engagements at the current quotations. A very small business had transpired, the total amount reported being about 150 tons. Black Pepper was difficult to procure; a parcel had been taken up at $6.60 per picul, and there were buyers at that rate. Dealers were not anxious to sell, as they had still heavy engagements to fulfil. It is reported that the crop is under the average; supplies were coming in slowly. White pepper had been bought at $12 to $11.75, and supplies were readily taken up. Tin maintained previous rates, and was in good demand, the market being very firm. Pearl Sago in active inquiry, and transactions to some extent were reported. Sago flour steady at last quotations; several contracts had been made for Singapore flour at $2.30 per picul. Gum Damar wanted; a parcel being taken up after some competition at $17 per picul. Gutta Percha had advanced considerably, and there was an active demand for the best qualities. Hides in fair inquiry at previous rates. Horns wanted, and prices firm. Rattans in good demand, and supplies eagerly bought at full rates. Cloves scarce and wanted. Coffee unchanged; transactions had been trifling. Rice rather weaker, and heavy supplies expected.

Bous, at Yokohama, 338 to 342 per 100 dols.

### SHARES.

Hong Kong and Shanghai Bank, New, 12; Old, 27 per cent. premium.
Hong Kong Gas Company, 41 dols. per share.
Hong Kong and Whampoa Dock, New, 15; Old, 8 per cent. discount.
Union Dock Company, 40 per cent. discount.
China Traders' Insurance, 500 dols. premium.
Hotel shares, 50 per cent. discount.
Hong Kong and Macao Steamboat Company, par.

*Exchange.*—A decline in Sterling Exchange of from one to one and a-half per cent. has taken place since the departure of the last mail. Shipments of treasure (in all about £230,000) have arrived per Guinevere, Black Prince, and Ziba, which fact taken in conjunction with the decrease of exports at the close of the Tea season has at last somewhat affected this market. The demand for remittance has not, however, been large during the past fortnight. The estimated amount of business by the present opportunity is about £230,000, say, £100,000 Bank Bill, and £130,000 private paper, and three lakhs rupees.

*Bullion.*—No Bar Silver has been received since the departure of last mail, and no transactions are reported. The price is entirely nominal, say 10 per cent. premium. No business has been doing in Sycee, and the nominal quotation may be put at 8 per cent. premium, although sales have been effected by natives at considerably lower rates.

*Shares.*—A fair business has been doing in shares during the past fortnight. In old Bank a few transactions have taken place at 26 to 26½ premium, but to-day's rate is 27, at which the market is very firm, about 160 shares have changed hands. New shares have advanced, and are to-day quotable at 12 per cent. premium. A large business has been done, including about 1,200 shares, at rates ranging from 11 to 14 per cent. premium, the latter rate for a parcel deliverable the last of June. The market closes very firm, at quotations given below. Sales of Union Dock have been effected at 40 discount, a decline of 12 per cent. since last advices. In Steamboat a fair business has been in progress, and about 500 shares have changed hands, at from 1 discount to par. There are buyers at close at par, but sellers are demanding a premium. Hotel have been dealt in, to a small extent, at 50 and 60 per cent. discount, and the latter is the closing rate. The rate for Hong Kong Fire has advanced, and there are buyers at quotations given below, with few, if any, sellers. Early in the fortnight a small parcel was placed at 65 dols. premium, subsequently they were done at 70 dols., and latterly about 15 shares changed hands at 80 dols. premium. China Traders are in demand, but no sellers under 560 dols. premium. In other shares there is nothing to report.

## FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, £4; to New York, £2 15s. to £3 per ton.

At SHANGHAI.—A fair demand exists in tonnage for coasting. To London there is no vessel on the berth; for New York the rate is unchanged.

At FOOCHOW.—No vessel on the berth, and no inquiry for tonnage.

At HONG KONG and CANTON.—For the coast there is a better demand. Home rates remain firm. Three charters have been effected, via Bangkok, at £3 10s. to £3 11s. 6d. per ton.

At MANILA tonnage is still scarce, and the demand continues good; vessels that arrive seeking are likely to find profitable employment. The Cissy (Brit.) 649 tons, is fixed for the U. K. with wet sugar at £4 per ton.

At SINGAPORE vessels are wanted to load home direct, and *via* the rice ports; rates vary from £2 15s. to £3 5s. per ton.

PENANG.—For London the Flatworth is on the berth at £3 5s. to £3 10s. for tin, £3 10s. sugar, cutch £4.

### RECEPTION AND BALL AT THE CHINESE EMBASSY.

(FROM OUR OWN CORRESPONDENT.)

Mr. and Mrs. Burlinghame gave their first grand party on Wednesday evening, and achieved one of the successes of the season, which is not saying a little, in respect where successful parties are as common as butterflies in summer. The house occupied by the Embassy is a very fine one, with one side in the avenue of the Champ Elysées, and famous as the residence of the *diva* Patti, who occupied the principal floor. Three floors were thrown open, and during a portion of the evening nearly every room was crowded. There must have been seven or eight hundred persons, if not more, present. Of course the proportion of Americans was large, but France and England were well represented. Amongst the diplomatic corps we noticed Lord Lyons and the Turkish Ambassador. The Imperial Court was represented by the First Chamberlain of the Emperor, and several other gentlemen.
